DAVID Y. IGE
GOVERNOR

DOUGLAS MURDOCK
Comptroller

AUDREY HIDANO
Deputy Comptroller

STATE OF HAWAII

Enhanced 911 Board Meeting
(Combined Meeting)
Kalanimoku Bldg., Room 322B
1151 Punchbowl St., Honolulu
Thursday, July 14, 2016
10:00 am - 12:00 pm

Agenda

I. Call to Order, Public Notice, Quorum

II. Public testimony on all agenda items

III. Introductions

IV. Review and Approval of Last Month's Meeting Minutes

V. Committee Updates by Committee Chairs

    a. Communications Committee – Steven Schutte

        i. 2017 Legislative Investigative Committee update – Paul Ferreira
        ii. Others.

    b. Technical Committee – Thalia Burns

        i. HawTel outage on June 22, 2016.
        ii. New Technical Committee member – Lt. Darren Horio (HiPD).
        iii. Investigative Regulatory Committee – Davlynn Racadio
        iv. FCC update
        v. Text-to-911 update
        vi. Others

    c. Finance Committee – Kiman Wong

        i. Review of Monthly Cash Flow & Budget Financial reports.
        ii. Others.

VI. PSAP Status Updates

    a. Kauai – Michael Contrades
    b. Oahu HPD – Allan Nagata
    c. Oahu HFD – Gary Lum
    d. Molokai – Dean Rickard

If you require an auxiliary aid or accommodation due to a disability, please contact
808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

e. Maui – John Jakubczak
f. Hawaii – Paul Ferreira

VII. Executive Director's Report

a. The ED will provide updates on the following items:

i. FCC Data Collection Project Update Action Item – PSAP financial data on E911 Operations.
ii. Encumbrances and FY2016 Accounting Close Update.
iii. NENA/NASNA Conference Update.

VIII. Items for Discussion, Consideration and Action

a. 911 Timeline update.

b. Request for Approval:

i. APCO Conference, August 14-17, 2016, Orlando, FL.
   1. Board member (1) - $3,300.
   2. Technical Committee Member (1) - $3,300.
   3. Oahu DIT (1) - $3,300.
   4. HFD (1) - $3,500.
ii. NASNA Conference, October 25-26, 2016, Kansas City, Mo.
   1. Executive Director (1) - $1,800
iii. Colorado Chapter Conference, Oct. 6-7, 2016, Denver, CO.
   1. HPD (2) - $5,000.

c. Jeffrey Riewer: Establishment of Educational subcommittee.

d. Others

IX. Announcements

a. Future meeting dates (10am – 12 noon).

i. Thursday, August 11, 2016 (Combined meeting)
ii. Thursday, September 15, 2016 (Combined meeting)(date change)
iii. Thursday, October 13, 2016 (Combined meeting)
iv. Thursday, November 10, 2016 (Combined meeting)

X. Executive Session: HRS 92-5(a)(4) and HRS 92F (a)(2) to consult with the board's attorney on questions and issues pertaining to the board's powers, duties, privileges, immunities, and liabilities.

XI. Open Forum: Public comment on issues not on the agenda for consideration for Board agenda at the next meeting.

XII. Adjournment

If you require an auxiliary aid or accommodation due to a disability, please contact 808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

STATE OF HAWAII

Enhanced 911 Board Meeting
(Combined Meeting)
Kalanimoku Bldg., Room 322B
1151 Punchbowl St., Honolulu
Thursday, July 14, 2016
10:00 am - 12:00 pm

Board members present: Paul Ferreira (Chair), Roy Irei, Thalia Burns, Michael Contrades, Lisa Hiraoka (Consumer Advocate Designee), John Jakubczak, Arnold Kishi (CIO Designee), Dean Rickard, Jeff Riewer, Steven Schutte, Kiman Wong and Mark Wong.

Board members absent: Ben Morgan.

Staff members present: Stella Kam, Courtney Tagupa and Kerry Yoneshige.

Guests: Clement Chan (DIT), Ryan Dunkle (Hitech Systems), Victoria Garcia (DoD), Robert Gausepohl (KPD), Roy Halterman (WEST), Darren Horio (HiPD), Agnes Lee (WEST), Melodey Lewellen (HPD), Randy Macadangdang (HPD), David Miyasaki (Kauai County), Allan Nagata (HPD), Andy Nielsen (WEST), Eleni Papakiristis (HT), Davlynn Racadio (MPD), Lavina Taovao (KPD), Kenison Tejada (APCO/NENA Pacific Chapter) and Bonnie Young (MPD).

Minutes

I.   Call to Order, Public Notice, Quorum
a. The meeting was called to order at 11:43 am by Board Chairman Paul Ferreira.
b. Public notice has been issued.
c. Quorum was present for the Board.

II.   Public testimony on all agenda items
a. Chair Ferreira asked if anyone who wishes to provide testimony on any agenda item to please come forward. No one came forward to testify.

III.   Introductions
a. Introductions were made by everyone present at the request of Chair Ferreira.

IV.   Review and Approval of Last Month's Meeting Minutes
a. Mr. Roy Irei motioned to approve the June 2016 meeting minutes. The motion was seconded and approved by voice vote by all Board members present.

V.   Committee Updates by Committee Chairs
a.   Communications Committee – Steven Schutte

If you require an auxiliary aid or accommodation due to a disability, please contact 808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

Chair Schutte acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 i. 2017 Legislative Investigative Committee update – Paul Ferreira
  1. Chair Ferreira stated there were no updates to what was presented at the Joint Committee meeting.

 ii. Others
  1. Chair Schutte acknowledged that there were no other items for discussion.

b. Technical Committee – Thalia Burns

Chair Burns acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 i. Hawaiian Telcom outage on June 22, 2016
  1. The Committee Chair acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 ii. New Technical Committee member – Lt. Darren Horio (HiPD)
  1. The Committee Chair acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 iii. Investigative Regulatory Committee – Davlynn Racadio
  1. Chair Racadio acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 iv. FCC update
  1. The Committee Chair acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 v. Text-to-911 update
  1. The Committee Chair acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 vi. Others
  1. The Committee Chair acknowledged that there were no other items for discussion.

c. Finance Committee – Kiman Wong

 i. Review of Monthly Cash Flow & Budget Financial reports
  1. Committee Chair Wong acknowledged that there were no updates to what was presented at the Joint Committee meeting.

 ii. Others
  1. Chair Wong thanked everyone for a great job with the budgeting process and submitting their requests for reimbursement for the 2016 fiscal year.

VI. PSAP Status Updates
a. Kauai – Michael Contrades
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

b. Oahu HPD – Allan Nagata
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

c. Oahu HFD – Gary Lum
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

d. Molokai – Dean Rickard
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

e. Maui – John Jakubczak
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

f. Hawaii – Paul Ferreira
   1. The PSAP representative acknowledged that there were no updates to what was presented at the Joint Committee meeting.

VII. Executive Director's Report

a. The ED will provide updates on the following items:

   i. FCC Data Collection Project Update Action Item – PSAP financial data on E911 Operations.
      1. The ED communicates with three individuals from the FCC's Public Safety and Homeland Security Bureau on a continual basis, the Bureau Chief Rear Admiral (ret.) David Simpson, Deputy Bureau Chief David Furth and Mr. Timothy May from the Policy and Licensing Division. We have a good working relationship with them they have always been willing to assist should questions arise and are an extremely valuable source of information. Regarding outage reports, they are expanding scope of requirements for audit reports but they are still investigating the cost-benefit analysis. On the issue of MLTS fees, there are a handful of states who have implemented legislation to capture these fees. We have not enacted legislation in HI to collect these fees and this represents a potential revenue opportunity for the Fund. States have assessed various fees per trunk line or lines based on many different matrices. The number of states who have implemented prepaid surcharge fees continues to grow and stands at over 40 and continuing, with HI not among them. In

Indiana, they have completed their text-to-911 deployment and have launched statewide. They have 128 PSAPs in 92 counties and this is a major accomplishment for them. The National 911 Office is track for the upcoming NG911 grant and is drafting the rules later this year. The ED is hopeful we may receive $1M based upon the previous E911 grant allocations. We need to plan what we would use these grant funds for prior to the December 2017. Ms. Victoria Garcia provided an update on the FirstNet Governor's Report. They are hoping to have a draft state plan after their selection of their vendor by the first or second quarter of next year. Once FirstNet submits the draft plan, her job is to establish a team and review the plan and ensure that the state is comfortable with the plan before the Governor would decide to opt in or out. She would like the Board to participate in the review of the draft and provide feedback. **Action Item**: The PSAPs would need to plan what they would utilize the potential NG911 grant funds for prior to December 2017 as this would be part of the justification on the grant application.

