Enhanced 911 Board Meeting

(Joint Meeting with Committees)
Thursday, August 14, 2014

Kalanimoku Bldg., Room 322B

1151 Punchbowl St., Honolulu

10 am to 1:00 pm

Meeting Minutes

Board members present: Clayton Tom, Chair, Marshall Kanehailua, Mark Begley, Kiman Wong, Ryan Freitas, Victor Ramos, Victoria Garcia, Jeff Riewer, Lisa Hiraoka, Mark Wong, Dave Kajihiro and Roy Irei.
Board members absent: Steven Schutte
Staff members present: Thera Bradshaw, Courtney Tagupa, Stella Kam and Kerry Yoneshige.
Observers: Travis Ing(KPD), Tony Ramirez (Akimeka), Robert May (Akimeka), Davlynn Racadio (MPD), Lavina Taovao (KPD), Ben Morgan (HawTelcom), Eleni Papakiristis (HawTelcom), Aaron Correia (HPD), Sean Naito (HPD), Thalia Burns (HPD), Diana Chun (EMS), Allen Nagata (HPD), Kenison Tejada (APCO/NENA), Dave Miyasaki (KPD), Rob Gausepohl (KPD), Tina Metivier (Intrado), Ken Schulte (TriTech), and Jim Howe (Ocean Safety),

I. **Call to Order, Public Notice, Quorum**

   a. The Board Chair called the meeting to order at 12:25 pm**.**

II. **Public testimony on all agenda items**

   a. The Board Chair asked if anyone in attendance that wishes to provide testimony on any agenda item to please come forward at this time. No one came forward.

III. **Introductions**

   a. Introductions were made of all in attendance.

1

IV. **Review and Approval of Last Month's Meeting Minutes**

    a. Roy Irei motioned to approve the minutes of the July 10, 2014 meeting. The motion was seconded and approved unanimously by voice vote.

V. **Committee Updates by Committee Chairs**

    a. Communications Committee – Steven Schutte

        i. Legislative Investigative Committee

            1. There were no updates at this time.

        ii. Others – None.

    b. Technical Committee – Victor Ramos

        i. Investigative Regulatory Committee update

            1. Marshall Kanehailua sent out the email to the PSAPs and the letter to Hawaiian Telcom will be delivered to Stella Kam for review.

        ii. FCC updates

            1. The Executive Director provided the following update:

                a. The FCC adopted a second report and order requiring wireless carriers and interconnected over-the-top testing providers to be capable of deploying text to 9-1-1 services by yearend.

                The order doesn't require the delivery of texts to PSAP's from WiFi only locations or mobile satellite services and in-flight texting service or internet protocol relay service providers.

                There are currently 121 PSAP's in 18 states that are now capable of accepting texts with several hundred more in the process of upgrading networks.

b. The FCC Public Safety Bureau is tasked with establishing a taskforce to study 911 issues, including whether the PSAP's can operate more effectively and cost efficiently if there was consolidation and how to prevent states from diverting 911 funds for other purposes. The bureau is to include the task force members of CSRIC as well as representatives from states, localities and tribes.

c. In a companion third notice of proposed rulemaking, the FCC is soliciting comments on other improvements to text-to-911. There is a proposal to require carriers to deliver the best available location information with texts and to require the support of roaming within two years. Additionally, it seeks comment on whether to extend the text-to-911 mandate to those providers that are not connected, such as private messaging apps used for purposes such as games or social media. It also seeks comments on extending the requirement to WiFi only networks, real time texting and telematics services.

d. There is a major investigation currently underway with the FCC Enforcement Division on 9-1-1 outages. Hawaii is included in this investigation due to the number of outages experienced. Hawaiian Telcom has been requested to provide a report to the board due to the severity of the situation in that these have been statewide

outages affecting every PSAP in the state. Hawaii has had basically one a month since the cutover on January 28, 2014. This report will be provided to the board by the end of next week with specific details on each outage.

      iii. Others - None

  c. Finance Committee – Kiman Wong

      i. Review of FY 2015 Cash Flow & Budget Financial report

          1. Mr. Kiman Wong provide the following summary of the financial results of the first month of FY2015:

              a. Revenue receipts - $766,892.

              b. Disbursements - $41,889

              c. Encumbrance pay down - $455,872.

              d. Net Bank Balance - $12,773,330

              e. Unencumbered bank balance - $9,787,515.

              f. Mr. Courtney Tagupa acknowledged that one of the wireless service providers filed for Chapter 11 bankruptcy and currently owes the E911 Fund $2,952. The AG's office has been informed and will be filing a claim in bankruptcy court for the full amount owing the Board.

      ii. Update on procurement of CPA auditor.

          1. Courtney Tagupa stated that as a result of repercussions of the PKF's elimination of their auditing services, it was decided to delay procurement of a replacement auditing firm by one month. The current outlook is for delivery of the final audit report during the November 2014 Board meeting remains on track.

      iii. Others - None

VI. PSAP Status Updates

  a. Kauai – Mark Begley

      i. Ms. Lavina Taovao stated the following:

          1. Kauai experienced no problems with the 911 system and or abandon calls during the storm.

          2. Kauai did not experience the difficulties of Hawaii and Maui.

b. Oahu – Dave Kajihiro

    i. Major Correia expressed his appreciation to Captain Allan Nagato for the preparation he did for the incoming storm.

    ii. Battalion Commander Gary Lum expressed his appreciation for all the help HFD received from DIT and Hawaiian Telcom during the storm.

    iii. Dave Kajihiro expressed his appreciation to Thera Bradshaw and Major Naito for their hospitality for the stranded Big Island personnel during the tropical storm.

c. Molokai – Victor Ramos

    i. Nothing to report.

d. Maui – Clayton Tom

    i. Nothing to report.

e. Hawaii – Marshall Kanehailua

    i. Deputy Chief expressed his appreciation to Sergeant

VII. Items for Discussion, Consideration and Action

a. 911 Timeline update

b. Request for funding approval:

    i. KPD – HawTelcom T1 interface required for the Intrado E911 upgrade for the dispatch center -$7,356.

        1. Victor Ramos motioned to approve the $7,356 for the Kauai Intrado E911 upgrade for the dispatch center. The motion was seconded and approved unanimously by voice vote.

    ii. TRICON Conference (Sep2014;SanDiego)

5

1. EMS –additional funding of $2,000 to be added to $4,000 <u>previously</u> approved for a total of $6,000 for two (2) attendees.
   a. Victor Ramos motioned to approve the additional $2,000 for the EMS TRICON attendees for a total of $6,000 for two (2) attendees.
2. HFD – (1) $3,000.
   a. Dave Kajihiro motioned modify the agenda for the request for approval for attendance by HFD from one individual to two at an increased cost of $3,000 for a total of $6,000. The motion was seconded and approved unanimously by voice vote.
   b. Dave Kajihiro motioned to approve funding in the amount of $6,000 for two HFD personnel to attend the TRICON Conference. The motion was approved unanimously by voice.

