Enhanced 911 Communications, Technical, Finance Committee Meeting
Tuesday, May 6, 2014
Kalanimoku Bldg., Room 322B
1151 Punchbowl St., Honolulu
10 am to 12 noon

Meeting Minutes

Communications Committee members present: Thalia Burns, Paul Ferreira, Marshall Kanehailua, Davlynn Racadio, Victor Ramos, Steven Schutte and Clayton Tom.
Communications Committee members absent: None.

Technical Committee members present: Victor Ramos (Chair), Clement Chan, Aaron Correia, Marshall Kanehailua, Gary Lum, Brandon Raines, Tony Ramirez, Steven Schutte, Clayton Tom, and Kiman Wong
Technical Committee members absent: None.

Finance Committee members present: Kiman Wong (Chair), Paul Ferreira, Lisa Hiraoka, Roy Irei and Randal Macadangdang.
Finance Committee members absent: None.

Board staff members: Thera Bradshaw and Courtney Tagupa

Observers: Kevin Allen, (ESD), Tom Barrientos (ESD), Mark Begley (Kauai County), Sonny Bhagowalia (Governors Office via telephone), Ron Bregman (Ocean Safety), Ryan Freitas (HTEL), Victoria Garcia (OMIT), Rob Gausepohl (Kauai), Travis Ing (HiPD)David Miyasaki (Kauai County), Allan Nagata (HPD), Sean Naito (HPD), Dan Purcell (public), Norma Reyes (OMIT), Jeff Riewer (AT&T), Ian Santee (ESD), and Kenison Tejada (APCO/NENA Joint Pacific Chapter).

I.   Call to Order, Public Notice, Quorum

a. The meeting was called to order at 10:04 am.

1

II. Public testimony on all agenda items

a. The Board Chair requested if anyone in attendance who wished to provide testimony on any agenda item to please come forward.   There was no one who came forward.

III. Introductions

a. Introductions were made of all in attendance.

IV. Review and Approval of Last Meeting's Minutes

a. Kiman Wong motioned to accept the minutes of March 2014. The motion was seconded by Paul Ferreira and approved unanimously by voice vote.

V. Items for Discussion, Consideration, and Action

a. Communications Committee – Steven Schutte

   i. 2014 Legislative Investigative Committee Update.

      1. The Executive Director thanked the counties, Paul Ferreira for his leadership, Dave Kajihiro, Randal Macadangdang, and Sean Naito for their presence and their representation on behalf of the Board.

      2. The bill went down to the wire, when the speaker closed the session; signatures were all that remained to pass the bill.

      3. Senator Baker and Espero were the key legislators behind the bill and were asked for their continued support. Going forward, we need to continue the legislative committee efforts and use the down time for educational purposes.

   ii. APCO/NENA Joint Pacific Chapter – Ride the 9-1-1 Wave into the 21st Century Forum

      1. The Chapter indicated the conference went well and was a great success. The panel discussions and topics were well received and provided the attendees with a lot of information.

2

2. The Chapter thanked the 9-1-1 Board for their support; Thera Bradshaw for her leadership, expertise and guidance.

3. Thera Bradshaw thanked the Chapter, the 9-1-1 Board for their continued support and the sponsors present.

b. Technical Committee – Victor Ramos

    i. Investigative Regulatory Committee update

        1. Marshall Kanehailua stated that a meeting with Stella will be scheduled with Stella Kam on the next steps for Committee.

    ii. Investigative Committee on NG911 update

        1. Nothing to report.

    iii. FCC updates – Thera Bradshaw

        1. The FCC hosting workshop on June 2, 2014 on network reliability. The FCC is focused on three specific areas: critical 9-1-1 circuit diversity; back up power for central offices that directly serve the public safety answering points and diverse network routing.

        2. Comments on Text to 9-1-1 rule making due; Board submitted comments previously; additional comments will be submitted by NASNA.

        3. FCC hosted a meeting on April 17 & 18, 2014 on public safety imperatives in an IP network, cyber security and disaster preparedness.

    iv. Hawaiian Telcom Format 6 – International Calls

        1. Nothing to report.

    vi. Request for Approval:

        1. NENA Conference – June 2014, Nashville, TN.

            i. Executive Director - $2,500 (includes NASNA)

            ii. MPD – Molokai 1 each; total $7,400.

1. Tony Ramirez suggested the Board include a general invitation to the other PSAPs and Board members that may be interested in attending the conference.

2. Steven Schutte motioned to approve the funding for the conference. The motion was seconded by Tony Ramirez and approved unanimously by voice vote.

2. APCO Conference – August 2014, New Orleans, LA.

   i. HPD 3 individuals (1 PSAP representative from the APCO/NENA Chapter); $10,500.

   ii. KPD – 1 individual; $3,700

      1. Discussion on increasing the attendees for KPD and HPD and adding Maui, the Big Island and Oahu DIT.

      2. The Executive Director recommended that the increase and additions that were not on the agenda be added to the June agenda and the Board can offer its support so that travel arrangements could be made.

      3. Steven Schutte motioned to approve the funding for 3 individuals from HPD and 1 individual from KPD to attend the conference. The motion was seconded by Clayton Tom and approved unanimously by voice vote.

3. KPD request attendance: 1 individual from Dispatch Operations for Joint Committee meetings each month - $260/month.

   i. The Executive Director recommended that the request be approved as operations personnel

If you require an auxiliary aid or accommodation due to a disability, please contact 808-447-8919 (voice/tty) or email at ctagupa@keakitech.com.

add value to the committee meetings especially on the Technical Committee.

        ii. Rob Gausepohl to submit the name of the individual to Victor Ramos for consideration and appointment. No other action required.

    4. ESD – Microwave antenna lease (6 months) - $3,770. increase.

        i. No action required; item previously approved on the existing budget.

  vi. Recurring PSAP Maintenance Discussion.

    1. All PSAPs to take steps for counties to absorb recurring maintenance costs in respective operational budget including:

        i. HT Trunk charges.

        ii. CAD Maintenance.

        iii. Others

    2. Discussion on transitioning the recurring maintenance charges back to the counties budget. This item came up in a discussion at a recent statewide meeting of police officers where it was suggested that these items be part of the county's general fund.

    3. The intent of the legislation was not to fund operational costs, however all the counties have already prepared their FY2015 budgets. The Board is looking at the FY2016 budget to begin cutting some of the costs.

    3. Mark Begley asked that the Committees prioritize the recurring charges and to consider what would happen if the counties are unable to fund the HT charges and what impact it would have on 9-1-1 service.

  vii. 2014 June NENA Conference Presentation Abstract – Sonny Bhagowalia.

1. Synergy Opportunity between Next Generation 9-1-1 and FirstNet abstract accepted by NENA; handouts provided to attendees; presented for the Board consideration.

2. Hawaii is an isolated State; citizens require public safety network that provides mission critical services; need for NG9-1-1, FirstNet and Hawaii Broadband Initiative to be connected under a unified state plan.

3. Connectivity between Hawaii and the mainland is challenging; need for redundancy, back up and improved coverage in rural areas; FirstNet will ensure the building, deployment and operation of a nationwide public safety broadband network; $7 billion dollars in funding; Hawaii has a chance to receive up to $35 million dollars and currently has $1 million dollars in grants.

