

STATE OF HAWAII
Enhanced 911 Board
Communications, Technical and Finance Meeting
(Combined Meeting)
Kalanimoku Bldg., Room 322B
1151 Punchbowl St., Honolulu
Thursday, September 10, 2015 (Combined
meeting)
10am – 12 noon

Agenda

- I. Call to Order, Public Notice, Quorum**
- II. Public testimony on all agenda items**
- III. Introductions**
- IV. Review and Approval of Last Month's Meeting Minutes**
- V. Committee Updates by Committee Chairs**
 - a. Communications Committee – Steven Schutte
 - i. Legislative Investigative Committee update- Paul Ferreira
 - b. Technical Committee – Thalia Burns
 - i. Investigative Regulatory Committee update – Marshall Kanehailua
 - ii. FCC
 - 1. Review of FCC Chairman Tom Wheeler's Presentation at APCO.
 - 2. Presentation on the results of findings on the Mall in Maui; changing the ALI records to display "Dispatchable Locations" at the PSAP and to obtain feedback from the dispatchers regarding FCC 15-9 – T. Ramirez
 - iii. Request approval for board member to attend the APCO Emerging Technology Forum; Nov. 17-18, 2015; Atlanta, GA - \$2,500.
 - iv. Text-2-911 update
 - v. Others
 - c. Finance Committee – Kiman Wong
 - i. Review of Monthly Cash Flow & Budget Financial Reports:
 - ii. Request for Funding Approval:
 - 1. Board member to attend the APCO Emerging Technology Forum; Nov. 17-18, 2015; Atlanta, GA - \$2,500.
 - iii. Others

VI. PSAP Status Updates

- a. Kauai – Mark Begley
- b. Oahu – Allan Nagata
- c. Molokai – Dean Rickard
- d. Maui – John Jakubczak
- e. Hawaii – Paul Ferreira

VII. Items for Discussion, Consideration and Action

- a. 911 Timeline update.
- b. Others

VIII. Announcements

- a. Meeting dates (10:00am – 12 noon):
 - i. Thursday, October 8, 2015 (Combined meeting)
 - ii. Thursday, November 12, 2015 (Combined meeting)
 - iii. Thursday, December 10, 2015 (Combined meeting)
- b. Others

IX. Open Forum: Public comment on issues not on the agenda for consideration for Committee meeting agenda at the next meeting.

X. Adjournment

STATE OF HAWAII

**Communications, Technical and Finance Meeting
(Combined Meeting)
Kalanimoku Bldg., Room 322B
1151 Punchbowl St., Honolulu
Thursday, September 10, 2015
10am – 12 noon**

Communications Committee members present: Steven Schutte (Chair), Thalia Burns, Davlynn Racadio, Lavina Taovao and Paul Ferreira.
Communications Committee members absent: none

Technical Committee members present: Thalia Burns (Chair), Clement Chan, Rob Gausepohl, John Jakubczak, Marshall Kanehailua, Ahlan Leong, Gary Lum, David Miyasaki, Eleni Papakiris, Antonio Ramirez, Steven Schutte, Kiman Wong and Kenison Tejada.

Technical Committee members absent: Jeff Riewer.

Finance Committee members present: Kiman Wong (Chair), Mark Begley, Paul Ferreira, Lisa Hiraoka, Roy Irei and Randy Macadangdang.

Finance Committee members absent: None.

Staff members present: Courtney Tagupa and Stella Kam.

Guests: Victoria Garcia (DoD), Bonnie Young (MPD), Travis Ing (HiPD), Diana Chun (EMS), Eric Butler (Pictometry), Annette Rausch (Intrado), Jeff Andrus (Spillman Tech), Cody Christensen (Spillman Tech), Anthony Dorsey (Spillman Tech), Allan Nagata (HPD), Wayne Hiras (SIC) and Melodey Lewellen (HPD).

Meeting Minutes

I. Call to Order, Public Notice, Quorum

- a. The Board Chair called the meeting order at 10:05 am.
- b. Quorum was present for all committees.

II. Public testimony on all agenda items

- a. The Board Chair requested of those present who wish to provide testimony on any of the agenda items to please come forward at this time. No one came forward.

III. Introductions

- a. The Board Chair requested that each individual present to please introduce themselves.

IV. Review and Approval of Last Month's Meeting Minutes

- a. The Board Chair requested the members of the committees to review the minutes of the August 13, 2015 Joint Committee meeting for approval. Ms. Thalia Burns noted that the minutes should include the names of the members of the Executive Director Evaluation committee and a further correction was noted in the spelling of Ms. Burns' last name.
- b. Tony Ramirez motioned to approve the minutes with the noted amendments to the August 13, 2015 meeting. The minutes were approved by voice vote by all committee members present without discussion.

V. Committee Updates by Committee Chairs

- a. Communications Committee – Steven Schutte
 - i. Committee Chair Schutte requested feedback from those who attended the APCO conference. The responses from the attendees were all positive in terms of exposure to new technologies, networking opportunities with colleagues and vendors, and a well-planned event. Ms. Davlynn Racadio concurred with the positive feedback but did comment on the closure of Reagan Airport that delayed her arrival.
 - ii. Legislative Investigative Committee update- Paul Ferreira
 1. Committee Chair Paul Ferreira stated that the committee met to amend the bill related to the E911 surcharge and review the justification sheet in order to move it forward to DAGS administration for their review and to be made part of the Governor's legislative budget for the upcoming legislative sessions. The LIC chair is also requesting the following:
 - a. Authority from the board to accept the inclusion of the proposed prepaid wireless legislation with the administration budget.
 - b. Authority to draft and present testimony during the legislative session, without first coming through the Board due to the short notices of hearings.
 - c. Any comments on the proposed bill, justification sheet or if anyone wishes to submit testimony please feel free to do so.
 - d. That the PSAPs provide justification for future expenditures related to NG911. It is anticipated that the additional revenue from prepaid wireless phones will elicit questions from the legislators as to how the projected prepaid revenues will be spent. It was also recommended that the wireless service providers submit estimated recoverable costs in anticipation of NG911.
- b. Technical Committee – Thalia Burns
 - i. Investigative Regulatory Committee update – Marshall Kanehailua
 1. There were no updates at this time.

- ii. FCC Updates:
 - 1. Review of FCC Chairman Tom Wheeler's Presentation at APCO.
 - a. The executive director provided a review of FCC Chairman Tom Wheeler's speech entitled 'Embracing Change for Public Safety Communications' that was presented at the APCO conference. Chairman Wheeler divided his speech into two areas: recent accomplishments and future actions under consideration by the FCC.
 - i. Recent FCC rulings which included:
 - 1. Providing users of fiber-based home voice services the option to buy backup power from service providers in the event of power outages.
 - 2. Ensuring that wireless mobile phone providers complete the deployment of text-to-911 within the prescribed time frame.
 - 3. Strengthening wireless 911 location accuracy requirements to include high rise buildings.
 - 4. Updates to the Network Outage Reporting System (NORS) to reflect changes in technology and consumer usage.
 - ii. Future FCC actions under consideration:
 - 1. Encourage utilization of Spectrum – sharing technology that is currently being used by commercial industry.
 - 2. NG911 – assist PSAPs to accelerate the pace of their migration to NG911.
 - 3. Cybersecurity improvements – through the creation of shared security operation centers supporting multiple PSAPs.
 - 4. Public Safety Workforce development – through continuing education and partnership with local colleges and universities.
 - 2. Presentation on the results of findings on the Mall in Maui; changing the ALI records to display "Dispatchable Locations" at the PSAP and to obtain feedback from the dispatchers regarding FCC 15-9 – Tony Ramirez.
 - a. Mr. Tony Ramirez provided a follow-on power point presentation on FCC 15-9 reporting requirements on Dispatchable Locations and the proof of concept demonstration that was conducted at the Queen Kaahumanu Shopping Center in Maui. Mr. Ramirez went on to mention that placing the "Dispatchable Location" information in the Supplemental Location Information of the delivered ALI stream proved to be a success as the additional information was successfully delivered to the Maui PSAP. It was also discovered there was an added benefit in that it was found that the Dispatchable Location information could also be passed on to the Mobile Data Terminal to the Public Safety responders in the field.