C. Approval of Finance Committee recommendation for Administrative and Executive Services.
   i. Mark Wong motioned to approve moving forward with RCUH to provide Executive Director and an Executive Assistant on a temporary basis for a period of 18 months. The motion was seconded and approved by voice vote with one opposed.
   ii. Deputy Chief Kajihiro requested he could provide an explanation of the process that the Board went through to come up with the decision to move forward with RCUH:
      1. The decision of the Board was to create two permanent positions for a period of 18 months.
      2. RCUH was selected to provide the administrative support in the hiring of the temporary positions.

6

3. Although RCUH will provide the human resource administrative services, the Board will maintain control of drafting the position requirements, interviewing and salaries of the two positions.

4. After the temporary positions are filled and the future permanent positions are authorized by the legislature, the permanent positions will be filled but will be subject to a probationary period.

5. If there is the need for more personnel, the Board can request additional positions through the legislature by going through the same hiring process.

6. The current Executive Director and Finance Administrator are encouraged to apply for these two positions.

iii. The Board Chair appointed Kenison Tejada as a member of the selection committee for the hiring the Executive Director and Assistant Executive Director.

d. Others – None.

VIII. Announcements

i. Next meeting date: Thursday, September 11, 2014

ii. Future meeting dates (10am – 12noon).

1. Thursday, October 9, 2014

2. Thursday, November 13, 2014 (Joint meeting with Committees)

3. Thursday, December 11, 2014

b. Others - none

IX. Open Forum: Public comment on issues not on the agenda for consideration for Board agenda at the next meeting.

a. The Board Chair requested if anyone who wishes to provide comment on issues not on the agenda for consideration for the Board agenda for next meeting to please come forward. There was no one who came forward.

X. **Adjournment**

    a. The meeting was adjourned at 12:45 pm.

APPROVED 9/11/2014

Note : Honolulu Fire Department Call Volume Numbers were not provided for June 2014.

1.5 PSAP Operation Notes

(1)   Total call volumes include Administrative calls. (Administrative calls = Calls originating on Adminstrative lines that required 911 service.)

(2)   "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. "Dropped Calls" are hang ups after transfers.

(3)   "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

1.6 Wireless Test – July 2014

Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail
07/03/14	AT&T	2	6	Oahu PSAP	Pass
07/29/14	AT&T	16	32	Oahu PSAP	Fail/vendor no show

There were two (2) scheduled Wireless 911 test in July 2014. The first scheduled test on 07/03/2014 was successfully tested. The second scheduled test was a no show on the vendor. No notification of cancellation was given.

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

2 MSAG

2.1 Current Month – July 2014

| 2014 | | 9-1-1NET REQUESTS | | | | | | | | | | | In Referred Status as of Report Month End (d) | | | In Suspended Status as of Report Month End (e) | |
| | | MSAG TRANSACTIONS | | | | | | | ALI TRANSACTIONS | | | | | | | | |
PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Submitted (a)	ALI Discrepancy (ALI-DR) Submitted (b)	VoIP Discrepancy (VoIP DR) Request Processed (c)	TN CR	ALI-DR	VoIP DR	# of Transactions	TNs Affected
OAHU CIVILIAN	777	103	87	1	5	3	7	1,874	666	2	6	6	0	0	0	0

A total of 777 MSAG transactions were processed during the month of July 2014. 103 9-1-1Net requests were processed relating to the MSAG database, with 1,874 customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. 666 Telephone Number Change Requests (TN CR), two ALI-DR, and six VoIP DR were processed in 9-1-1Net for updates and corrections to the ALI database. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

There are 6 TN CRs in Referred status as of July 31, 2014.

Referred Status: There are six TN CR records in Referred status as of July 31, 2014. Referred records are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

There are no ALI DRs in Referred status as of July 31, 2014.

There are no VoIP DRs in Referred status as of July 31, 2014.

There are no Suspended Records as of July 31, 2014.

Note: Revised categories and report format changes effective June 2012 with new Intrado TN CR functionality.

Definitions:		
	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

2.3 MSAG Communities Project

2.3.1 MSAG Community and Street Segment Sweep – Phase II Status

Based on a verbal agreement between the Honolulu Police Department, as the Primary Civilian PSAP, and Akimeka, it was agreed that the Military MSAG should be updated to reflect the standardized and approved MSAG Community Names approved jointly by the Military and Oahu Civilian PSAPs to ensure interoperability. It was also agreed that this work effort will be completed by Akimeka on an **"as we can get to it"** basis.

Below is the latest status of the Phase II work effort as of **July 31, 2014**

OMIL Existing Community Name	New Approved Community Name	MSAG Records	MSAG Transactions Required	Status	Notes/Comments
Bellows Airforce Station	BELLOWS	65	65	**COMPLETED -- 03/31/13**

Pearl Harbor	PEARL HBR	86	86	**COMPLETED -- 08/12/13**	Nine (9) records did not receive the new community name. Eight (8) records due to overlapping with existing records (0 TNs) and one (1) record Akimeka does not have the authorization to change.

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

2.3.2 MSAG Community and Street Segment Sweep – Phase II Status (continued)

OMIL Existing Community Name	New Approved Community Name	MSAG Records	MSAG Transactions Required	Status	Notes/Comments
Ford Island	FORD ISL	147	147	COMPLETED -- 09/03/13	
Regional Dispatch Center	PEARL HBR	3	3	COMPLETED -- 10/03/13	
Schofield Bks	SCHOFIELD	661	661	COMPLETED -- 01/30/14	One record did not receive the new community name due to the overlapping with existing records (2 TNs).
Tripler AMC	TRIPLER	116	116	COMPLETED -- 02/18/14	
Wheeler AFB	SCHOFIELD	11	11	COMPLETED -- 02/20/14	
Hickam Air Force Base	HICKAM	3	3	COMPLETED -- 02/24/14	
Wheeler	SCHOFIELD	75	75	COMPLETED -- 04/28/14	One record did not receive the new community name due to the overlapping with existing records (0 TNs).
Fort Shafter	FT SHAFTER	282	282	COMPLETED -- 06/23/14	

A total of 1,993 MSAG transactions have been completed thus far – **80% Complete**. An estimated 474 MSAG transactions remain to be submitted and processed.

Status of the Phase II effort will continue to be tracked until all 9-1-1Net MSAG transactions required have been completed.

2.3.3 MSAG Community and Street Segment Sweep – Phase V

MSAG Community and Street Segment Sweep – Phase V

A meeting was held with the Oahu Civilian PSAPs and Akimeka on August 7, 2013, to review the   Phase V project scope, schedule and timeline. Approval was received to proceed with Phase V and Phase VI after the completion of Phase V.