4. Governor to request funding from the federal government; need to ensure adequate funding and resources through Synergy efforts; improve technology infrastructure reliability and security; analyze, prioritize and ensure equitable access for all islands.

5. Member of the public complimented Sonny Bhagowalia for his work and inquired if Wi-Fi will be available in Hawaii as it is in the City of New York. Sonny Bhagowalia responded that Wi-Fi is limited to one or two areas, one of which is the Kalanimoku Building.

6. Victoria Garcia commented that Hawaii has not received any money yet and funding will not be available until the auction is complete; General Wong is the point of contact for Hawaii; OMIT will be doing outreach and education in the future and will be reaching out to all the stakeholders for participation.

7. Steven Schutte motioned to forward this item on to the Board for information or approval. The motion was seconded by Clayton Tom and unanimously approved by voice vote.

viii. Others – None

c. Finance Committee – Kiman Wong

    i. Review of FY 2014 Cash Flow & Budget Financial Report

        1. Receipts - $770,430

        2. Disbursements - $517,689

        3. Balance - $12,167,287

        4. Unencumbered Balance - $10,925,545

    ii. Request for Funding Approval;

        1. NENA Conference – June 2014, Nashville, TN.

            i. Executive Director - $2,500 (includes NASNA)

            ii. MPD – Molokai 1 each; total $7,400

            Paul Ferreira motioned to approve the funding for the conference. The motion was seconded by Randal Macadangdang and approved unanimously by voice vote.

        2. APCO Conference – August 2014, New Orleans, LA.

            i. HPD – 3 individuals (1 PSAP representative from the APCO/NENA Chapter) - $10,500

            ii. KPD – 1; $3,700.

            Paul Ferreira motioned to approve the funding for the conference to include a recommendation to amend Thursday's agenda for pre-approval from the Board to allow other PSAPs to send representatives to the conference with a dollar amount to be determined. The motion was seconded by Randal Macadangdang and approved unanimously by voice vote.

3. KPD request attendance: one individual from Dispatch Operations for Joint Committee meetings each month - $260/month.
    i. No action required.
4. ESD – Microwave antenna lease (6 months) - $3,770
    i. No action required.
    iii. Open Data Visualization of E911 (Preliminary Draft)
        1. The website is means of offering transparency in government. The information for the website has been provided to Sonny Bhagowalia; the figures/numbers need to be verified.
        2. The website is operational; however with the installation of the new CIO, some of the projects have been delayed.
    iv. FY 2015-19 Strategic Budget Planning
        1. The Strategic Budget Planning meeting will commence after the Committee meeting.
    v. Others – None.

VI. PSAP Status Updates
a. Kauai – Rob Gausepohl
    i. Tritech implementation ongoing.
b. Oahu – Aaron Correia
    i. CAD upgrade ongoing; latest version due out today with the address verification fix; go live slated for prior to the end of the year.
c. Molokai – Victor Ramos
    i. Nothing to report.
d. Maui – Victor Ramos
    i. Nothing to report.
e. Hawaii – Marshall Kanehailua
    i. RFP out with a deadline of May 14, 2014.

VII. **Items for Discussion, Consideration and Action**

    a. 911 Timeline update

        i. A reminder to continue to submit the updates.

    b. Others – None.

VIII. **Announcements**

    a. Next meeting date: Tuesday, June 10, 2014, Kalanimoku Bldg., Room 322B, 10am – 12noon (Joint meeting with Board).

        i. Future meeting dates (10am – 12noon).

            1. July 8, 2014

            2. August 12, 2014

            3. September, 9, 2014

            4. October 7, 2014

            5. *__Thursday__*, November 13, 2014 (Joint meeting with Board)

            6. December 9, 2014

    b. Others – None.

IX. **Open Forum: Public comment on issues not on the agenda for consideration for Committee agenda at the next meeting.**

    a. There was no one who came forward to testify.

X. **Adjournment**

    a. The meeting was adjourned at 11:34 am.

Note: *Total Calls include Administrative calls that are not direct 9-1-1 calls.*

1.5 PSAP Operation Notes

(1) Total call volumes include Administrative calls. (Administrative calls = Calls originating on Adminstrative lines that required 911 service.)

(2) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. "Dropped Calls" are hang ups after transfers.

(3) "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

1.6 Wireless Test – April 2014

Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail
None					

There were no scheduled Wireless Test for Honolulu in April 2014

2 MSAG
2.1 Current Month – April 2014

		MSAG TRANSACTIONS							ALI TRANSACTIONS					
PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Submitted (a)	ALI Discrepancy (ALI-DR) Submitted (b)	TN CR	ALI-DR	# of Transactions	TNs Affected
OAHU CIVILIAN	780	465	421	7	2	2	33	16,682	314	1	38	0	0	0

During the month of April 2014, there were a total of seven hundred eighty (780) MSAG transactions were processed in 9-1-1Net. Four hundred sixty-five (465) 9-1-1Net requests were processed relating to the MSAG database, with 16,682 customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. Three hundred fourteen (314) Telephone Number Change Requests (TN CR) and one(1) ALI-DR transaction was processed in 9-1-1Net for updates and corrections to the ALI database. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG valid address was provided to the Telco.

There is thirty eight (38) TN CR records in Referred status as of April 30, 2014. Referred records are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

There are currently no records in suspended status as of April 30, 2014.

Note: Revised categories and report format changes effective May 2012 with new Intrado TN CR functionality.

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

2.3 MSAG Communities Project
2.3.1 MSAG Community and Street Segment Sweep – Phase II Status

Based on a verbal agreement between the Honolulu Police Department, as the Primary Civilian PSAP, and Akimeka, it was agreed that the Military MSAG should be updated to reflect the standardized and approved MSAG Community Names approved jointly by the Military and Oahu Civilian PSAPs to ensure interoperability. It was also agreed that this work effort will be completed by Akimeka on an **"as we can get to it"** basis.

Below is the latest status of the Phase II work effort as of **April 30, 2014**

OMIL Existing Community Name	New Approved Community Name	MSAG Records	MSAG Transactions Required	Status	Notes/Comments

Oahu Civilian E9-1-1 Status Report
April 1, 2014 –April 30, 2014

2.3.2 MSAG Community and Street Segment Sweep – Phase II Status (continued)

In the month of April 2014, Wheeler was "Completed".

A total of 1711 MSAG transactions have been completed thus far – **69% Complete**. An estimated 756 MSAG transactions remain to be submitted and processed.

Status of the Phase II effort will continue to be tracked until all 9-1-1Net MSAG transactions required have been completed.

MSAG Community and Street Segment Sweep – Phase V

A meeting was held with the Oahu Civilian PSAPs and Akimeka on August 7, 2013, to review the Phase V project scope, schedule and timeline. Approval was received to proceed with Phase V and Phase VI after the completion of Phase V.

Below is the latest status of the Phase V work effort as of **April 30, 2014**:

3.7 Geographic Information System (GIS) Narrative

3.7.1 Police Beats Corrections

Background

The Police Beats was previously identified as a layer requiring corrective action in preparation for the ESZ/ESN project and ensuring spatial accuracy.

