STATE OF HAWAII
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES

Enhanced 911 Board Meeting
Thursday, July 12, 2012
McCoy Pavilion, Ala Moana Regional Park, Honolulu
10 am to 12 noon

MINUTES

Board members present: Clayton Tom (Chair), Victor Ramos, Mark Begley, Su Shin, Kiman Wong, Dean Seki, James LaClair, Roy Irei, Gordon Bruce, and Steve Schutte.

Board members absent: Jeffrey Ono and Marshall Kanehailua.

Staff members present: Thera Bradshaw, Courtney Tagupa and Kerry Yoneshige.

Guests: Mary Boyd (Intrado), Goldie Cross (AT&T), Kenison Tejada (HFD), Bart Huber (HPD), Morris Tamanaha (Navy RDC), Roy Halterman (Intrado), Ashish Patel (Intrado), Aaron Correia, Thalia Burns (HPD), Jeff Habrych (OIMT), Paul Calvey (HPD) and Ah Lan Leong (HPD).

I. Call to Order, Public Notice, Quorum

The meeting was called to order at 10:05 am.

II. Public testimony on all agenda items.

A request by the Board Chair was made if anyone wishes to testify on any of agenda items. There were no responses to this request.

III. Introductions

Introductions were made of all in attendance.

IV. Approval of Last Meeting's Minutes

There was a motion to approve the meeting minutes. The motion was seconded and approved unanimously by voice vote without discussion.

V. Committee Updates by Committee Chairs

a. Finance Committee – Kiman Wong

No updates at this time.

b. Technical Committee – Victor Ramos

No updates at this time.

c. Communications Committee- Gordon Bruce

Mr. Gordon Bruce stated the following:

- i. Logo Contest- The office of the Director of Education stated that there are approximately 280 schools and 600 classrooms that may participate in the contest,

1. Logo contest will now be called the Logo and Slogan Contest.
2. Senator Kidani was pleased with the Logo Contest and volunteered to be a judge.
3. Mary Boyd of Intrado volunteered to provide graphic support.
4. The DOE requested the no constraints be placed on the method of submission from the students.

- ii. Ocean Safety PSAP Status

1. The Honolulu Fire Chief sent a letter of support to the Mayor's office for Ocean Safety's efforts to be recognized as a PSAP.
2. If the City & County of Honolulu department heads say that Ocean Safety is a PSAP, should that be sufficient to determine if Ocean Safety is a PSAP?
3. The City Attorney's office is anticipated to opine the decision regarding Ocean Safety.
4. §138,HRS provides a definition of a PSAP.
5. What are we trying to accomplish by making an entity a PSAP? Is it to provide separate funding?
6. The Board will be awaiting the C&C of Honolulu's Attorney's office decision regarding the Ocean Safety PSAP. Upon receipt, it will be forwarded to the State AG's office for review.

VI. PSAP Status Updates

a. Kauai – Mark Begley

Kauai continues to have its bimonthly meetings with HawTel regarding delivery of 911 services. Kauai is also looking at alternatives for 911 services.

b. Oahu – Gordon Bruce

There was a meeting with all the PSAPs within the C&C of Honolulu to strategize the roll out of the CAD upgrades and identify all potential issues. C&C of Honolulu is also monitoring of the Big Island regarding their upgrade roll out. If the Big Island problems are not resolved by the end of the month, C&C of Honolulu will have to examine the alternatives. In the meantime, Mr. Bruce has been given the permission to meet with the president of Hawaiian Telcom to discuss the challenges.

c. Molokai – Victor Ramos

There were no updates at this time.

d. Maui – Clayton Tom

Maui County is also monitoring the progress of the Big Island as well.

e. Hawaii - Marshall Kanehailua

There were no updates at this time.

VII. Items for Discussion, Consideration and Action

- a. Approval of Investigative Committee recommendation on the TKC Consulting Group Executive Director contract services with a 5% funding increase (\$341,250) for one year 2013 extension option.

Mr. Kiman Wong stated that the Finance Committee reviewed the request for a 5% increase and found it reasonable and is recommending the increase to the Board.

Mr. Mark Begley motioned to approve the 5% increase in the TKC Consulting Group Executive Director contract services. The motion was seconded and approved unanimously by voice vote without discussion.

b. Election of new Board Vice Chair.

There was a motion by the Board Chair to approve the nomination of Mr. Roy Irei as the new Board Vice Chair. The motion was seconded and approved unanimously by voice vote without discussion.

c. Approval on policy governing criteria and qualifications of Committee members for recommendation to Enhanced 9-1-1 Board.

Ms. Thera Bradshaw stated that this matter be deferred until next month to give her time to incorporate some recommended changes by the Committee.

d. Approval of S. Kaleo Perez (Kauai) as a new Finance Committee member.

Mr. James LaClair motioned to approve the nomination of S. Kaleo Perez as the new Finance Committee member. The motion was seconded and approved unanimously by voice vote without discussion.

e. Approval of Brandon Raines (Kauai) as a new Technical Committee member, replacing S. Kaleo Perez.

There was motion to approve Mr. Brandon Raines as the new Technical Committee member who replaces S. Kaleo Perez. The motion was seconded and approved unanimously by voice vote without discussion.

f. Appoint Chair for the Investigative Regulatory Committee.

The Board Chair appointed Steven Schutte as the new Chair of the Investigative Regulatory Committee.

g. Review of the Monthly Cash Flow Report

Mr. Courtney Tagupa presented the final FY2012 Cash Flow Financial Report and stated the following:

- i. Total Revenues for the year- \$8,909,273.

- ii. Total Disbursements for the year- \$12,053, 520.
- iii. The total encumbrances for the year- \$4,639,779.
- h. Approval of new bank proposal for the E911 Fund.
This matter was differed until next month.
- i. New Board member status:
 - i. Kevin Paul, HawTel
 - ii. Mr. Kevin Paul's is still under review by the Boards & Commissions office.
 - iii. Bart Huber, HPD
 - iv. Assistant Chief Huber should be approved by the next meeting.
- j. Wireless E911 Timeline update
There were no timeline updates.
- k. Approval for funding for FY 2013 Conference Travel.
 - i. APCO Conference (August 2012)
 - 1. Honolulu PD:
 - a. Lt. Yvonne Bolton-\$2,871.
 - b. SPRD Bertie Johnson-\$2,871.
 - 2. Honolulu FD:
 - a. Kenison Tejada, Battalion Chief-\$3,420
 - b. Sean Iida, - \$3,420.
 - 3. Oahu PSAP:
 - a. Clement Chan- \$3,000.
 - 4. Maui PD:
 - a. Isabell Kamoku- \$2,800.
 - b. Kernette Pocock- \$2,800.
 - 5. Hawaii PD
 - a. Curtis Malia - \$3,072.
 - b. Lorelee Haskell - \$2,700.

There was a motion by Mr. James LaClair to approve the APCO Conference attendees. The motion was seconded and approved unanimously by voice vote without discussion.

I. Approval for adjustments of FY 2012 Strategic Budget Plan Funding:

i. Kauai PD VisionAir Conference (October 2011):

1. Max Klute-\$2,646.08.
2. Mabel Antonio-\$3,686.21
3. Audrey Silva-\$3,442.90.

This matter was discussed in committee meetings earlier this week and more research is underway. No action required by the board at this time.

ii. Others

m. Discussion & Approval of FY 2013-2017 Strategic Budget Plan.

Mr. Courtney Tagupa reviewed the Strategic Budget Plan which included the:

- i. Cash flow for fiscal years 2013-2017.
- ii. A legislative ceiling analysis of the projected budgets for fiscal years 2013-2017.
- iii. Each major cost category which included:
 1. Recurring Costs:
 - i. Administration
 - ii. Maintenance
 - iii. Hawaiian Telcom Services
 - iv. Other recurring costs.
 2. Nonrecurring costs.
 3. Conference travel costs.

There was a motion by Mr. Gordon Bruce to approve the FY2013-FY2017 Strategic Budget Plan. The motion was seconded and approved unanimously by voice vote with discussion.

The following suggestions were stated from the Board members:

1. The plan shows a surplus in some years. It is

recommended that the recipients of this Strategic Budget Plan be made aware of the need to preserve cash for future emerging technology and infrastructure improvements.

2. Acknowledgment that there will be no rate increase.
3. The Board will continue to live within the legislation ceiling.

- n. Approval of Independent CPA Firm to perform the FY2012-2014 annual audits of the Enhanced 911 Fund.