Below is the latest status of the Phase V work effort as of **July 31, 2014**:

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

3 Geographic Information System (GIS) – July 2014

3.1 Mapping Layers Updated (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

Type of Layer	Akimeka GIS Server	Date Uploaded to ftp Site	Other/Remarks
	Date Created/ Edits Performed		
OAHU CIVILIAN			
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)			
Address Points		07/25/14	
	7/24/2014		Deleted one (1) address point in Kaneohe; duplicate record.
	7/23/2014		Added one (1) routing ID to address point Mid Pacific Country in Kailua.
	7/17/2014		Received new development Kuauli Subdiv(Kahuku). Georeferenced building plan and added eight (8) new address points in Kahuku.
	7/17/2014		Spatially corrected one (1) address point in Kahuku.
	7/17/2014		Deleted three (3) address points in Kakuku; duplicate addresses.
	7/16/2014		Added two (2) routing IDs in Kaneohe.
	7/16/2014		Corrected name of one (1) address point in Waimanalo.
	7/16/2014		Added one (1) routing ID in Aiea.
		07/11/14	
	7/11/2014		Spatially corrected one (1) address point in Aiea.
	7/11/2014		Spatially corrected seven (7) address points in Waipio.
	7/10/2014		Reviewed lifeguard tower names and addresses in address points as requested by HFD, no discrepancies found.
	7/10/2014		Spatially corrected one (1) address point in Waianae.
	7/10/2014		Reviewed duplicate address points per TriTech restrictions. Identified one (1) valid address point and deleted six (6).
	7/7/2014		Added one (1) apartment letter in Kaneohe.
	7/7/2014		Deleted two (2) address points in Kaneohe; duplicate addresses.
	7/1/2014 - 7/28/2014		Spatially corrected nine hundred fifty-nine (959) address points in Kaneohe.
	7/1/2014 - 7/28/2014		Added twenty-eight (28) new address point in Kaneohe.
Common Place Name		07/25/14	
		07/11/14	
	7/10/2014		Researched three (3) TCAD errors for follow up on the JUL 1 2014 report. Completed review.
	7/10/2014		Corrected MSAG community of one (1) point of interest from Laie to Kahuku.
	7/9/2014		Spatially corrected one (1) point of interest in Kailua.
	7/9/2014 - 7/30/2014		Spatially corrected fourty-nine (49) points of interest in Kaneohe.

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

3.2 Mapping Layers Updated (Part II)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

3.9 Geographic Information System (GIS) Narrative

3.9.1 Police Beats Corrections

Background

The Police Beats was previously identified as a layer requiring corrective action in preparation for the ESZ/ESN project and ensuring spatial accuracy.

Subsequent to the Police Beat corrections that took place during the month of August 2013, upon loading the GIS data for Street Centerlines in the current Motorola Premier CAD, HPD PMT confirmed that there were no issues with regards to the CAD system recommendations. HPD PMT also reviewed the Police Beats corrections worksheet and confirmed that there were no issues with the document. As such, Akimeka proceeded to make corrections to the Police Beats layer utilizing HPD's written Policies and Procedures document for boundary descriptions.

Status To Date

Based on HPD PMT's confirmation, Akimeka continued to make corrections to the Police Beats during the month of July 2014. Akimeka completed an additional three (3) Police Beat (875, 876, and 877) boundary correction.

Upload Process

It was agreed that the Police Beats layer will not be uploaded to the current Motorola CAD system and will only be uploaded to the new Motorola PremierOne CAD system. Although the Police Beats layer (with the corrections) will not be uploaded to the current CAD system, the Street Centerlines are impacted by these boundary updates.

As such, Akimeka assisted with creating a new upload process which mirrors a step similar to the updates with the MSAG Communities. The new process was run successfully in November 2013, and has been successful since that time. In addition, the new upload process for the Premier CAD, also resolved other discrepancies with recommendations which were previously identified. It was agreed that this new process will be implemented and used going forward. Subsequent to this process improvement, there have been no issues and the Police Beat corrections project continues to move forward.

3.9.2 Intrado PowerMap Upload

Since the establishment of the GIS Data deliverable process between Akimeka and Intrado in January 2014, the data uploads have been successfully carried out.

In January and February 2014, an issue within PowerMap had been identified with the display of Phase 1 wireless 911 calls. The issue identified is that the map is not displaying the Phase 1 polygons, but is zooming to the area when the 911 call occurs. Akimeka assisted Intrado on a couple occasions with the configuration settings; however no true identification of the cause of the discrepancy has been identified.

* The Honolulu PowerMap 4.1 GIS Deliverable always include the following GIS layers: WSP Cell Sites, WSP Cell Sectors, Street Centerlines, Address Points, Common Places, MSAG Communities, ESN, Fire Response Areas, Medic Response Areas, Police Response Areas, Streams, and Tow Boundaries

3.9.3 TriTech CAD System Upgrade

During the month of January 2014, Akimeka, HFD and EMS had begun coordination to prepare Address Points for the new TriTech CAD system for Address Validation. Since Address Points have not been used in the CAD system, but in the past had been used as visual only, there are needed configurations in both the GIS and the CAD in order to work properly. HFD, EMS, and Akimeka will continue to work together to ensure the proper information is being utilized.

1. Subsequent to the delivery of the small batch of Address Points on February 7, 2014, some potential issues were identified.

    a. Apartment numbers are included in the GIS data.

        a. Depending on how the TriTech CAD system gets configured, the information for apartment numbers and/or building numbers should not be included in the full address for address validation.

        b. Akimeka identified previously that the ANI/ALI information for the State of Hawaii does not include apartment information in the full address used in the address validation process. That information however, does come across in driving instructions which is a comment field used to provide additional information for address locations and is not an identifier used in validations of the call.

        c. With that said, Akimeka preferred to hold on discussing the address point configuration until a meeting with all of the PSAPs can be set up. It is important for all public safety agencies to discuss these items collectively as a group so decisions can be made together.

    b. On March 13, 2014, a meeting was held to discuss the apartment field in the GIS and the validation source with the ANI/ALI fields. The PSAPs and Akimeka agreed that the apartment field would best be used as a visual display in the mapping and CAD systems as a label. Considering the apartment information is not available in the designated field in the ANI/ALI it is best to use the full address without apartment and/or building numbers for address validations.

2. On May 18, 2014, all of the Oahu Address Points were included in the GIS data deliverable for the TriTech CAD for Fire and EMS.

3. Subsequent to previous discussions, there were no changes during the month of May 2014. Address Points were provided without issues throughout the month.

4. Subsequent to GIS deliverables that included Address Points in May 2014, it was requested by HFD CAD Administrator that the Address Points not include the apartment and building numbers.

    a. On June 13, 2014, Akimeka delivered GIS data for Address Points that met this request.

        a. Included in the GIS deliverable, were Address Points without apartment and building numbers, intended for configuration in the system since this matches with the ANI/ALI. Also included were the Address Points that have building and/or apartment number to be used as a visual tool in the map display, if helpful. The third set of Address Point data was Ocean Safety points that only included the locations for Surf Breaks, Dive Locations, Lifeguard Towers, and BROW, as requested previously.

    b. Shortly after the deliverables were sent, it was decided by the HFD CAD Administrator that Address Points will not be loaded in the TriTech CAD for HFD. The volume of Address Points was overwhelming and presented difficulty for the CAD Administrator.

5. During July 2014, Issues from the HFD RMS Administrator were brought to Akimeka's attention that there may potentially be incorrect Community names being provided into the TriTech RMS.

a. On July 7, 2014, Akimeka reviewed the discrepancies that were identified, and were able to confirm that the Community names that were identified are correct as they appeared.

     a. The names of the Communities had previously been decided on and agreed to among all of the PSAP representatives at the beginning of the MSAG Community and Street Segment sweep project which was an effort initiated to begin the synchronization of the 911 databases, starting in early 2012.