Mr. Ramirez also mentioned that the PSAP Dispatchers that were interviewed during this proof of concept provided positive feedback regarding Dispatchable Location information being supplied to the PSAPs, and the Public Safety responders in the field. The PSAPs all verbalized their approval to move forward with the Dispatchable Location information to the ALI records.

- b. Mr. Ramirez presentation also discussed how to apply the same concept of Dispatchable Location information for Wireless 9-1-1 calls. Mr. Ramirez mentioned that the Dispatchable Location could not be delivered in the current delivered ALI stream as it is currently configured; however, there was a way to add the supplemental information to the Wireless Cell Sector layers within the GIS to make that information available to the PSAP Dispatchers. Mr. Ramirez also made a recommendation to modify one of the fields in the CRS process in order to identify if the wireless 9-1-1 call was registering on an indoor or outdoor antennal location, and that recommendation was also approved by the PSAPs.

iii. Request approval for a board member to attend the APCO Emerging Technology Forum; Nov. 17-18, 2015; Atlanta, GA - \$2,500.

1. John Jakubczak motioned to approve the attendance by a board member at the APCO Emerging Technology Forum from Nov. 17-18, 2015 subject to funding by the Finance committee and final approval by the board. The motion was seconded and approved by voice vote without discussion by all technical committee members present.

iv. Text-to-911 update

1. Ms. Thalia Burns provided an update of the Text-to-911 committee meeting which included the decision to go with one statewide theme which is "call if you can, text if you can't."
2. The committee also agreed to create one flyer that all the counties and PSAPs would use. The flyer would contain:
 - a. The state and county seals.
 - b. Generic first responder vehicles representing police, fire and EMS.
 - c. The statewide theme.
 - d. The Hawaiian Islands.
3. The committee is working with the executive director to have a dedicated page on the E911 Board website in which the counties and PSAPs can link to for more information.
4. Lastly, the committee will be seeking partnerships with the service providers who will be able to provide:
 - a. Air time (received commitment by TWC Oceanic Cable).
 - b. Inserts of the text-to-911 flyers to be included with customer billings.
 - c. Posting flyers at service provider retail stores.
5. More recommendations will be forthcoming next month.

- v. Others-none
- c. Finance Committee – Kiman Wong
 - i. Review of Monthly Cash Flow & Budget Financial Reports:
 - 1. Finance chair Kiman Wong reviewed the results of the monthly budget and cash flow report with the committee. The following statistics were provided:
 - a. Receipts (month) \$789.2k
 - b. Receipts (YTD) \$1.6M
 - c. Disbursements (month) \$90.3k
 - d. Disbursements (YTD) \$158.9k
 - e. Bank balance \$16.8M
 - f. Unencumbered bank balance \$11.0M
 - ii. Request for Funding Approval:
 - 1. Board member to attend the APCO Emerging Technology Forum; Nov. 17-18, 2015; Atlanta, GA - \$2,500.
 - a. Paul Ferreira motioned to approve attendance by a board member at the APCO Emerging Technology Forum on Nov 17-18, 2015, in Atlanta, GA at an estimated cost of \$2,500 subject to final approval by the full board. The motion was seconded and approved by voice vote by all the finance committee members present without discussion.
 - iii. Others – None

VI. PSAP Status Updates

- a. Kauai – Mark Begley
 - i. Congratulations were extended to the Kauai PSAP for their ADC 911 system which recently went operational.
- b. Oahu – Allan Nagata
 - i. Acting Major Allan Nagata thanked the board for their support in HPD’s Smart 911 project. The most recent tally of signups for Smart911 amounted to approximately 700+ accounts.
- c. Molokai – Dean Rickard – nothing to report.
- d. Maui – John Jakubczak – nothing to report.
- e. Hawaii – Paul Ferreira
 - i. Sgt. Travis Ing introduced the Spillman Technology team who will be participating in the kick-off meeting for the upgrade of the Hawaii Island CAD system.

VII. Items for Discussion, Consideration and Action

- a. 911 Timeline update- no timelines to report.
- b. Others - None

VIII. Announcements

- a. Meeting dates (10:00am – 12 noon):
 - i. Thursday, October 8, 2015 (Combined meeting)
 - ii. Thursday, November 12, 2015 (Combined meeting)
 - iii. Thursday, December 10, 2015 (Combined meeting)
- b. Others

IX. Open Forum: Public comment on issues not on the agenda for consideration for Committee meeting agenda at the next meeting.

- a. The board chair asked if anyone in attendance who wishes to provide comment on issues not on the agenda for consideration for the committee meeting agenda at the next meeting to please come forward. No one came forward.

X. Adjournment

- a. The meeting was adjourned at 10:50 am by voice vote of the all the committee members present.

HAWAII ENHANCED 911 BOARD STATEMENT OF CASH FLOWS

For month ending September 30, 2015

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

PSAP OPERATION NOTES:

- Total call volumes does not include Administrative Calls. Administrative calls = Calls originating on Administrative lines that required 911 service.
- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the Wireline and Wireless total counts respectively.
- All VoIP (Voice over Internet Protocol) types of 911 calls are combined in the Call Volume statistic.

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

TEXT TO 911 – CURRENT MONTH – SEPTEMBER 2015

NOTE:

- State of Hawaii PSAPs are currently in the testing phase with the WSPs (Wireless Service Providers) for Text to 911.
- In the coming months, a chart will be provided for the amount of Text to 911 messages that are received at the PSAP.

FYI.....FOR YOUR INFORMATION

FYI For Your Information						
TEXT TO 911						
States and the number of PSAPs that are <u>currently</u> accepting Text to 911 at their 911 Centers						
Text Method used at each PSAP varies, they are: Text to TTY, Web Browser, or a Direct IP method						
STATE	# of PSAPs	Date of Compliance	# of PSAPs	Date of Compliance	Total State PSAPs accepting 911 Text	Total number of PSAPs in the State

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

ALI TRANSACTIONS CURRENT MONTH – SEPTEMBER 2015

OAHU CIVILIAN		9-1-1 NET REQUESTS					
		ALI TRANSACTIONS SUBMITTED			Open Discrepancy Records as of Report Month End		
2015	TOTAL	TN CR (A)	ALI-DR (B)	VoIP DR (C)	TN CR	ALI-DR	VoIP DR
SEPT	49	49	0	0	304	0	0

Definitions	
(A) Telephone Number Change Request - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 199 attached to them which indicates the need for validation.	
(B) Automatic Location Information Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.	
(C) Voice over Internet Protocol Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.	

ALI TRANSACTIONS CURRENT MONTH NOTES:

49 Telephone Number Change Requests (TN CR) were processed in 9-1-1Net for updates and corrections to the ALI database. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

OPEN DISCREPANCY RECORDS STATUS:

- There are 304 Open Telephone Number Change Requests as of September 30, 2015.
- Refer to chart in the next section "TNCR Current Status"

The TNCRs are a direct result of the ESN 199 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

There are zero (0) Open ALI-DRs as of September 30, 2015.

There are zero (0) Open VoIP DRs as of September 30, 2015.