Subsequent to the Police Beat corrections that took place during the month of August 2013, upon loading the GIS data for Street Centerlines in the current Motorola Premier CAD, HPD PMT confirmed that there were no issues with regards to the CAD system recommendations. HPD PMT also reviewed the Police Beats corrections worksheet and confirmed that there were no issues with the document. As such, Akimeka proceeded to make corrections to the Police Beats layer utilizing HPD's written Policies and Procedures document for boundary descriptions.

Status To Date

Based on HPD PMT's confirmation, Akimeka continued to make corrections to the Police Beats during the month of April 2014. Akimeka completed an additional one (1) Police Beats (871) boundary correction.

Upload Process

It was agreed that the Police Beats layer will not be uploaded to the current Motorola CAD system and will only be uploaded to the new Motorola PremierOne CAD system. Although the Police Beats layer (with the corrections) will not be uploaded to the current CAD system, the Street Centerlines are impacted by these boundary updates.

As such, Akimeka assisted with creating a new upload process which mirrors a step similar to the updates with the MSAG Communities. The new process was run successfully in November 2013, and has been successful since that time. In addition, the new upload process for the Premier CAD, also resolved other discrepancies with recommendations which were previously identified. It was agreed that this new process will be implemented and used going forward. Subsequent to this process improvement, there have been no issues and the Police Beat corrections project continues to move forward.

3.7.2 Ocean Safety Requirements

Subsequent to Akimeka's meetings with Ocean Safety, Akimeka continued to work on Ocean Safety's layers in order to assist with Ocean Safety's dispatch and response operations. In addition to all of Akimeka's priorities and deliverables, Akimeka completed all items identified during the initial kickoff meeting. Since September 2013, Akimeka has worked with Ocean Safety in a continued effort to make any additions or corrections to the Ocean Safety layers in order to move the project along.

1. On April 2, 2014, Ocean Safety, the Honolulu Emergency Medical Services, and Akimeka came together to review and edit the Ocean Response Areas layer at the Akimeka office.

   a. Upon request, Akimeka extended the half mile ATV boundary to include a 150 yard boundary into the ocean.

   b. Upon request, Akimeka added six (6) Rescue Craft boundaries, one (1) Dive Location, and one (1) Lifeguard Tower.

2. April 3 – 8, 2014, Akimeka completed a full review of the Ocean Response Areas.

   a. Reviewed the 150 yard beach boundary, 400 yard lifeguard tower boundary, half mile ATV boundary, three mile Mobile Vehicle boundary, and the Rescue Craft boundary for inconsistencies.

   b. Merged all five (5) Ocean Response Areas together.

   c. Validated the Ocean Response Areas for gaps and overlaps.

3. On April 9, 2014, Ocean Safety and Akimeka held a meeting to finalize the Ocean Response Areas layer.

4. On April 10, 2014, Akimeka submitted the Ocean Response Area layer to TriTech for review.

During the month of May 2014, Akimeka and Ocean Safety will await TriTech's review and follow up on the Ocean Response Areas and make any necessary changes if needed.

3.7.3 Intrado PowerMap Upload

Since the establishment of the GIS Data deliverable process between Akimeka and Intrado in January 2014, the data uploads have been successfully carried out.

In January and February 2014, an issue within PowerMap had been identified with the display of Phase 1 wireless 911 calls. The issue identified is that the map is not displaying the Phase 1 polygons, but is zooming to the area when the 911 call occurs. Akimeka assisted Intrado on a couple occasions with the configuration settings; however no true identification of the cause of the discrepancy has been identified.

GIS UPDATES FOR POWERMAP 4.1

* The Honolulu PowerMap 4.1 GIS Deliverable always include the following GIS layers: WSP Cell Sites, WSP Cell Sectors, Street Centerlines, Address Points, Common Places, MSAG Communities, ESN, Fire Response Areas, Medic Response Areas, Police Response Areas, Streams, and Tow Boundaries

3.7.4 TriTech CAD System Upgrade

During the month of January 2014, Akimeka, HFD and EMS had begun coordination to prepare Address Points for the new TriTech CAD system for Address Validation. Since Address Points have not been used in the CAD system, but in the past had been used as visual only, there are needed configurations in both the GIS and the CAD in order to work properly. HFD, EMS, and Akimeka will continue to work together to ensure the proper information is being utilized.

1. Agreement was made to use a small batch of Address Points for the initial configuration and testing, as to not overwhelm the system and will be more effective for testing.

    a. It was agreed to use a small area in both the Waikiki area and Waimanalo area. Waikiki is being used to test a more urban area and Waimanalo more rural. In addition, Waimanalo has been through a street and address sweep process and Waikiki has not been through the correction process, so it should be a good means to test for a variety of potential discrepancies.

    b. The first small dataset of Address Points was included in the February 7, 2014 GIS data deliverable.

3.7.5 TriTech CAD System Upgrade (Part II)

1. Subsequent to the delivery of the small batch of Address Points on February 7, 2014, some potential issues were identified.

    a. Apartment numbers are included in the GIS data.

        a. Depending on how the TriTech CAD system gets configured, the information for apartment numbers and/or building numbers should not be included in the full address for address validation.

        b. Akimeka identified previously that the ANI/ALI information for the State of Hawaii does not include apartment information in the full address used in the address validation process. That information however, does come across in driving instructions which is a comment field used to provide additional information for address locations and is not an identifier used in validations of the call.

        c. With that said, Akimeka preferred to hold on discussing the address point configuration until a meeting with all of the PSAPs can be set up. It is important for all public safety agencies to discuss these items collectively as a group so decisions can be made together.

    b. On March 13, 2014, a meeting was held to discuss the apartment field in the GIS and the validation source with the ANI/ALI fields. The PSAPs and Akimeka agreed that the apartment field would best be used as a visual display in the mapping and CAD systems as a label. Considering the apartment information is not available in the designated field in the ANI/ALI it is best to use the full address without apartment and/or building numbers for address validations.

2. On April 18, 2014, all of the Oahu Address Points were included in the GIS data deliverable for the TriTech CAD for Fire and EMS.

3.7.6 SPAWAR Meeting on Addressing for MCBH

There has been no further information or correspondence with regards to this project.

Oahu Civilian E9-1-1 Status Report
April 1, 2014 – April 30, 2014

3.7.7 Street Utility Check

This is an ongoing project to correct the errors identified. A comparison of the raw CAD generated report from the Street Check Utility was performed between the Street Centerline GIS data delivered on March 24, 2014 and April 24, 2014. Below are the results of the comparison.

	First Report 06/01/12	03/24/14	04/24/14	Improvement/ Comments
Total Number of GIS Records	**26,602**	**27,010**	**27,022**	**Added twelve (12) records**
	Errors Identified			
Zero Errors	5,112	889	829	Further reduced errors by 6.8% (60 errors)
Low > High Errors	3	1	0	Decreased by 1 error
Mixed Parity Errors	1	0	0	No Change
Changed Parity Errors	105	0	0	No Change
Address Gap Errors	2,629	328	96	Further reduced errors by 70.7% (232 errors)
Address Overlap Errors	423	1	0	Decreased by 1 error
Flipped Link Errors	1,030	574	566	Further reduced errors by 1.4% (8 errors)
Total Errors	**9,303**	**1,793**	**1,491**	**Further reduced errors by 16.8% (302 errors)**

In addition to Akimeka's internal validation tools, Akimeka will continue to utilize the various CAD reports to further identify and correct the multitude of discrepancies in the GIS data. This is an ongoing and routine process which Akimeka has been using to improve the accuracy of the GIS data for Public Safety.