6. Also during July 2014, it was requested for Akimeka to assist with the creation of a boundary layer to help identify the federal properties in the TriTech CAD system, in order to attach caution notes for dispatch purposes.

    a. On July 21, 2014, Akimeka received the request and began creating the Geographic Areas based on the MSAG Community's federal properties which have previously been defined with the help and assistance of the PSAPs, including the Regional Dispatch Center at Pearl Harbor.

        a. The boundaries were provided as requested on July 21, 2014, via Akimeka's ftp site.

        b. Subsequent to the boundary layer being provided, minor configurations were requested and made throughout the remainder of July 2014.

        c. Akimeka will continue to assist in the creation of the Federal Geographic Areas for HFD's TriTech CAD system, until it is finalized. There are no foreseen issues with work effort which would require HPD's approval and adjustment of timelines/priorities.

3.9.4 SPAWAR Meeting on Addressing for MCBH

There has been no further information or correspondence with regards to this project.

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

3.9.5 Street Utility Check

This is an ongoing project to correct the errors identified. A comparison of the raw CAD generated report from the Street Check Utility was performed between the Street Centerline GIS data delivered on June 27, 2014 and July 25, 2014. Below are the results of the comparison.

	First Report 06/01/12	06/27/14	07/25/14	Improvement/ Comments
Total Number of GIS Records	**26,602**	**27,047**	**27,058**	**Added eleven (11) records**
	Errors Identified			
Zero Errors	5,112	699	646	Further reduced errors by 7.6% (53 errors)
Low > High Errors	3	0	0	No Change
Mixed Parity Errors	1	0	2	Increased by 2 errors
Changed Parity Errors	105	0	0	No Change
Address Gap Errors	2,629	0	0	No Change
Address Overlap Errors	423	0	0	No Change
Flipped Link Errors	1,030	533	518	Further reduced errors by 2.8% (15 errors)
Total Errors	**9,303**	**1,232**	**1,166**	**Further reduced errors by 5.4% (66 errors)**

In addition to Akimeka's internal validation tools, Akimeka will continue to utilize the various CAD reports to further identify and correct the multitude of discrepancies in the GIS data. This is an ongoing and routine process which Akimeka has been using to improve the accuracy of the GIS data for Public Safety.

Akimeka plans to continue its work effort to complete corrections of the discrepancies identified and/or identify any valid exceptions which Akimeka will tag with the proper information so the CAD system will accept the record(s) and not jeopardize the full functionality of the CAD system from the upload to RMS. Akimeka plans to complete all Street Utility Check errors prior to the implementation of the Motorola PremierOne CAD "go live" date.

Oahu Civilian E9-1-1 Status Report
July 1, 2014 – July 31, 2014

4 E9-1-1 Database Synchronization

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for the Oahu Civilian PSAP in July 2014.

The database synchronization effort included comparing Oahu Civilian's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **7,511** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on July 1, 2014 for the Oahu Civilian PSAP are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

4.1 Audit Summary Results – 2014

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of Octover 21, 2013 9-1-1 MSAG Dated 10-01-13		As of January 13, 2014 9-1-1 MSAG Dated 01-01-14		As of April 1, 2014 9-1-1 MSAG Dated 04-01-14		As of July 1, 2014 9-1-1 MSAG Dated 07-01-14	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		7,111	0	7,336		7,509		7,511	
Less: 9-1-1 MSAG Exception Records	(1)	6	0.1%	6	0.1%	6	0.1%	118	1.6%
Net 9-1-1 MSAG Records Eligible for Comparison		7,105	0	7,330		6,560		7,393	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		6,825	96.1%	7,082	96.6%	6,430	98.0%	7,364	99.6%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	213	3.0%	166	11.6%	57	0.9%	34	0.5%
9-1-1 MSAG Record With No Matching GIS Record	(3)	67	0.9%	82	1.1%	73	1.1%	7	0.1%
Total 9-1-1 MSAG Records No Match		280	3.9%	248	3.4%	130	2.0%	41	0.6%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the City & County of Honolulu(Civilian PSAPs) was completed as scheduled. Further progress has been made from April 2014 with a 98% Match Rate to a 99.6% Match Rate as of July 2014
4.2 Audit Summary Results – 2014 (Part II)

Notes:

(1)   An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

(2)   An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

(3)   An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

4.3 Audit Summary Results – April 1, 2014 MSAG vs. July 1, 2014 MSAG

**Oahu Civilian's level of accuracy or 9-1-1 Match percentage improved from
98% as of April 1, 2014 to 99.6% as of July 1, 2014.
The majority of the remaining MSAG and GIS discrepancies are in the
Honolulu MSAG Community.**

❖   As agreed between HPD PMT and Akimeka, Akimeka would initially focus on the <u>existing</u> MSAG and GIS records to produce a match which will benefit the PSAP in the interim.

❖   This effort would not include the MSAG Communities project to implement the <u>new</u> MSAG Communities and associated GIS Street Centerlines. This would be handled as a separate project as identified and agreed to.

❖   As a result of the MSAG Community and Street Segment Sweep project, the majority of the remaining discrepancies reside in the Honolulu MSAG Community and will be addressed during the Phase V effort.

4.3.1 Audit Summary Results – July 1, 2014 MSAG vs. April 1, 2014 (Part II)

❖ The previously completed MSAG Communities as a result of the MSAG Community and Street Segment Sweep project are now considered part of ongoing maintenance.

❖ "MSAG - GIS Minor Corrections" were further reduced by **40.4%** (57 to 34) from April 2014 to July 2014 respectively. Low and high address ranges, odd/even combines, and street suffixes were adjusted in the MSAG to correspond with the GIS record. Although identified as a minor correction, customer telephone numbers (TNs) must be validated in 9-1-1Net prior to correcting the MSAG record to ensure the correction will not result in an orphan ALI Record or TN Fall-out.

❖ "MSAG Record With No GIS Record" decreased by **90.4%** (73 to 7) from April 2014 to July 2014 respectively. The decrease in records were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within City and County Honolulu.

❖ "GIS MSAG Records With No Matching E9-1-1 MSAG Record" increased from 4 to 2 records from April 2014 to July 2014. The decrease in records were due primarily to the verification of the MSAG records against the single source 9-1-1 GIS databases created by Akimeka from the multiple public safety agencies' databases to determine if the roads exist within City & County of Honolulu and Military bases GIS records.

❖ "GIS – MSAG Minor Corrections" were further reduced by **55.7%** (104 to 46) from from April 2014 to July 2014 respectively. Low and high address ranges, street suffixes, and MSAG Community were adjusted in the GIS database to correspond with the MSAG record.