Mr. Gordon Bruce motioned to approve the CPA audit firm of PKF Pacific to perform the audit of the E911 Fund for the fiscal years of 2012, 2013, & 2014. The motion was seconded and approved unanimously by voice vote without discussion.

VIII. Announcements

- a. **Next Meeting Date:** Thursday, August 9, 2012, McCoy Pavilion, Ala Moana Park, 10 am – 12 noon.

- b. **Others.**

Ms. Goldie Cross was honored for her exemplary service to the Board with a certificate of appreciation from the Board and another certificated from the Governor Abercrombie.

Mr. Gordon Bruce announced that Hawaiian Telcom will be acquiring Wavecom. Since Wavecom submits surcharge revenue to the Fund, this acquisition may impact future cash flow.

- IX. **Open Forum: Public comment on issues not on the agenda, for consideration for Board agenda at the next meeting.**

- X. **Adjourn:**

There was a motion to adjourn. The motion was seconded and approved unanimously by voice vote without discussion.

Note:	Total Calls include Administrative calls that are not direct 911 calls.										

Note: Total Calls include Administrative calls that are not direct 911 calls.

Notes:

- (1) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.
- (2) "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard CML reports do not provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.
- (3) Total call volumes include Administrative calls. (Administrative calls = Calls made between 911 positions but are not 911 calls.)

Current Month PSAP Operations Activities – June 2012

- | | |
|-------------------------------|---|
| Weekly
(Every
Thursday) | The Oahu Civilian PSAP, along with the other PSAPs and Akimeka, participated in the weekly conference calls hosted by Hawaiian Telcom, Inc. (HTI) to review the Solacom conversion in the State of Hawaii. There has been no significant progress or improvement to date. Hawaii County still has not been able to achieve the same level of service and performance prior to the conversion, as promised by HTI. |
| 06/10/12 --
06/14/12 | City & County of Honolulu representatives, along with Akimeka and representatives from the other State of Hawaii PSAPs, attended the 2012 NENA Conference in Long Beach, California. There were education and training sessions dealing with Next Generation and its impact on the industry. |

Oahu Civilian E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Wireless Tower Naming Project

As reported last month, during the test process, Akimeka observed that the source of the data being displayed was being retrieved from the GIS mapping layer rather than the ALI datastream. Akimeka has been working with GeoComm to address the issue on the system configuration and what is displayed on screen. Once Akimeka gets the answers from GeoComm, Akimeka will submit recommendations to HPD/PSAP with regards to the GeoComm mapping system configurations in order to retrieve the data from the correct source and how it will help the dispatchers.

The HPD PMT approved the wireless tower re-naming project, using the agreed upon naming schema in March 2012. In conjunction with this project, HPD's expectation is to test all sites (towers) and sectors for each Wireless Service Provider (WSP) to establish a verified and tested baseline database and ensure accuracy and synchronization of the GeoComm mapping system and the Wireless E9-1-1 database.

As previously agreed to, the wireless tower re-naming project would begin with T-Mobile and Mobi PCS.

1. T-Mobile requested to re-schedule testing to July 9 -13, 2012 due to manpower issues, which was approved by the HPD PMT.
2. Mobi PCS requested to re-schedule testing to June 25 – 29, 2012 due to manpower issues, which was approved by the HPD PMT. It was agreed to start the testing with one technician on June 27, 2012. Future testing will be scheduled based on Mobi PCS' field technician availability and approval by the HPD PMT.

Mobi PCS Test

In preparation for the Mobi PCS test, Sheldon Kono from the City & County of Honolulu DIT department, confirmed that the GeoComm Cell Tower and Sector layers were received and loaded into their server and was ready for testing.

On June 27, 2012, twenty-one (21) cell sites (towers) and one sector per site were tested and validated for Wireless Phase I (WPH I) and Wireless Phase II (WPH II) compliance. The test was considered successful after the 9-1-1 call plotted both Wireless Phase I (WPH I) and Wireless Phase II (WPH II) data elements. Additional testing will be scheduled to complete the testing requirement based on Mobi PCS' field technician availability and approval by the HPD PMT.

WSP Notification

The HPD PMT will notify the other WSPs of the wireless tower re-naming project and request their cooperation and assistance to plan for CRS submissions and test scheduling to test all sites (towers) and sectors.

Note: Revised categories and report format changes effective May 2012 with new Intrado TN CR functionality.

(*) During the month of April 2012, Akimeka was informed by Intrado that no MSAG requests or transactions within the Intrado E9-1-1 MSAG would be processed as directed by Hawaiian Telcom, Inc. (HTI).

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs.
	(b)	Represents ALI Discrepancies discovered during a 9-1-1 call. These record corrections are treated with a higher urgency.
	(c)	Represents what is in suspension status at the end of the report month -- awaiting further action by County, Telco, or Akimeka.

Oahu Civilian E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **MSAG (continued)**

MSAG Communities Project

On June 26, 2012, the Honolulu Police Department (HPD) received Hawaiian Telcom's letter dated May 9, 2012 via a pdf attachment to an email from Mr. Robert Uyehara.

In compliance with Hawaiian Telcom's MSAG Maintenance guidelines and restrictions, HPD will continue with its Oahu Combine project and focus on 9-1-1Net MSAG Maintenance transactions in existing MSAG Communities, as agreed to. On behalf of HPD, Akimeka will ensure compliance and work within the restrictions provided by Hawaiian Telcom.

With regards to the new MSAG Communities identified and provided to Hawaiian Telcom by HPD in March 2012, on behalf of HPD, Akimeka requested confirmation from Hawaiian Telcom that the information provided (tabular list of existing and new Civilian and Military MSAG Communities and maps) were sufficient and all E9-1-1 databases that need to be updated have been successfully updated by Hawaiian Telcom to accept the new MSAG Communities. It was recommended that Hawaiian Telcom provide HPD with a formal response accordingly.

- **Geographic Information System (GIS)**

Mapping Layers Updated – June 2012

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

OAHU CIVILIAN			
Type of Layer	Akimeka GIS Server	Date Loaded Into PSAP GIS Server	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)			
Address Points	06/07/12		Continued to work on setting up attributes to meet the Motorola Geofile Build requirements and other State of Hawaii PSAP's Address Points as a standard guide.
	06/05/12 -- 06/08/12		Added fields based on Motorola Geofile Build requirements as well as fields used by the other State of Hawaii PSAPs. Added metadata to include descriptions for the layer and each field.
	06/01/12		Akimeka received Address Points layer from CCH DPP GIS
Common Place Name	06/29/12		Researched new Common Place Name locations and made additional edits to the layer
	06/25/12 -- 06/26/12		Edited Common Place Name layer based on error log submitted by HPD
Fire Districts	06/04/12		Adjusted boundary on ridgeline in Waimanalo to match with the Fire Beat boundary
	06/01/12		Edited coastline to match other layers

June 1, 2012 – June 30, 2012

- Geographic Information System (GIS)**

Mapping Layers Updated – June 2012

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

OAHU CIVILIAN			
Type of Layer	Akimeka GIS Server	Date Loaded Into PSAP GIS Server	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)			
Points of Interest	06/05/12 -- 06/29/12		Updated Class and Subclass categories
	06/05/12		Edited fields in order to standardize POIN layers across all State of Hawaii PSAPs
Street Centerlines	06/04/12 -- 06/26/12		Updated E9-1-1 Street Centerlines. This is an ongoing project.
WSP Cell Towers	06/29/12		Per T-Mobile CRS
			Per Mobi PCS CRS
	06/22/12		Added cell sectors for AT&T Mobility. This is an ongoing project.
	06/20/12		Added sectors and prepared layer for Mobi PCS testing
	06/07/12 -- 06/08/12		Added cell sectors to tower sites for Mobi PCS
	06/06/12		Plotted all cell tower sites for Mobi PCS

Current Month GIS Activities – June 2012

- 06/01/12 Akimeka received the Addressing Procedures Guidelines from the City & County of Honolulu (CCH) DPP GIS team.
- 06/08/12 Akimeka received a street, common place, and ANI/ALI error report from the HPD PSAP.
- 06/08/12 Akimeka researched twenty-nine (29) missing addresses using TMK Lookup on the DPP HoLIS website. All addresses were identified and the Address Points layer updated accordingly.
- 06/12/12 Akimeka uploaded a geodatabase to Motorola's ftp site which contained the latest Address Points. The feature classes in this geodatabase are being used to build the geofile for the HPD's Motorola PremierOne CAD system.
- 06/14/12 Akimeka compared and analyzed previous address points on the CCH ftp site against the latest updated address points. Minor corrections were identified and the Address Points layer was updated accordingly.