ii. Encumbrances and FY2016 Accounting Close Update
1. The ED stated that it was a difficult fiscal year accounting closing out and many contracts that were originally budgeted could not be signed by the June 30 date and therefore could not be encumbered. On a positive note, there were contracts that were signed on or before that date that could be encumbered in their place. The ED provided a slide from the monthly financial report and reviewed the contracts that were signed prior to June 30. He noted PSAPs who have encumbrances should track these items and provide periodic status updates. There are outstanding encumbrances that are outstanding from prior years, including fiscal years 2011 (Kauai), 2014 and 2015 that amount to over $3.5M. These items need to be addressed as soon as possible, in particular the Kauai encumbrance from FY2011. KPD A/C Gausepohl stated they are diligently working on closing out the 2011 encumbrance and unfortunately they were not able to get Pictometry signed for this fiscal year due to their finance and legal teams not in agreement, but they anticipate the contract will be signed shortly. The ED was hoping to encumber all five years for their Pictometry contract, but was able to replace this item with Maui's HT contract encumbrance. Encumbrances that were booked at end of the 2016 fiscal year are highlighted on the monthly financial report. Most contracts were for a five year period with exception of Maui's HT three year contract and Kauai's CAD upgrade. There are approximately $4.9M of encumbrances that we will be paying down as the fiscal year progresses. The items that were not able to be signed for FY2016 may flow into next year, which we presently do not have room for. Encumbrances help to relieve us from potential ceiling issues and with FY2018 and reestablishing the ceiling, expenditures will have to be closely monitored. The ED thanked the County finance departments and received considerable assistance from Hauoli and Nani from Hawaii, Lesley from Maui and Daurice from Kauai. The ED would have liked to hit $9M ceiling but unfortunately we were not able to exactly hit the $9M ceiling but we

were came very close.

   iii. NENA/NASNA Conference Update
1. The ED attended the NASNA conference that was held two days prior to NENA. The conference consisted of very informative full day sessions and networking sessions were also held. The main value of NENA is networking and the ability to find out what is happening in other states. In Maine, they had extraordinary performances in their PSAPs. They have a population of approximately 1.3M, but they are about three times the size of HI. They have many accomplishments including they were able to fully integrate to NG911 and were one of the handful of states to fully deploy text-to-911. Regarding interoperability, they have connected all PSAPs to their ESInet which is also a major accomplishment. They are considered the most advanced of states as far as NG911 and they have an excellent management team. They have utilized services of consultants to assist them with interoperability, architecture and technology selection. Another issue that was highlighted was PSAP consolidation. Many states have consolidated voluntarily, with others via legislation. Consolidation of PSAPs mostly focused on rural areas where having multiple PSAPs did not make sense in terms of economies of scale. On the issue of interoperability, many states are in process of establishing ESInet as the main technology for interoperability. This is a process that is continual and very expensive, as this takes a great deal of time and planning.

VIII. Items for Discussion, Consideration and Action

   a. 911 Timeline update
     i. Chair Ferreira requested that the PSAPs report any timeline updates to be posted on the 911 website to the Executive Director.

   b. Request for Approval:

     i. APCO Conference, August 14-17, 2016, Orlando, FL
1. Board member (1) - $3,300
2. Technical Committee Member (1) - $3,300
This request to attend has been withdrawn.
3. Oahu DIT (1) - $3,300
4. HFD (1) - $3,500
This request to attend has been withdrawn.

Deputy Chief Rickard motioned to approve this request. This motion was seconded and approved by voice vote by all Board members present.

     ii. NASNA Conference, October 25-26, 2016, Kansas City, MO
1. Executive Director (1) - $1,800

Mr. Arnold Kishi motioned to approve this request. This motion was seconded and approved by voice vote by all Board members present.

If you require an auxiliary aid or accommodation due to a disability, please contact 808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

APCO Colorado Chapter Conference, October 6-7, 2016, Denver, CO
1. HPD (2) - $5,000

> Deputy Chief Contrades motioned to approve this request. This motion was seconded and approved by voice vote by all Board members present.

c. Jeffrey Riewer: Establishment of Educational Subcommittee

i. Mr. Riewer opened the discussion to the possibility of establishing an educational subcommittee. He obtained a list from the NC911 Board of educational courses that are offered through APCO, NENA and various institutions and this was presented to the Board and Committee members. The Board sends various members to conferences but he inquired if the PSAPs have developed this type of course listing and does the Board think this listing would be of benefit if we developed this the local level. His employer AT&T offers online courses and asked if we could possibly offer this to first responders across the board to all PSAPs. Chair Ferreira stated this is a good list to review and stated the decision should be left to the PSAPs to inquire if establishing a subcommittee is a valuable option. Perhaps we could establish this in a similar fashion to the Legislative Committee. What the Board would need ascertain is if the first responders would incur overtime for certain classes or trainings. In the past, the Board funded overtime for this type of request, but we would need to look at this in the future. He stated HiPD sends dispatchers to the conferences because they are on the front lines. Deputy Chief Rickard stated on Maui they do offer and approve web based trainings when they can, but it comes down to the issue of manpower. He stated dispatchers usually come forward with the types of trainings that they would like. Ms. Racadio stated previously they offered a suicide prevention training and it was broadcast on the back wall for all to see. Ms. Hiraoka inquired if there is a telecommunicator certification program. A/C Jakubczak stated there is a requirement to meet to be a PRD, but it is tailored at the County level and the level of training depends on the PSAP and whether they are integrated with medical and/or Fire. A/C Gausepohl stated we will research if there are standardized trainings or certifications in other states and perhaps centralize things further. He stated that the Board does not fully fund training, as the Counties absorb overtime for staff that attend conferences. Chair Ferreira stated a model could possibly follow that of the training coalition in bringing an instructor to the State and have personnel from all islands attend. Deputy Chief Contrades said the PSAPs should review list and determine if it could be standardized to where it is comprehensive for all of the Counties. It should be further reviewed to see if the PSAPs would need funding from the Board in order to facilitate these training requests. Ms. Victoria Garcia offered to be involved on behalf of DoD if the committee is formed to investigate potential shared funding opportunities.

If you require an auxiliary aid or accommodation due to a disability, please contact 808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

Action Item: The PSAPs will share the NC911 Board course listing with their staff and solicit feedback. Once information is received, the Board will engage in further discussion at the August meeting to determine if there is a need to establish the Educational Subcommittee.

    d. Others

        i. Chair Ferreira acknowledged that there were no other items for discussion.

IX. Announcements

    a. Future meeting dates (10:00 am – 12:00 pm)
        i. Thursday, September 15, 2016 (Combined meeting)(date change)
        ii. Thursday, October 13, 2016 (Combined meeting)
        iii. Thursday, November 10, 2016 (Combined meeting)
        iv. Thursday, December 8, 2016 (Combined meeting)

X. Executive Session: HRS 92-5(a)(4) to consult with the board's attorney on questions and issues pertaining to the board's powers, duties, privileges, immunities, and liabilities.

        i. Chair Ferreira announced that an Executive Session was not necessary during this month's Board meeting.

XI. Open Forum: Public comment on issues not on the agenda for consideration for Board agenda at the next meeting.

        i. Chair Ferreira asked if there was anyone who wishes to comment on issues not on the agenda for consideration for the agenda at the next Board meeting. No one came forward.

XII. Adjournment

        i. Deputy Chief Rickard motioned to adjourn the meeting. The motion was seconded and approved by voice vote by all Board members present. The meeting was adjourned at 12:24 pm.

If you require an auxiliary aid or accommodation due to a disability, please contact 808-391-7971 (voice/tty) or email at Courtney.Tagupa@hawaii.gov.

PSAP OPERATION NOTES:

- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.**
- **Abandoned Calls are not included in the total of Wireline and Wireless counts respectively.**
- **All VOIP (Voice over internet protocol) types of 911 calls are combined in the Call Volume statistic.**

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

TEXT TO 911 – CURRENT MONTH – JULY 2016

NOTE:

- Hawaii County deployed a soft launch of Text to 911 on February 1, 2016.
- Sprint PCS conducted a Text to 911 test with the Hawaii Police 911 PSAP on February 1, 2016. During the test, the location received at the PSAP from the 911 texting device was a "Coarse Location" (centroid of a sector coverage area) plot, several miles away from the texter' s actual location.
  911 Text message was transferred to the Hawaii Fire Department successfully as part of the test agenda.
  Additional Text to 911 tests were also performed internally with personal telephones of the other Wireless Service Providers. The results showed that T-Mobile's location of the Texter was similar to Sprint's "Coarse Location".   The AT&T and Verizon tests revealed that the location of the texter sent to the PSAP was utilizing a Location Based Service (LBS) that plotted within 50 meters of the texter' s location.
- Although there is a "Text to 911" plot on the MapFlex, the location of the plot is not reliable in some cases and pretty accurate in others. There are no indication on the Ali Screen to inform the Dispatcher on location accuracy. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- During the month of June, it was identified that the Text to 9-1-1 icon was missing on the MapFlex System when receiving Text to 9-1-1. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

WIRELESS PSAP TESTING – JULY 2016

HAWAII COUNTY - JULY 2016						
Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail	Comments:
07/07/16	Verizon	5	15	Hawaii PSAP	Pass	2 Testers
07/12/16	AT&T	1	1	Hawaii PSAP	Pass	SoftCell

NOTES:

- There were three (3) scheduled Wireless 911 Tests for the month of July 2016.