❖ A constant effort to keep the databases synchronized and maintained are required to improve the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

4.4 Invalid MSAG Streets and Address Ranges – ESN x99 Records

At the request of the Kauai County and Hawai'i County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided all State of Hawai'i PSAPs and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the Oahu Civilian data provided are as follows:

OAHU CIVILIAN	Invalid MSAG Records					
	9-1-1 MSAG Dated 01-01-14		9-1-1 MSAG Dated 04-01-14		9-1-1 MSAG Dated 07-01-14	
	# of Records (Baseline Starting Point)	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)
ESN 199	238	3.1%	220	2.8%	209	2.7%

These invalid MSAG records represent **2.7%** of the Total MSAG records for the City & County of Honolulu as of the July 1, 2014 MSAG. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 199 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.
4.5 Automatic Location Identification (ALI) Discrepancy Report

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for the City & County of Honolulu (Oahu Civilian). As of June 30,2014, there are **209** ALI records with an assigned ESN of 199, representing **2.7%** of the City & County of Honolulu (Oahu Civilian) total ALI records.

With Akimeka's continuing MSAG Community and Street Segment Sweep effort, the percentage of ESN 199 records may increase as low and high address ranges and new communities are verified.

**Oahu Civilian ALI Records
as of July 1, 2014**

2.7%

97.3%

- ESN 100
- ESN 199

The total number of ALI records decreased by **2.2%** (491,003 to 479,999) while the number of ESN 199 records decreased by **8.3%** (1,709 to 1,568) from April 2014 to July 2014 respectively. The decrease was due primarily to Akimeka's effort to identify the invalid MSAG records and verify their correct locations against current County GIS data.

Although the ESN 199 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 199 MSAG records to a valid City & County of Honolulu ESN 100 to ensure that all ALI records assigned to the City & County of Honolulu (Oahu Civilian) have an "MSAG valid address".

1.1.1 Call Volume Maui County PSAP Notes:

Intrado Viper Call Volume Statistics began on January 22, 2014 at 7:00 a.m. (HST) when 911 trunks were Transferred and connected to the Intrado Viper System from the 9-1-1 backup system being utilized during the Intrado conversion from the CML/Plant system.

There were no call volume statistics between January 28, 2014, 2:11 p.m. HST, and January 28, 2014, 8:39 p.m. HST, while the PSAPs were on the 9-1-1 back-up system due to a Intrado Viper System outage.

1.3.1 Call Volume Molokai County PSAP Notes:

(1) Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)

(2) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.

(3) "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

Maui County E9-1-1 Status Report
July 1, 2014 – July 31, 2014

2.1.1 MSAG Current Month Notes:

A total of 262 MSAG transactions were processed during the month of July 2014. Fifty-one (51) 9-1-1 Net requests were processed relating to the Maui County MSAG database, with 780 customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. 211 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net for updates and corrections relating to the ESN 359/399 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG valid address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user HawaiianTelcom customer before updating the ALI record.

There are 239 TN CRs in Referred status as of July 31, 2014.

The TN CRs in "Referred" status are a direct result of the ESN 359/399 clean-up and are awaiting approval from Hawaiian Telcom, Inc (HTI) and/or customer to update ALI records. No explanation has been provided as to why these TN CRs have not been corrected for 9-1-1 purposes. Akimeka continues to monitor and track the progress of Referred TN CRs.

There are no VoIP DR records in Referred status as of July 31, 2014.

There are no ALI DR records in Referred status as of July 31, 2014.

There are no records in Suspended status as of July 31, 2014.

2.1.2 Definitions for Year-To-Date Summary

Definitions:		
	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

Maui County E9-1-1 Status Report
July 1, 2014 – July 31, 2014

3   GIS Mapping Layers – July 2014

3.1 Updated/Loaded Into GIS (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Type of Layer	Island	Akimeka GIS Server Date Created/ Edits Performed	Date Loaded Into PSAP GIS Server	Other/Remarks
		MAUI COUNTY		
		CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)		
Address Points	Maui/Lanai	7/29/2014		Corrected one (1) Routing ID
	Maui/Lanai	7/25/2014		Spatially corrected one (1) address point in Haiku
			07/23/14	
	Maui/Lanai	7/22/2014		Spatially corrected two (2) address points in Kula and two (2) in Makawao.
	Maui/Lanai	7/22/2014		Prepared data for Intergraph delivery - Assigned ID to all new addresses and checked for duplicate ID
	Molokai	7/22/2014		Changed highway name for twenty-four (24) mile marker address points on Kalae and Maunaloa Hwy's.
	Maui/Lanai	7/17/2014		Added MSAG Address in Haiku
	Maui/Lanai	7/17/2014		Spatially corrected one (1) address point in Haiku and four (4) in Kula
	Molokai	7/17/2014		Added MSAG Address in Kualapuu
	Maui/Lanai	7/16/2014		Spatially corrected one (1) address on Lanai, two (2) in Wailuku, one (1) in Kahului and three (3) in Haiku
	Maui/Lanai	7/16/2014 - 7/22/2014		Added two (2) MSAG Address in Hana
			07/09/14	
	Maui/Lanai	7/9/2014		Spatially corrected eleven (11) address points in Haiku and six (6) in Kihei
	Maui/Lanai	7/8/2014		Spatially corrected one (1) address point in Haiku, one (1) in Hana and one (1) in Lahaina.
	Maui/Lanai	7/8/2014		Corrected one (1) address in Kahului
	Maui/Lanai	7/8/2014		Added one (1) POI address point for Baby Beach Lahaina off of Puunoa Pl as requested by Dispatch
	Molokai	7/2/2014 - 7/25/2014		Added thirty-four (34) addresses received from DSA

Maui County E9-1-1 Status Report
July 1, 2014 – July 31, 2014

3.2 Updated/Loaded Into GIS (Part II)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

		7/10/2014		Added new Tow Company, Bob's Auto Refinishing to ESN 7000, 7001, 7003, and 7004

(*) Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

Note: The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

3.11 CAD/Mapping System GIS Upload Process

3.11.1 Current Month Key GIS Activities and Updates – July 2014

7/23/2014   Prepared and delivered Intergraph CAD Map which included the following updated data: Address Points, Street Centerlines, WSP Cell Towers, Fire Beats, Points of Interest, Parks, Police Response Areas, Tow Boundaries, and Common name look up table. Files prepared and delivered were the mdf, ldf, str, rte, map and ply files.

7/23/2014   Updated PowerMap including Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Fire Beats, Points of Interest and Parks

7/10/2014   Cleaned up duplicate labels on Street Centerline, Trails and Streams. Created highway shields for Piilani Hwy, Hwy 31 and labeled Makena State Park. Re-ran Tow Truck .ply, published the .map and created the .str and .rte files. Tested I/Dispatcher.

7/9/2014   Uploaded the following data for a PowerMap update: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Fire Beats, Medic Beats, MSAG Communities, Points of Interest and Police Beats.

7/1/2014   Deleted duplicate, overlapping and multiple labels of Street Centerlines, Streams and Trails on the Intergraph CAD Map. Also spatially moved labels and created highways shields.