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – SEPTEMBER, 2015

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
OAHU CIVILIAN	304	11	191	102

STATUS
<u>TOTAL TNCRs SUBMITTED</u> - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
<u>PENDING STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
<u>REFERRED STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
<u>TOTAL UNOPENED TNCR RECORDS STATUS</u> - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

MSAG COMMUNITIES PROJECT

MSAG COMMUNITY AND STREET SEGMENT SWEEP – PHASE VII

MSAG Community and Street Segment Sweep – Phase VII

Subsequent to the completion of the MSAG Community and Street Segment Sweep - Phase V work on **June 27, 2014**, and the Database Synchronization Phase VI in **July 2014**, a project plan for Phase VII, with regards to the spatial accuracy of Street Centerlines, was approved by the Honolulu Police Department on **July 31, 2014**. The MSAG Community and Street Segment Sweep – Phase VII project is aimed to identify and correct the spatial accuracy of Street Centerlines throughout the island of Oahu, through a methodical counter-clockwise approach, following the same community correction path in the previous phases, to ultimately increase the accuracy of the data and to be in compliance with NENA standards. Street Centerlines that are corrected through this process will then achieve the NENA recommended standard of being accurate to within 10 feet or less.

Below is the latest Phase VII work effort as of **September 30, 2015**:

UPCOMING GIS DELIVERABLES SCHEDULE

As it is nearing the end of the year with many holidays ahead in the coming months, an approved schedule for the GIS deliverables has been provided below. Some days may have originally fallen on a holiday so an alternative GIS deliverable schedule around those dates were created.

GIS Deliverable schedule for 2015		
OCT	16	30
NOV	13	27
DEC	11	23

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

INTRADO POWERMAP UPLOAD

Since the establishment of the GIS Data deliverable process between Akimeka and Intrado in January 2014, the data uploads have been successfully carried out.

During the September 4, 2015 GIS deliverable, Akimeka received a notification that the Honolulu PowerMap was no longer being used by the customer. Intrado also indicated that Hawaiian Tel was no longer going to be updating the PowerMap server.

POLICE BEATS CORRECTIONS

Background

The Police Beats layer was previously identified as a layer requiring corrective action in preparation for the ESZ/ESN project and ensuring spatial accuracy.

Subsequent to the Police Beat corrections that took place during the month of August 2013, upon loading the GIS data for Street Centerlines in the current Motorola Premier CAD, HPD PMT confirmed that there were no issues with regards to the CAD system recommendations. HPD PMT also reviewed the Police Beats corrections worksheet and confirmed that there were no issues with the document. As such, Akimeka proceeded to make corrections to the Police Beats layer utilizing HPD's written Policies and Procedures document for boundary descriptions.

Status to Date

Based on HPD PMT's confirmation, Akimeka continued to make corrections to the Police Beats during the month of September 2015. Akimeka corrected boundaries for three (3) Police Beats (556, 557, and 558) and performed routine maintenance on several other Police Beat boundaries.

Upload Process

It was agreed that the Police Beats layer will be uploaded to the current Motorola CAD system given some delays with the new Motorola PremierOne CAD system. During the month of April 2015, Akimeka had worked with HPD PMT to design a new upload procedure that would provide the updated Police Beats into the system, along with other corrected layers now previously loaded to the Motorola CAD system. For more information regarding the latest CAD upload procedure, refer to the May 2015 Monthly Status Report, section on Motorola CAD Upload. Updated Police Beats are continuously delivered with this new process on a bi-monthly update with the other GIS deliverables.

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

ESN PROJECT

Since Akimeka had completed the preliminary ESN layer, during a meeting with HPD in December 2014 agreement was made to proceed with beginning the work efforts with Hawaiian Telcom.

1. The new ESN layer was created based on all of the operational response areas for each agency
2. Review and discussion was held during the meeting and Akimeka was given approval to proceed with preparing documentation to provide HPD with in order for Hawaiian Telcom to program the new ESN numbers and ELTs.
3. Akimeka prepared the final documentation during the month of January 2015 and provided the ELTs, Letter, and supporting attachments to HPD.
4. On February 13, 2014, the letter requesting change to Honolulu ESN numbers and corresponding ELTs were submitted to Hawaiian Telecom.
5. On March 12, 2015, confirmation was received that Honolulu can move forward with new ESNs and under the special project, cannot exceed 50 MSAG transactions per day.
6. On March 16, 2015, Akimeka began processing the MSAG transactions beginning with the approved ESN 184 in Waimanalo
 - a. In order to validate the correct information was being displayed at HPD, a group of test phone numbers was gathered to be used to verify the information.
 - b. Also on March 16, 2015, processing in MSAG was halted because Akimeka's access to new ESNs was restricted by Intrado. Akimeka followed up and the restriction was removed by end of the day.
7. On March 17, 2015, HPD tested the telephone numbers in ESN 184 and had experienced some issues with the call routing past the call screeners, directly to the dispatcher.
 - a. HPD opened a trouble ticket with Intrado and Hawaiian Telcom on the issue
 - b. Intrado/Hawaiian Telcom corrected the issue shortly after and notified HPD
8. On March 19, 2015, Akimeka received confirmation that the test phone numbers in ESN 184 were successful at HPD and routed to the call screener
 - a. Following the successful, Akimeka was given the ability to backfill the 250 transactions that were lost in order to get caught up with the timeline.
9. Throughout the remainder of March there were no reported issues and the ESN schedule has remained on track.
10. Throughout April, 2015, Akimeka continued processing ESN transactions in the MSAG database and GIS database, coordinating changes between both in an effort to keep synchronized.
11. As of May 21, 2015, Akimeka was given an increase of seventy five (75) daily transactions for the Oahu ESN project by Intrado/Hawaiian Telcom. All other transaction limitations remain the same.
12. Target Start Dates were adjusted in July to reflect the daily transaction increase effective on June 3, 2015. Target completion date is now estimated to be by the end of October, 2015. See the below chart for an up-to-date listing.

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPFLEX DEPLOYMENT

During the month of August 2015, Intrado moved forward with set schedule for MapFlex implementation for the Oahu PSAPs. The implementation primarily consisted of installations, server configuration etc. and did not include any requests for GIS data or upload procedures.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, is being implemented across the State of Hawaii, in the below narrative there is some information that was identified through the processes which the Neighbor Islands had been through and pertains to the processes which will be associated for the Oahu PSAPs. The historical information will provide detail as to how and when the establishment of the implementation processes took place and remaining unanswered questions yet to be discussed.

During the month of September 2015, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, and Kauai County. For a chronology prior to September, please see the April thru September 2015 Monthly Status Report. The MapFlex deployment has been primarily concluded, and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in September 2015
 - a. **Hawaii County** – September 8th and September 22nd
 - b. **Maui County** – September 9th and September 23rd
 - c. **Kauai County** – September 10th and September 24th

On August 13, 2015, Akimeka followed up with Intrado to gather an update on the progress of the Honolulu MapFlex deployment and to receive an update on the timeline for when the system will be ready for data updates. There have been no responses as of September 30, 2015.

POWER911 (VIPER) UPDATE

It was brought to Akimeka's attention that on certain Landline 911 calls, the Comments (Location) field on the Power911 ALI/ANI screen was displaying unusual and confusing information pertaining to the address of the caller. For example, **ALI DR** appeared on the ALI screen in the Comment field which was interpreted by the 911 Call Takers as Ali Drive. ALI DR is a 911 NET term for ALI (automatic location information) Discrepancy Report. Akimeka researched the 911 NET database, the ALI ANI data stream, and after several 911 tests with the PSAP, concluded that the Location Field and the TELCO Comment field from the ALI ANI Data Stream were merged together in the Power911 "ini" file which cause the TELCO information to appear on the Power911 ALI ANI Screen in the Comment Field.

On July 23rd, Akimeka and Intrado resolved this issue by reconfiguring the Power911 "ini" file as to prevent the TELCO Comments from appearing on the Power911 ALI ANI Screen. Future use of the TELCO Comment field appearing on the ALI ANI screen should contain useful information for dispatching purposes.