FOR YOUR INFORMATION

FYI ………... For Your Information
MLTS (Multi Line Telephone System)
"Most MLTS/PBX systems enable the digits 9-1-1 to be dialed and routed to a Public Safety Answering Point (PSAP). However, the vast majority of these systems do not provide granular location information with the 9-1-1 call to enable emergency responders to know the actual location of the emergency. In many instances a call from the 12th floor of a large office building may only provide the street address of the building. If the caller is unable to provide his or her location and no one else is available to provide assistance, such a lack of location information can prove fatal." (NENA : Multi-Line Telephone System & Private Branch Exchange) Technical Standards & Docs.

PRIMARY PSAPS*	MLTS/PBX 911 CALLS RECEIVED	
	July 2016	YEAR TO DATE 2016
Oahu	4,507	25,262
Hawaii	82	477
Maui	114	690

Definitions
(A) **M**aster **S**treet **A**ddress **G**uide - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
(B) **T**elephone **N**umber **C**hange **R**equest - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
(C) **A**utomatic **L**ocation **I**nformation **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
(D) **V**oice **o**ver **I**nternet **P**rotocol **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

MSAG CURRENT MONTH NOTES:

A total of **278** MSAG transactions were processed in 9-1-1 Net during the month of July 2016. **60** requests were processed relating to the MSAG database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **1,550** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

215 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 299 clean-up effort. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Three (**3**) ALI DRs were submitted as the result of 9-1-1 calls from businesses in Hilo and Kailua Kona, and a residence in Ocean View. Hawaii County Fire submitted this request to Akimeka to update the customer information and the discrepancy was corrected in 9-1-1 Net.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 358 Open TN CR Transactions as of July 31, 2016.**
- **Refer to chart in the next section "TNCR Current Status"**

355 Open TN CR transactions are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **3** Open TN CR transactions are a result of the Dispatchable Location project submitted in September. (Refer to the "Dispatchable Location" chart below) Once a telephone number is submitted to West for correction, it is verified against HT records and/or by the customer. Intrado's internal process requires calling each telephone customer individually for verification to update an address in the 9-1-1 database. West Safety Services opened over 900 TN CR records for Hawaii County during the month of June 2016. Many of these records required more research by Akimeka in order to find their MSAG valid addresses, after West provided information available in HT records or driving directions per HT customer. Akimeka continues to monitor and track the progress of the remaining 358 Referred records.

- **There are three (3) Open ALI-DRs as of July 31, 2016**

One Open ALI-DR was submitted for correction in 9-1-1 Net in August 2014. This discrepancy has been referred to the telco since that time. Akimeka requested a status update from West Safety Services in February 2016 and is awaiting further information. The second Open ALI DR was submitted in April 2016 for a business in Hilo. The TN was ported to PLNI and West Safety Services (Intrado) has emailed PLNI with the address update. This ALI DR will remain in Referred status until PLNI confirms the update is complete. The third Open ALI DR was submitted in July 2016 for a business in Kailua Kona.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JUNE 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services (Intrado) for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	**TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA**	**OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES (INTRADO)**	**OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES (INTRADO)**	**TOTAL UNOPENED TNCR RECORDS**
HAWAII	**358**	**129**	**172**	**57**

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services (Intrado) Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JULY 2016

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a "State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9" presentation. Based on the 9-1-1 Board's confirmation to add the "Dispatchable Location" information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The "Dispatchable Location" data is entered into the "Driving Directions" field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the "Exact" field should a 911 call be received from that telephone number. Seventy-five **(75)** Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and West Safety Services (Intrado) for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the "Driving Directions" field. Until this field is created, no further Dispatchable Location transactions will be submitted. However, present observations indicate that previous transactions that were submitted in 2015 are currently being processed.

Dispatchable Location					
Common Name Place	**MSAG Address**	**2016**	**Number of TNCR* Transactions Submitted**	**Number of Transactions Processed****
KINGS SHOPS	CARRY OVER	2015	75	0
		Jan-June	0	70
KINGS SHOPS	690250 WAIKOLOA BEACH DR, WAIKOLOA	July	100	102
MAUNA LANI SHOPS	681330 MAUNA LANI DR, KAMUELA		25	25
		Total	**200**	**197**

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

CHARTER COMMUNICATIONS (TIME WARNER) VOIP DATABASE TNCR

Akimeka received Automatic Location Identification (ALI) records from Charter Communications (formally known as Time Warner) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka had access to these ALI Records, Akimeka was able to perform a three way comparison. This comparison is a validation of the ALI Record to ensure the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The Analysis of the database records indicated there were invalid MSAG addresses utilized by the VoIP Provider, however, the majority of these records were corrected, or sent back to Charter for further location clarifications. Akimeka was able to verify the majority of the VoIP records had a valid MSAG address assigned and matched with the GIS information. Akimeka has also initiated a correction process with Charter Communications on behalf of the PSAPs in order to perform timely corrections to the remaining VoIP 9-1-1 Records, and to ensure new VoIP customers receive valid MSAG addresses to improve their 9-1-1 location service.

Charter Communications 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)			
PSAP	**TOTAL RECORDS SUBMITTED BY CHARTER (A)**	**RECORDS REQUIRING FURTHER INFORMATION BY CHARTER (B)**	**RECORDS CORRECTED AND RETURNED TO CHARTER BY AKIMEKA (C)**

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
7/19/2016	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places and Street Centerlines.
7/6/2016	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places and Street Centerlines.

ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

On a routine basis, upon receipt of Hawaiʻi County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawaiʻi County Planning Department on **July 26, 2016**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	139	
Addresses Removed	0	
Address Street Name Changes	3	
Address Street Number Changes	4	
New Street Segments Added		2
Street Segments Removed		0
Street Segment Range Changes		7
Street Segment Name Changes		0

NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

POLICE BEAT REVIEW

Beginning in late 2015 and continuing in January 2016, Akimeka has been conducting a Police Beats review process as part of an annual update and in addition, preparation for Hawaii County's CAD system deployment. During this time, the Police Beats are also reviewed with the written descriptions of the Hawaii Police Beat Boundaries, whereby corrections are made to the Police Beat GIS layer where applicable in an effort to synchronize the GIS layer with the written descriptions and provide the 911 centers in Hawaii with a more accurately defined boundary layer which align with operational jurisdictions.

1. To better service the public safety needs of Hawaii County, Akimeka compared the written descriptions of the Hawaii Police Beats as recorded in Document Number GO 204 with an effective date of June 27, 2011, and made corrections to the Police Beats GIS layer where needed. In addition, Akimeka has been documenting any recommendations for document description updates.

    a. Akimeka reviewed the written descriptions for the Hawaii Police Beats and cross referenced it to the Police Beats GIS layer. The boundaries to all seventy-six police beats as well as the area falling within the jurisdiction of the Hawaii Volcanoes National Park were edited for greater accuracy.

    b. Akimeka has documented all potential discrepancies between the written descriptions and GIS layer for a thorough review upon completion. Akimeka has also produced several maps to better illustrate some of the larger discrepancies.

    c. Upon completion of the GIS editing procedures, Akimeka will participate in a Police Beat review process with the Hawaii Police Department to further refine the boundaries to the Police Beats GIS layer and the written descriptions for those boundaries. This process will finalize the synchronization between the GIS layer and the written descriptions; provide additional precision and accuracy to both the GIS layer and written descriptions; and eliminate all discrepancies so that confusion and/or misinterpretation of those boundaries do not hinder public safety needs.

    d. During the month of February 2016, Akimeka corrected the boundaries to the GIS layers that are associated with the Police Beats so that proper alignment would occur between the associated layers. This included correcting boundaries to six ESNs and three Police Districts. Those corrected layers were delivered to MapFlex and made available to the dispatchers on February 17th.

    e. During the month of March 2016, Akimeka corrected the boundaries to the Police Response Areas so they would be aligned properly with the Police Beats and be topologically error free. This included correcting the boundaries to all seventy-six police response areas as well as the area falling within the jurisdiction of the Hawaii Volcanoes National Park.

    f. During the month of July 2016, Akimeka is awaiting the final review process of the Police Beat layer with the Hawaii Police Department. Besides the Police Beat layer, the review process with the Hawaii Police Department will also likely include a review process of the Police Districts layer as well as the Police Response Areas layer.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

CAD SYSTEM DEPLOYMENT

During the 2015 year, the Hawaii County Police Department has conducted thorough research and has decided to implement a new CAD (Computer Aided Dispatch) system. Through their selection process, they have chosen the Spillman Technologies CAD system to best fit their operational needs. Throughout the coming months there will be much coordination between the Hawaii Police Department, Hawaii IT Department, Akimeka, and Spillman Technologies to deploy the Spillman Technologies CAD system with absolute success.