❖ *Everytime the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.*

4   Geographic Information System (GIS)

4.1   Next Generation 911 (NG9-1-1) GIS Requirements

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of July 2014, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1:

NG9-1-1 GIS Data Corrections			
GIS Layer Name	**Type of Correction**	**Number of Records Corrected/Modified/Added/Removed**	**Comments/Details**
Address Points	Added	39	Addresses received from DSA, DSA Address layer, MSAG and field verifications
Address Points	Corrections	26	Correction to address, MSAG Community, ESN or Routing ID
Address Points	Spatially Corrected	37	Corrected location of address point, recalculated x/y
Street Centerlines	New Segment	4	
Street Centerlines	Range Segments Corrected	15	Ranges modified according to address point locations
Street Centerlines	ESN Correction	1	
Street Centerlines	Spatially Corrected/Partial Spatial Correction	101/64	

Maui County E9-1-1 Status Report
July 1, 2014 – July 31, 2014

4.2 Intergraph CAD Upgrade

From April to July 2014, the Maui Police Department has worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements have been identified and the overall functionality of the system from the Map Build process to the Production workstation has made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. Throughout July, aesthetic work was done on the Intergraph CAD Map, as previously requested.

   a. Overlapping and duplicate labels of Street Centerlines, Streams and Trails were deleted or moved to de-clutter the map to ease reading. Additional highway shields were also added at this time. The aesthetic work with the map visual will be an ongoing item and will continue to be a work in progress.

2. On July 8, 2014, the following data was prepared for an Intergraph CAD Map delivery:

   a. Address Points, Street Centerlines, WSP Cell Towers, Fire Beats, Medic Beats, Points of Interest, Police Beats, and Police Response Areas. This data was not delivered due to permission issues within the SQL Server which restricted access to be able to copy the CAD Map Build database.

3. An updated Tow Jurisdictions .ply file which included a new Tow Company, Bob's Auto Refinishing was delivered to MPD on July 10, 2014.

4. On July 17, 2014, another new Tow Company, KK/AMERICAN/MAUI TOW was added to the Tow Jurisdictions and an updated Tow Jurisdictions .ply file was delivered to MPD.

5. On July 21, 2014, MPD IT was able to correct the SQL Server permission issue on the Intergraph CAD Build machine housed at Akimeka.

6. Akimeka successfully delivered an updated Intergraph CAD map on July 23, 2014 which included:

   a. Address Points, Street Centerlines, WSP Cell Towers, Fire Beats, Points of Interest, Parks, Police Response Areas, Tow Boundaries, and the Common name look up table.

7. Intergraph Personnel, Jeff Warren and Tammi-Ann Renton made a site visit to Akimeka as part of additional training, which the Maui Police Department was afforded, due to resource changes within Intergraph during the upgrade with the Maui Police Department's Intergraph CAD system. Also in attendance were Tony LaSoya and Charles Davis of MPD IT.

   a. General questions of the Map Build process were reviewed

   b. Further enhancements were made to the CAD map including a time stamp

   c. The Maui Custom Map Workflow document was revised. Tony LaSoya agreed to combine the corrections and updates, which Akimeka had contributed with edits.

8. Throughout August 2014, the Intergraph CAD map will continue to be delivered on a bi-monthly basis, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

   a. As the Intergraph deliverable continues to be provided and uploaded, changes/updates will continue to be made to the Maui Custom Map Workflow, and communication will continue between MPD IT and Akimeka so that improvements can continuously be provided.

Hawaiʻi County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

1.3 9-1-1 Call Volume by Agency – July 2014
Source: **Intrado Viper**

2014	9-1-1 Call Volume by Agency									
	Hawaii County Police					Hawaii County Fire				
	Number of Total Calls Received	% of Total Calls	Number of Admin Calls	Number of Abandoned/ Dropped Calls	Number of Other Calls	Number of Total Calls Received	% of Total Calls	Number of Admin Calls	Number of Abandoned/ Dropped Calls	Number of Other Calls
July	16977	81.00%	0	1669	0	2298	10.96%	0	16	0

1.3.1 Call Volume by Agency Notes:

(1)   Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)

(2)   "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. These calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

(3)   "Other Calls" for HPD and HFD include calls marked"PBXR", "RSDX" and "RSDX" in the call volumes.

Hawai'i County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

1.5 Wireless Test – July 2014

Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail
07/08/14	Verizon Wireless	1	3	Hawaii PSAP	Fail
07/17/14	Verizon Wireless	1	3	Hawaii PSAP	Fail
07/24/14	Verizon Wireless	1	3	Hawaii PSAP	Pass
07/25/14	AT&T	8	16	Hawaii PSAP	Pass

1.5.1 Wireless Test Notes:

There were 4 scheduled 911 Wireless Tests for Hawaii County in July 2014. After 2 failed attempts, a successful test was completed on 07/24/14.

2   MSAG

2.1 Current Month – July 2014

2014		9-1-1NET REQUESTS										In Referred Status as of Report Month End (d)			In Suspended Status as of Report Month End (e)	
		MSAG TRANSACTIONS							ALI TRANSACTIONS							
PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Processed (a)	ALI Discrepancy Request (ALI-DR) Processed (b)	VoIP Discrepancy Request (VoIP DR) Processed (c)	TN CR	ALI-DR	VoIP-DR	# of Transactions	TNs Affected
HAWAII	288	59	13	2	28	11	5	234	226	3	0	552	0	0	0	0

2.1.1 MSAG Current Month Notes:

A total of 288 MSAG transactions were processed in 9-1-1 Net during the month of July 2014. Fifty-nine (59) requests were processed relating to the MSAG database, with 234 customer ANI/ALI (telephone/address) records updated as a direct result. 226 Telephone Number Change Requests (TN CR) transactions and three (3) ALI-DR transactions were processed and updated in 9-1-1Net. The 226 TNCRs were submitted with MSAG valid addresses, as a result of the ESN 299 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG valid address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

There are 552 TN CRs in Referred Status as of July 31, 2014, which are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

Hawaiʻi County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

2.1.2 MSAG Current Month Notes (Part II):

There are no ALI-DRs in Referred Status as of July 31, 2014

There are no VoIP DRs in Referred Status as of July 31, 2014

There are no records in Suspended Status as of July 31, 2014.

2.1.3 Definitions for Year-To-Date Summary

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

Hawai'i County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

2.2 Year-to-Date (YTD) Summary – 2014

Note: Revised categories and report format changes effective June 2012 with new Intrado TN CR unctionality.

3.6 CAD/Mapping System GIS Upload Process

3.6.1 Current Month GIS Activities – July 2014

7/22/2014   Performed Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Points of Interest and Police Beats.

7/8/2014   Performed Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers and Points of Interest.

*Everytime the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

4   Mapping Layers Updated/Loaded Into GIS – July 2014

4.1.1 Address Points and Street Centerlines Update Comparison

On a routine basis, upon receipt of Hawaiʻi County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers. In the month of June 2014, Akimeka added a process to identify changes to the Street Segment Names which has been included in the chart below.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawaiʻi County Planning Department on **July 16, 2014**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
# of New Street Segments Added		3
# of Street Segments Removed		0
# of New Addresses Added	70	
# of Addresses Removed	0	
# of Street Segment Range Changes		0
# of Street Segment Name Changes		0
# of Address Street Name Changes	0	
# of Address Street Number Changes	0	

Note: Some Address Points have its street name and street number changed at the same time. These are counted as separate actions since these changes are needed to make the layers "9-1-1 capable" for dispatch and response.

