Definitions

- (A) **Dispatchable Location** - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.
- (B) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (C) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
- (D) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

MSAG CURRENT MONTH NOTES:

A total of **269** MSAG transactions were processed in 9-1-1 Net during the current month. **32** requests were processed relating to the MSAG database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **280** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

235 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 299 clean-up effort and the Dispatchable Location Project. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Two (**2**) ALI DRs were submitted as the result of 9-1-1 calls from residences in Kailua Kona and Ocean View. Hawaii County Fire submitted this request to Akimeka to update the customer information and the discrepancy was corrected in 9-1-1 Net.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 283 Open TN CR Transactions.**
- **Refer to chart in the next section “TNCR Current Status”**

283 Open TN CR transactions are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Once a telephone number is submitted to West for correction, it is verified against HT records and/or by the customer. West's internal process requires calling each telephone customer individually for verification to update an address in the 9-1-1 database. Akimeka continues to monitor and track the progress of the remaining 283 Referred records.

- **There is currently one (1) Open ALI-DR**

One Open ALI DR was submitted in July 2016 for a business in Kailua Kona. Akimeka will continue to monitor this discrepancy until it is updated.

- **There are currently no Open VoIP DRs.**

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – FEBRUARY 2017

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)

County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES (INTRADO)	OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES (INTRADO)	TOTAL UNOPENED TNCR RECORDS
HAWAII	283	130	135	18

STATUS

TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1

PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.

REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.

TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

DISPATCHABLE LOCATION – STATUS AS OF – FEBRUARY 2017

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. There were a total of **1,121** Dispatchable Locations processed in 2016.

Dispatchable Location			
2017	Common Place Name MSAG Address	TNCR* Transactions Submitted	Transactions Processed**

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

CHARTER COMMUNICATIONS (TIME WARNER) VOIP DATABASE TNCR

Akimeka received Automatic Location Identification (ALI) records from Charter Communications (formally known as Time Warner) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka had access to these ALI Records, Akimeka was able to perform a three way comparison. This comparison is a validation of the ALI Record to ensure the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The Analysis of the database records indicated there were invalid MSAG addresses utilized by the VoIP Provider, however, the majority of these records were corrected, or sent back to Charter for further location clarifications. Akimeka was able to verify the majority of the VoIP records had a valid MSAG address assigned and matched with the GIS information. Akimeka has also initiated a correction process with Charter Communications on behalf of the PSAPs in order to perform timely corrections to the remaining VoIP 9-1-1 Records, and to ensure new VoIP customers receive valid MSAG addresses to improve their 9-1-1 location service.

Charter Communications 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)			
PSAP	TOTAL RECORDS SUBMITTED BY CHARTER (A)	RECORDS REQUIRING FURTHER INFORMATION BY CHARTER (B)	RECORDS CORRECTED AND RETURNED TO CHARTER BY AKIMEKA (C)
HAWAII County	19,135	5	33
KAUAI County	7,911	7	39
MAUI County	15,629	0	7
OAHU Civilian	82,256	5	66
TOTAL	124,931	17	145

(A)	VoIP Database records submitted by Charter to Akimeka for research and MSAG address validation.
(B)	Akimeka was not able to determine an MSAG valid address with the information provided. Charter is advised to contact customer and provide Akimeka with a TMK or driving directions.
(C)	Akimeka researched and provided Charter with an MSAG valid address.