1. The Hawaii Police Department, Akimeka, and Spillman Technologies have begun introductory coordination and information sharing to ensure a successful deployment of the new CAD system, which will improve dispatch efficiency.

    a. On January 15, 2016, Spillman Technologies held a webinar and discussion on their Geobase process which HPD, Spillman Technologies, and Akimeka were in attendance. The discussion was high-level and pertaining to the GIS database and how it is integrated within the Spillman Technologies CAD architecture.

    b. In February 2016, Spillman Technologies was on-site at the Hawaii Police Department to host an official kick-off meeting and technical discussion which Akimeka was also in attendance. During the meeting Akimeka presented the entire GIS dataset via webinar. Spillman Technologies was impressed with the quality of the GIS data and is looking forward to the project.

    c. In May 2016, the final NDA were completed with Akimeka, Spillman Technologies, and the Hawaii Police Department.

    d. On May 31, 2016, Akimeka's GIS Manager and two representatives from the Spillman Technologies team met to discuss the timeline, requirements, and where they can work together to make this a successful project and on schedule.

        i. Spillman Technologies is currently in the process of getting the server(s) packaged/shipped on site. Once these are in place, more timeline milestones will be established with preparing the data for configuration on the server, etc.

MILE MARKER PROJECT

In March 2016, Hawaii County Fire Department requested Akimeka to furnish mile markers for the new section of Daniel K Inouye Highway (Route 200). Akimeka proceeded by performing the research necessary for obtaining precise coordinates of all new mile markers.

1. On March 16, 2016, Hawaii County Fire Department requested Akimeka to furnish mile markers for the new section of Daniel K Inouye Highway (Route 200), opened to the public since September 2013, so that mile markers would be both visible and query able to the dispatchers for both the new and old sections of the Highway.

    a. Akimeka immediately began researching for any available updates to the mile markers and it was discovered that there was no current data available via Hawaii Department of Transportation's website or any other reputable organization's website.

    b. On March 21, 2016, Akimeka contacted Hawaii Department of Transportation via email to inquire if there were any new mile markers in place for the new stretch of Route 200, and if so if we could acquire the necessary data from them to include in our current mile marker spatial dataset that we provide to the PSAPs. We also inquired if the mile markers for the old section of Route 200 were still in place, and if so if the old stretch of Route 200 had a different route number now, so that confusion would not arise between the mile markers of the new and old routes. In order to

clarify and expedite our request for information, Akimeka created a map illustrating the new and old sections of Route 200 for Hawaii Department of Transportation's perusal.

c.   As of March 28, 2016, Akimeka still had not heard back from Hawaii Department of Transportation regarding the request for updated mile marker information, so we proceeded to phone the organization to check on the status of our request. They informed us that they are processing the request and will get back to us with the information as soon as possible.

d.   On April 21, 2016, Akimeka received a map from Hawaii Department of Transportation, detailing the location of the ten mile markers for the new section of Route 200. The new mile markers were then digitized into the necessary file format and incorporated into the Milepost Markers layer. This updated layer was delivered to MapFlex and made available to the dispatchers on April 26th.

e.   On April 28, 2016, Akimeka received a request from Hawaii County Fire Department for the mile markers to be query able to the dispatchers in the same manner as the common places.

f.   On April 28, 2016, Akimeka promptly proceeded with this request by first modifying the naming of fifty-seven of the mile markers in order to differentiate the mile markers of the new section of Route 200 from the mile markers of the old section of Route 200. Then forty-seven of the mile markers were assigned aliases to help ensure they would be located by dispatchers when queried since the name of those particular mile markers might be confused with their historical name. The five hundred nineteen mile markers were then incorporated into the Common Places layer to ensure that dispatchers would be able to correctly and efficiently query them from the spatial dataset.

g.   On April 29, 2016, Akimeka performed an additional MapFlex deliverable, which included the Common Places and the Milepost Markers layers, thereby making the mile markers query able to the dispatchers. Detailed instructions were also given to the PSAPs on how to query the mile markers correctly so that time would not be wasted trying to figure it out during an emergency situation.

h.   On Friday, May 6, 2016, Akimeka was notified by Hawaii County Fire Department that their MapFlex's Milepost Marker search now had a dropdown selection indicating multiple options.

i.   On Monday, May 9, 2016, Akimeka contacted West (formerly Intrado) to verify if this was occurring due to there being more than one GIS layer (Milepost Markers and Common Places) in MapFlex configured for the search.

j.   On May 26, 2016, Akimeka received confirmation from West that multiple options were in fact being produced while searching because Milepost Markers and Common Places are both configured for querying. Akimeka immediately proceeded by recommending the opening of a trouble ticket with Hawaiian Tel to correct this issue.

k.   On June 24, 2016, West made the necessary configuration correction to prevent the dropdown selection from appearing in MapFlex while querying the Milepost Markers.

l.   On June 27, 2016, the dispatchers at the Hawaii County Fire Department confirmed that the issue with the Milepost Marker search format had been resolved resulting in a single option for each unique Milepost Marker search.

m.   During the month of July 2016, no activity took place with the milepost markers.

Hawaii County E9-1-1 Status Report

July 1, 2016 – July 31, 2016

MAPFLEX SYSTEM

During the month of July 2016, the MapFlex system received updates without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, West, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of July 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in July 2016
   a. **Hawaii County** – July 5th and July 19th
   b. **Maui County** – July 6th and July 20th
   c. **Kauai County** – July 7th and July 21st
   d. **Honolulu** – July 8th and July 22nd

MAPFLEX ISSUE

During the June 2016 State of Hawaii 9-1-1 Board Meeting, an issue was identified by several of the PSAPs with the MapFlex system displaying non- Ali formatted Latitude and Longitude location points from an unknown origin for 9-1-1 calls received from payphones. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the total Wireline and Wireless counts respectively.
- All VoIP (Voice over Internet Protocol) type of 911 calls is combined in the Call Volume statistic.
- *911 Calls with no Ali 0.23% - Statewide average = 0.18% Year 2015*

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

TEXT TO 911 – CURRENT MONTH – JULY 2016

NOTE:

- Kauai County has deployed a soft launch for Text to 911 on December 21, 2015.
- During this soft launch period, internal testing and training will be conducted.
- Although there is a "Text to 911" plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- During the month of June, it was identified that the Text to 9-1-1 icon was missing on the MapFlex System when receiving Text to 9-1-1. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

NOTES:

- There was one (1) scheduled Wireless 911 test for the month of July, 2106.

FOR YOUR INFORMATION

FYI ………... For Your Information
MLTS (Multi Line Telephone System)
"Most MLTS/PBX systems enable the digits 9-1-1 to be dialed and routed to a Public Safety Answering Point (PSAP). However, the vast majority of these systems do not provide granular location information with the 9-1-1 call to enable emergency responders to know the actual location of the emergency. In many instances a call from the 12th floor of a large office building may only provide the street address of the building. If the caller is unable to provide his or her location and no one else is available to provide assistance, such a lack of location information can prove fatal." (NENA : Multi-Line Telephone System & Private Branch Exchange) Technical Standards & Docs.

PRIMARY PSAPS*	MLTS/PBX 911 CALLS RECEIVED	
	July 2016	**YEAR TO DATE 2016**
Oahu	4,507	25,262

These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

MSAG CURRENT MONTH NOTES:

A total of twenty-three (**23**) MSAG transactions were processed in 9-1-1 Net during the month of July 2016. Eight (**8**) requests were processed relating to the MSAG database, which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **63** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

All Kauai Telephone Number Change Requests (TN CR) transactions have been processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 499 clean-up effort. ESN 499 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Akimeka is awaiting feedback from Intrado on the TN CRs that have been submitted for correction. In June 2016 there were sixty-three (**63**) TN CRs completed and as a result, six (**6**) ESN 499 street records were deleted from the MSAG database.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 119 Open TN CR Transactions as of July 31, 2016.**
- **Please refer to "TNCR Current Status" chart in the next section.**

97 Open TN CR transactions are a direct result of the ESN 499 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **22** Open TN CR transactions are a result of the Dispatchable Location project submitted in September (refer to the "Dispatchable Location" chart below). Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no Open ALI-DRs as of July 31, 2016**
- **There are no Open VoIP DRs as of July 31, 2016**

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JULY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services (Intrado) for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request **(Telephone Number Change Request (TNCR) Status)**			
PSAP	**TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA**	**OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES (INTRADO)**	**OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES (INTRADO)**	**TOTAL UNOPENED TNCR RECORDS**
KAUAI	**119**	**20**	**48**	**51**

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services (Intrado) Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JULY 2016 - PENDING

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a "State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9" presentation. Based on the 9-1-1 Board's confirmation to add the "Dispatchable Location" information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kukui Grove Center at 302600 Kaumualii Hwy, Lihue**. The "Dispatchable Location" data is entered into the "Driving Directions" field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the "Exact" field should a 911 call be received from that telephone number. Sixty two **(62)** Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and West Safety Services (Intrado) for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the "Driving Directions" field. Until this field is created, no further Dispatchable Location transactions will be submitted. During the months of November, December, and January as Akimeka awaits for the notice to proceed, Akimeka has continued to research and prepare "Driving Instructions" for other shopping malls that will assist the Kauai Dispatchers with their 911 calls for service. A total of 991 telephone records are complete and ready for submittal, and transactions that were submitted in 2015 are now being processed.