There were no further discrepancies in the "Location" field on the ALI Screen in the month of September, 2015.

SPAWAR MEETING ON ADDRESSING FOR MCBH

There has been no further information or correspondence with regards to this project.

Oahu Civilian E9-1-1 Status Report

September 1, 2015 - September 30, 2015

STREET UTILITY CHECK

This is an ongoing project to correct the errors identified. A comparison of the raw CAD generated report from the Street Check Utility was performed between the Street Centerline GIS data on July 7, 2015 and August 7, 2015. The September 18th, 2015 GIS deliverable is currently in progress and is scheduled to be updated to production at the beginning of October.

Street Utility Check				
	First Report 06/01/13	7/7/2015	8/7/2015	Improvements/Corrections
Total Number of GIS Records	26,602	28,201	28,583	Increased by 382 records
Errors Identified				
Zero Errors	5,112	458	440	Decreased by 18 errors
Low > High Errors	3	0	3	Increased by 3 errors
Mixed Parity Errors	1	0		No Change
Changed Parity Errors	105	0		No Change
Address Gap Errors	2,629	0	4	Increased by 4 errors
Address Overlap Errors	423	0	1	Increased by 1 error
Flipped Link Errors	1,030	527	581	Increased by 54 errors
Total Errors	9,303	985	1,029	Increased by 4.5% (44 errors)

In addition to Akimeka's internal validation tools, Akimeka will continue to utilize the various CAD reports to further identify and correct the multitude of discrepancies in the GIS data. This is an ongoing and routine process which Akimeka has been using to improve the accuracy of the GIS data for Public Safety.

Akimeka plans to continue its work effort to complete corrections of the discrepancies identified and/or identify any valid exceptions which Akimeka will tag with the proper information so the CAD system will accept the record(s) and not jeopardize the full functionality of the CAD system from the upload to RMS. Akimeka plans to complete all Street Utility Check errors prior to the implementation of the Motorola PremierOne CAD "go live" date.

Due to the MSAG Community and Street Sweep – Phase VII project, Akimeka expects there to be fluctuation in the results of the Street Check Utility moving forward, especially with regards to Zero Errors, Flipped Link Errors, Address Gap Errors, and Address Overlap Errors. These errors are as a direct result of the spatial corrections made on the Street Centerline network, where many new ingress segments are added. The preference is that the system can generate these non-impacting and non-critical errors instead of overriding them beforehand. The errors that are identified through this process are subsequently corrected based on the results of the Street Check.

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the total of Wireline and Wireless counts respectively.
- All VOIP (Voice over internet protocol) types of 911 calls are combined in the Call Volume statistic.

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

TEXT TO 911 – CURRENT MONTH – SEPTEMBER 2015

NOTE:

- State of Hawaii PSAPs are currently in the testing phase with the WSPs (Wireless Service Providers) for Text to 911.
- In the coming months, a chart will be provided for the amount of Text to 911 messages that are received at the PSAP.

FYI.....FOR YOUR INFORMATION

FYI For Your Information

ALI TRANSACTIONS CURRENT MONTH – SEPTEMBER 2015

HAWAII COUNTY		9-1-1 NET REQUESTS					
		ALI TRANSACTIONS SUBMITTED			Open Discrepancy Records as of Report Month End		
2015	TOTAL	TN CR (A)	ALI-DR (B)	VoIP DR (C)	TN CR	ALI-DR	VoIP DR
SEPT	263	260	3	0	1,027	1	0

Definitions	
<p>(A) Telephone Number Change Request - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.</p> <p>(B) Automatic Location Information Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.</p> <p>(C) Voice over Internet Protocol Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.</p>	

ALI TRANSACTIONS CURRENT MONTH NOTES:

185 Telephone Number Change Requests (TN CR) transactions were processed with MSAG valid addresses, as a result of the ESN 299 clean-up effort. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Three (3) ALI DRs were submitted as the result of 9-1-1 calls from residences in Hawi, Honokaa and Laupahoehoe. Hawaii County Fire submitted a request to Akimeka to update the customer information. Akimeka submitted the ALI DR to Intrado and the addresses have been updated in 9-1-1 Net. In addition, **75** Dispatchable Location transactions were submitted in September for a total of **263** transactions.

OPEN DISCREPANCY RECORDS STATUS:

- There were no VoIP Discrepancy Requests submitted to Time Warner Cable in September 2015.
- Refer to chart in the next section "TNCR Current Status"

952 Open TN CR transactions are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **75** Open TN CR transactions are a result of the Dispatchable Location project. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

There is one (1) Open ALI-DR as of September 30, 2015

The ALI DR was the result of 9-1-1 call from a business in Hilo. Hawaii County Fire submitted a request to Akimeka to update the customer information and provided an MSAG valid address. Akimeka submitted the ALI DR to Intrado and the transaction is awaiting approval from the telco.

Intrado will notify Akimeka when the TN has been updated in 9-1-1Net.

There are no Open VoIP DRs as of September 30, 2015

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

DISPATCHABLE LOCATION – STATUS AS OF – SEPTEMBER 2015

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Seventy-five (75) Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted.

Dispatchable Location				
Common Name Place	MSAG Address	2015	Number of TNCR* Transactions Submitted	Number of Transactions Processed**
KINGS SHOPS	690250 WAIKOLOA BEACH DR, WAIKOLOA	Aug		
		Sept	75	0
		Oct		
		Nov		
		Dec		
		Total	75	

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – SEPTEMBER 2015

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
HAWAII	1,027	161	57	809

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
9/22/2015	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places, Street Centerlines, MSAG Communities, ESN, Medic Response Areas, Police Response Areas and Fire Response Areas.
9/8/2015	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places, Street Centerlines, MSAG Communities, ESN, Medic Response Areas, Police Response Areas and Fire Response Areas.

UPCOMING GIS DELIVERABLES SCHEDULE

As it is nearing the end of the year with many holidays ahead in the coming months, an approved schedule for the GIS deliverables has been provided below. Some days may have originally fallen on a holiday so an alternative GIS deliverable schedule around those dates were created.

GIS Deliverable schedule for 2015		
OCT	13	27
NOV	10	24
DEC	8	22

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawai'i County Planning Department on **September 15, 2015**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	87	
Addresses Removed	0	
Address Street Name Changes	0	
Address Street Number Changes	0	
New Street Segments Added		2
Street Segments Removed		0
Street Segment Range Changes		0
Street Segment Name Changes		0

NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

NEXT GENERATION 911 (NG9-1-1) GIS REQUIREMENTS

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of September 2015, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1:

NG9-1-1 GIS Data Corrections			
GIS Layer Name	Type of Correction	Number of Records Corrected/Modified/Added/Removed	Comments/Details
<i>Address Points</i>	New Address Points	178 Added	Throughout County in 18 communities
	Spatial Correction	340 Corrected	Corrected location of Address Point, recalculated x/y; majority were located in Keaau and Ocean View
	Address	15 Corrected	Throughout County in 8 communities
	Location Name	226 Corrected	Throughout County in 23 communities
<i>Response Boundaries</i>	ESN	28 Corrected	Throughout County
	Fire Districts	15 Corrected	Throughout County
	Medic Response Areas	11 Corrected	Throughout County
	Police Districts	9 Corrected	Throughout County
<i>Street Centerlines</i>	New Streets	6 Added	Streets were in 5 different communities
	Spatial Correction	95 Corrected	Majority of streets were in Keaau
	Range/Parity	7 Corrected	Majority of streets were in HVNP and Kailua Kona
	Split	5 Corrected	Streets were in 4 different communities
	Deleted	2 Removed	Streets were in Mountain View and Volcano
	Name	94 Corrected	Majority were in Hilo and Kailua Kona
	Merged	4 Corrected	Streets were in Kailua Kona and Kurtistown

NOTE:

Response Boundaries include any updates to ESNs, Police Beats, Fire Beats, etc. that pertain to dispatch and response.