Akimeka plans to continue its work effort to complete corrections of the discrepancies identified and/or identify any valid exceptions which Akimeka will tag with the proper information so the CAD system will accept the record(s) and not jeopardize the full functionality of the CAD system from the upload to RMS. Akimeka plans to complete all Street Utility Check errors prior to the implementation of the Motorola PremierOne CAD "go live" date.

4 E9-1-1 Database Synchronization

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for the Oahu Civilian PSAP in April 2014.

The database synchronization effort included comparing Oahu Civilian's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **7,509** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on April 1, 2014 for the Oahu Civilian PSAP are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

4.1 Audit Summary Results – 2014

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of July 26, 2013 9-1-1 MSAG Dated 07-01-13		As of Octover 21, 2013 9-1-1 MSAG Dated 10-01-13		As of January 13, 2014 9-1-1 MSAG Dated 01-01-14		As of April 1, 2014 9-1-1 MSAG Dated 04-01-14	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		7,096	0	7,111	0	7,336		7,509	
Less: 9-1-1 MSAG Exception Records	(1)	6	0.1%	6	0.1%	6	0.1%	6	0.1%
Net 9-1-1 MSAG Records Eligible for Comparison		7,090	0	7,105	0	7,330		6,560	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		6,793	95.8%	6,825	96.1%	7,082	96.6%	6,430	98.0%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	225	3.2%	213	3.0%	166	11.6%	57	0.9%
9-1-1 MSAG Record With No Matching GIS Record	(3)	72	1.0%	67	0.9%	82	1.1%	73	1.1%
Total 9-1-1 MSAG Records No Match		297	4.2%	280	3.9%	248	3.4%	130	2.0%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the City & County of Honolulu(Civilian PSAPs) was completed as scheduled. Further progress has been made from January 2014 with a 96.6% Match Rate to a 98% Match Rate as of April 2014
Oahu Civilian E9-1-1 Status Report
April 1, 2014 – April 30, 2014

4.2 Audit Summary Results – 2014 (Part II)

Notes:

(1)   An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

(2)   An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

(3)   An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

4.3 Audit Summary Results – April 1, 2014 MSAG vs. January 1, 2013 MSAG

9-1-1 MSAG Dated 04-1-14

2%

98%

■ Match
■ No Match

9-1-1 MSAG Dated 01-01-14

3.4%

96.6%

■ Match
■ No Match

Oahu Civilian's level of accuracy or 9-1-1 Match percentage improved from 96.6% as of January 1, 2014 to 98% as of April 1, 2014.
The majority of the remaining MSAG and GIS discrepancies are in the Honolulu MSAG Community.

❖   As agreed between HPD PMT and Akimeka, Akimeka would initially focus on the underline{existing} MSAG and GIS records to produce a match which will benefit the PSAP in the interim.

❖   This effort would not include the MSAG Communities project to implement the underline{new} MSAG Communities and associated GIS Street Centerlines. This would be handled as a separate project as identified and agreed to.

❖   As a result of the MSAG Community and Street Segment Sweep project, the majority of the remaining discrepancies reside in the Honolulu MSAG Community and will be addressed during the Phase V effort.

4.4 Audit Summary Results – April 1, 2014 MSAG vs. January 1, 2014 (Part II)

❖ The previously completed MSAG Communities as a result of the MSAG Community and Street Segment Sweep project are now considered part of ongoing maintenance.

❖ "MSAG - GIS Minor Corrections" were further reduced by **66%** (166 to 57) from January 2014 to April 2014 respectively. Low and high address ranges, odd/even combines, and street suffixes were adjusted in the MSAG to correspond with the GIS record. Although identified as a minor correction, customer telephone numbers (TNs) must be validated in 9-1-1Net prior to correcting the MSAG record to ensure the correction will not result in an orphan ALI Record or TN Fall-out.

❖ "MSAG Record With No GIS Record" decreased by **11%** (82 to 73) from January 2014 to April 2014 respectively. The decrease in records were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within City and County Honolulu.

❖ "GIS MSAG Records With No Matching E9-1-1 MSAG Record" increased from 4 to 9 records from January 2014 to April 2014. The increase in records were due primarily to the verification of the MSAG records against the single source 9-1-1 GIS databases created by Akimeka from the multiple public safety agencies' databases to determine if the roads exist within City & County of Honolulu and Military bases GIS records.

❖ "GIS – MSAG Minor Corrections" were further reduced by **72.3%** (376 to 104) from from January 2014 to April 2014 respectively. Low and high address ranges, street suffixes, and MSAG Community were adjusted in the GIS database to correspond with the MSAG record.

❖ A constant effort to keep the databases synchronized and maintained are required to improve the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

4.5 Invalid MSAG Streets and Address Ranges – ESN x99 Records

At the request of the Kauai County and Hawai'i County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided all State of Hawai'i PSAPs and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the Oahu Civilian data provided are as follows:

OAHU CIVILIAN	Invalid MSAG Records			
	9-1-1 MSAG Dated 01-01-14		9-1-1 MSAG Dated 04-01-14	
	# of Records (Baseline Starting Point)	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)
ESN 199	238	3.1%	220	2.8%

These invalid MSAG records represent **2.8%** of the Total MSAG records for the City & County of Honolulu as of the April 2014 MSAG. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 199 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.
Oahu Civilian E9-1-1 Status Report
April 1, 2014 –April 30, 2014

4.6 Automatic Location Identification (ALI) Discrepancy Report

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for the City & County of Honolulu (Oahu Civilian). As of April 30,2014, there are **220** ALI records with an assigned ESN of 199, representing **2.8%** of the City & County of Honolulu (Oahu Civilian) total ALI records.

With Akimeka's continuing MSAG Community and Street Segment Sweep effort, the percentage of ESN 199 records may increase as low and high address ranges and new communities are verified.

The total number of ALI records decreased by **9%** (538,412 to 491,003) while the number of ESN 199 records decreased by **4.2%** (1,783 to 1,709) from January 2014 to April 2014 respectively. The decrease was due primarily to Akimeka's effort to identify the invalid MSAG records and verify their correct locations against current County GIS data.

Although the ESN 199 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 199 MSAG records to a valid City & County of Honolulu ESN 100 to ensure that all ALI records assigned to the City & County of Honolulu (Oahu Civilian) have an "MSAG valid address".

Maui County E9-1-1 Status Report
April 1, 2014 – April 30, 2014

2.1.1 MSAG Current Month Notes:

During the month of April a total of one hundred fifty-nine **(159)** MSAG transactions were processed. Thirty-One **(31)** 9-1-1 Net requests were processed relating to the Maui County MSAG database, with seven hundred seventy-five **(775)** customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. One hundred twenty-eight **(128)** Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1Net for updates and corrections relating to the ESN 359/399 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG valid address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user HawaiianTelcom customer before updating the ALI record.

There are 209 TN CRs in Referred status as of April 30, 2014.

The TN CRs in "Referred" status are a direct result of the ESN 359/399 clean-up and are awaiting approval from Hawaiian Telcom, Inc (HTI) and/or customer to update ALI records. No explanation has been provided as to why these TN CRs have not been corrected for 9-1-1 purposes. Akimeka continues to monitor and track the progress of Referred TN CRs.