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
2/28/2017	Spillman deliverable which included the following updated layers: Address Points, Common Names Alt Table, Display Streets, Points of Interest, POI Alt Names, Street Centerlines, Street Alt Names, Street Routes, Lodging
2/21/2017	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Points of Interest, and Street Centerlines.
2/14/2017	Spillman deliverable which included the following updated layers: Address Points, Common Names Alt Table, Display Streets, Points of Interest, POI Alt Names, Street Centerlines, Street Alt Names, Street Routes

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawai'i County Planning Department on **February 15, 2017**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	97	
Addresses Removed	0	
Address Street Name Changes	0	
Address Street Number Changes	0	
New Street Segments Added		0
Street Segments Removed		0
Street Segment Range Changes		3
Street Segment Name Changes		1

NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

POLICE BEAT REVIEW

Beginning in late 2015 and continuing in January 2016, Akimeka has been conducting a Police Beats review process as part of an annual update and in addition, preparation for Hawaii County's CAD system deployment. During this time, the Police Beats are also reviewed with the written descriptions of the Hawaii Police Beat Boundaries, whereby corrections are made to the Police Beat GIS layer where applicable in an effort to synchronize the GIS layer with the written descriptions and provide the 911 centers in Hawaii with a more accurately defined boundary layer which align with operational jurisdictions.

1. To better service the public safety needs of Hawaii County, Akimeka compared the written descriptions of the Hawaii Police Beats as recorded in Document Number GO 204 with an effective date of June 27, 2011, and made corrections to the Police Beats GIS layer where needed. In addition, Akimeka has been documenting any recommendations for document description updates.
 - a. Akimeka reviewed the written descriptions for the Hawaii Police Beats and cross referenced it to the Police Beats GIS layer. The boundaries to all seventy-six police beats as well as the area falling within the jurisdiction of the Hawaii Volcanoes National Park were edited for greater accuracy.
 - b. Akimeka has documented all potential discrepancies between the written descriptions and GIS layer for a thorough review upon completion. Akimeka has also produced several maps to better illustrate some of the larger discrepancies.
 - c. Upon completion of the GIS editing procedures, Akimeka will participate in a Police Beat review process with the Hawaii Police Department to further refine the boundaries to the Police Beats GIS layer and the written descriptions for those boundaries. This process will finalize the synchronization between the GIS layer and the written descriptions; provide additional precision and accuracy to both the GIS layer and written descriptions; and eliminate all discrepancies so that confusion and/or misinterpretation of those boundaries do not hinder public safety needs.
 - d. During the month of February 2016, Akimeka corrected the boundaries to the GIS layers that are associated with the Police Beats so that proper alignment would occur between the associated layers. This included correcting boundaries to six ESNs and three Police Districts. Those corrected layers were delivered to MapFlex and made available to the dispatchers on February 17th.
 - e. During the month of March 2016, Akimeka corrected the boundaries to the Police Response Areas so they would be aligned properly with the Police Beats and be topologically error free. This included correcting the boundaries to all seventy-six police response areas as well as the area falling within the jurisdiction of the Hawaii Volcanoes National Park.
 - f. During the month of August 2016, Akimeka is awaiting the final review process of the Police Beat layer with the Hawaii Police Department. Besides the Police Beat layer, the review process with the Hawaii Police Department will also likely include a review process of the Police Districts layer as well as the Police Response Areas layer.
 - g. During the month of September 2016, Akimeka began creating a series of large-scale maps to illustrate in detail the police beat boundaries. The maps are anticipated to be completed during October 2016, at which time they will be made available for examination by the Hawaii Police Department for accuracy.
 - h. During the month of October 2016, Akimeka created the first draft of a series of seventy-seven large-scale maps – one map for each police beat as well as one map of the entire county. Besides police beat boundaries, streets, and aerial imagery, the maps also contain points of interest that are referenced within the written descriptions of the Hawaii

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

Police Beat Boundaries, as well as other important features such as high schools, colleges, and major attractions so that the maps will be easier to validate the accuracy of. After reviewing the maps, Akimeka recognized enhancements that could be made to them to further their value as a communication device so that a more thorough review process can take place, which will ultimately result in greater informed decision making in regards to boundary and written description revisions.