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

LAVA FLOW AND ALTERNATE ROUTES

During the month of September 2014, Akimeka created two (2) new layers detailing the lava flow nearing Pahoa, in an effort to provide the 911 centers on Hawaii a valuable resource in identifying current and proposed lava flows.

1. In light of the potential consequences to public safety from the current lava flow heading toward Pahoa, Akimeka created two new layers to support the PSAP, “Puna Lava Flow 2014” and “Alternate Routes Lower Puna” to be utilized by the PSAPs.
 - a. Akimeka created the layer “Lava Flows”, which details the current progress of the lava flow as well as the flow forecast.
 - b. Akimeka also created the layer “Alternate Routes Lower Puna”, which displays the alternate routes in Lower Puna in the event Hwy 130 becomes obstructed by the lava flow.
 - c. The two new layers were first uploaded into PowerMap on September 23rd 2014 and have been available to the dispatchers since and continue to be updated and subsequently uploaded.
 - d. During April 2015, Akimeka continued to monitor the activity of the lava flow and updated and uploaded the Lava Flows layer into PowerMap on April 7th 2015.
 - e. Akimeka will continue to monitor the activity of the lava flow and will update the Lava Flows layer as necessary. Akimeka will also monitor the status of the Chain of Craters Road and will add it to the Alternate Routes Lower Puna layer if and when it is rebuilt and available as an alternate route.
 - f. Due to the vital importance involved in staying apprised of the lava flow progress heading toward Pahoa and the Pacific Ocean, Akimeka will upload the Lava Flows and Alternate Routes Lower Puna layers into PowerMap more frequently than the regularly scheduled PowerMap uploads if necessary.

MAPFLEX DEPLOYMENT

During the month of September 2015, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, and Kauai County. For a chronology prior to September, please see the April thru August 2015 Monthly Status Report. The MapFlex deployment has been primarily concluded, and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in September 2015
 - a. **Hawaii County** – September 8th and September 22nd
 - b. **Maui County** – September 9th and September 23rd
 - c. **Kauai County** – September 10th and September 24th

Hawaii County E9-1-1 Status Report

September 1, 2015 – September 30, 2015

POWER911 (VIPER) UPDATE

It was brought to Akimeka's attention that on certain Landline 911 calls, the Comments (Location) field on the Power911 ALI/ANI screen was displaying unusual and confusing information pertaining to the address of the caller. For example, **ALI DR** appeared on the ALI screen in the Comment field which was interpreted by the 911 Call Takers as Ali Drive. ALI DR is a 911 NET term for ALI (automatic location information) Discrepancy Report. Akimeka researched the 911 NET database, the ALI ANI data stream, and after several 911 tests with the PSAP, concluded that the Location Field and the TELCO Comment field from the ALI ANI Data Stream were merged together in the Power911 "ini" file which cause the TELCO information to appear on the Power911 ALI ANI Screen in the Comment Field.

On July 23rd, Akimeka and Intrado resolved this issue by reconfiguring the Power911 "ini" file as to prevent the TELCO Comments from appearing on the Power911 ALI ANI Screen. Future use of the TELCO Comment field appearing on the ALI ANI screen should contain useful information for dispatching purposes.

There were no further discrepancies in the "Location" field on the ALI Screen in the month of September, 2015.

POWERMAP

During the May 14, 2015, 9-1-1 Communications Technical and Finance Committee it was discussed that with the successful implementation of the MapFlex system, the uploads for the PowerMap system are scheduled to be phased out by the end of May 2015.

1. The phase out plan for uploads to PowerMap included the disconnection of the dedicated circuits from Akimeka's office in Kihei, Maui to Hawaii County, Maui County, and Kauai County on May 31, 2015.
 - a. This meant that Akimeka would no longer have a connection to the PowerMap at each Neighbor Island to perform uploads and that there will be no technical support of PowerMap. The phasing out of PowerMap was due to the system surpassing its expected lifecycle and it had remained in service for more than 8 years.
2. The phase out plan also included Akimeka's assistance in the removal of GIS data which contains proprietary information to the PSAPs that must be cared for and also includes IPR information from Akimeka.
 - a. Akimeka was on site to perform the data removal of PowerMap in **Maui County** on June 12, 2015. Six (6) PowerMap positions were cleaned during this process.
 - b. Akimeka was on site to perform the data removal of PowerMap in **Kauai County** on June 23, 2015. Six (6) PowerMap positions were cleaned during this process.
 - c. **Hawaii County** IT was previously scheduled to remove the PowerMap positions during the month of July 2015, so that Akimeka can assist in cleaning the positions. However the MapFlex is still not displaying the Phase I polygons correctly for wireless 9-1-1 calls, so HPD will be keeping the PowerMap positions until this can be corrected by Intrado.
 - d. There have been no known updates reported during the month of September 2015.

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the Wireline and Wireless total counts respectively.
- All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.
- Outgoing 911 calls are included in the totals. These are ringback or callback 911 calls made from the Viper System.

ALI TRANSACTIONS CURRENT MONTH – SEPTEMBER 2015

MAUI COUNTY		9-1-1 NET REQUESTS					
		ALI TRANSACTIONS SUBMITTED			Open Discrepancy Records as of Report Month End		
2015	TOTAL	TN CR (A)	ALI-DR (B)	VoIP DR (C)	TN CR	ALI-DR	VoIP DR
SEPT	184	180	4	0	1,194	1	0

Definitions	
(A) Telephone Number Change Request - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 359/399 attached to them which indicates the need for validation.	
(B) Automatic Location Information Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.	
(C) Voice over Internet Protocol Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.	

ALI TRANSACTIONS CURRENT MONTH NOTES:

180 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net. **56** TN CR transactions were processed as a result of the ESN 399 clean-up effort. **124** TN CR transactions were processed in order to add Dispatchable Location Information to Queen Kaahumanu Center ALI Records. There were no ALI Discrepancy Request (ALI DR) processed in 9-1-1 Net.

OPEN DISCREPANCY RECORDS STATUS:

- **There are 1,194 Open TN CR Transactions as of September 30, 2015**
- **Refer to chart in the next section "TNCR Current Status"**

The Open TN CR transactions are a direct result of the ESN 399 clean-up and the Dispatchable Location Information ALI Record updates.

Akimeka continues to monitor and track the progress of the ESN 399 Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

There is one (1) Open ALI-DR as of September 30, 2015

The Open ALI DR was the result of a 911 call made from a payphone showing an incorrect address in Lahaina. The caller information did not match the displayed location and this discrepancy has been referred to Hawaiian Telcom for verification. Intrado will notify Akimeka when the ALI record has been updated.

There are no Open VoIP DRs as of September 30, 2015

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

DISPATCHABLE LOCATION – STATUS AS OF – SEPTEMBER 2015

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Screen shots of the “Before” ALI screen, and the “After” ALI screen with the updated “Dispatchable Location” information visible, were presented to the Dispatch Supervisors. Akimeka received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, Akimeka was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this “Dispatchable Location” information which will reduce the response times for Public Safety. In September, the Dispatchable Location transactions have been temporarily stopped. Transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted.