Oahu Civilian E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• Geographic Information System (GIS) (continued)

Current Month GIS Activities – June 2012 (continued)

- 06/14/12 -- Akimeka researched how an update process can be implemented to the Address
06/22/12 Points layer when new updates are posted by CCH DPP to their ftp site. Based on this, Akimeka began building an Address Points model that inputs the new updated Address Points and outputs a layer with the correct schema for the 9-1-1 CAD systems. Tests were performed as a quality control measure and the model was completed on June 22, 2012 which included descriptions and metadata.

- 06/21/12 Akimeka received a Street Centerlines layer and a Common Place Name layer from HPD via Akimeka's ftp site.

- 06/21/12 Akimeka compared and analyzed the updated Common Place Name layer received from the HPD PSAP. One addition and one name change of an existing record were identified and the updates were completed.

- 06/21/12 -- Akimeka began reviewing HPD's Common Places error log. Using the error log,
06/25/12 Akimeka also began editing the Common Place Name layer on June 25, 2012.

- 06/25/12 Akimeka received a copy of the GeoComm geodatabase from CCH DIT.

Oahu Street Centerline Project Update – June 2012

On June 28, 2012, a meeting was held with HPD AVS and PMT, City & County of Honolulu DPP GIS and Akimeka to transfer knowledge used to maintain the current HPD CAD GIS data. The focus of the meeting was to review processes, document workflows, and set a date for the current HPD CAD GIS data update.

The discussion was also specific to the Street Centerlines and Common Places in the Aloha geodatabase. Historically, the Street Centerlines have been maintained by DPP GIS in coordination with HPD AVS and Common Places have been maintained by HPD AVS.

The meeting covered the following areas:

1. Overview of Current Motorola CAD GIS Data Workflow
2. Aloha Geodatabase Editing Options
3. Current CAD Data Update Process.
4. Current CAD Data Maintenance Process (Draft)

Oahu Civilian E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **Geographic Information System (GIS) (continued)**

Oahu Street Centerline Project Update – June 2012 (continued)

A general overview of the current process was provided by Jim Hayden from DPP GIS. Jim's role is to keep the HPD Street Centerlines synchronized with updates from the main County Street Centerlines.

At the meeting, DPP GIS also supplied the latest copy of the County Street Centerlines. A process to routinely transfer the latest copy of the County Street Centerlines in the future will be established with HPD and DPP.

A more detailed overview of the past workflows, options for editing streets, and general knowledge which keep the HPD Street Centerlines updated as required by HPD was discussed during the meeting.

HPD AVS is responsible for performing maintenance after the data is updated to rebuild required networks. The Motorola Geofile Utilities (MGU) is used to process the data for loading to the system. Additional details will be documented during the next meeting to ensure everyone involved have a common understanding on how the system functions.

At the meeting, it was agreed that:

1. Akimeka will determine their business process with respect to editing and updating GIS data. (Note: Akimeka is able to have data available for uploads every two weeks.)
2. Any errors/discrepancies discovered by Akimeka between DPP GIS and HPD's data will be reported to DPP by Akimeka.
3. Akimeka will continue to work with HPD on the best way to record, resolve, and track address discrepancies.
4. Spatial edits/attribute changes performed by Akimeka will have comments attached to note the changes made.
5. Akimeka will be on-site at HPD on Wednesday, July 11, 2012 at 7:30 a.m. to update the Aloha geodatabase and perform a CAD Street Centerlines functional update cycle.
6. Akimeka will document the Motorola Geofile Utilities (MGU) process during the next meeting with HPD AVS.

NONE						

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• PSAP Operations (continued)

Current Month PSAP Operations Activities – June 2012

Effective 06/01/12	Lieutenant Gregg Okamoto assumed responsibility of the Molokai PSAP command.
Weekly (Every Thursday)	Maui County, along with the other PSAPs and Akimeka, participated in the weekly conference calls hosted by Hawaiian Telcom, Inc. (HTI) to review the Solacom conversion in the State of Hawaii. There has been no significant progress or improvement to date. Hawaii County still has not been able to achieve the same level of service and performance prior to the conversion, as promised by HTI.
06/07/12	An open trouble ticket with AT&T Mobility (5/15/12) was successfully tested and closed with the Molokai PSAP. The dispatcher was able to confirm that the call plotted correctly on the map to the location of the handset.
06/10/12 -- 06/14/12	Bill Heyde and Tracy Pellazar, Emergency Dispatcher's III for the Maui Police Department, along with Akimeka and representatives from the other State of Hawaii PSAPs, attended the 2012 NENA Conference in Long Beach, California. There were education and training sessions dealing with Next Generation and its impact on the industry.
06/09/12 -- 06/20/12	<p>On June 9, 2012, there was another reported incident of a wireless call (808/357-xxxx) that experienced trouble when the 9-1-1 call was transferred between the Hilo PSAP and the Maui PSAP.</p> <p>A trouble ticket was opened with Hawaiian Telcom, Inc. (HTI) to report the disconnect problem and that the dispatchers were unable to call the 9-1-1 caller back, using both the CML and PBX Admin lines. While using both methods, the dispatcher reported receiving the "your call cannot be completed as dialed" recording.</p> <p>HTI's initially reported the following as potential causes:</p> <ol style="list-style-type: none"> 1) The disconnect may have occurred because the 9-1-1 caller was in a potentially marginal connection to the network. 2) The inability to ringback the 9-1-1 caller via the CML equipment could possibly be that the Customer Provided Number (CPN) was incorrectly populated, which is sent by the WSP via a third party provider, Intrado or TCS. 3) The inability to ringback the 9-1-1 caller via the PBX Admin line, could possibly be dispatcher error. The dispatcher may have needed to dial using the (808) area code. 4) The disconnect may have been caused by the Hilo dispatcher disconnecting the incorrect leg on the Solacom equipment.

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Current Month PSAP Operations Activities – June 2012 (continued)

06/09/12 -- HTI recommended additional testing to be scheduled for the evening of June 18, 2012
06/20/12 beginning at 11:45 a.m. Based on this test, HTI reported that the test was successful
(continued) with no issues.

The County of Hawaii and County of Maui PSAPs requested HTI to perform additional testing on June 20, 2012 at 10:00 a.m. so both commands could observe and monitor the transfer of the call. Two test calls were conducted on June 20, 2012 without incident. There were no disconnection or ringback issues.

Stephen Douglass of HTI reviewed the proper procedures for disconnecting "legs" on a conference/transfer call using the Solacom position with the County of Hawaii primary and secondary PSAPs (Police and Fire). HTI also dispatched field technicians to check on the Admin lines and placed test calls to the number on record. Test calls were successful.

This issue will continue to be monitored by the PSAPs and HTI.

Open Issues (To be Monitored and Tracked by Akimeka)

Updates as of June 30, 2012 are noted below:

11/21/09 Akimeka will continue to monitor and track AT&T Mobility's open trouble ticket (11/21/09) for missing house number (HN), street and community information when transferring a WPH2 call or rebidding a WPH2 call. This issue was escalated to the State of Hawaii Wireless Enhanced 9-1-1 Board for action (August 2010). There have been no updates received to date. Unfortunately, the trouble is still occurring.

Akimeka will provide status updates via the Monthly Status Report (MSR) when there are significant changes or updates as provided by the State of Hawaii Wireless Enhanced 9-1-1 Board and/or AT&T Mobility.

Update (4/30/11) -- Hawaiian Telcom notified the Neighbor Island PSAPs that Intrado will be upgrading the ALI software to Version 5.0. A feature in this upgrade may potentially address the AT&T issue. This feature can be activated with the permission of all of the PSAPs across the State of Hawaii. This will be reviewed and discussed at the next Enhanced 9-1-1 Wireless Board Technical Committee meeting on May 10, 2011.

Maui County E9-1-1 Status Report June 1, 2012 – June 30, 2012

• PSAP Operations (continued)

Open Issues (To be Monitored and Tracked by Akimeka) (continued)

Updates as of June 30, 2012 are noted below:

11/21/09 (continued) **Update (5/31/11)** -- All PSAPs sent in a written confirmation to Hawaiian Telcom, Inc. (HTI) to proceed with the software 5.0 upgrade. Testing has been scheduled for Monday, June 6, 2011.