- i. During the month of December 2016, Akimeka proposed boundary modifications to Police Beats 148, 430, and 435 to the Hawaii Police Department. The proposed boundary modifications would have the affected beats intersect between the new Daniel K Inouye Hwy and Mile Marker 43, rather than the southern boundary of the Kilohana Girl Scout Camp. To help illustrate the boundary modifications, Akimeka sent the Hawaii Police Department a map detailing the current and proposed boundaries of the area that would be affected by the change. The Hawaii Police Department notified Akimeka that such a change would require a process of reviews and proposals. Akimeka is now awaiting the results of this process, at which time the final drafts of the Police Beat Maps will be completed and ready for examination.
- j. During the month of January 2017, Akimeka was awaiting the results of the reviews and proposals process by the Hawaii Police Department.
- k. During the month of February 2017, Akimeka was awaiting the results of the reviews and proposals process by the Hawaii Police Department.

CAD SYSTEM DEPLOYMENT

During the 2015 year, the Hawaii County Police Department has conducted thorough research and has decided to implement a new CAD (Computer Aided Dispatch) system. Through their selection process, they have chosen the Spillman Technologies CAD system to best fit their operational needs. Throughout the coming months there will be much coordination between the Hawaii Police Department, Hawaii IT Department, Akimeka, and Spillman Technologies to deploy the Spillman Technologies CAD system with absolute success.

1. The Hawaii Police Department, Akimeka, and Spillman Technologies have begun introductory coordination and information sharing to ensure a successful deployment of the new CAD system, which will improve dispatch efficiency.
 - a. On January 15, 2016, Spillman Technologies held a webinar and discussion on their Geobase process which HPD, Spillman Technologies, and Akimeka were in attendance. The discussion was high-level and pertaining to the GIS database and how it is integrated within the Spillman Technologies CAD architecture.
 - b. In February 2016, Spillman Technologies was on-site at the Hawaii Police Department to host an official kick-off meeting and technical discussion which Akimeka was also in attendance. During the meeting Akimeka presented the entire GIS dataset via webinar. Spillman Technologies was impressed with the quality of the GIS data and is looking forward to the project.
 - c. In May 2016, the final NDA were completed with Akimeka, Spillman Technologies, and the Hawaii Police Department.
 - d. On May 31, 2016, Akimeka's GIS Manager and two representatives from the Spillman Technologies team met to discuss the timeline, requirements, and where they can work together to make this a successful project and on schedule.

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

- i. Spillman Technologies is currently in the process of getting the server(s) packaged/shipped on site. Once these are in place, more timeline milestones will be established with preparing the data for configuration on the server, etc.
- e. During the month of August 2016, there was significant coordination done between Akimeka and Spillman Technologies to get an initial GIS dataset ready for configuration.
 - i. There was a slight delay in getting a connection to the Hawaii County server during the beginning of August but was quickly remediated. In the meantime while, Spillman was on-site getting server connections set up, Akimeka was preparing the GIS data for the CAD system. Several preparation took place and included a variety of QA items to ensure the best possible data to be configured.
 - ii. On August 24, 2016, Akimeka uploaded an initial GIS dataset containing the core data, meaning the functional data that makes the system work. The display layers intended to perform labeling, set up different symbols, and establish the basemaps will come after the initial data has been given the go ahead.
 - iii. On August 29, 2016, Spillman Technologies followed up with Akimeka to let them know the data looked good on their end. They ran testing on addresses, common places, and mile markers and all were good.
 - iv. On August 30, 2016, Akimeka was on-site to meet with the Hawaii Police Department and Spillman Technologies. Akimeka, along with the supervisors of the Hawaii Police 911 Center, observed during a Spillman Cad Mapping demonstration that the initial base GIS layers that were provided by Akimeka were installed and functioning flawlessly with no issues. CAD project proceeding as planned. Previous issues regarding the 911 GIS layers for the Hawaii Fire Department were discussed and resolved. Spillman Technologies will be reaching out to the Hawaii Fire Department personnel regarding data input into the Spillman CAD System. This information was conveyed to the Hawaii Fire Department representative along with the Hawaii County Information Technology Manager during a separate meeting that Akimeka and Hawaii Police Department attended at the Hawaii County ITD office.
 - v. During the month of September, Akimeka continued with routing deliverables for the Spillman CAD system. One deliverable during the beginning of September included 45 display layers to be used for making the pin maps more aesthetically pleasing and useful for the dispatchers.
 - vi. During the month of October, Hawaii County Police and Fire, Akimeka, and Spillman was on-site for the mock Go-Live.
 - 1. The on-site meetings were a success and Akimeka and Spillman worked together to provide some enhancements to the mapping, such as hillshades to provide some terrain features in the mapping.
 - 2. Spillman rolled out their new mapping display which was well received by Hawaii County.
 - 3. Akimeka met with Hawaii Fire to go over the First In boundaries and agreed to make some slight modifications to include third, fourth, and fifth level responses, which will be a follow on item to work on.
 - 4. There were some records that needed some updating and Akimeka took this as an action item.
 - vii. Throughout the remainder of October 2016, Akimeka and Spillman continued to work together to ensure the project is successful.
 - 1. Akimeka provided several addition GIS updates, which included new Water Response Areas for Police, Fire, and Medics. In addition, several deliverables that included new Common Names and updates as well.
 - viii. During the month of November 2016, Akimeka created a new layer to be used in the Spillman CAD. This new layer, *Fire EMS Zone*, replaces the layer *First In*, and is configured to provide enhanced labeling.
 - ix. Throughout the month of December 2016, Akimeka continued to deliver data for the Spillman project on a bi-weekly basis.
 - x. In January 2017, Akimeka and Spillman implemented a new GIS delivery process where the geodatabase is directly updated, thereby cutting out some unnecessary steps on the pre-processing CAD side making this a more efficient and accurate process. In addition, the geodatabase names were slightly updated as well.
 - xi. Throughout the month of January 2017, Akimeka continued to deliver data for the Spillman project on a bi-weekly basis using the new GIS delivery process.