Dispatchable Location				
Common Name Place	MSAG Address	2015	Number of TNCR* Transactions Submitted	Number of Transactions Processed**
Queen Kaahumanu Center	275 Kaahumanu Ave	Aug	244	156
Queen Kaahumanu Center	275 Kaahumanu Ave	Sept	124	143
		Oct		
		Nov		
		Dec		
		Total	368	299

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – SEPTEMBER, 2015

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
MAUI	891	92	69	730
MOLOKAI	303	17	19	267
TOTAL	1,194	109	88	997

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET. This includes the 399 and 359 clean up effort, and the "Dispatchable Location" project.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

GEOGRAPHIC INFORMATION SYSTEM (GIS) – SEPTEMBER 2015

MAPPING LAYERS UPDATED (PART I)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

MAUI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
Address Points		09/23/15	
	9/23/2015		Spatially corrected one (1) address point in Kula
	9/22/2015		Corrected one (1) Location Name in Kula
	9/22/2015		Added one hundred thirty-eight (138) addresses in Wailuku
	9/21/2015		Spatially corrected one (1) address in Haiku
	9/21/2015		Added one (1) address in Haiku
	9/21/2015		Added one (1) address in Hana
	9/21/2015		Added seventy-one (71) addresses in Kaanapali
	9/21/2015		Spatially corrected one (1) address point in Kaanapali
	9/21/2015		Added one (1) address in Kaunakakai
	9/21/2015		Added thirty-six (36) addresses in Lahaina
	9/21/2015		Spatially corrected one (1) address point in Lahaina
	9/21/2015		Added one (1) address in Wailea
	9/21/2015		Added Location Names to six (6) addresses in Wailea
	9/21/2015		Added alias Location Name for five (5) addresses in Wailea
	9/18/2015		Added one (1) address in Wailuku
	9/18/2015		Added one hundred twenty-one (121) address points in Wailea
	9/18/2015		Spatially corrected ten (10) address points in Wailea
	9/18/2015		Corrected nine (9) addresses in Wailea
	9/18/2015		Added an alias Location Name for one (1) address in Wailea
	9/17/2015		Added one (1) address in Haiku
	9/17/2015		Added two (2) addresses in Hana
	9/17/2015		Spatially corrected one (1) address point in Hana
	9/17/2015		Corrected Location Name for one (1) address in Kihei per Maui Dispatch
	9/17/2015		Added one (1) MSAG address in Kula
	9/17/2015		Added two (2) POI addresses in Wailea
	9/11/2015		Spatially corrected one (1) address point in Kula
		09/09/15	
	9/9/2015		Added one (1) address in Kaanapali
	9/8/2015		Added one (1) address in Kaanapali
	9/4/2015		Added four (4) addresses in Kihei
	9/4/2015		Spatially corrected one hundred eighty-six (186) address points in Kihei
	9/1/2015		Spatially corrected twenty-five (25) address points in Wailea
	9/1/2015		Spatially corrected twenty-nine (29) address points in Waikapu
	9/1/2015		Changed one (1) address in Lahaina per DSA
	9/1/2015		Added one (1) address in Haiku

	9/3/2015		Per ATT CRS

NOTE:

- The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

- GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
9/23/2015	Prepared and delivered the following data for the Intergraph CAD map: Maui Cell Coverage .csv, .str, .rte and .map which included updated Address Points, Police Beats, Subdivisions, Street Centerlines and WSP Cell Towers
9/23/2015	Delivered the following data for MapFlex: Address Points, Points of Interest, Street Centerlines, WSP Cell Towers and WSP Cell Sectors
9/23/2015	Added street centerline labels, deleted duplicate street centerline labels and duplicate stream labels
9/16/2015	Conducted field work of shopping centers in Wailea, Lahaina and Kaanapali
9/9/2015	Delivered the following data for MapFlex: Address Points, Points of Interest, Street Centerlines, WSP Cell Towers and WSP Cell Sectors
9/9/2015	Delivered the following data for the Intergraph CAD map: Maui Cell Coverage .csv, .str, .rte and .map which included updated Address Points, Points of Interest, Street Centerlines and WSP Cell Towers

UPCOMING GIS DELIVERABLES SCHEDULE

As it is nearing the end of the year with many holidays ahead in the coming months, an approved schedule for the GIS deliverables has been provided below. Some days may have originally fallen on a holiday so an alternative GIS deliverable schedule around those dates were created.

GIS Deliverable schedule for 2015		
OCT	14	28
NOV	10	25
DEC	9	23

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

NEXT GENERATION 911 (NG9-1-1) GIS REQUIREMENTS

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of September 2015, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1:

NG9-1-1 GIS Data Corrections			
GIS Layer Name	Type of Correction	Number of Records Corrected/Modified/Added/Removed	Comments/Details
<i>Address Points</i>	Addition	384	Addresses assigned by DSA, DSA Address Layer, MSAG and field verifications
	Spatially Corrected	256	Corrected location of address point, recalculated x/y
	Correction	9	Correction of address
	Change	1	DSA reassigns an address
	Neighborhood Info	0	Added Neighborhood Info
	Location Name	14	Added or Changed Location Name
<i>Response Boundaries</i>	Spatially Corrected	7	Boundary corrections to match spatially corrected street centerlines. Layers include ESN and Police Beats.
<i>Street Centerlines</i>	Addition	14	Added a street centerline segment
	Range Segments	7	Modification of a range
	Spatially Corrected	129	Corrected using Pictometry
	Partial Correction	0	Corrected using Pictometry
	Corrected Name	1	Corrected Street Name

NOTE:

- Response Boundaries include any updates to ESNs, Police Beats, Fire Beats, etc. that pertain to Dispatch and Response.

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. Akimeka successfully delivered an updated Intergraph CAD map on September 9, 2015 which included:
 - a. Address Points, Points of Interest, Street Centerlines and WSP Cell Towers
 - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
2. On September 23, 2015, the following data was prepared and delivered for an Intergraph CAD Map update:
 - a. Address Points, Police Beats, Street Centerlines, Subdivisions and WSP Cell Towers
 - b. The .map, .str, .rte, CAD Map Build database and Cell Coverage.csv were also delivered.
3. Through the month of September, Akimeka deleted overlapping and crowded Street Centerline and Stream labels. New Street Centerline labels were also added. This continues to be a work in progress.

During October 2015, the Intergraph CAD map will continue to be delivered on a bi-monthly basis, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

MAPFLEX DEPLOYMENT

During the month of September 2015, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, and Kauai County. For a chronology prior to September, please see the April thru September 2015 Monthly Status Report. The MapFlex deployment has been primarily concluded, and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in September 2015
 - a. **Hawaii County** – September 8th and September 22nd
 - b. **Maui County** – September 9th and September 23rd
 - c. **Kauai County** – September 10th and September 24th

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

POWER911 (VIPER) UPDATE

It was brought to Akimeka's attention that on certain Landline 911 calls, the Comments (Location) field on the Power911 ALI/ANI screen was displaying unusual and confusing information pertaining to the address of the caller. For example, **ALI DR** appeared on the ALI screen in the Comment field which was interpreted by the 911 Call Takers as Ali Drive. ALI DR is a 911 NET term for ALI (automatic location information) Discrepancy Report. Akimeka researched the 911 NET database, the ALI ANI data stream, and after several 911 tests with the PSAP, concluded that the Location Field and the TELCO Comment field from the ALI ANI Data Stream were merged together in the Power911 "ini" file which cause the TELCO information to appear on the Power911 ALI ANI Screen in the Comment Field.

On July 23rd, Akimeka and Intrado resolved this issue by reconfiguring the Power911 "ini" file as to prevent the TELCO Comments from appearing on the Power911 ALI ANI Screen. Future use of the TELCO Comment field appearing on the ALI ANI screen should contain useful information for dispatching purposes.

There were no further discrepancies in the "Location" field on the ALI Screen in the month of September, 2015.

POWERMAP

During the May 14, 2015, 9-1-1 Communications Technical and Finance Committee it was discussed that with the successful implementation of the MapFlex system, the uploads for the PowerMap system are scheduled to be phased out by the end of May 2015.