Dispatchable Location					
Common Name Place	**MSAG Address**	**2016**	**Number of TNCR* Transactions Prepared**	**Number of TNCR* Transactions Submitted**	**Number of Transactions Processed****
	2015 Carryover	**2015**	286	62	0
*Common Name Place and MSAG Addresses available upon request		Jan-Mar	544	0	0
		Apr	0	0	0
		May	0	0	2
Kukuiula Shopping Center	2829 Ala Kalanikaumaka, Kukuiula	June	87	0	56
Kukui Grove Center	302600 Kaumualii Hwy, Lihue	July	74	44	26
		Total	**991**	**106**	**84**

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

CHARTER COMMUNICATIONS (TIME WARNER) VOIP DATABASE TNCR

Akimeka received Automatic Location Identification (ALI) records from Charter Communications (formally known as Time Warner) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka had access to these ALI Records, Akimeka was able to perform a three way comparison. This comparison is a validation of the ALI Record to ensure the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The Analysis of the database records indicated there were invalid MSAG addresses utilized by the VoIP Provider, however, the majority of these records were corrected, or sent back to Charter for further location clarifications. Akimeka was able to verify the majority of the VoIP records had a valid MSAG address assigned and matched with the GIS information. Akimeka has also initiated a correction process with Charter Communications on behalf of the PSAPs in order to perform timely corrections to the remaining VoIP 9-1-1 Records, and to ensure new VoIP customers receive valid MSAG addresses to improve their 9-1-1 location service.

Charter Communications 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)			
PSAP	**TOTAL RECORDS SUBMITTED BY CHARTER (A)**	**RECORDS REQUIRING FURTHER INFORMATION BY CHARTER (B)**	**RECORDS CORRECTED AND RETURNED TO CHARTER BY AKIMEKA (C)**
HAWAII County	19,135	5	33
KAUAI County	7,911	7	39
MAUI County	15,629	0	7
OAHU Cilivian	82,256	5	66
TOTAL	**124,931**	**17**	**145**

(A)	VoIP Database records submitted by Charter to Akimeka for research and MSAG address validation.
(B)	Akimeka was not able to determine an MSAG valid address with the information provided. Charter is advised to contact customer and provide Akimeka with a TMK or driving directions.
(C)	Akimeka researched and provided Charter with an MSAG valid address.

The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
7/21/2016	Delivered updated Address Points, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, GEO.xml and LANDMARK.xml for GeoComm
7/21/2016	Delivered updated Address Points, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for MapFlex
7/7/2016	Delivered updated Address Points, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors, WSP Cell Towers, GEO.xml and LANDMARK.xml for GeoComm
7/7/2016	Delivered updated Address Points, MSAG Communities, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for MapFlex

MAPFLEX SYSTEM

During the month of July 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of July 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in July 2016
    a. **Hawaii County** – July 5th and July 19th
    b. **Maui County** – July 6th and July 20th
    c. **Kauai County** – July 7th and July 21st
    d. **Honolulu** – July 8th and July 22nd

PMRF PROJECT

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

Beginning April 1, 2016, Akimeka kicked off a project to incorporate new data provided by the Navy from the Navy Emergency Management Addressing Project (NEMAP) on the Pacific Missile Range Facility (PMRF). These changes to the PMRF in Mana included Address Points and Street Centerline range changes were translated into a more accurate application for the Kauai Police Department.

The PMRF updates were tracked and recorded in April's MSR as this was an ongoing project until all updates were incorporated. In addition, all subsequent changes to the MSAG database were coordinated by Akimeka's MSAG Coordinators.

Akimeka completed this project on May 19th, 2016.

SPILLMAN PROJECT

Kauai County is moving forward with the implementation of their new Spillman Technologies CAD system and there has been some significant progress beginning in May 2016.

1. At the end of May 2016, Akimeka started preparing GIS data for Kauai's Spillman CAD system.
   a. Akimeka configured the Spillman Toolbox to process GIS data into Spillman's data specifications.
2. During June 2016, an initial data deliverable included Address Points, MSAG Communities, Street Centerlines, Fire Response Areas, Medic Beats, Police Response Areas, Points of Interest and Street Centerline Alternate Names.
3. On June 30, 2016, Akimeka delivered this data to Spillman Technologies and worked with Spillman Technologies to stand up data on Kauai's server.
   a. The GIS data was copied over into the Kauai Spillman server and loaded into file designation used for staging.
4. On July 20, 2016, Akimeka met with Spillman via teleconference.
   a. Reviewed pinmaps
   b. Discussed closest route module
      i. Akimeka will be sending data to support this module once Spillman is ready

MAPFLEX ISSUES

On July, 24, 2016, Hawaiian Telcom sent an email to Akimeka notifying them to stop all GIS updates for Kauai County. The email stated that it was their belief that issues will occur again July 25, 2016.

1. According to HT, the issues started on July 23, 2016 after the 3:00 AM daily GIS update. Incoming 911 calls were not plotting in MapFlex and an error message was displayed. When the P911 application was restarted, MapFlex displayed a blank, white screen.
   a. During their investigation of the issue, the following MapFlex services were stopped:
      i. Composite Geocode Service
      ii. Street Locator Geocode Service

       iii.   Street Name Geocode Service

    b.   These services could not be restarted until the data was reverted to the previous update.

2.   Akimeka replied back to HT after investigating the data which was delivered previously.

    a.   Akimeka clarified that the deliverable had taken place on July 21, 2016 so it went 2 days without issue.

    b.   The data was reviewed by Akimeka for file names, content, structure, schema, etc. and there were no identified issues.

    c.   Akimeka also advised that the error messages are pertaining after the data is uploaded. It has nothing to do with the data and it is the process which takes place on the MapFlex server that builds the locators and publishes those services out to dispatch. The error is considered post update and indicates the data sent by Akimeka does not have issues.

3.   On July 27, 2016 during the PSAP, HT, West meeting Akimeka brought up the issue. West confirmed during the call that it has nothing to do with the data sent by Akimeka. It is due to a process deficiency on the MapFlex. The original process for publishing the service to dispatch, built the map data into a package and sent out to all of the workstations. There tends to be issues with this process and there is not a production server for publishing updates.

4.   During the June 2016 State of Hawaii 9-1-1 Board Meeting, an issue was identified by several of the PSAPs with the MapFlex system displaying non- Ali formatted Latitude and Longitude location points from an unknown origin for 9-1-1 calls received from payphones. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

Note:	* The 2015 Carryover row indicated the number of Service Requests that were opened in 2015 and brought forward into 2016 in an effort to track the service request until completion. Detailed information on service tickets are available upon request.

	Category	Description
Definitions:	**Wireline**	Telephone Number (ALI) Discrepancies from land line phones that have been submitted to West Safety Services (Intrado) via 9-1-1 Net for correction.
	Wireless	Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database.
	VoIP	Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCBL) for correction

5. E9-1-1 DATABASE SYNCHRONIZATION

(**Reference:** NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for Kauai County in July 2016.

The database synchronization effort included comparing Kauai County's 9-1-1 MSAG received from the 911 Database provider, Intrado on July 1, 2016, against its 9-1-1 GIS Street Centerline data. A total number of **1,337** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on July 1, 2016 for Kauai County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUDIT SUMMARY RESULTS – 2016

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of October 1 , 2015 9-1-1 MSAG Dated 10-01-15		As of January 1 , 2016 9-1-1 MSAG Dated 1-01-15		As of April 1 , 2016 9-1-1 MSAG Dated 4-01-16		As of July 1 , 2016 9-1-1 MSAG Dated 7-01-16	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		1,297		1,300		1,331		1,337	
Less: 9-1-1 MSAG Exception Records	(1)	66	5.1%	72	5.5%	77	5.8%	84	6.3%
Net 9-1-1 MSAG Records Eligible for Comparison		1,231		1,228		1,254		1,253	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		1,231	100.0%	1,223	99.6%	1,249	99.6%	1,249	99.7%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	0	0.0%	5	0.4%	4	0.3%	2	0.2%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.0%	0	0.0%	1	0.1%	2	0.2%
Total 9-1-1 MSAG Records No Match		0	0.0%	5	0.4%	5	0.4%	4	0.3%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the Kauai County was completed as scheduled. The match rate remained consistent from April 2016 with a 99.6% Match Rate to a 99.7% Match Rate as of July 2016.

NOTES:

- An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

- An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

- An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUDIT SUMMARY RESULTS – JULY 1, 2016 MSAG VS. APRIL 1, 2016 MSAG

9-1-1 MSAG Dated 7-01-16
0.3%
99.7%
Match
No Match

9-1-1 MSAG Dated 4-01-16
0.4%
99.6%
Match
No Match
Kauai County level of accuracy for 9-1-1 Match percentage remained consistent with a

99.7% as of July 1, 2016 compared to 99.6% as of April 1, 2016

The NENA recommended minimum match rate of 98% has been met

consistently in 2013 and continues in 2016.