Hawai'i County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

5 Geographic Information System (GIS)

5.1 Next Generation 911 (NG9-1-1) GIS Requirements

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of July 2014, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1:

GIS Layer Name	Type of Correction	Number of Records Corrected/Modified/Added/Removed	Comments/Details
Street Centerlines	New Streets	6 Added	5 in Hilo, 1 in Pahoa
Street Centerlines	Range/Parity	50 Corrected	Majority were in Kapaau and Kamuela
Street Centerlines	Spatial Correction	30 Corrected	To increase spatial accuracy, majority were in Hilo and Kapaau
Street Centerlines	Splits	6 Corrected	To eliminate segments from crossing boundaries and where existing streets were intersected by new streets
Street Centerlines	Merged	2 Corrected	Streets were in Kapaau
Street Centerlines	Flipped Direction	1 Corrected	Street was in Hilo

NG9-1-1 GIS Data Corrections

Hawai'i County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

5.2 Next Generation 911 (NG9-1-1) GIS Requirements (Part II)

Street Centerlines	Changed Street Type	1 Corrected	Street was in Kailua Kona
Address Points	New Address Points	83 Added	Throughout County in 14 communities
Address Points	Changed Street Name	1 Modified	Address was in Kailua Kona
Address Points	Spatial Correction	119 Corrected	Corrected location of Address Point, recalculated x/y, majority were in Kapaau and Kamuela
Address Points	Routing ID	1 Corrected	To ensure proper routing to address, address was in Kapaau
Address Points	Changed Address Number	1 Modified	Address was in Volcano
Address Points	Location Name Attribute	2 Added	1 in Kapaau and 1 in Kealakekua
Points of Interest	New Points of Interest	2 Added	1 in Kapaau and 1 in Kealakekua
Points of Interest	Name Field Attribute	393 Corrected	Throughout County in 30 communities
Police Beats	Boundaries	3 Corrected	Police Beats 151, 641 and 732
Police Response Areas	Boundaries	3 Corrected	Police Response Areas 151, 641 and 732
Major Roads	ESN Attribute	1 Corrected	1 segment of Akoni Pule Hwy
Trails	Description Attribute	2 Corrected	Both were in HVNP

5.3 Mamalahoa Hwy Project

During June 2014, Akimeka performed research and an analysis of the naming discrepancies between Mamalahoa Hwy and Hawaii Belt Rd. Akimeka identified discrepancies regarding the addresses that are used on these streets as well as the street signs posted along them versus the naming of the streets on which they are located.

1. During June 2014, Akimeka initiated the research for a Mamalahoa Renaming Project and identified a correction process which involves renaming certain segments of Hawaii Belt Rd to Mamalahoa Hwy.

    a. This project will correct 556 TNs in Kealakekua and 345 TNs in Captain Cook for a total of 901 TNs.

    b. During the month of July 2014, Akimeka awaited approval to proceed with the project. Once approval has been granted the updates will be made in the GIS and MSAG Databases.

        1) Once the corrections have been made the updates will be reflected into the PowerMap and available to the dispatchers.

    c. Subsequent to receiving approval, Akimeka plans to initiate the correction process during the month of August 2014.

5.4 Fire Department's PowerMap

Beginning around the March 2014 timeframe, there had been several occurrences of technical issues occurring with the Hawaii County Fire Department's PowerMap not receiving ANI/ALI data on all four (4) of their positions.

1. On March 19, 2014, it was brought to Akimeka's attention that the Hawaii Fire Department was experiencing a network connection issue with the GIS Server. The PowerMap positions at Fire were not receiving ANI/ALI data from the PowerMap Server located in the Police building. The PowerMap positions in the Police Department were working without issue, as were the Fire Station Viper and Intergraph systems. The following day on March 20, 2014, all Fire Powermap positions were fully operational.

    a. Since March 19, 2014, the above issue had repeated many times. At first it seemed to occur following PowerMap updates performed by Akimeka. Akimeka had been communicating with Scott Uehara and the Hawaii Fire Department to investigate the cause and help to find a solution to this technical issue. It had come to light that the issue had nothing to do with the PowerMap updates performed by Akimeka and that the issue would occur and be resolved for no known reason and at times unrelated to when PowerMap updates were performed.

    b. On June 24, 2014, Akimeka was informed that a couple of weeks prior to June 24, 2014 the Hawaii County IT had performed some technical work on the issue and the Fire Department's PowerMap had been functioning properly since then with the exception of one short interruption.

    c. Akimeka will continue to monitor the performance of the Fire Department's PowerMap and if technical issues should occur again, Akimeka will continue to help investigate the cause and help to find a solution.

    d. Throughout July 2014, the Fire Department's PowerMap has not incurred any further technical difficulties. Akimeka will continue monitoring its performance and be ready to help with any possible issues that may arise.

.

1.2.1 Call Volume Notes

(1)   Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)

(2)   "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.

(3)   "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports does not provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

1.3 Wireless Test – July 2014

Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail
07/28/14	AT&T	4	8	Kauai PSAP	Pass

There was 1 scheduled Wireless 911 Test for Kauai County in July 2014. 4 sites and 8 sectors were successfully Tested.

Kauai County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

2 MSAG

2.1 Current Month – July 2014

KAUAI	51	12	2	2	2	6	0	94	38	1	0	142	0	0	0	0

2.1.1 MSAG Notes for July 2014

A total of fifty-one (51) MSAG transactions were processed during the month of July 2014. Twelve (12) 9-1-1Net requests were processed relating to the MSAG database, with 94 customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. Thirty-eight (38) Telephone Number Change Requests (TN CR) were processed in 9-1-1Net for updates and corrections to the ALI database. The TN CRs were submitted as a result of the ESN 499 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

2.1.2 MSAG Notes for July 2014 (Part II)

There are 142 TN CRs in Referred status as of July 31, 2014.

142 TN CRs that remain in "Referred" status are a direct result of the ESN 499 clean-up and are awaiting approval from end user Hawaiian Telcom customer in order to update the ALI records. No explanation has been provided by HTI as to why these TN CRs have not been processed for 9-1-1 purposes.

Intrado will notify Akimeka when each TN has been updated in 9-1-1Net.

There are no ALI DRs in Referred status as of July 31, 2014.

There are no VoIP DRs in Referred status as of July 31, 2014.

There are no Suspended Records as of July 31, 2014

2.1.3 Definitions for Year-To-Date Summary

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

3 GIS Mapping Layers – July 2014

3.1 Updated/Loaded Into GIS (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

KAUAI			
Type of Layer	**Akimeka GIS Server** **Date Created/ Edits Performed**	**Date Loaded Into PSAP GIS Server**	**Other/Remarks**
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS **(Listed Alphabetically)**			
Address Points	7/31/2014		Added one (1) new address point at 4781 Apopo Rd in Kapaa.
		07/24/14	
	7/18/2014		Added one (1) new address point (5064 Kukuna Rd) in Anahola.
	7/18/2014		Added one (1) new address point (5425 Honu Rd) in Princeville.
		07/10/14	
	7/7/2014		Added one (1) new address point at 6042 Menehune Rd in Waimea.
	7/3/2014		Spatially corrected 57 address points in Anahola.
	7/3/2014		Spatially corrected seven (7) address points in Kealia.
	7/2/2014		Added three (3) new addresses (4681 Aulima Rd A, 4681 Aulima Rd B and 4681 Aulima Rd C) in Lawai.
	7/1/2014 - 7/31/2014		Spatially corrected thirty-one (31) address points in Kapaa.
	7/1/2014		Added three (3) new address points (6380 Kawaihau Rd, 1716 Mauna Ikena Rd and 1741 Mauna Ikena Rd) in Kapaa.
	7/1/2014		Changed address from 6386 Kawaihau Rd to 1710 Mauna Ikena Rd in Kapaa.
DISPATCH AND RESPONSE			
ESZ/ESN	7/28/2014		Corrected boundary to ESN 401.
Emergency Callboxes			
Fire Beats	7/28/2014		Corrected boundary to Fire Beat 1.