1. The phase out plan for uploads to PowerMap included the disconnection of the dedicated circuits from Akimeka's office in Kihei, Maui to Hawaii County, Maui County, and Kauai County on May 31, 2015.
 - a. This meant that Akimeka would no longer have a connection to the PowerMap at each Neighbor Island to perform uploads and that there will be no technical support of PowerMap. The phasing out of PowerMap was due to the system surpassing its expected lifecycle and it had remained in service for more than 8 years.
2. The phase out plan also included Akimeka's assistance in the removal of GIS data which contains proprietary information to the PSAPs that must be cared for and also includes IPR information from Akimeka.
 - a. Akimeka was on site to perform the data removal of PowerMap in **Maui County** on June 12, 2015. Six (6) PowerMap positions were cleaned during this process.
 - b. Akimeka was on site to perform the data removal of PowerMap in **Kauai County** on June 23, 2015. Six (6) PowerMap positions were cleaned during this process.
 - c. **Hawaii County** IT was previously scheduled to remove the PowerMap positions during the month of July 2015, so that Akimeka can assist in cleaning the positions. However the MapFlex is still not displaying the Phase I polygons correctly for wireless 9-1-1 calls, so HPD will be keeping the PowerMap positions until this can be corrected by Intrado. There have been no known updates reported during the month of September 2015.

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

5. E9-1-1 DATABASE SYNCHRONIZATION

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted the next quarterly database synchronization audit for Maui County in September 2015.

The database synchronization effort included comparing Maui County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **2,588** 9-1-1 MSAG (ESN 300 – 357) records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on September 1, 2015 for Maui County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

AUDIT SUMMARY RESULTS – 2015

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of December 1, 2015		As of March 1, 2015		As of June 1, 2015		As of September 1, 2015

Less: 9-1-1 MSAG Exception Records	(1)	72	2.7%	74	2.78%	74	2.78%	74	2.7%
Net 9-1-1 MSAG Records Eligible for Comparison		2,581		2,584		2,587		2,588	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		2,577	99.80%	2,584	100.00%	2,587	100.00%	2,588	100.00%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	4	0.00%	0	0.00%	0	0.00%	0	0.0%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.00%	0	0.00%	0	0.00%	0	0.0%
Total 9-1-1 MSAG Records No Match		4	0.20%	0	0.00%	0	0.00%	0	0.0%

AUDIT SUMMARY NOTES:

- (1)An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- (2)An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- (3)An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

9-1-1 MSAG Dated 06-01-15

NOTE:

Maui County's level of accuracy or 9-1-1 Match percentage remained constant
at 100% as of June 1, 2015 to 100% as of September 1, 2015
NENA Recommended Match Rate = 98%

MSAG AUDIT SUMMARY RESULTS NOTES:

- “MSAG - GIS Minor Corrections” remained constant with zero from June 2015 to September 2015 respectively. The zero minor corrections is primarily the result of edits made to the GIS Street Centerlines layer in order to meet new NG9-1-1 requirements. Low and high address ranges were then adjusted in the MSAG to correspond with the GIS record. Although this is a minor correction, customer telephone numbers (TNs) need to be validated by the service providers prior to adjusting an address range.
- “MSAG Record with No GIS Record” remained constant with zero from June 2015 to September 2015 respectively. The total of zero MSAG Record with No GIS Record was due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Maui County records.
- “GIS Record with Minor Corrections” remained constant with zero from June 2015 to September 2015 respectively. Low and high address ranges, street suffix, and MSAG Community were adjusted in the GIS to correspond with the MSAG record.
- “MSAG records that don’t match GIS” remained constant with zero from June 2015 to September 2015 respectively. The total of zero MSAG Records not matching the GIS database resulted in a combination of corrections to the GIS and MSAG databases have been processed in order to meet NG9-1-1 requirements.
- Ongoing maintenance is critical to ensure the database synchronized level of address accuracy is maintained each time an MSAG or GIS record is “last modified”.

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

Hawaiian Telcom, Inc. (HTI) provides Maui County and Akimeka, as the PSAP's agent, with access and visibility to the ESN 359/399 MSAG records which are "known" invalid streets and address ranges. Results of the data provided are as follows:

PSAP	ESN	Invalid MSAG Records					
		9-1-1 MSAG Dated 03-01-15		9-1-1 MSAG Dated 06-01-15		9-1-1 MSAG Dated 09-01-15	
		# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)
MAUI	399	120	4.7%	104	4.1%	100	3.9%
MOLOKAI	359	42	16.2%	32	12.5%	28	11.1%
TOTAL MAUI		162	5.7%	136	4.9%	128	4.6%

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

Maui County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancy reports by community for Maui County. As of September 28, 2015, **2,062** ESN 399 (Maui/Lanai) and ESN 359 (Molokai) records, representing **3%** of Maui County's total ALI records, require research and corrective action, if needed.

THE TOTAL NUMBER OF ALI RECORDS REMAINS RELATIVELY CONSISTENT.

NOTES:

The number of ESN 359/399 ALI records decreased from 2,103 to 2,062 from June 2015 to September 2015 respectively. The decrease reflects the work that Akimeka has done since the last database synchronization in June 2015. Extensive research has gone into verifying the invalid TNs against current County data. This is an ongoing project, as Akimeka continues to research and correct the ESN 359/399 records.

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the total Wireline and Wireless counts respectively.
- All VoIP (Voice over Internet Protocol) type of 911 calls is combined in the Call Volume statistic.
- *Calls with no Ali 0.41% - Statewide average = 0.24% August 2015

ALI TRANSACTIONS CURRENT MONTH – SEPTEMBER 2015

KAUAI COUNTY		9-1-1 NET REQUESTS					
		ALI TRANSACTIONS SUBMITTED			Open Discrepancy Records as of Report Month End		
2015	TOTAL	TN CR (A)	ALI-DR (B)	VoIP DR (C)	TN CR	ALI-DR	VoIP DR
SEPT	62	62	0	0	278	0	0

Definitions	
(A) Telephone Number Change Request - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 499 attached to them which indicates the need for validation.	
(B) Automatic Location Information Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.	
(C) Voice over Internet Protocol Discrepancy Record - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.	

ALI TRANSACTIONS CURRENT MONTH NOTES:

There were no ALI Discrepancy Requests (ALI DR) processed in 9-1-1 Net.

OPEN DISCREPANCY RECORDS STATUS:

- **There are 278 Open TN CR Transactions as of September 30, 2015**
- **Refer to chart in the next section "TNCR Current Status"**

216 Open TN CR transactions are a direct result of the ESN 499 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

Sixty-two (62) Open TN CR transactions are a result of the Dispatchable Location Project.

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

DISPATCHABLE LOCATION – STATUS AS OF – SEPTEMBER 2015

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliance with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kukui Grove Center at 302600 Kaumualii Hwy, Lihue**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Sixty two (62) Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted.