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

- xiii. Throughout the month of February 2017, Akimeka continued to deliver data for the Spillman project on a bi-weekly basis.

COMMON NAMES UPDATE

In September 2016, Akimeka was provided a spreadsheet by the Hawaii Fire Department of common names that they wished to be included in the Spillman Technologies CAD system. Akimeka immediately reviewed the spreadsheet and developed a strategy and timeline for ensuring that all the common names on the spreadsheet be included in the GIS data that is used in their Spillman Technologies CAD and MapFlex systems.

1. In late September 2016, Akimeka received, and immediately reviewed, a spreadsheet by the Hawaii Fire Department of common names that they would like included in their Spillman CAD system. The spreadsheet contains a list of four hundred eighteen multi-family residential complexes, most of which are apartment, condominium, and townhouse complexes.
 - a. Akimeka developed a strategy for completing this large update, which includes a timeline whereby thirty of the updates will be completed before the Spillman CAD go-live date, which takes place in the first week of October 2016, followed by a minimum of fifty updates for each of the subsequent Spillman CAD updates taking place every two weeks. At that projected rate, the updates will be completed in January 2017.
 - b. During the month of October 2016, Akimeka kept the projected pace to be completed with the multi-family residential complexes updates in January 2017.
 - c. During the month of November 2016, Akimeka kept the projected pace to be completed with the multi-family residential complexes updates in January 2017.
 - d. During the month of December 2016, Akimeka kept the projected pace to be completed with the multi-family residential complexes updates in January 2017.
 - e. During the month of January 2017, Akimeka finished verifying and including all possible updates into the address points and points of interest layers as recommended by the spreadsheet that was provided by the Hawaii Fire Department.
 - f. During the month of February 2017, no activity took place with the common names update.

MAPFLEX SYSTEM

During the month of February 2017, the MapFlex system received updates manually as a result of MapFlex having several issues pertaining to the automated upload processes.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, West, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 and 2016 years.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in February 2017
 - a. **Hawaii County** – Feb 21, 2017
 - b. **Maui County** – Feb 21, 2017
 - c. **Kauai County** – Feb 21, 2017
 - d. **Honolulu** – Feb 21, 2017

MAPFLEX ISSUES

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

Below is a detailed list of issues regarding the MapFlex systems throughout the State of Hawaii.