Update (6/30/11) -- The ALI cache wireless option was installed by Hawaiian Telcom, Inc. (HTI) on June 5, 2011. Testing was conducted as scheduled on the Neighbor Islands on June 6, 2011. Testing began at 7:44 a.m. however, there was no improvement. House number (HN) and street and community information was still missing when transferring a WPH2 call or rebidding a WPH2 call. Akimeka contacted HTI to report the condition. HTI and Intrado addressed the issue and testing continued. Results of the re-bidding of a WPH1 to WPH2 (GSM) call displayed the tower information and city. However, when testing UMT to UMT calls, the tower information and city were missing. In addition, the COF fields remained constant at 271 meters for every Phase II test call received. Akimeka reported this to Intrado for review.

On June 8, 2011, HTI notified the PSAPs that they believe the ALI caching trouble was resolved and all information sent on re-bids is in compliance with what is being sent by AT&T Mobility. As such, any additional discrepancy of calculated accuracy pertaining to the confidence factor (COF) should be reported to AT&T Mobility.

Update (7/1/11 – 6/30/12) – No further updates.

04/16/10 Akimeka personnel worked on a flowchart for the Neighbor Island PSAPs to document the flow of a Call Routing Spreadsheet (CRS) and Testing Validation Worksheet (TVW). It was discovered that different processes exist among the carriers.

Akimeka created and submitted for review a DRAFT Call Routing Sheet (CRS) and Testing Validation Worksheet (TVW) process flowchart to the Neighbor Island PSAPs on December 20, 2010.

Update (4/30/11) – Akimeka continued to work on the flowchart and incorporate the feedback received. An updated process flowchart is currently under review within Akimeka. Once approved, it will be shared with the Neighbor Island PSAPs.

Update (5/1/11 – 7/31/11) – In progress.

Update (8/31/11) – In progress. Personnel updates need to be incorporated.

Update (9/1/11 – 11/30/11) – No further updates.

Update (12/31/11) – In progress. NENA standards updates are being incorporated.

Update (1/31/12 – 6/30/12) – No further updates.

Maui County E9-1-1 Status Report June 1, 2012 – June 30, 2012

• MSAG

Current Month – June 2012

2012		9-1-1NET REQUESTS									In Suspended Status as of Report Month End (c)

Revised categories and report format changes effective May 2012.

Revised categories and report format changes effective May 2012.

During the month of June 2012, 144 9-1-1Net requests were completed relating to the Maui County MSAG database, with 1,817 customer ANI/ALI records updated as a direct result. 539 TN CR and one (1) ALI-DR transactions were submitted to 9-1-1Net for updates and corrections. See attached spreadsheet for a detailed description of changes and additions.

There are nine (9) records in Suspended status as of June 30, 2012, affecting nine (9) telephone numbers (TNs). An invalid MSAG address will result in a No Record Found (NRF) condition during a 9-1-1 call.

- Nine (9) suspended records are due to the TNs not having a valid address in the ALI record. Address validation requests for each customer TN were sent to the respective communications service provider. The respective communications service provider provided a TMK number for the ALI record. However, a TMK is not a valid address nor is it acceptable under current NENA guidelines and industry best practices for locating 9-1-1 callers. As a courtesy, Akimeka researched multiple databases, however, a valid address was not attached to the TMK assignment. The communications service provider is responsible for providing a valid MSAG address and for correcting the ALI record in accordance with NENA standards and the current E9-1-1 Wireline tariff.

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs.
	(b)	Represents ALI Discrepancies discovered during a 9-1-1 call. These record corrections are treated with a higher urgency.
	(c)	Represents what is in suspension status at the end of the report month -- awaiting further action by County, Telco, or Akimeka.

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **MSAG (continued)**

Emergency Service Number (ESN) Project Status – June 2012 Year-to-Date (YTD)

Island	Total # of Street Segments	# of Street Segments Assigned New ESNs	% Complete
Maui	5,000	4,984	99.7%
Lanai	112	112	100.0%
Molokai	500	500	100.0%

The ESN project is done on a per street segment basis. Street segments require research in both 9-1-1Net and Maui County GIS before a new ESN can be assigned. Verifying a street segment's address range and community prevents ESN overlapping and mislabeling. Once the street segment is verified in both MSAG and GIS – to ensure database synchronization – a request to update the ESN field in 9-1-1Net is sent.

Lanai and Molokai are 100.0% complete. This completes the assignment of ESNs to existing street segments. Going forward, ESN assignments to new street segments will part of the ongoing maintenance effort.

Maui is almost complete. Sixteen (16) records were pending change over to the newly assigned ESN. Once these changes have been processed, Maui will be at 100.0% complete. Going forward, ESN assignments to new street segments will part of the ongoing maintenance effort.

June 1, 2012 – June 30, 2012

• Mapping Layers Updated/Loaded Into GIS – June 2012 (continued)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

MAUI COUNTY				
Type of Layer	Island	Akimeka GIS Server	Date Loaded Into PSAP GIS Server	Other/Remarks
		Date Created/ Edits Performed		
SPECIAL REQUESTS				
Gate Codes	Maui/Molokai		06/13/12	
	Maui	06/08/12		Changed gate code for The Summit at Kaanapali per SR 491
HCS Monsanto Fields				
Tow Jurisdictions				

(*) Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

Note: The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Current Month GIS Activities – June 2012

- 06/14/12 Akimeka received an updated Parcels layer from the County of Maui's Real Property Tax Division.
- 06/14/12 Akimeka received Worldview-2 half meter imagery of Lanai and Molokai from the County of Maui's GIS department.
- 06/22/12 Akimeka prepared the following layers for an Intergraph CAD map push: Address Points, Street Centerlines, Gate Codes, WSP Cell Towers, and Subdivisions.
- 06/22/12 Akimeka conducted an Intergraph CAD map push with the Address Points, Common Places Lookup Table, Street Centerlines, Gate Codes, Subdivisions, and WSP Cell Towers data.

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• E9-1-1 Database Synchronization

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted the next quarterly database synchronization audit for Maui County in June 2012.

The database synchronization effort included comparing Maui County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **2,701** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on June 5, 2012 for Maui County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

Audit Summary Results – 2012

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of March 16, 2012		As of June 5, 2012	
		9-1-1 MSAG Dated 03-01-12		9-1-1 MSAG Dated 06-01-11	
		# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		2,744		2,701	
Less: 9-1-1 MSAG Exception Records	(1)	60	2.2%	60	2.2%
Net 9-1-1 MSAG Records Eligible for Comparison		2,684		2,641	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		2,435	90.7%	2,410	91.3%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	164	6.1%	158	6.0%
9-1-1 MSAG Record With No GIS Record	(3)	85	3.2%	73	2.8%
Total 9-1-1 MSAG Records No Match		249	9.3%	231	8.7%

Objective: NENA Recommended Match Rate = 98%

Maui County E9-1-1 Status Report June 1, 2012 – June 30, 2012

- **E9-1-1 Database Synchronization (continued)**
(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

Audit Summary Results – 2012 (continued)

Notes:

- (1) An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- (2) An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- (3) An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

Audit Summary Results – June 1, 2012 vs. March 1, 2012 MSAG

Maui County's level of accuracy or 9-1-1 Match percentage improved from 90.7% as of March 1, 2012 to 91.3% as of June 1, 2012

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **E9-1-1 Database Synchronization (continued)**
(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

Audit Summary Results – June 1, 2012 vs. March 1, 2012 MSAG (continued)

- ❖ Akimeka continues to work with the Maui County GIS and Planning Departments to validate GIS record errors. The items being validated with the County agencies include: invalid low/high address range, incorrect community, and/or incorrect ESN values. During the validation process, Akimeka identified new road segments that needed to be added to the 9-1-1 GIS and MSAG databases.
- ❖ “MSAG - GIS Minor Corrections” were reduced by 3.7% (164 to 158) from March 2012 to June 2012 respectively. Low and high address ranges were adjusted in the MSAG to correspond with the GIS record. Although this is a minor correction, customer telephone numbers (TNs) need to be validated by the service providers prior to adjusting an address range.
- ❖ “MSAG Record With No GIS Record” was reduced by 14.1% (85 to 73) from March 2012 to June 2012 respectively. The decrease in records were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Maui County records.
- ❖ “GIS Record With No MSAG Record” was significantly increased (15 to 64) from March 2012 to June 2012 respectively mainly due to the ESN project. The increase was due primarily to a lag between the GIS and MSAG record updates. New GIS records that were added to the Street Centerlines layer before the updates were completed in 9-1-1Net. Once 9-1-1Net is updated, the GIS and MSAG records will match.
- ❖ “GIS Record With Minor Corrections” were reduced by 5.1% (156 to 148) from March 2012 to June 2012 respectively. Low and high address ranges, street suffix, and MSAG Community were adjusted in the GIS to correspond with the MSAG record.
- ❖ Street segment GIS record errors were reduced by 5.9% (527 to 496) from March 2012 to June 2012 respectively. The street segment errors were validated by Maui County personnel or databases, corrected, and uploaded into the GIS Street Centerlines layer. The MSAG is also adjusted accordingly to reflect the change in GIS.
- ❖ Ongoing maintenance is critical to ensure the database synchronized level of address accuracy is maintained each time an MSAG or GIS record is “last modified”.