There are no VoIP DRs in Referred status as of April 30, 2014.

There are no ALI DR records in Referred status as of April 30, 2014

There are no Suspended Records as of April 30, 2014.

2.1.2 Definitions for Year-To-Date Summary

Definitions:	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

April 1, 2014 – April 30, 2014

3   GIS Mapping Layers – April 2014

3.1   Updated/Loaded Into GIS (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

		MAUI COUNTY		
Type of Layer	**Island**	**Akimeka GIS Server** **Date Created/** **Edits Performed**	**Date Loaded Into** **PSAP GIS Server**	**Other/Remarks**
Address Points	Maui/Lanai	04/30/14		Added two (2) new addresses received from DSA. Spatially corrected seven (7) address points in Makawao.
	Molokai	04/30/14		Added ten (10) addresses in Maunaloa
	Maui/Lanai	04/25/14		Added five (5) addresses received from DSA. Spatially corrected two (2) address points in Makawao and seven (7) in Kihei.
			04/23/14	
	Maui/Lanai	04/18/14		Spatially corrected fifty-five (55) address points in Paia.
	Maui/Lanai	04/16/14		Spatially corrected eighty-eight (88) address points in Napili.
	Maui/Lanai	04/15/14		Added one (1) address and spatially corrected 132 address points in Napili. Added two (2) addresses received from DSA and spatially corrected one (1) address point in Kihei.
	Maui/Lanai	04/11/14		Added six (6) new addresses received from DSA. Spatially corrected 127 address points in Napili.
	Maui/Lanai	04/10/14		Spatially corrected 145 address points in Napili
	Maui/Lanai		**04/09/14**	
	Maui/Lanai	04/09/14		Spatially corrected 187 address points in Napili
	Maui/Lanai	04/08/14		Added one (1) address in Kula per DSA
	Molokia	04/04/14		Added one (1) address and spatially corrected eleven (11) addresses in Maunaloa
	Maui/Lanai	04/03/14		Spatially corrected two (2) address points in Haiku and seventy-two (72) in Makawao. Added one (1) new address received from DSA and five (5) addresses from the DSA Address layer.
	Molokia	04/02/14		Spatially corrected one (1) address point in Kaunakakai and added one (1) address received from DSA.
	Maui/Lanai	04/01/14		Spatially corrected 2 address points in Haiku, eight (8) in Pukalani and fifty (50) in Makawao. Corrected two (2) address in Makawao. Added three (3) new addresses received from DSA and eight (8) from the DSA Address layer.

Maui County E9-1-1 Status Report
April 1, 2014 – April 30, 2014

3.2 Updated/Loaded Into GIS (Part II)
9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Type of Layer	Island	Akimeka GIS Server Date Created/ Edits Performed	Date Loaded Into PSAP GIS Server	Other/Remarks
ESZ/ESN	Maui/Lanai	04/08/14		Corrected boundary between 320 and 326 so address point for 14306 Hana Hwy was included in ESN 326
Emergency Callboxes				
Fire Beats				
Fire Districts				
Fire Response Areas				
Fire Stations				
Major Roads				
MSAG Address Points (aka Pseudo Address Points)				
MSAG Communities (aka Towns)	Maui/Lanai	04/08/14		Corrected boundary between Haiku and Makawao to include address point for 2560 Kokomo Rd in Haiku
Medic Beats	Maui/Lanai	04/0814		Corrected the boundary between Medic 1 & 3 on Mokulele Hwy, Kahului
Medic Districts				
Medic Response Areas				
Medic Stations				
Milepost Markers				

3.3 Updated/Loaded Into GIS (Part III)
9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Type of Layer	Island	Akimeka GIS Server Date Created/ Edits Performed	Date Loaded Into PSAP GIS Server	Other/Remarks
MAUI COUNTY				
Milepost Markers				
Points of Interest	Maui/Lanai	04/17/14		Corrected subdivision name and location for Makawao Ranch Acres.
Police Beats	Maui/Lanai	04/0814		Corrected boundary between Beat 6-43 & 6-44 along the spatially corrected Kilohana Dr
Police Districts				
Police Response Areas	Maui/Lanai	04/08/14		Corrected boundary between RA 50 & 51 along the spatially corrected Kilohana Dr.
Police Stations				
WSP Cell Sectors	Maui/Lanai	04/23/14	04/23/14 04/09/14	Per T-Mobile CRS
Schools				
Street Centerlines	Maui/Lanai	04/25/14		Spatially corrected three (3) street centerline segments; Partial spatial correction on two (2) segments, in Pukalani.
				Spatially corrected one (1) street centerline segment; Partial spatial correction on one (1) segment; Modified one (1) range segment in Lanai.
				Spatially corrected and one (1) street centerline segment; Partial spatial correction on one (1) segment; Modified one (1) range segment in Makawao
				Spatially corrected one (1); Modified one (1) range segment in Kahului.
	Maui/Lanai	04/10/14 - 04/25/14		Spatially corrected one hundred two (102) street centerline segments; Partial spatial correction of thirty two(32) segments; Modified thirty one (31) range segments in Napili.
			04/23/14	
	Maui/Lanai	04/23/14		Spatially corrected one (1) street centerline segment in Haiku, partial spatial correction on four (4) segments in Haiku and one (1) in Napili, modified one (1) range segment in Haiku. Added one (1) new street segment in Napili.
	Maui/Lanai	04/22/14		Spatially corrected one (1) street centerline segment and modified one (1) range segment in Wailuku.

3.4 Updated/Loaded Into GIS (Part IV)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Type of Layer	Island	Akimeka GIS Server Date Created/ Edits Performed	Date Loaded Into PSAP GIS Server	Other/Remarks
Street Centerlines	Molokai	04/22/14		Fixed a multipart segment in Kaunakakai
	Maui/Lanai	04/18/14		Spatially corrected ten (10) street centerline segments, partial spatial correction on eight (8) segments and modified two (2) segment ranges in Paia.
	Maui/Lanai	04/09/14 - 04/16/14		Spatially corrected one hundred two (102) street centerline segments; Partial spatial correction of thirty one (31) segments; Modified thirty one (31) range segments in Napili.
	Maui/Lanai	04/15/14		Added two (2) addresses received from DSA and spatially corrected one (1) address point in Kihei.
	Maui/Lanai	04/11/14		Spatially corrected one (1) street centerline segment; Partial spatial correction three (3) segments and modified the range on one (1) segment range in Lahaina.
			04/09/14	
	Maui/Lanai	04/08/14		Added one (1) address in Kula per DSA.
	Molokai	04/04/14		Spatially corrected two (2) street centerline segments, partial spatial correction to three (3) segments, corrected seven (7) range segments, corrected the parity for eight (8) range segments and corrected the street name for six (6) range segments in Maunaloa.
	Maui/Lanai	04/01/14 - 04/03/14		Spatially corrected three (3) street centerline segments, partial spatial correction to two (2) segments, corrected fourteen (14) range segments and one (1) parity in Makawao. Spatially corrected seven (7) street centerline segments, partial spatial correction to ten (10) segments, corrected thirteen (13) range segments in Makawao. Spatially corrected eighteen (18) street centerline segments, partial spatial correction to sixteen (16) segments, corrected eight (8) range segments and flipped one (1) segment in Makawao.
	Molokai	04/02/14		Modified the range for two (2) street centerline ranges in Hoolehua to correspond with all address points. Akimeka's MSAG Coordinator was notified of all range changes affecting the MSAG.