DATE	ISSUE	DESCRIPTION	STATUS
7/24/2016	Automatic Uploads Malfunctioning	It was identified that the Automatic uploads were creating issues within the MapFlex systems, where locators were not being published, etc. as a result of a scripting error at West. Manual uploads have been taking place of the GIS as necessary and agreed by all PSAPs.	Pending
7/24/2016	Blank MapFlex Screen	The MapFlex screen went blank and there was no mapping capability, similar to what had occurred with Maui PD. Resulted from West's automatic update script. All of the PSAPs agreed to hold off on all GIS updates in MapFlex until West has resolved the issue.	Resolved (Nov 2016)
8/2016	Wireless Addresses	MapFlex system began displaying wireless information incorrectly. MapFlex system is doing a reverse query for additional information in the GIS and this is overriding the ALI information with the closest address in the GIS.	Resolved (Nov 2016)
8/2016	Text-to-911 Icons	Icons for text calls have stopped displaying. Previously when calls came in as a text call, there would be an icon displaying "TEXT" where the call was plotted.	Resolved (Nov 2016)
11/2016	Phase I Display	Wireless Phase I calls plotting at centroid of coverage area and landing in the ocean. After installation of new MapFlex version to correct other issues, the configurations for Wireless Phase I were not set up properly by West, in which the mapping did not point to the correct information in MapFlex.	Resolved (Dec 2016)
11/2016	Wireless Confidence	Sprint calls coming across with unusually high confidence. Coordination is taking place with Sprint and West. West provides the PDE services for Sprint.	Pending
1/18/2017	RDC MapFlex	During a meeting between Akimeka and RDC, it was identified that HPD GIS data was contained within the RDC MapFlex and was missing RDC's data. Due to the proprietary nature of the GIS data provided by Akimeka for the civilian PSAP's mapping systems and the confidential information contained to support HPD operations, it was concerning. Actions were taken to request West to stop this and to pull RDC's archive data. West has since replied that they never knew RDC was military and functioned separately from the civilian PSAPs. HPD, RDC, and Akimeka have taken corrective actions to construct GIS data that will be used as a baseline for the RDC and to remove sensitive information supplied for the RDC MapFlex.	Pending – Notified by West in Feb 2017 that they are still planning this with HT and should be able to move forward soon.

4. SERVICE REQUESTS TRANSACTIONS

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

OPEN SERVICE REQUESTS – FEBRUARY 2017

#	Date	Ticket #	Description	PSAP	Urgency	Comments
1	07/13/16	856	Updated Address	FIRE	Normal	TN has been referred to telco via email by West Safety Services (Intrado). RMS
2						
3						

Note* There is one (1) opened service request pending for February 2017.

SERVICE REQUEST YEAR-TO-DATE (YTD) SUMMARY – 2017

HAWAII COUNTY				MSAG SERVICE REQUEST CATEGORIES					
2017	TOTAL		Open	WIRELINE		WIRELESS		VoIP	
	Created	Closed		Created	Closed	Created	Closed	Created	Closed
2016 Carryover*			1						
January	3	3	1	2	2	0	0	1	1
February	2	2	1	2	2	0	0	0	0
March									
April									
May									
June									
July									
August									
September									
October									
November									
December									
TOTAL	5	5	1	4	4	0	0	1	1

Note:

* The 2016 Carryover row indicated the number of Service Requests that were opened in 2016 and brought forward into 2017 in an effort to track the service request until completion. Detailed information on service tickets are available upon request.

Definitions:	Category	Description
	Wireline	Telephone Number (ALI) Discrepancies from land line phones that have been submitted to West Safety Services via 9-1-1 Net for correction.
	Wireless	Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database.
	VoIP	Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCBL) for correction

5. E9-1-1 DATABASE SYNCHRONIZATION

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a quarterly database synchronization audit for Hawaii County in **February 2017**.