- ❖ Akimeka continues to work with Kauai County GIS and Planning departments to validate streets and communities.

- ❖ In achieving and exceeding the NENA minimum match rate of 98% for data accuracy, Kauai County is ready for Next Generation 9-1-1 (NG9-1-1) from a database perspective.

- ❖ A constant effort to keep the databases synchronized and maintained are required to ensure the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

- ❖ "MSAG record that doesn't match the GIS" decreased (4 to 2) from April 2016 to June 2016. This is a result in which MSAG records submitted in 9-1-1 Net were not completed prior to the end of the month.

- ❖ "MSAG record with no GIS record" increased (1 to 2) from April 2016 to June 2016. MSAG records with no matching record were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Kauai County. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the October 2016 re-analysis.

- ❖ "MSAG Records Corrections Required" decreased (3 to 0) from April 2016 to June 2016 respectively. MSAG records have been combined, split, and high/low ranges have been changed, to match the Street Centerlines.

- ❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

- ❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

- ❖ Coordinating the clean-up of the ALI discrepancy records associated with an assigned ESN of 499 with the respective Service Providers is needed to ensure all records are MSAG valid.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

At the request of the Kauai County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Kauai County and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the data provided are as follows:

KAUAI	Invalid MSAG Records					
	9-1-1 MSAG Dated 1-01-16		9-1-1 MSAG Dated 04-01-16		9-1-1 MSAG Dated 07-01-16	
	Number of Records	% of Total Invalid MSAG Records	Number of Records	% of Total Invalid MSAG Records	Number of Records	% of Total Invalid MSAG Records
ESN 499	43	3.2%	38	2.8%	36	2.6%

These invalid MSAG records represent **2.6%** of the Total MSAG records for Kauai County as of the July 1, 2016 MSAG as compared to **2.8%** as of the April 1, 2016 MSAG. The individual ALI records associated with these records are provided below.

The decrease in the number of invalid MSAG records is a result of Akimeka's research and validation of telephone numbers (TNs) assigned an invalid MSAG address. In order for a TN to be corrected, Akimeka submits the update to the Service Provider via Intrado for approval.

Kauai County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for Kauai County. As of June 27, 2016, there are **108** ESN 499 ALI records, representing **0.4%** of Kauai County's Total ALI records. The number of ESN 499 ALI records was further reduced by **20%** (135 to 108) from April 27, 2016 to July 27, 2016 respectively.

**Kauai County ALI Records
as of 7-26-16**

0.4%

99.6%

- ESN 400
- ESN 499
Although the ESN 499 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 499 MSAG records to a valid Kauai County ESN 400 – 448 to ensure that all ALI records assigned to the County of Kauai have an "MSAG valid address".

PSAP OPERATION NOTES:

- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.**
- **Abandoned Calls are not included in the Wireline and Wireless total counts respectively.**
- **All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.**
- **Outgoing 911 calls are included in the totals. These are ringback or callback 911calls made from the Viper System.**

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

TEXT TO 911 – CURRENT MONTH – JULY 2016

NOTE:

- Maui County initiated a soft launch of the Text to 911 service on March 15, 2016.
- Although there is a "Text to 911" plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- Text to 911 Chart also includes internal testing of Text to 911 for training purposes.
- On July 15, 2016 it was identified that the Text to 9-1-1 icon was missing on the MapFlex System when receiving Text to 9-1-1. This causes the MapFlex not to refresh the map view, and remains at the previous 911 caller's location. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.
- On July 27, 2016, Maui 911 center received a bounce back message while testing text to 911 that read, "Please make a voice call to 911, there is no text service available at this time". This issue was later identified to be a statewide problem.

- There were no (0) scheduled Wireless tests conducted in July, 2016 for the Maui and Molokai PSAP

FOR YOUR INFORMTION

FYI ……….. For Your Information		
MLTS (Multi Line Telephone System)		
"Most MLTS/PBX systems enable the digits 9-1-1 to be dialed and routed to a Public Safety Answering Point (PSAP). However, the vast majority of these systems do not provide granular location information with the 9-1-1 call to enable emergency responders to know the actual location of the emergency. In many instances a call from the 12th floor of a large office building may only provide the street address of the building. If the caller is unable to provide his or her location and no one else is available to provide assistance, such a lack of location information can prove fatal." (NENA : Multi-Line Telephone System & Private Branch Exchange) Technical Standards & Docs.		
PRIMARY PSAPS*	**MLTS/PBX 911 CALLS RECEIVED**	
	July 2016	**YEAR TO DATE 2016**
Oahu	4,507	25,262
Hawaii	82	477
Maui	114	690
Molokai	0	1
Kauai	25	154
Total**	4,728	26,584
*PSAP totals does not include Military 911 calls.		
** Total numbers are a minimum estimated count. Presently, CENTRX & VoIP call volumes are combined with Multi & Single line systems and were not added to the total MLTS 911 calls.		

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

FOR YOUR INFORMTION

FYI ………... For Your Information	
911 Calls Received From Payphones	
Approximately **95%** of 911 calls received from Payphones are "one way" lines. These Payphones are not capable of receiving calls which makes it impossible for the 911 operator to re-contact the caller should there be a location discrepancy or additional information needed.	
PRIMARY	**911 CALLS RECEIVED via Payhone**

Definitions
(A)**M**aster **S**treet **A**ddress **G**uide - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
(B) **T**elephone **N**umber **C**hange **R**equest - Represents address corrections on a specific TN or group of TNs.   These "invalid" TNs usually have an associated ESN 399/359 attached to them which indicates the need for validation.
(C) **A**utomatic **L**ocation **I**nformation **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
(D) **V**oice **o**ver **I**nternet **P**rotocol **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

MSAG CURRENT MONTH NOTES:

A total of **37** MSAG transactions were processed in 9-1-1 Net during the month of July 2016. Sixteen (**16**) requests were processed relating to the MSAG database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS, and inserting new MSAG records.

There were **402** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

20 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 399 clean-up effort. ESN 399 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Akimeka is awaiting feedback from Intrado on the TN CRs that have been submitted for correction. In June 2016, there were **376** TN CRs completed and as a result, eight (**8**) ESN 399/359 street records were deleted from the MSAG database. One (**1**) ALI DR was submitted as the result of a 9-1-1 call from a residence on Molokai. Maui PSAP submitted the request to Akimeka to update the customer information and the discrepancies were corrected in 9-1-1 Net.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 467 Open TN CR Transactions as of July 31, 2016.**
- **Refer to chart in the next section "TNCR Current Status"**

419 Open TN CR transactions are a direct result of the ESN 399 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **48** Open TN CR transactions are a result of the Dispatchable Location project submitted in September. (Refer to the "Dispatchable Location" chart below) Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no ALI DRs Open as of July 31, 2016**
- **There are no VoIP DRs Open as of July 31, 2016**

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JULY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services (Intrado) for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES (INTRADO)	OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES (INTRADO)	TOTAL UNOPENED TNCR RECORDS
MAUI	366	82	173	111
MOLOKAI	101	22	58	21
TOTAL	467	104	231	132

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services (Intrado) Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JULY 2016 - PENDING

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a "State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9" presentation. Based on the 9-1-1 Board's confirmation to add the "Dispatchable Location" information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The "Dispatchable Location" data is entered into the "Driving Directions" field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the "Exact" field should a 911 call be received from that telephone number. Screen shots of the "Before" ALI screen, and the "After" ALI screen with the updated "Dispatchable Location" information visible, were presented to the Dispatch Supervisors. Akimeka received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, Akimeka was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this "Dispatchable Location" information which will reduce the response times for Public Safety. In September, the Dispatchable Location transactions have been temporarily stopped. Transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and West Safety Services (Intrado) for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the "Driving Directions" field. Until this field is created, no further Dispatchable Location transactions will be submitted. There are currently 877 transactions prepared for submission. However, present observations indicate that previous transactions that were submitted in 2015 are currently being processed.

Dispatchable Location					
Common Name Place	**MSAG Address**	**2016**	**Number of TNCR* Transactions Prepared**	**Number of TNCR* Transactions Submitted**	**Number of Transactions Processed****
Queen Kaahumanu Center	Carryover from 2015	2015		368	299
Lahaina Outlets	900 Front St, Lahaina	Jan-	155	0	6

Azeka Kihei	1280 S Kihei Rd, Kihei		129	0	0
		Total	**877**	**374**	**326**

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

CHARTER COMMUNICATIONS (TIME WARNER) VOIP DATABASE TNCR

Akimeka received Automatic Location Identification (ALI) records from Charter Communications (formally known as Time Warner) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka had access to these ALI Records, Akimeka was able to perform a three way comparison. This comparison is a validation of the ALI Record to ensure the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The Analysis of the database records indicated there were invalid MSAG addresses utilized by the VoIP Provider, however, the majority of these records were corrected, or sent back to Charter for further location clarifications. Akimeka was able to verify the majority of the VoIP records had a valid MSAG address assigned and matched with the GIS information. Akimeka has also initiated a correction process with Charter Communications on behalf of the PSAPs in order to perform timely corrections to the remaining VoIP 9-1-1 Records, and to ensure new VoIP customers receive valid MSAG addresses to improve their 9-1-1 location service.