The table above is headed by a single spanning header row: **MAUI COUNTY**

3.5 Updated/Loaded Into GIS (Part V)
9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Tow Jurisdictions				

Note: The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Maui County E9-1-1 Status Report
April 1, 2014 – April 30, 2014

3.8 CAD/Mapping System GIS Upload Process

3.8.1 Current Month GIS Activities – April 2014

04/09/14   Akimeka prepared the following data on PowerMap in Maui: Address Points, Gate Codes, Medic Beats, MSAG Communities, Police Beats, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.

04/09/14   Akimeka's prepared PowerMap update was not completed on Molokai due to connection issues.

04/23/14   Akimeka prepared the following data on PowerMap in Maui: Address Points, Gate Codes, Medic Beats, MSAG Communities, Police Beats, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.

04/23/14   Akimeka prepared Powermap Update in Molokai which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Subdivisions and Points of Interest.

❖ *Everytime the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.*

4   Geographic Information System (GIS)

4.1 Next Generation 911 (NG9-1-1) GIS Requirements

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of April 2014, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1.

4.1.1 GIS Data Corrections

NG9-1-1 GIS Data Corrections			
GIS Layer Name	**Type of Correction**	**Number of Records Corrected/Modified/Added/Removed**	**Comments/Details**
Address Points	Added	56 Added	Addresses received from DSA, DSA Address layer, MSAG and field verifications
Address Points	Corrections	3 Corrected	
Address Points	Spatially Corrected	947 Corrected	Corrected location of address point, recalculated x/y
Street Centerlines	New Segment	1 Added	
Street Centerlines	Range Segments Corrected	93 Corrected	Ranges modified according to address point locations
Street Centerlines	Street Name Correction	6 Corrected	
Street Centerlines	Parity/Flip/Multipart	9/1/1 Modified

April	15,296	79.60%	0	1,667	5	2,219	11.55%	0	27	2

1.3.1 Call Volume by Agency Notes:

(1) Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)

(2) "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. These calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

(3) "Other Calls" for HPD and HFD include calls marked"PBXR", "RSDX" and "RSDX" in the call volumes.

There was no scheduled Wireless Testing for Hawaii County in April 2014.

2 MSAG

2.1 Current Month – April 2014

| 2014 | | 9-1-1NET REQUESTS | | | | | | | | | | In Referred Status as of Report Month End (d) | | | In Suspended Status as of Report Month End (e) | |
| | | MSAG TRANSACTIONS | | | | | | | ALI TRANSACTIONS | | | | | | | |
PSAP	TOTAL	Total	Change	Combined	Delete	Insert	Split	Customer Addresses Affected	County Address Change Request (TN CR) Submitted (a)	ALI Discrepancy (ALI-DR) Submitted (b)	VoIP Discrepancy (VoIP DR) Request Processed (c)	TN CR	ALI-DR	VoIP	# of Transactions	TNs Affected
HAWAII	401	142	71	4	48	11	8	777	252	4	3	544	1	0	0	0

2.1.1 MSAG Current Month Notes:

During the month of April 2014 a total of four hundred one (401) MSAG transactions were processed in 9-1-1 Net. One hundred fourty-two (142) requests were processed relating to the MSAG database, with seven hundred seventy-seven (777) customer ANI/ALI (telephone/address) records updated as a direct result. Two hundred fifty-two (252) Telephone Number Change Requests (TN CR) transactions and four (4) ALI-DR transactions were processed in 9-1-1Net, as well as three (3) VoIP DRs submitted to Time Warner for updates and corrections.

The Two hundred fifty-two (252) TNCRs were submitted with MSAG valid addresses, as a result of the ESN 299 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG valid address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

There are five hundred fourty-four (544) TN CRs in Referred Status as of April 30, 2014, which are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc.

Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

2.1.2 MSAG Current Month Notes (Part II):

There is one (1) ALI DR in Referred Status as of April 30, 2014.

The TN that was submitted in November 2013 to T-Mobile via Intrado. Numerous follow-ups have been made by Akimeka inquiring as to why these TN CRs remain in "Referred" status. Intrado re-referred TN to T-Mobile on April 16, 2014.

Intrado will notify Akimeka when the TNs have been updated in 9-1-1Net.

There are no VoIP DRs in Referred Status as of April 30, 2014

2.1.3 Definitions for Year-To-Date Summary

Definitions:		
	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

3   GIS Mapping Layers – April 2014

3.1   Updated/Loaded Into GIS (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and are NG9-1-1 i3 ready

Type of Layer	Akimeka GIS Server Date Created/ Edits Performed	Date Loaded Into PSAP GIS Server	Other/Remarks
HAWAII			
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS (Listed Alphabetically)			
CALLER LOCATION			
Address Points	04/30/14		Corrected address number to three (3) address points in Ninole and spatially corrected two (2) of them.
	04/29/14 - 04/30/14		Spatially corrected seventy-one (71) address points in Hawi.
	04/25/14		Updated Routing ID to three (3) addresses in Mountain View.
		04/22/14	
	04/18/14		Spatially corrected ten (10) address points in Keaau. Added six (6) new address points in Keaau.
			Spatially corrected one (1) address point in Ocean View. Added six (6) new address points in Ocean View.
			Spatially corrected two (2) address points in Pahala. Corrected routing id to one (1) address point in Pahala.
			Spatially corrected one (1) address point in Pahoa.
			Added one (1) new address point in Captain Cook.
			Added two (2) new address points in Hawi.
			Added four (4) new address points in Hilo.
			Added one (1) new address point in Honomu.
			Added eight (8) new address points in Kailua Kona.
			Added four (4) new address points in Kamuela.
			Added eight (8) new address points in Kurtistown.
			Added one (1) new address point in Laupahoehoe.
			Added eight (8) new address points in Mountain View.
			Added three (3) new address points in Naalehu.
			Added three (3) new address points in Paauilo.
			Added nine (9) new address points in Pahoa.
			Added one (1) new address point in Pepeekeo.
	4/17/2014 - 04/18/14		Changed street name to 21 address points in Volcano. Added six (6) new address points in Volcano.
	04/11/14		Updated address number and street name to one (1) address in Kamuela.
		04/08/14	
	04/07/14		Spatially corrected one (1) address in Kailua Kona.
	04/04/14		Updated Routing ID to 18 addresses in Kamuela.
	04/03/14		Spatially corrected one (1) address point in Kapaau.
			Spatially corrected 55 address points in Hawi.
Emergency Callboxes			
Fire Stations			

Hawai'i County 9-1-1 Status Report

3.5 CAD/Mapping System GIS Upload Process

3.5.1 Current Month GIS Activities – April 2014

04/08/14   Akimeka prepared Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Fire Stations and Transfer Stations.

04/22/14   Akimeka prepared Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, Fire Response Areas and Points of Interest.