Maui County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **E9-1-1 Database Synchronization (continued)**
(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

Automatic Location Identification (ALI) Discrepancy Reports

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancy reports by community for Maui County. As of May 16, 2012, **10,011** ESN 399 records, representing **11.4%** of Maui County's total ALI records, require research and corrective action, if needed.

These ALI discrepancy reports will result in a No Record Found (NRF) condition during a 9-1-1 call.

The ALI discrepancy reports are primarily due to telephone numbers (TNs) with missing digit(s) in the address point, assigned to blank-to-blank ranges without an assigned customer or address, and attached to the wrong address point, street, customer or combination thereof.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 399 MSAG records and associated ALI records to a valid Maui County ESN and valid MSAG address.

Note: Total Calls include Administrative calls that are not direct 9-1-1 calls.

- (*) As reported manually by Hawaiian Telcom, Inc. (HTI) following the Solacom cutover on February 8, 2012: Transfer destination reports were not available. HTI reported that 1,818 calls were transferred to Fire covering the period February 8 – 29, 2012.

Notes:

- (1) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.
- (2) "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard CML reports do not provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.
- (3) Total call volumes include Administrative calls. (Administrative calls = Calls made between 911 positions but are not 911 calls.)

Hawai'i County E9-1-1 Status Report June 1, 2012 – June 30, 2012

• PSAP Operations

Current Month PSAP Operations Activities – June 2012

- Weekly (Every Thursday) The State of Hawai'i PSAPs and Akimeka participated in the weekly conference calls hosted by Hawaiian Telcom, Inc. (HTI) to review the Solacom conversion in the State of Hawaii. There has been no significant progress or improvement to date. Hawaii County still has not been able to achieve the same level of service and performance prior to the conversion, as promised by HTI.
- 06/10/12 -- Sergeant Travis Ing and Michelle Shiroma, along with Akimeka and representatives
06/14/12 from the other State of Hawaii PSAPs, attended the 2012 NENA Conference in Long Beach, California. There were education and training sessions dealing with Next Generation and its impact on the industry.

County of Hawai'i Conversion to NG9-1-1 Enabled Solacom Platform Update – June 2012

Due to the numerous outstanding issues, the County of Hawai'i Public Safety Answering Points (PSAPs) – Police and Fire – have not formally accepted the Hawaiian Telcom, Inc.(HTI) Solacom Next Generation 9-1-1 (NG9-1-1) enabled ESInet system as of June 30, 2012, which is approximately five (5) months since the February 8, 2012 cutover.

As of June 30, 2012, a total of **201** trouble reports have been documented as follows:

Trouble Category	# of Trouble Reports					Total Trouble Reports to Date
	February 2012	March 2012	April 2012	May 2012	June 2012	
Audio Issues	107	7	6	0	0	120
No ANI/ALI Transferring to the CAD	10	9	5	2	3	29
Feature Not Working and Screen Problems	8	0	0	1	0	9
Ringback Issues -- Inability to Callback 9-1-1 Callers	4	3	2	0	0	9
Transfer Issues to Secondary PSAP (Fire)	4	2	3	0	0	9
Transfer Issues Between Hawaii and Maui PSAP					2	2
Call History Not Complete or Available	2	3	0	0	0	5
Other (Printer Not Working, Miscellaneous Reports, TDD Not Working Properly, Testing Document Not Provided, Etc.)	6	7	1	4	0	18
Total Trouble Reports	141	31	17	7	5	201

There were two 9-1-1 call incidents in June 2012, whereby the 9-1-1 call was received by the Hilo PSAP but could not be transferred successfully to the Maui PSAP. One incident occurred on June 3, 2012 which resulted in a fatality in Hana, Maui. Another incident occurred on June 9, 2012.

No documentation and/or feedback/updates have been provided by HTI as to which of the **201** trouble reports have been closed with the PSAP's concurrence.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

County of Hawai'i Conversion to NG9-1-1 Enabled Solacom Platform Update – June 2012 (continued)

In an effort to address the post conversion issues, Hawaiian Telcom, Inc. (HTI) continues to host weekly (every Thursday) conference calls with the State of Hawai'i PSAPs to review the Solacom conversion in the State of Hawai'i. There appears to be no significant progress made to date.

Feedback and updates provided by HTI as of June 30, 2012 are as follows:

1. Incomplete/Bad ANI/ALI Information -- It appears that this issue involves overflow routes being used by all the service providers/Wireless Service Providers (WSPs). HTI reported that this was an existing issue on the CML platform. On the CML platform, there will be a blank ANI. On the Solacom platform, there will be an "anonymous" notification.

Since it was determined that this was an existing issue with the CML platform, HTI asked if this issue could be removed from the list of Solacom conversion issues.

Sergeant Matsumoto agreed to allow this issue to be removed from the Solacom issues since this was an existing issue on the CML platform.

2. Inability to Ringback 9-1-1 Callers -- HTI reported that a maintenance update was performed as scheduled on May 9, 2012. The purpose of the maintenance update was to resolve the issue of the intermittent inability to ringback callers.

The Hawai'i County PSAP dispatchers and supervisors performed a review and analysis of the ringback function from May 9, 2012 through May 17, 2012. Results of the analysis are as follows. Of the eighteen (18) ringback calls observed, 83.3% (15) were successful and 16.7% (3) were not successful.

This issue was closed out with the PSAP's concurrence on May 24, 2012. Unfortunately, the trouble ticket was re-opened on May 31, 2012 due to the occurrence of similar ringback issues. The Hawai'i County PSAP agreed to continue to monitor this issue throughout the month of June 2012.

Sergeant Matsumoto agreed to close this issue at this time. However, should there be future issues, a trouble report will be re-opened.

3. No ANI/ALI Information Transferring to the CAD -- This issue remains unresolved and is still under investigation by Solacom. The Hawai'i County PSAP reported that the only occurrence has been on the Hilo Solacom position and will be reported to Intergraph.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

County of Hawai'i Conversion to NG9-1-1 Enabled Solacom Platform Update – June 2012 (continued)

4. Greater Percentage of Wireless Phase I (WPHI I) Calls – This issue remains unresolved. HTI continued to adjust and evaluate the second delay within the network. Several attempts were made at re-adjusting the second delay. On June 7, 2012, the delay was set at four (4) seconds. On June 21, 2012, the delay was set at two (2) seconds. Based on all of this “trial and error” approach to problem solving, Sergeant Matsumoto recommended that the delay remain at two (2) seconds until additional data is provided by HTI

On June 8, 2012, HTI held a conference call with the Hawai'i County PSAPs to discuss this issue. HTI provided a PowerPoint presentation to review how the call information is received and presented to the PSAPs. This information is under review by the PSAPs.

(Note: Prior to the conversion, most of the wireless 9-1-1 calls delivered to the PSAP were Wireless Phase II calls upon initial delivery. Following the conversion, there has been a noticeable shift from Wireless Phase II calls to Wireless Phase I calls. As a result, there are more re-bid requests being required as compared to pre-conversion.)

5. Inability to Transfer Calls to the Secondary PSAP – HTI installed a software maintenance update on May 9, 2012. The purpose of this update was to resolve some operational issues with the original ACD configuration of “priority”. The software update appeared to resolve the ACD issue. As such, this issue was closed as of May 22, 2012 by Sergeant Matsumoto and Battalion Chief Gahan. This issue will continue to be monitored during the month of June 2012.

Since there have been no further incidents, this issue was closed.