Charter Communications 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)			
PSAP	**TOTAL RECORDS SUBMITTED BY CHARTER (A)**	**RECORDS REQUIRING FURTHER INFORMATION BY CHARTER (B)**	**RECORDS CORRECTED AND RETURNED TO CHARTER BY AKIMEKA (C)**

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

NOTE:

- **The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.**

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

- **GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.**

Date	Key Activities/Updates
7/20/2016	Delivered updated Address Points, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for a MapFlex update
7/20/2016	Delivered .map, .str, rte. and Maui Cell Coverage.cvs which included updated Address Points, Common Places Lookup Table, Gate Codes, Points of Interest, Street Centerlines and WSP Cell Towers for Intergraph CAD Map
7/6/2016	Delivered updated Address Points, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for a MapFlex update
7/6/2016	Delivered .map, .str, rte. and Maui Cell Coverage.cvs which included updated Address Points, Common Places Lookup Table, Gate Codes, Points of Interest, Street Centerlines and WSP Cell Towers for Intergraph CAD Map

INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. On July 6, 2016, the following data was delivered for an Intergraph CAD Map update:
    a. Address Points, Common Places Lookup Table, Gate Codes, Street Centerlines and WSP Cell Towers.
    b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
2. Akimeka delivered an updated Intergraph CAD map on July 20, 2016 which included:
    a. Address Points, Common Places Lookup Table, Gate Codes, Street Centerlines and WSP Cell Towers.
    b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv

During August 2016, the Intergraph CAD map will continue to be delivered on a bi-monthly basis, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

MAPFLEX SYSTEM

During the month of July 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of July 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in July 2016
    a. **Hawaii County** – July 5th and July 19th
    b. **Maui County** – July 6th and July 20th
    c. **Kauai County** – July 7th and July 21st
    d. **Honolulu** – July 8th and July 22nd

Maui County E9-1-1 Status Report

July 1, 2016 - July 31, 2016

MAPFLEX SYSTEM ISSUES

During the month of March 2016, there were some identified addresses not present within the MapFlex system. Throughout the month of March, Akimeka and MPD worked closely to identify what data is the most current in the system and when the updated GIS data will be available in the MapFlex. Akimeka coordinated several times with West (formerly Intrado) to correct the issue.

1. On July 9th, 2016, Maui Dispatch confirmed that the delivery of updated data from Akimeka on July 6th, 2016 was successfully updated.
2. During the June 2016 State of Hawaii 9-1-1 Board Meeting, an issue was identified by several of the PSAPs with the MapFlex system displaying non- Ali formatted Latitude and Longitude location points from an unknown origin for 9-1-1 calls received from payphones. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

RESCUE TUBES

On April 18th, 2016 Akimeka created a Rescue Tubes layer as requested by the Maui Police Dispatch Center. The data was provided by Kaanapali Operations Association. The data provided included Rescue Tube number, latitude and longitude and a physical location for each tube. There are twenty-seven rescue tube locations in the Lahaina and Kaanapali area. This layer was included in the Intergraph CAD map with the April 27th, 2016 deliverable. There were no further updates in July, 2016.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

PSAP OPERATION NOTES:

- **Total call volumes does not include Administrative Calls. Administrative calls = Calls originating on Administrative lines that required 911 service.**
- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.**
- **Abandoned Calls are not included in the Wireline and Wireless total counts respectively.**
- **All VoIP (Voice over Internet Protocol) types of 911 calls are combined in the Call Volume statistic.**

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

TEXT TO 911 – CURRENT MONTH – JULY 2016

NOTE:

- The Oahu Civilian PSAPs have deployed a soft launch for Text to 911 on December 21, 2015.
- During this soft launch period, PSAP personnel will utilize this period to sharpen their Texting skills and procedures.
- Although there is a "Text to 911" plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- During the month of June, it was identified that the Text to 9-1-1 icon was missing on the MapFlex System when receiving Text to 9-1-1. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

NOTES:

- **There were four (4) scheduled Wireless 911 Tests for the Oahu Civilian PSAP in July, 2016.**

FOR YOUR INFORMATION

FYI ………... For Your Information
MLTS (Multi Line Telephone System)
"Most MLTS/PBX systems enable the digits 9-1-1 to be dialed and routed to a Public Safety Answering Point (PSAP). However, the vast majority of these systems do not provide granular location information with the 9-1-1 call to enable emergency responders to know the actual location of the emergency. In many instances a call from the 12th floor of a large office building may only provide the street address of the building. If the caller is unable to provide his or her location and no one else is available to provide assistance, such a lack of location information can prove fatal." (NENA : Multi-Line Telephone System & Private Branch Exchange) Technical Standards & Docs.

PRIMARY PSAPS*	MLTS/PBX 911 CALLS RECEIVED

Definitions
(A)**M**aster **S**treet **A**ddress **G**uide - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
(B) **T**elephone **N**umber **C**hange **R**equest - Represents address corrections on a specific TN or group of TNs.   These "invalid" TNs usually have an associated ESN 199 attached to them which indicates the need for validation.
(C) **A**utomatic **L**ocation **I**nformation **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
(D) **V**oice **o**ver **I**nternet **P**rotocol **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

MSAG CURRENT MONTH NOTES:

A total of **117** MSAG transactions were processed in 9-1-1 Net during the month of July 2016. Twenty-nine (**29**) requests were processed relating to the MSAG database, and two (**2**)requests relating to the ALI database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **2,561** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

There was two (2) ALI Discrepancy Request (ALI DR) processed in 9-1-1 Net, one as the result of a 911 call from a business in Pearl City and the other for a payphone located in a residential area. Akimeka verified the address provided by the caller and verified the correct location. The address has been updated in the GIS and in 9-1-1 Net and is now MSAG valid.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

86 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 199 clean-up effort. ESN 199 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 208 Open TN CR Transactions as of July 31, 2016.**
- **Refer to chart in the next section "TNCR Current Status"**

208 Open TN CR transactions are a direct result of the ESN 199 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There is zero Open ALI-DR as of July 31, 2016.**
- **There is zero Open VoIP DR as of July 31, 2016.**

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JULY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services (Intrado) for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	**TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA**	**OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES (INTRADO)**	**OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES (INTRADO)**	**TOTAL UNOPENED TNCR RECORDS**
OAHU CIVILIAN	**208**	**4**	**198**	**6**

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services (Intrado) Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

CHARTER COMMUNICATIONS (TIME WARNER) VOIP DATABASE TNCR

Akimeka received Automatic Location Identification (ALI) records from Charter Communications (formally known as Time Warner) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka had access to these ALI Records, Akimeka was able to perform a three way comparison. This comparison is a validation of the ALI Record to ensure the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The Analysis of the database records indicated there were invalid MSAG addresses utilized by the VoIP Provider, however, the majority of these records were corrected, or sent back to Charter for further location clarifications. Akimeka was able to verify the majority of the VoIP records had a valid MSAG address assigned and matched with the GIS information. Akimeka has also initiated a correction process with Charter Communications on behalf of the PSAPs in order to perform timely corrections to the remaining VoIP 9-1-1 Records, and to ensure new VoIP customers receive valid MSAG addresses to improve their 9-1-1 location service.

PSAP	**Charter Communications** **9-1-1 Telephone Number Location Change Request** **(Telephone Number Change Request (TNCR) Status)**		
	TOTAL RECORDS SUBMITTED BY CHARTER (A)	RECORDS REQUIRING FURTHER INFORMATION BY CHARTER (B)	RECORDS CORRECTED AND RETURNED TO CHARTER BY AKIMEKA (C)

MSAG COMMUNITIES PROJECT

MSAG COMMUNITY AND STREET SEGMENT SWEEP – PHASE VII

MSAG Community and Street Segment Sweep – Phase VII

Subsequent to the completion of the MSAG Community and Street Segment Sweep - Phase V work on **June 27, 2014,** and the Database Synchronization Phase VI in **July 2014**, a project plan for Phase VII, with regards to the spatial accuracy of Street Centerlines, was approved by the Honolulu Police Department on **July 31, 2014.** The MSAG Community and Street Segment Sweep – Phase VII project is aimed to identify and correct the spatial accuracy of Street Centerlines throughout the island of Oahu, through a methodical counter-clockwise approach, following the same community correction path in the previous phases, to ultimately increase the accuracy of the data and to be in compliance with NENA standards. Street Centerlines that are corrected through this process will then achieve the NENA recommended standard of being accurate to within 10 feet or less.