Everytime the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

Hawai'i County 9-1-1 Status Report
April 1, 2014 – April 30, 2014

4   Mapping Layers Updated/Loaded Into GIS – April 2014

4.1.1 Address Points and Street Centerlines Update Comparison

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers. In the month of May 2012, Akimeka added a process to identify changes to the Street Segment Names which has been included in the chart below.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawai'i County Planning Department on **April 18, 2014**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
# of New Street Segments Added		1
# of Street Segments Removed		0
# of New Addresses Added	71	
# of Addresses Removed	0	
# of Street Segment Range Changes		1
# of Street Segment Name Changes		1
# of Address Street Name Changes	21	
# of Address Street Number Changes	0	

Note: Some Address Points have its street name and street number changed at the same time. These are counted as separate actions since these changes are needed to make the layers "9-1-1 capable" for dispatch and response.

Hawaiʻi County 9-1-1 Status Report
April 1, 2014 – April 30, 2014

5   Geographic Information System (GIS)

5.1 Next Generation 911 (NG9-1-1) GIS Requirements

The transition of E9-1-1 to NG9-1-1 has caused a shift in the focus of the 9-1-1 GIS work. This new focus has centralized the GIS data model with more of an emphasis toward a higher degree of precision, while continuing its foundation on current, accurate, and standardized GIS data, only now to a higher level of exactness.

The NG9-1-1 GIS requirements have repositioned the focal point from generalizations and interpolation on Street Centerlines and civic addressing, to new and more focused requirements of point specific locations utilizing lat/longs, combined with civic addresses to determine a 9-1-1 caller's location from any communications device and from any location.

Akimeka has adapted the NG9-1-1 requirements into their correction processes and has continued working to improve accuracy, completeness, and quality of the GIS data. The redesigned correction process will also promote a higher level of detail, which helps facilitate data consistency and is an important element for interoperability and information sharing across the PSAPs.

During the month of April 2014, Akimeka has focused on correcting the following areas and has established a baseline moving into NG9-1-1.

NG9-1-1 GIS Data Corrections			
GIS Layer Name	**Type of Correction**	**Number of Records Corrected/Modified/Added/Removed**	**Comments/Details**
Street Centerlines	New Streets	14 Added	Majority were in Kamuela
Street Centerlines	Range/Parity	18 Corrected	Majority were in Hawi
Street Centerlines	Spatial Correction	7 Corrected	To increase spatial accuracy
Street Centerlines	Splits	5 Corrected	To eliminate segments from crossing boundaries and where existing streets were intersected by new streets
Street Centerlines	ESN Attributes	177 Modified	For the recently created ESN 239
Street Centerlines	Changed Street Name	1 Modified	Street was in Volcano
Street Centerlines	MSAG Community Attributes	1 Modified	Street was in Paauhau
Address Points	New Address Points	71 Added	Throughout County in 16 communities

Hawai'i County 9-1-1 Status Report
April 1, 2014 – April 30, 2014

Address Points	Changed Street Name	22 Modified	21 were in Volcano and 1 was in Kamuela
Address Points	Spatial Correction	144 Corrected	Corrected location of Address Point, recalculated x/y, majority were in Hawi
Address Points	Routing ID	26 Corrected	To ensure proper routing to address
Address Points	Changed Address Number	4 Modified	3 in Ninole and 1 in Kamuela
Address Points	MSAG Community Attributes	1 Modified	Address was in Paauhau
Points of Interest	Spatial Correction	1 Corrected	Corrected location of Point of Interest, recalculated x/y
Points of Interest	ESN Attributes	83 Modified	For the recently created ESN 239
ESN	Removed	1 Removed	ESN 220
ESN	Spatially Corrected Boundaries	1 Corrected	ESN 218
MSAG Communities	Spatially Corrected Boundaries	2 Corrected	Paauhau and Paauilo
Fire Response Areas	Splits	2 Corrected	Split Fire Response Area 51 into Fire Response Areas 51 and 52, corrected their Station Orders, First Ins, Second Ins and District Names

5.2 Creation of Transfer Stations Layer

In April 2014, per special request of the Hawaii Fire Department, Akimeka created the Hawaii Transfer Stations layer.

1. During April 2014, Akimeka finished creating the Hawaii Transfer Stations layer.

    a. The layer was uploaded into PowerMap for utilization by the PSAPs on April 8, 2014.

    b. The Transfer Stations were also added to the Points of Interest layer so they could be searchable on PowerMap by the PSAPs.

1.2.1 Call Volume Notes

(1)   Total call volumes include Administrative calls. (Administrative calls = Calls made between 9-1-1 positions but are not 9-1-1 calls.)

(2)   "Abandoned" calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered.

(3)   "Abandoned" calls are included in the "Wireline" and "Wireless" counts respectively. The standard Intrado Viper reports provide a break-out of "Abandoned" calls between "Wireline" and "Wireless" calls.

1.3 Wireless Test – April 2014

Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail
None					

There were no sites scheduled for wireless testing for Kauai County in April 2014.

Kauai County 9-1-1 Status Report

KAUAI	86	10	5	0	1	1	3	203	75	0	1	263	0	0	1	1

2.1.1   MSAG Notes for April 2014

During the month of April 2014 a total of eighty-six (86) MSAG transactions were processed. Ten (10) 9-1-1Net requests were processed relating to the MSAG database, with 203 customer ANI/ALI (telephone/address) records updated as a direct result of Akimeka's address research and GIS validation process. Seventy-five (75) Telephone Number Change Requests (TN CR) were processed in 9-1-1Net for updates and corrections to the ALI database. The TN CRs were submitted as a result of the ESN 499 clean-up effort. Streets and address ranges were validated against the GIS to ensure synchronization and an MSAG address was provided to the Telco. TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

There are 263 TN CRs in Referred status as of April 30, 2014.

Two hundred and sixty-three (263) TN CRs that remain in "Referred" status are a direct result of the ESN 499 clean-up and are awaiting approval from end user Hawaiian Telcom customer in order to update the ALI records. No explanation has been provided by HTI as to why these TN CRs have not been processed for 9-1-1 purposes. Intrado will notify Akimeka when each TN has been updated in 9-1-1Net.

2.1.2 MSAG Notes for April 2014 (Part II)

There are no ALI-DRs in Referred status as of April 30, 2014.

A new process was introduced in the month of March 2014 to the PSAP concerning the reporting of 9-1-1 VoIP calls with name and address discrepancies. The process for correcting VoIP discrepancies will be similar to the ALI DR process utilized with Hawaiian Telcom; however with VoIP calls, Time Warner will be the coordinating agency. Akimeka will track and reflect the process of these Discrepancy Requests (VoIP DRs) in the Monthly Status Report, effective April of 2014.

One (1) VoIP DR was submitted to Time Warner Network Operations Center for correction. All six discrepancies were the result of a 911 call from a VoIP phone that displayed an incorrect address. Kauai County submitted the information to Akimeka for correction. Akimeka forwarded the information to Time Warner for the Network Operations Center to verify and the phone number was updated on April 30, 2014.

There is one (1) ALI-DR record in Suspended status as of April 30, 2014.

The Suspended ALI DR is due to a request from Intrado to insert a TN in 9-1-1Net that does not have an MSAG valid address. Akimeka was able to identify the TN location of the with a TMK and advised that an MSAG Address Point be added to the GIS until the county officially assigns an address. The MSAG Address Point will be added and the MSAG adjusted before the next synchronization in July 2014.