6. No 9-1-1 Recording – This issue has not been resolved. HTI is still working with Solacom to provide an “All Operators Are Busy” recording for the Hawai'i County Police queue. Hawai'i County Fire closed this issue, however; Hawai'i County Police requested that this issue remain open.
7. Call History – This is still an open issue. Originally calls transferred to the secondary PSAP (Fire) from the primary PSAP (Police) would not retain history on the primary PSAP positions. HTI installed a software maintenance upgrade on May 9, 2012 to correct this problem. During testing, it was discovered that the record only becomes available when the caller disconnects from the final destination. Follow up action is needed by HTI to resolve this issue since the call transfer record is needed when the call is transferred. The Hawai'i County PSAPs (Police and Fire) also requested that they be provided the ability to print screen in order to document the call history and call transfer.

This issue continues to be investigated by HTI.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• PSAP Operations (continued)

County of Hawai'i Conversion to NG9-1-1 Enabled Solacom Platform Update – June 2012 (continued)

8. Transfer Calls Between Hilo PSAP and Maui PSAP -- In the month of June 2012, there were two (2) 9-1-1 call incidents whereby the 9-1-1 call was received by the Hilo PSAP but could not be transferred successfully to the Maui PSAP.

- a. On June 3, 2012, there was a fatality in Hana, Maui. The 9-1-1 call was received at the Hawai'i County Police PSAP and the call was transferred to the Maui PSAP. Unfortunately, the 9-1-1 call was dropped and when the 9-1-1 caller called back, the Hilo dispatcher was not able to transfer the call to the Maui PSAP and received an "all circuits busy" recording. The Hilo dispatcher then transferred the call to the Molokai PSAP to handle the call.

The "all circuits busy" recording clearly indicates that this was a Hawaiian Telcom network issue. According to Hawaiian Telcom, the Hilo PSAP was set up to transfer only one (1) call at a time on the Solacom platform. To resolve this issue, Hawaiian Telcom installed another trunk.

Maui County is currently doing an investigation regarding this incident.

- b. On June 9, 2012, it was reported by the Maui County PSAP that they received a 9-1-1 transfer call from the Hilo PSAP. The 9-1-1 call was announced to the Maui PSAP. However, when the 9-1-1 caller started to speak, the 9-1-1 call was disconnected. The Maui dispatcher attempted a ringback from both the CML equipment and PBX Admin lines, unfortunately it was not successful. The Maui dispatcher received a "your call cannot be completed as dialed" recording on both methods. The 9-1-1 caller did callback and the Hilo dispatcher remained on the line for the duration of the second 9-1-1 call with no problems.

HTI provided their initial report and performed subsequent testing. However, the responses were not to the PSAP's satisfaction.

Both the Maui County PSAP and Hawai'i County PSAPs will continue to monitor the transfer of 9-1-1 calls between the islands. This is of major concern since it directly impacts the PSAP's ability to respond to emergency calls and puts Public Safety at risk.

8. 9-1-1 Calls With No Audio and No ANI/ALI Information – These are old issues that have resurfaced. Sergeant Ing reported that from June 22 – 23, 2012, the Hawaii County PSAP received numerous calls with no audio, no ANI/ALI information, and "00" in the call leg field. According to HTI, these three (3) instances of trouble "all occurred on the same trunk group which was set to sequential hunting, meaning that events prior to the Central Office would hunt and not appear on the same channel of the hunt group at the Solacom. Also, any valid call should have ANI." HTI reported that no maintenance had been scheduled and no alarms were received on the trunk groups. HTI believed that the trunks may have taken a "hit" which they were not able to identify in the historical data. HTI also believed that the calls were not valid and were caused by abnormal network occurrences. As such, HTI recommended additional testing.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

County of Hawai'i Conversion to NG9-1-1 Enabled Solacom Platform Update – June 2012 (continued)

8. 9-1-1 Calls With No Audio and No ANI/ALI Information (continued)

On June 28, 2012, a conference with HTI was held to discuss this issue. It was discovered that an additional two (2) two-line rotary trunk groups were added to each of the Solacom switches for mainland alarm companies to route calls through. Traditionally, mainland alarm companies purchase a remote call forwarding (RCF) number from Hawaiian Telcom. With the implementation of Solacom, these mainland originating calls produce an "ANONYMOUS" call window in the Solacom equipment with no ANI information. To fix this problem, HTI installed a work around and provided the PSAPs with a diagram for future reference.

Implementation of the Hawaiian Telcom, Inc. (HTI) Solacom Next Generation 9-1-1 (NG9-1-1) enabled ESInet system has affected the County of Hawai'i PSAP operations. The time to answer, process and respond to E9-1-1 calls have been impacted. The County of Hawai'i PSAPs have also experienced a shift in the delivery of Wireless Phase II calls to more Wireless Phase I calls upon initial delivery. As a result, the PSAP is processing more re-bid requests.

The County of Hawai'i PSAPs' is no longer confident that HTI can resolve the issues since it has been almost five (5) months since the February 8, 2012 cutover.

HTI committed, prior to the conversion, that the County of Hawai'i PSAPs would receive same or better services and performance with the new Solacom platform as compared to the Plant/CML platform. Unfortunately, this has not been the case to date.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Open Issues (To be Monitored and Tracked by Akimeka)

Updates as of June 30, 2012 are noted below:

11/21/09 Akimeka will continue to monitor and track AT&T Mobility's open trouble ticket (11/21/09) for missing house number (HN), street and community information when transferring a WPH2 call or rebidding a WPH2 call. This issue was escalated to the State of Hawaii Wireless Enhanced 9-1-1 Board for action (August 2010). There have been no updates received to date. Unfortunately, the trouble is still occurring.

Akimeka will provide status updates via the Monthly Status Report (MSR) when there are significant changes or updates as provided by the State of Hawaii Wireless Enhanced 9-1-1 Board and/or AT&T Mobility.

Update (4/30/11) -- Hawaiian Telcom notified the Neighbor Island PSAPs that Intrado will be upgrading the ALI software to Version 5.0. A feature in this upgrade may potentially address the AT&T issue. This feature can be activated with the permission of all of the PSAPs across the State of Hawaii. This will be reviewed and discussed at the next Enhanced 9-1-1 Wireless Board Technical Committee meeting on May 10, 2011.

Update (5/31/11) -- All PSAPs sent in a written confirmation to Hawaiian Telcom, Inc. (HTI) to proceed with the software 5.0 upgrade. Testing has been scheduled for Monday, June 6, 2011.

Update (6/30/11) -- The ALI cache wireless option was installed by Hawaiian Telcom, Inc. (HTI) on June 5, 2011. Testing was conducted as scheduled on the Neighbor Islands on June 6, 2011. Testing began at 7:44 a.m. however, there was no improvement. House number (HN) and street and community information was still missing when transferring a WPH2 call or rebidding a WPH2 call. Akimeka contacted HTI to report the condition. HTI and Intrado addressed the issue and testing continued. Results of the re-bidding of a WPH1 to WPH2 (GSM) call displayed the tower information and city. However, when testing UMT to UMT calls, the tower information and city were missing. In addition, the COF fields remained constant at 271 meters for every Phase II test call received. Akimeka reported this to Intrado for review.

In June 8, 2011, HTI notified the PSAPs that they believe the ALI caching trouble was resolved and all information sent on re-bids is in compliance with what is being sent by AT&T Mobility. As such, any additional discrepancy of calculated accuracy pertaining to the confidence factor (COF) should be reported to AT&T Mobility.

Update (7/1/11 – 6/30/12) – No further updates.

Hawai'i County E9-1-1 Status Report June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Open Issues (To be Monitored and Tracked by Akimeka) (continued)

Updates as of June 30, 2012 are noted below:

04/16/10 Akimeka personnel worked on a flowchart for the Neighbor Island PSAPs to document the flow of a Call Routing Spreadsheet (CRS) and Testing Validation Worksheet (TVW). It was discovered that different processes exist among the carriers.

Akimeka created and submitted for review a DRAFT Call Routing Sheet (CRS) and Testing Validation Worksheet (TVW) process flowchart to the Neighbor Island PSAPs on December 20, 2010.

Update (4/30/11) – Akimeka continued to work on the flowchart and incorporate the feedback received. An updated process flowchart is currently under review within Akimeka. Once approved, it will be shared with the Neighbor Island PSAPs.

Update (5/1/11 – 7/31/11) – In progress.