The database synchronization effort included comparing Hawaii County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **4,503** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on February 1, 2017 for Hawaii County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is **98%**.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

AUDIT SUMMARY RESULTS – FEBRUARY 2017

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of May 1, 2016		As of August 1, 2016		As of November 1, 2016		As of February 1, 2017	
		9-1-1 MSAG Dated 05-01-16		9-1-1 MSAG Dated 08-01-16		9-1-1 MSAG Dated 11-01-16		9-1-1 MSAG Dated 02-01-17	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		4,474		4,482		4,488		4,503	
Less: 9-1-1 MSAG Exception Records	(1)	48	1.1%	49	1.1%	48	1.1%	46	1.0%
Net 9-1-1 MSAG Records Eligible for Comparison		4,426		4,433		4,440		4,457	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG – GIS Match – No Corrections Required)		4,426	100.0%	4,431	100.0%	4,438	100.0%	4,446	99.8%
9-1-1 MSAG -- GIS No Match Minor Correction Required	(2)	0	0.0%	2	0.0%	2	0.0%	9	0.2%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.0%	0	0.0%	0	0.0%	2	0.0%
Total 9-1-1 MSAG Records No Match		0	0.0%	2	0.0%	2	0.0%	11	0.2%

Notes:

- (1) An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- (2) An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- (3) An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

AUDIT SUMMARY RESULTS COMPARISON –FEBRUARY 1, 2017 VS NOVEMBER 1, 2016

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

9-1-1 MSAG Dated 2-01-17

9-1-1 MSAG Dated 11-01-16

NOTE:

Hawaii County's level of accuracy or 9-1-1 Match percentage remained constant

from 99.8% as of February 1, 2017 to 100% as of November 1, 2016

NENA Recommended Match Rate = 98%

AUDIT SUMMARY RESULTS

COMPARISON NOTES:

- ❖ There continues to be a tremendous work effort to synchronize the MSAG and GIS data. Akimeka continues to work closely with County Planning to address problem areas. Hawai'i County has worked very hard to assign addresses and name and range street centerlines which have helped facilitate Akimeka's synchronization efforts.
- ❖ "MSAG - MSAG with Missing GIS Records" increased from two (2) to nine (9) records from November 2016 to February 2017. MSAG records with missing record were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Hawaii County.
- ❖ "MSAG - GIS Minor Corrections" increased from two (2) to nine (9) records from November 2016 to February 2017. The non-match condition of the nine records are a result in which MSAG records submitted in 9-1-1 Net were not completed prior to the end of month. The MSAG section will monitor these records to ensure they are processed in 9-1-1Net prior to the May 2017 re-analysis
- ❖ "GIS Record with No Matching MSAG Record" remained consistent at 100% from November 2016 to February 2017. This includes GIS records that have no MSAG records, and/or GIS records that do not match the MSAG record exactly.
- ❖ "GIS Record with No MSAG Record" remained consistent at 100% from November 2016 to February 2017. This was primarily the result of edits made to the GIS Street Centerlines layer in order to meet new NG9-1-1 requirements.
- ❖ Ongoing maintenance is critical to ensure the database synchronized level of address accuracy is maintained each time an MSAG or GIS record is "touched".

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

At the request of the County of Hawai'i Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Hawai'i County and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Results of the data provided are as follows:

HAWAII	Invalid MSAG Records	
	9-1-1 MSAG Dated 02-01-17	
	Number of Records	% of Total Invalid MSAG Records
ESN 299	398	8.2%

These invalid MSAG records represent **8.2%** of the Total MSAG records for Hawai'i County. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 299 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

Hawaii County E9-1-1 Status Report

February 1, 2017 – February 28, 2017

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancy reports by community for Hawai'i County. As of February 28, 2017, **1,502** ESN 299 records, representing **2.1%** of Hawai'i County's total ALI records, require research and corrective action, if needed. These ALI discrepancy reports may result in a No Record Found (NRF) condition during a 9-1-1 call.