Dispatchable Location				
Common Name Place	MSAG Address	2015	Number of TNCR* Transactions Submitted	Number of Transactions Processed**
KUKUI GROVE CENTER	302600 KAUMUALII HWY, LIHUE	Aug		
		Sept	62	0
		Oct		
		Nov		
		Dec		
		Total	62	

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – SEPTEMBER, 2015

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
KAUAI	278	32	53	193

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

	9/17/2015		Modified boundary of ESN 417, 418, 419, 426, 427, 440, 442 and 444
	9/16/2015		Modified boundary between ESN 441 and 443
	9/15/2015		Modified boundary of ESN 401, 402, 403, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 427, 433, 434, 435, 436, 437, 438, 439, 440, 442, 443, 444, 445, 446, 449, 450 and 451 to line up with Street Centerlines
	9/14/2015		Modified boundary of ESN 411, 412, 414, 417, 421, 422, 428, 421, 449, 450 and 452 to line up with Street Centerlines
		09/10/15	
Fire Beats	9/9/2015		Modified boundary between ESN 445 & 446 to match spatially corrected street centerlines

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPPING LAYERS UPDATED (PART III)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

KAUAI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
Fire Districts			
Fire Response Areas			
Fire Stations			
Food & Beverage			
Gas Stations			
Gate Codes			
Government Buildings			
Harbors			
Helipads			
Hiking Trails			
Hospitals			
Hydrants			

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPPING LAYERS UPDATED (PART IV)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

KAUAI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
Hyrdology Layers: Dams Ponds Streams Waterfalls			
Incident Response Areas	9/15/2015		Modified boundary for IRA 206250 (2), 213156 (3) and 244156
Lodging			
Major Roads			
Medic Beats			
Medic Districts			
Medic Response Areas			
Medic Stations			
Medical Facilities			
Milepost Markers			
MSAG Communities		09/10/15	
	9/9/2015		Modified boundary of Waimea and Kekaha to match spatially corrected street centerlines

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPPING LAYERS UPDATED (PART V)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

KAUAI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
Net Junctions			
Ocean Rescue Boundaries			
Ocean Safety			
Parcels			
Parks			
Parks Polygon			
Points of Interest	9/30/2015		Added thirty (30) POI, spatially corrected four (4) POI and added the Unit # to one (1) POI
	9/29/2015		Added nineteen (19) POI and spatially corrected eleven (11) POI
	9/28/2015		Added twenty-one (21) Points of Interest
		09/24/15	
	9/14/2015		Added fifty-four (54) POI, Spatially corrected fifteen (15) POI, Added Unit # for twelve (12) POI, Corrected one (1) POI name
	9/14/2015		Spatially corrected fifteen (15) POI
	9/11/2015		Corrected the street name for seven (7) POI addresses and corrected the Subclass for three (3) POI
		09/10/15	
	9/10/2015		Spatially moved nine (9) POI. Added four (4) POI.
Police Beats			
Police Districts			

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPPING LAYERS UPDATED (PART VI)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

KAUAI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
Police Response Areas			
Police Stations			
Post Offices			
Schools			
Street Centerlines	9/25/2015		Corrected Parity of six (6) street centerline segments
		09/24/15	
	9/11/2015		Calculated Cost for ninety-nine (99) street centerline segments
		09/10/15	
	9/10/2015		Spatially corrected six (6) street centerline segments in Waimea
	9/9/2015		Spatially corrected twenty-seven (27) street centerline segments in Kekaha
Subdivisions	9/9/2015		Spatially corrected twelve (12) street centerline segments in Waimea
Tow Jurisdictions			
Tsunami Evacuation Zones			
Tsunami Heights			
Waste Water Plants			

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPPING LAYERS UPDATED (PART VII)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

KAUAI COUNTY			
Type of Layer	Akimeka GIS Server	Date GIS Delivered	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)			
WSP Cell Sectors	9/28/2015		Per ATT CRS
		09/24/15	
		09/10/15	
	9/9/2015		Per VZW CRS
	9/3/2015		Per ATT CRS
WSP Cell Towers	9/28/2015		Per ATT CRS
		09/24/15	
		09/10/15	
	9/9/2015		Per VZW CRS
	9/3/2015		Per ATT CRS

NOTE:

- The Parcels layer is provided by Kauai County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
9/24/2015	Delivered the following data for a GeoComm update: Address Points, ESN, IRA, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers
9/24/2015	Delivered the following data for a MapFlex update: Address Points, ESN, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers
9/10/2015	Delivered updated data for GeoComm: Address Points, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers. Also included geofiles for Points of Interest and Street Centerlines.
9/10/2015	Delivered updated data for a MapFlex deliverable: Address Points, ESN, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers

UPCOMING GIS DELIVERABLES SCHEDULE

As it is nearing the end of the year with many holidays ahead in the coming months, an approved schedule for the GIS deliverables has been provided below. Some days may have originally fallen on a holiday so an alternative GIS deliverable schedule around those dates were created.

GIS Deliverable schedule for 2015		
OCT	15	29
NOV	12	27
DEC	10	23

GPS DATA COLLECTION AND SITE VERIFICATION

During the month of September 2015, there were no scheduled GPS data collection and site verifications required. Data capture will continue to be coordinated on an as needed basis.

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

MAPFLEX DEPLOYMENT:

During the month of September 2015, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, and Kauai County. For a chronology prior to September, please see the April thru August 2015 Monthly Status Report. The MapFlex deployment has been primarily concluded, and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in September 2015
 - a. **Hawaii County** – September 8th and September 22nd
 - b. **Maui County** – September 9th and September 23rd
 - c. **Kauai County** – September 10th and September 24th

POWER911 (VIPER) UPDATE

It was brought to Akimeka's attention that on certain Landline 911 calls, the Comments (Location) field on the Power911 ALI/ANI screen was displaying unusual and confusing information pertaining to the address of the caller. For example, **ALI DR** appeared on the ALI screen in the Comment field which was interpreted by the 911 Call Takers as Ali Drive. ALI DR is a 911 NET term for ALI (automatic location information) Discrepancy Report. Akimeka researched the 911 NET database, the ALI ANI data stream, and after several 911 tests with the PSAP, concluded that the Location Field and the TELCO Comment field from the ALI ANI Data Stream were merged together in the Power911 "ini" file which cause the TELCO information to appear on the Power911 ALI ANI Screen in the Comment Field.

On July 23rd, Akimeka and Intrado resolved this issue by reconfiguring the Power911 "ini" file as to prevent the TELCO Comments from appearing on the Power911 ALI ANI Screen. Future use of the TELCO Comment field appearing on the ALI ANI screen should contain useful information for dispatching purposes.

There were no further discrepancies in the "Location" field on the ALI Screen in the month of September, 2015.

POWERMAP

During the May 14, 2015, 9-1-1 Communications Technical and Finance Committee it was discussed that with the successful implementation of the MapFlex system, the uploads for the PowerMap system are scheduled to be phased out by the end of May 2015.

1. The phase out plan for uploads to PowerMap included the disconnection of the dedicated circuits from Akimeka's office in Kihei, Maui to Hawaii County, Maui County, and Kauai County on May 31, 2015.
 - a. This meant that Akimeka would no longer have a connection to the PowerMap at each Neighbor Island to perform uploads and that there will be no technical support of PowerMap. The phasing out of PowerMap was due to the system surpassing its expected lifecycle and it had remained in service for more than 8 years.
2. The phase out plan also included Akimeka's assistance in the removal of GIS data which contains proprietary information to the PSAPs that must be cared for and also includes IPR information from Akimeka.
 - a. Akimeka was on site to perform the data removal of PowerMap in **Maui County** on June 12, 2015. Six (6) PowerMap positions were cleaned during this process.
 - b. Akimeka was on site to perform the data removal of PowerMap in **Kauai County** on June 23, 2015. Six (6) PowerMap positions were cleaned during this process.
 - c. **Hawaii County** IT was previously scheduled to remove the PowerMap positions during the month of July 2015, so that Akimeka can assist in cleaning the positions. However the MapFlex is still not displaying the Phase I polygons correctly for wireless 9-1-1 calls, so HPD will be keeping the PowerMap positions until this can be corrected by Intrado.
 - d. There have been no known updates reported during the month of September 2015.

Kauai County E9-1-1 Status Report

September 1, 2015 - September 30, 2015

4. SERVICE REQUESTS TRANSACTIONS

OPEN SERVICE REQUESTS – SEPTEMBER 2015

#	Date	Ticket #	Description	Category	Urgency	Comments
			None			

NOTE:

There are no open service requests for September 2015.

SERVICE REQUEST YEAR-TO-DATE (YTD) SUMMARY – 2015