Update (8/31/11) – In progress. Personnel updates need to be incorporated.

Update (9/1/11 – 11/30/11) – No further updates.

Update (12/31/11) – In progress. NENA standards updates are being incorporated.

Update (1/31/12 – 6/30/12) – No further updates.

Hawai'i County E9-1-1 Status Report June 1, 2012 – June 30, 2012

• MSAG

Current Month – June 2012

2012		9-1-1NET REQUESTS									In Suspended Status as of Report Month End (c)	
		MSAG TRANSACTIONS							ALI TRANSACTIONS			
		PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Submitted (a)	ALI Discrepancy (ALI-DR) Submitted (b)
HAWAII	453	408	259	34	30	33	52	2,899	39	6	5	5

Revised categories and report format changes effective May 2012.

During the month of June 2012, 408 9-1-1Net requests were completed relating to the MSAG database, with 2,899 customer ANI/ALI records updated as a direct result. 39 TN CR and six (6) ALI-DR transactions were submitted to 9-1-1Net for updates and corrections, as needed. See attached spreadsheet for a detailed description of changes and additions.

There are five (5) records in Suspended status as of June 30, 2012 affecting five (5) telephone numbers (TNs). An invalid MSAG address will result in a No Record Found (NRF) condition during a 9-1-1 call.

- Four (4) suspended records are due to the TNs not having a valid address in the ALI record. Address validation requests for each customer TN were sent to the respective communications service provider. The respective communications service provider provided a TMK number for the ALI record. However, a TMK is not a valid address nor is it acceptable under current NENA guidelines and industry best practices for locating 9-1-1 callers. As a courtesy, Akimeka researched multiple databases, however, a valid address was not attached to the TMK assignment. The communications service provider is responsible for providing a valid MSAG address and for correcting the ALI record in accordance with NENA standards and the current E9-1-1 Wireline tariff.
- One (1) suspended record is due to a discrepancy between information provided by the Hawai'i County website and information provided by Hawaiian Telcom, Inc. (HTI). HTI will not authorize a change to the database if their information does not agree with the County website. Akimeka met with HTI on January 24, 2012, to discuss new corrective processes to address suspended records and ongoing ALI discrepancies. However, there has been no further discussions or agreements reached.

<u>Note:</u>	Street Centerline, Address Points, and Parcels layers are provided by Hawaii County.
	Akimeka has been instructed to not perform any edits on the Parcels layers as provided. Akimeka uploads the layer into the Akimeka GIS Server and PSAP GIS Server accordingly.
	For the Street Centerline and Address Points layers, effective November 25, 2009, Akimeka will compare and incorporate the County's changes into Akimeka's Street Centerline and Address Points layer.

Current Month GIS Activities – June 2012

06/05/12 Akimeka prepared and published the Address Points, Street Centerlines, Police ESZ, and Fire ESZ layers for an Intergraph CAD map update.

Hawai'i County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- Mapping Layers Updated/Loaded Into GIS – June 2012**
(continued)

Address Points and Street Centerlines Update Comparison

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers. In the month of May 2012, Akimeka added a process to identify changes to the Street Segment Names which has been included in the chart below.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawai'i County Planning Department on June 20, 2012. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
# of New Street Segments Added		13
# of New Street Segments Removed		0
# of New Addresses Added	68	
# of New Addresses Removed	5	
# of Street Segment Range Changes		211
# of Street Segment Name Changes		3
# of Street Name Changes	12	
# of Street Number Changes	231	

Note: Some Address Points have its street name and street number changed at the same time. These are counted as separate actions since these changes are needed to make the layers "9-1-1 capable" for dispatch and response.

Note: Total Calls include Administrative calls that are not direct 9-1-1 calls.

Notes:

- (1) Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)
- (2) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.
- (3) "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard CML reports do not provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• PSAP Operations (continued)

Wireless Test – June 2012

Date	WSP	Sites Tested	Sectors Tested	Tested By	Test Pass/Fail
06/19/12	AT&T Mobility (GSM Overflow Route Test)	1	1	Kauai PSAP	Pass

Current Month PSAP Operations Activities – June 2012

Weekly (Every Thursday)	Kauai County, along with the other PSAPs and Akimeka, participated in the weekly conference calls hosted by Hawaiian Telcom, Inc. (HTI) to review the Solacom conversion in the State of Hawaii. There has been no significant progress or improvement to date. Hawaii County still has not been able to achieve the same level of service and performance prior to the conversion, as promised by HTI.
06/28/12	Akimeka proactively requested and received Verizon Wireless' complete CRS to perform a special audit to validate all of Verizon Wireless' towers on Kauai. The special audit was deemed necessary due to the number of changes and updates. The purpose of the special audit is to ensure all cell towers and sectors have been updated and reflected in the WSP Cell Towers and WSP Cell Sectors (Polygon) layers.

VisionAIR/911 Inc. Integrated CAD Replacement Project

Unfortunately, key issues required to move forward have not been resolved. Highlights of the June 6, 2012 and June 20, 2012 follow up conference calls with Hawaiian Telcom are as follows:

1. Current 9-1-1 Service Delivery to the County of Hawaii – Enhanced 9-1-1 (E9-1-1) vs. Next Generation 9-1-1 (NG9-1-1)

Hawaiian Telcom re-confirmed that they are currently providing E9-1-1 service and their existing tariffs cover this service. When Next Generation 9-1-1 (NG9-1-1) is available, Hawaiian Telcom will take the appropriate action.

2. Network Connectivity and Compatibility Issues

Because NENA's i3 architecture is not fully defined, Hawaiian Telcom will not support a custom non-standard solution for 9-1-1 call delivery because of the risk involved with ongoing software patching and regression testing that could impact 9-1-1's critical service and Public Safety.

It was re-iterated that this is a collective decision by Hawaiian Telcom to not support a custom non-standard solution and compatibility details will not be provided.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

VisionAIR/911 Inc. Integrated CAD Replacement Project (continued)

2. Network Connectivity and Compatibility Issues (continued)

Hawaiian Telcom will not support an IP-based 9-1-1 delivery that is not Solacom from end-to-end. This prevents the PSAPs from deciding upon technology inside their facilities and seems to conflict with the existing tariff language on demarcation.

Given Hawaiian Telcom's position, Kauai County requested if Hawaiian Telcom can provide Hawaiian Telcom/Solacom's API standards so 911 Inc. can better understand what Hawaiian Telcom is expecting. Hawaiian Telcom contacted Solacom to discuss what documentation can be made available. Hawaiian Telcom requested the SIP messaging standards and documentation. This is still an open issue.

3. ALI Database Access

Hawaiian Telcom confirmed that they can deliver an ALI feed to VisionAIR/911 Inc.'s equipment on a live 9-1-1 call. This is no longer an issue.

However, Hawaiian Telcom's position has not changed with regards to providing Kauai County with an electronic file of the ALI database. The ALI database is necessary in order for the County to validate subscribers' addresses and the routing of 9-1-1 calls in accordance with the current E9-1-1 tariff.

Kauai County suggested if Hawaiian Telcom could provide the ALI data/information if the subscriber name was removed and merely the address and telephone number was provided to Kauai County. Hawaiian Telcom reviewed the request and declined to accept the request.

As such, Kauai County asked if Hawaiian Telcom's Regulatory folks could participate on the next scheduled call since there are a lot of open regulatory related issues.

4. Transition Plan from E9-1-1 to NG 9-1-1

Hawaiian Telcom shared that it has no immediate plans to deliver a Next Generation 9-1-1 solution until the i3 standards have been established and ratified. Hawaiian Telcom later clarified that their requirement for i3 standards being finalized prior to NG 9-1-1 delivery was limited to PSAPs choosing to implement a non-Solacom solution at their facilities. Additionally, Hawaiian Telcom has yet to discuss NG 9-1-1 integration with the wireless carriers, but confirmed that associated requirements for i3 standards at that level would pose a similar barrier/delay. Hawaiian Telcom suggested that the discussion of implementing Next Generation features and services for the State of Hawaii should be driven by the State of Hawaii E9-1-1 Board.

The next follow-up conference call is scheduled for July 11, 2012.

