HELPFUL TIPS

Below are a few helpful tips on how to keep safe on the Internet:

- Keep your operating system updated and patched.
- Use anti-virus and anti-spyware software and keep them updated.
- Do not visit un-trusted websites or follow links provided by unknown or un-trusted sources.
- Keep your applications (programs) updated and patched, particularly if they work with your browser such as multi-media programs used for viewing videos.
- Block pop-up windows, some of which may be malicious and hide attacks. This may block malicious software from being downloaded to your computer.