SPECIAL REQUESTS			
KCC Building Outline			
KCC Callboxes			

*Every time the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

> Note: The Parcels layer is provided by Kauai County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes.   Changes to the attribute table are made when needed.   The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

3.8 CAD/Mapping System GIS Upload Process

3.8.1 Current Month Key GIS Activities and Updates – July 2014

7/24/2014   Performed Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.

7/24/2014   Address Points, Street Centerlines, Geofile for Street Centerlines, WSP Cell Sectors and WSP Cell Towers for GeoComm.

7/10/2014   Performed Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Trails, Hospitals and Dams.

7/10/2014   Address Points, Street Centerlines, Geofile for Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Trails, Medical Facilities, Hospitals and Dams for GeoComm.

3.8.2 Creation of Police Beat 453

During the month of June 2014, per special request of the Kauai Police Department, Akimeka began creating Police Beat 453.

1. Throughout July 2014, Akimeka completed the draft boundary for Police Beat 453 based on the boundary descriptions provided by the Kauai Police Department.

   a. During this process, the boundaries for Police Beats 450, 456 and 556 were modified to accommodate for the new Police Beat 453.

   b. Two (2) maps were created by Akimeka detailing the boundary of the new Police Beat and provided to the Kauai Police Department for their review and approval.

      i. Once the Police Beat has been approved for use by the Kauai Police Department, Akimeka will initiate the correction process to all accompanying layers, if necessary.

      ii. Research is currently being conducted to see if the ESZ/ESN GIS Layer requires modification in order to accommodate the changes to the Police Beat Layer. If it is determined that it does require corrective action, the process will also include corrections to the Street Centerlines, Address Points and the MSAG database including all affected TNs to ensure proper routing of emergency services.

   c. Subsequent to approval, the Police Beats layer will be uploaded into PowerMap and will be available to the dispatchers, potentially in August.

4   Service Requests Transactions

Kauai County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

5 E9-1-1 Database Synchronization

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a special re-run of the quarterly database synchronization audit for Kauai County in July 2014.

The database synchronization effort included comparing Kauai County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **1,268** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on July 1, 2014 for Kauai County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized.   Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

5.1 Audit Summary Results – 2014

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of January 7, 2014		As of April 1, 2014		As of July 1, 2014	
		9-1-1 MSAG Dated 01-01-14		9-1-1 MSAG Dated 04-01-14		9-1-1 MSAG Dated 07-01-14	
		# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		1,266		1,264		1,268	
Less: 9-1-1 MSAG Exception Records	(1)	56	4.4%	56	4.4%	60	4.7%
Net 9-1-1 MSAG Records Eligible for Comparison		1,210		1,208		1,208	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		1,204	99.5%	1,205	99.8%	1,202	99.5%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	6	0.5%	3	0.2%	5	0.4%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.0%	0	0.0%	1	0.1%
Total 9-1-1 MSAG Records No Match		6	0.5%	3	0.2%	6	0.5%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit completed
***for Kauai County resulted in a 99.5% 9-1-1 Match percentage***

5.2 Audit Summary Results – (Part II)

Notes:

(1)   An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

(2)   An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

(3)   An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

5.3 Audit Summary Results – July 1, 2014 MSAG vs. April 1, 2014 MSAG

**Kauai County's level of accuracy or 9-1-1 Match percentage
as of January 2014 was 99.8%.**

*The NENA recommended minimum match rate of 98% has been met
consistently in 2013 and continues in 2014.*

❖   Akimeka continues to work with Kauai County GIS and Planning departments to validate streets and communities.

❖   In achieving and exceeding the NENA minimum match rate of 98% for data accuracy, Kauai County is ready for Next Generation 9-1-1 (NG9-1-1) from a database perspective.

❖   A constant effort to keep the databases synchronized and maintained are required to ensure the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

❖   There is three (3) MSAG record that don't match the GIS. This is a result in which MSAG records submitted in 9-1-1 Net were not completed prior to the to the end of the month. These records have been corrected and will be reflected in the October 2014 re-analysis.

5.4 Audit Summary Results – July 1, 2014 MSAG vs. April 1, 2014 MSAG (Part II)

- ❖ There is one (1) MSAG record with missing GIS record. The missing record was due to MSAG correction request not being completed prior to the end of month. This record has been completed and will be reflected in the October 2014 re-analysis.

- ❖ Five (5) minor MSAG corrections were identified. MSAG records have been combined, split, and high/low ranges have been changed, to match the Street Centerlines, and will be reflected in the October 2014 re-analysis.

- ❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

- ❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

- ❖ Coordinating the clean-up of the ALI discrepancy records associated with an assigned ESN of 499 with the respective Service Providers is needed to ensure all records are MSAG valid.

5.4.1 Invalid MSAG Streets and Address Ranges – ESN x99 Records

At the request of the Kauai County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Kauai County and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the data provided are as follows:

KAUAI	Invalid MSAG Records					
	9-1-1 MSAG Dated 1-01-14		9-1-1 MSAG Dated 04-01-14		9-1-1 MSAG Dated 07-01-14	
	# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)
ESN 499	112	8.1%	103	7.5%	85	6.3%

These invalid MSAG records represent **6.3%** of the Total MSAG records for Kauai County as of the July 1, 2014 MSAG as compared to **7.5%** as of the April 1, 2014 MSAG. The individual ALI records associated with these records are provided below.
The decrease in the number of invalid MSAG records is a result of Akimeka's research and validation of telephone numbers (TNs) assigned an invalid MSAG address. In order for a TN to be corrected, Akimeka submits the update to the Service Provider via Intrado for approval.

Kauai County 9-1-1 Status Report
July 1, 2014 – July 31, 2014

5.5 Automatic Location Identification (ALI) Discrepancy Report

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for Kauai County. As of July 23, 2014, there are **890** ESN 499 ALI records, representing **3.5%** of Kauai County's Total ALI records. The number of ESN 499 ALI records was further reduced by **17.2%** (1,075 to 890) from April 30, 2014 to July 23, 2014 respectively.

**Kauai County ALI Records
as of 7-23-14**

3.5%

96.5%

- ESN 400
- ESN 499

The total number of ALI records remains relatively consistent.

Although the ESN 499 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 499 MSAG records to a valid Kauai County ESN 400 – 448 to ensure that all ALI records assigned to the County of Kauai have an "MSAG valid address".