2.1.3 Definitions for Year-To-Date Summary

Definitions:		
	(a)	Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
	(b)	Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
	(c)	Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.
	(d)	Represents correction requests that have been referred by Intrado to the appropriate service provider and is awaiting approval to be updated in 9-1-1Net.
	(e)	Represents correction requests that have been "paused" due to TN fallouts, range overlaps, or not having a valid address point. Intrado requires additional information from Akimeka/PSAP before the Telco approves the change.

3 GIS Mapping Layers – April 2014

3.1 Updated/Loaded Into GIS (Part I)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems.

KAUAI			
Type of Layer	**Akimeka GIS Server** **Date Created/ Edits Performed**	**Date Loaded Into PSAP GIS Server**	**Other/Remarks**
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS **(Listed Alphabetically)**			
Address Points	04/30/14		Added thirty-six (36) new address points; Spatially corrected one (1) address point in Princeville.
	04/28/14		Added one (1) new address point in Kaumakani.
		04/24/14	
	04/22/14		Added three (3) new address points in Kaumakani.
	04/21/14		Spatially corrected one (1) address point in Anahola.
	04/15/14		Spatially corrected one (1) address point in Kilauea.
	04/02/14 - 04/15/14		Spatially corrected thirty three (33) address points in Kalihiwai.
		04/10/14	
	04/02/14 - 04/10/14		Spatially corrected eighty three (83) address points; Corrected structure on wrong block error to four (4) address points; Added apartment number to one (1) address; Added 41 new address points in Princeville.
	04/01/14		Spatially corrected eight (8) address points in Hanalei.

Kauai County 9-1-1 Status Report
April 1, 2014 – April 30, 2014

3.6 CAD/Mapping System GIS Upload Process

3.6.1 Current Month GIS Activities – April

04/10/14   Akimeka performed Powermap update which included: Address Points, Street Centerlines, Court Districts, WSP Cell Sectors and WSP Cell Towers.

04/10/14   Akiemka delivered address Points, Court Districts, Geofile for Street Centerlines, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for GeoComm.

04/24/14   Akimeka delivered Address Points, Geofile for Street Centerlines, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for GeoComm.

04/24/14   Akimeka performed Powermap Update which included: Address Points, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.

Everytime the GIS Update tool is used, Indexes and Cache have to be built. The Positron system configurator is adjusted every time a layer is loaded in the PowerMap database. Each PSAP position is updated accordingly.

4   Service Requests Transactions

4.1   Open Service Requests – April 2014

#	Date	Ticket #	Description	Category	Urgency	Comments
1	2/3/2014	638	808 826 6219 question why does it show up as 404 Unknown ESN?	MSAG	Low	Sent question to Intrado via email on 2/3/2014. RN Per Intrado on 2/18/14: "This issue was referred up. I have requested a status update and will let Akimeka know when I find out." As of 2/27/14, Akimeka has not received a status on this issue. RN As of 3/27/14, Akimeka has not heard back from Intrado on this issue, follow up email was sent 3/27/14. RN Per Intrado on 3/28/14, forwarded email on up, will notify Akimeka when information is available. RN

Note: *Open Service Requests reflect what is in pending status at the end of the report month.*

4.2 Service Request Year-to-Date (YTD) Summary – 2014

5 E9-1-1 Database Synchronization

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a special re-run of the quarterly database synchronization audit for Kauai County in April 2014.

The database synchronization effort included comparing Kauai County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **1,264** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on April 1, 2014 for Kauai County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

5.1 Audit Summary Results – 2014

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of January 1, 2014 9-1-1 MSAG Dated 01-01-14		As of April 1, 2014 9-1-1 MSAG Dated 04-01-14	
		# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		1,266		1,264	
Less: 9-1-1 MSAG Exception Records	(1)	56	4.4%	56	4.4%
Net 9-1-1 MSAG Records Eligible for Comparison		1,210		1,208	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		1,204	99.5%	1,205	99.8%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	6	0.5%	3	0.2%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.0%	0	0.0%
Total 9-1-1 MSAG Records No Match		6	0.5%	3	0.2%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit completed for Kauai County resulted in a 99.8% 9-1-1 Match percentage
Kauai County 9-1-1 Status Report
April 1, 2014 – April 30, 2014

5.2 Audit Summary Results – (Part II)

Notes:

(1)   An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

(2)   An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

(3)   An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

5.3 Audit Summary Results – April 1, 2014 MSAG vs. January 1, 2014 MSAG

9-1-1 MSAG Dated 4-01-13

0.2%

99.8%

■ Match
■ No Match

9-1-1 MSAG Dated 01-01-14

0.5%

99.5%

■ Match
■ No Match

**Kauai County's level of accuracy or 9-1-1 Match percentage
as of January 2014 was 99.8%.**

*The NENA recommended minimum match rate of 98% has been met
consistently in 2013 and continues in 2014.*

❖   Akimeka continues to work with Kauai County GIS and Planning departments to validate streets and communities.

❖   In achieving and exceeding the NENA minimum match rate of 98% for data accuracy, Kauai County is ready for Next Generation 9-1-1 (NG9-1-1) from a database perspective.

❖   A constant effort to keep the databases synchronized and maintained are required to ensure the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

5.4 Audit Summary Results – April 1, 2014 MSAG vs. January 1, 2014 MSAG (Part II)

❖ There are no MSAG records with missing GIS records.

❖ Three (3) minor MSAG corrections were identified. Low and high address ranges will be researched and adjusted to ensure that the MSAG and GIS databases are aligned.

❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

❖ Coordinating the clean-up of the ALI discrepancy records associated with an assigned ESN of 499 with the respective Service Providers is needed to ensure all records are MSAG valid.

5.4.1 Invalid MSAG Streets and Address Ranges – ESN x99 Records

At the request of the Kauai County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Kauai County and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the data provided are as follows:

KAUAI	Invalid MSAG Records			
	9-1-1 MSAG Dated 1-01-14		9-1-1 MSAG Dated 04-01-14	
	# of Records	% of Total MSAG Records (Valid and Invalid)	# of Records	% of Total MSAG Records (Valid and Invalid)
ESN 499	112	8.1%	103	7.5%

These invalid MSAG records represent **7.5%** of the Total MSAG records for Kauai County as of the April 1, 2014 MSAG as compared to **8.1%** as of the Januray 1, 2014 MSAG. The individual ALI records associated with these records are provided below.
The decrease in the number of invalid MSAG records is a result of Akimeka's research and validation of telephone numbers (TNs) assigned an invalid MSAG address. In order for a TN to be corrected, Akimeka submits the update to the Service Provider via Intrado for approval.

5.5 Automatic Location Identification (ALI) Discrepancy Report

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for Kauai County. As of April 30, 2014, there are **1,075** ESN 499 ALI records, representing **4.2%** of Kauai County's Total ALI records. The number of ESN 499 ALI records was further reduced by **13.2%** (1,239 to 1,075) from January 28, 2014 to April 30, 2014 respectively.

The total number of ALI records remains relatively consistent.

Although the ESN 499 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 499 MSAG records to a valid Kauai County ESN 400 – 448 to ensure that all ALI records assigned to the County of Kauai have an "MSAG valid address".