Given the complexity of the situation and circumstances, Kauai County requested the assistance of the State of Hawaii E9-1-1 Board to resume discussions regarding the delivery of Next Generation 9-1-1 for the State of Hawaii, work with the Technical Committee to "stand up" the agreed upon Investigative Regulatory Committee, and review the PSAP Monthly Status Reports from Kauai and Hawaii County which documents the challenges faced by the respective PSAP.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Open Issues (To be Monitored and Tracked by Akimeka)

Updates as of June 30, 2012 are noted below:

11/21/09 Akimeka will continue to monitor and track AT&T Mobility's open trouble ticket (11/21/09) for missing house number (HN), street and community information when transferring a WPH2 call or rebidding a WPH2 call. This issue was escalated to the State of Hawaii Wireless Enhanced 9-1-1 Board for action (August 2010). There have been no updates received to date. Unfortunately, the trouble is still occurring.

Akimeka will provide status updates via the Monthly Status Report (MSR) when there are significant changes or updates as provided by the State of Hawaii Wireless Enhanced 9-1-1 Board and/or AT&T Mobility.

Update (4/30/11) -- Hawaiian Telcom notified the Neighbor Island PSAPs that Intrado will be upgrading the ALI software to Version 5.0. A feature in this upgrade may potentially address the AT&T issue. This feature can be activated with the permission of all of the PSAPs across the State of Hawaii. This will be reviewed and discussed at the next Enhanced 9-1-1 Wireless Board Technical Committee meeting on May 10, 2011.

Update (5/31/11) -- All PSAPs sent in a written confirmation to Hawaiian Telcom, Inc. (HTI) to proceed with the software 5.0 upgrade. Testing has been scheduled for Monday, June 6, 2011.

Update (6/30/11) -- The ALI cache wireless option was installed by Hawaiian Telcom, Inc. (HTI) on June 5, 2011. Testing was conducted as scheduled on the Neighbor Islands on June 6, 2011. Testing began at 7:44 a.m. however, there was no improvement. House number (HN) and street and community information was still missing when transferring a WPH2 call or rebidding a WPH2 call. Akimeka contacted HTI to report the condition. HTI and Intrado addressed the issue and testing continued. Results of the re-bidding of a WPH1 to WPH2 (GSM) call displayed the tower information and city. However, when testing UMT to UMT calls, the tower information and city were missing. In addition, the COF fields remained constant at 271 meters for every Phase II test call received. Akimeka reported this to Intrado for review.

In June 8, 2011, HTI notified the PSAPs that they believe the ALI caching trouble was resolved and all information sent on re-bids is in compliance with what is being sent by AT&T Mobility. As such, any additional discrepancy of calculated accuracy pertaining to the confidence factor (COF) should be reported to AT&T Mobility.

Update (7/1/11 – 6/30/12) – No further updates.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **PSAP Operations (continued)**

Open Issues (To be Monitored and Tracked by Akimeka) (continued)

Updates as of June 30, 2012 are noted below:

04/16/10 Akimeka personnel worked on a flowchart for the Neighbor Island PSAPs to document the flow of a Call Routing Spreadsheet (CRS) and Testing Validation Worksheet (TVW). It was discovered that different processes exist among the carriers.

Akimeka created and submitted for review a DRAFT Call Routing Sheet (CRS) and Testing Validation Worksheet (TVW) process flowchart to the Neighbor Island PSAPs on December 20, 2010.

Update (4/30/11) – Akimeka continued to work on the flowchart and incorporate the feedback received. An updated process flowchart is currently under review within Akimeka. Once approved, it will be shared with the Neighbor Island PSAPs.

Update (5/1/11 – 7/31/11) – In progress.

Update (8/31/11) – In progress. Personnel updates need to be incorporated.

Update (9/1/11 – 11/30/11) – No further updates.

Update (12/31/11) – In progress. NENA standards updates are being incorporated.

Update (1/31/12 – 6/30/12) – No further updates.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

• MSAG

Current Month – June 2012

2012		9-1-1NET REQUESTS									In Suspended Status as of Report Month End (c)	
		MSAG TRANSACTIONS							ALI TRANSACTIONS			
		PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Submitted (a)	ALI Discrepancy (ALI-DR) Submitted (b)
KAUAI	27	9	5	0	0	4	0	118	18	0	22	22

Revised categories and report format changes effective May 2012.

During the month of June 2012, nine (9) 9-1-1Net requests were completed relating to the MSAG database, with 118 customer ANI/ALI records updated as a direct result. Eighteen (18) TN CRs were submitted to 9-1-1Net for updates and corrections. See attached spreadsheet for a detailed description of changes and additions.

There are twenty-two (22) records in Suspended status as of June 30, 2012 affecting 22 telephone numbers (TNs). An invalid MSAG address will result in a No Record Found (NRF) condition during a 9-1-1 call.

- Seventeen (17) suspended records are due to the TNs not having a valid address in the ALI record. Address validation requests for each customer TN were sent to the respective communications service provider. The respective communications service provider provided a TMK number for the ALI record. However, a TMK is not a valid address nor is it acceptable under current NENA guidelines and industry best practices for locating 9-1-1 callers. As a courtesy, Akimeka researched multiple databases, however, a valid address was not attached to the TMK assignment. The communications service provider is responsible for providing a valid MSAG address and for correcting the ALI record in accordance with NENA standards and the current E9-1-1 Wireline tariff.
- Five (5) suspended records are due to the TNs being on Federal property and not having a valid address in the ALI record. Address validation requests for each customer TN were sent to the respective communications service provider. The communications service provider provided a TMK number for the ALI record. However, a TMK is not a valid address nor is it acceptable under current NENA guidelines and industry best practices for locating 9-1-1 callers. As a courtesy, Akimeka researched multiple databases, however, a valid address was not attached to the TMK assignment. The communications service provider is responsible for providing a valid MSAG address and for correcting the ALI record in accordance with NENA standards and the current E9-1-1 Wireline tariff.

Note: Revised categories and report format changes effective May 2012 with new Intrado TN CR functionality.

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs.
	(b)	Represents ALI Discrepancies discovered during a 9-1-1 call. These record corrections are treated with a higher urgency.
	(c)	Represents what is in suspension status at the end of the report month -- awaiting further action by County, Telco, or Akimeka.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- Mapping Layers Updated/Loaded Into GIS – June 2012

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

KAUAI			
Type of Layer	Akimeka GIS Server	Date Loaded Into PSAP GIS Server	Other/Remarks
	Date Created/ Edits Performed		
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)			
Address Points		06/28/12	
	06/21/12		Assigned Street Centerline Names for address points that are Points of Interest (POI)
		06/14/12	
Emergency Callboxes			
Fire Beats			
Fire Districts			
Fire Response Areas			
Fire Stations			
Incident Response Area			
Major Roads			
MSAG Communities (aka Towns)			
Medic Beats			
Medic Districts			
Medic Response Areas		06/28/12	
	06/27/12		Corrected Medic 21 to Lihue
Medic Stations			
Milepost Markers			
Points of Interest		06/28/12	
	06/21/12		Corrected a restaurant name
	06/15/12		Added plantation camps
		06/14/12	
	06/04/12		Edited fields in order to standardize POI layers across PSAPs in the State of Hawaii
Police Beats			
Police Districts			
Police Response Areas			
Police Stations			
Schools			
Street Centerlines		06/28/12	
	06/21/12		Extended range to fit address points
		06/14/12	
	06/01/12		Named and ranged Street Centerlines

(*) Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

KCC Callboxes			

(*) Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

Note: The Parcels layer is provided by Kauai County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS Server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Kauai County E9-1-1 Status Report

June 1, 2012 – June 30, 2012

- **Mapping Layers Updated/Loaded Into GIS – June 2012**
(continued)

Current Month GIS Activities – June 2012

- 06/01/12 The Kauai County PSAP reported warning lights on the alarm panel of the Sentry Server. These lights are warnings sent to the Administrator of a potential risk at the workstation. The Sentry Server was reset and the issue was resolved.
- 06/18/12 -- Akimeka personnel attended GeoComm GeoLynx DMS training.
06/20/12
- 06/22/12 -- Akimeka prepared and copied the following updated layers to Kauai's GeoComm
06/27/12 computer: Address Points, WSP Cell Sectors, WSP Cell Towers, ESN, Fire Beats, Fire Response Areas, Fire Stations, Food & Beverage, IRA, Medic Beats, Medic Response Areas, MSAG Communities, Parcels, Points of Interest, Police Beats, Police Districts, Street Centerlines, and Subdivisions.
- 06/28/12 Akimeka replaced the WSP Cell Sectors and WSP Cell Towers layers on Kauai's GeoComm computer for a GeoLynx map update.