Below is the latest Phase VII work effort as of **July 31, 2016**:

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

- **GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.**

Date	Key Activities/Updates
7/25/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS
7/22/2016	Street Centerlines, Common Places, Police Beats, MSAG Communities to HPD for Motorola CAD
7/22/2016	Street Centerlines, Address Points, Fire Response Areas, Medic Response Areas, and Display Address Points to HFD, EMS, and Ocean Safety for TriTech CAD
7/22/2016	Address Points, Common Places, Street Centerlines, Police Response Areas, Fire Response Areas, Medic Response Areas, Ocean Safety Response Areas, ESN, MSAG Communities, Cell Towers, Cell Sectors to the Honolulu MapFlex system for HPD, HFD, EMS, and Ocean Safety
7/18/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS
7/18/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS
7/11/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS
7/8/2016	Street Centerlines, Common Places, Police Beats, MSAG Communities to HPD for Motorola CAD
7/8/2016	Street Centerlines, Address Points, Fire Response Areas, Medic Response Areas, and Display Address Points to HFD, EMS, and Ocean Safety for TriTech CAD
7/8/2016	Address Points, Common Places, Street Centerlines, Police Response Areas, Fire Response Areas, Medic Response Areas, Ocean Safety Response Areas, ESN, MSAG Communities, Cell Towers, Cell Sectors to the Honolulu MapFlex system for HPD, HFD, EMS, and Ocean Safety
7/5/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

POLICE BEATS CORRECTIONS

Background

The Police Beats layer was previously identified as a layer requiring corrective action in preparation for the ESZ/ESN project and ensuring spatial accuracy.

Subsequent to the Police Beat corrections that took place during the month of August 2013, upon loading the GIS data for Street Centerlines in the current Motorola Premier CAD, HPD PMT confirmed that there were no issues with regards to the CAD system recommendations. HPD PMT also reviewed the Police Beats corrections worksheet and confirmed that there were no issues with the document. As such, Akimeka proceeded to make corrections to the Police Beats layer utilizing HPD's written Policies and Procedures document for boundary descriptions.

Status to Date

Based on HPD PMT's confirmation, Akimeka continued to make corrections to the Police Beats during the month of July 2016 and has corrected fourteen (14) Police Beats (178, 179, 180, 650, 651, 652, 654, 655, 656, 657, 658, 659, 660, and 661) according to the HPD written Policies and Procedures.

Upload Process

It was agreed that the Police Beats layer will be uploaded to the current Motorola CAD system given some delays with the new Motorola PremierOne CAD system. During the month of April 2015, Akimeka had worked with HPD PMT to design a new upload procedure that would provide the updated Police Beats into the system, along with other corrected layers now previously loaded to the Motorola CAD system. For more information regarding the latest CAD upload procedure, refer to the May 2015 Monthly Status Report, section on Motorola CAD Upload. Updated Police Beats are continuously delivered with this new process on a bi-monthly update with the other GIS deliverables.

MAPFLEX SYSTEM

During the month of July 2016, the MapFlex system received updates without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, West, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of July 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in July 2016
   a. **Hawaii County** – July 5th and July 19th
   b. **Maui County** – July 6th and July 20th
   c. **Kauai County** – July 7th and July 21st
   d. **Honolulu** – July 8th and July 22nd

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

MAPFLEX ISSUE

During the June 2016 State of Hawaii 9-1-1 Board Meeting, an issue was identified by several of the PSAPs with the MapFlex system displaying non- Ali formatted Latitude and Longitude location points from an unknown origin for 9-1-1 calls received from payphones. Hawaiian Telcom and West Safety Solutions will look into the trouble and will schedule a statewide coordination call with all the PSAPs during early August 2016 after their investigation.

STREET UTILITY CHECK

This is an ongoing project to correct the errors identified. A comparison of the raw CAD generated report from the Street Check Utility was performed between the Street Centerline GIS data on June 13, 2016 and July 5, 2016.

Street Utility Check				
	First Report 06/01/13	**6/13/2016**	**7/5/2016**	**Improvements/Corrections**
Total Number of GIS Records	26,602	29,394	29,408	Increased by 14 records
Errors Identified				
Zero Errors	5,112	18	25	Increased by 7 errors
Low > High Errors	3	0	0	No Change
Mixed Parity Errors	1	0	0	No Change
Changed Parity Errors	105	0	0	No Change
Address Gap Errors	2,629	3	0	Decreased by 3 errors
Address Overlap Errors	423	2	2	No Change
Flipped Link Errors	1,030	592	596	Increased by 4 errors
Total Errors	**9,303**	**617**	**623**	Increased by 6 errors

In addition to Akimeka's internal validation tools, Akimeka will continue to utilize the various CAD reports to further identify and correct the multitude of discrepancies in the GIS data. This is an ongoing and routine process which Akimeka has been using to improve the accuracy of the GIS data for Public Safety.

Akimeka plans to continue its work effort to complete corrections of the discrepancies identified and/or identify any valid exceptions which Akimeka will tag with the proper information so the CAD system will accept the record(s) and not jeopardize the full functionality of the CAD system from the upload to RMS. Akimeka plans to complete all Street Utility Check errors prior to the implementation of the Motorola PremierOne CAD "go live" date.

Due to the MSAG Community and Street Sweep – Phase VII project, Akimeka expects there to be fluctuation in the results of the Street Check Utility moving forward, especially with regards to Zero Errors, Flipped Link Errors, Address Gap Errors, and Address Overlap Errors. These errors are as a direct result of the spatial corrections made on the Street Centerline network, where many new ingress segments are added. The preference is that the system can generate these non-impacting and non-critical errors instead of overriding them beforehand. The errors that are identified through this process are subsequently corrected based on the results of the Street Check.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

---

4. E9-1-1 DATABASE SYNCHRONIZATION

(**Reference:** NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for the Oahu Civilian PSAP in July 1, 2016.

The database synchronization effort included comparing Oahu Civilian's 9-1-1 MSAG received from the 911 Database provider, Intrado on July 1, 2016, against the PSAP's 911 GIS Street Centerline data. A total number of **7,755** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on April 1, 2016 for the Oahu Civilian PSAP are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUDIT SUMMARY RESULTS – 2016

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of October 1, 2015 9-1-1 MSAG Dated 10-01-15		As of January 1, 2016 9-1-1 MSAG Dated 1-01-16		As of April 1, 2016 9-1-1 MSAG Dated 4-01-16		As of July 1, 2016 9-1-1 MSAG Dated 7-01-16	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		7,749		7,752		7,766		7,755	
Less: 9-1-1 MSAG Exception Records	(1)	35	0.5%	30	0.4%	33	0.4%	33	0.4%
Net 9-1-1 MSAG Records Eligible for Comparison		7,714		7,722		7,733		7,722	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		7,694	99.7%	7,710	99.8%	7,719	99.8%	7,718	99.9%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	16	0.2%	11	0.1%	13	0.2%	3	0.0%
9-1-1 MSAG Record With No Matching GIS Record	(3)	4	0.1%	1	0.0%	1	0.0%	1	0.0%
Total 9-1-1 MSAG Records No Match		20	0.3%	12	0.2%	14	0.2%	4	0.1%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the City & County of Honolulu (Civilian PSAPs) was completed as scheduled. The match rate remained consistent from April 2016 with a 99.8% Match Rate to a 99.9% Match Rate as of July 2016
NOTES:

- An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.

- An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).

- An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUDIT SUMMARY RESULTS – JULY 1, 2016 MSAG VS. APRIL 1, 2016 MSAG

9-1-1 MSAG Dated 7-1-16
.1%
99.9%
■ Match
■ No Match

9-1-1 MSAG Dated 4-1-16
.2%
99.8%
■ Match
■ No Match

Oahu Civilian's level of accuracy or 9-1-1 Match percentage remained consistent with a

99.9% as of July 1, 2016 compared to 99.8% as of April 1, 2016.

The majority of the remaining MSAG and GIS discrepancies are in the

Honolulu MSAG Community.

❖ As agreed between HPD PMT and Akimeka, Akimeka would initially focus on the <u>existing</u> MSAG and GIS records to produce a match which will benefit the PSAP in the interim.

❖ This effort would not include the MSAG Communities project to implement the <u>new</u> MSAG Communities and associated GIS Street Centerlines. This would be handled as a separate project as identified and agreed to.

❖ As a result of the MSAG Community and Street Segment Sweep project, the majority of the remaining discrepancies resides in the Honolulu MSAG Community and will be addressed during the Phase V effort.

❖ The previously completed MSAG Communities as a result of the MSAG Community and Street Segment Sweep project are now considered part of ongoing maintenance.

❖ "MSAG - GIS Minor Corrections" decreased (13 to 3) from April 2016 to July 2016. Low and high address ranges, odd/even combines, and street suffixes were adjusted in the MSAG to correspond with the GIS record. Although identified as a minor correction, customer telephone numbers (TNs) must be validated in 9-1-1Net prior to correcting the MSAG record to ensure the correction will not result in an orphan ALI Record or TN Fall-out.

AUDIT SUMMARY RESULTS – JULY 1, 2016 MSAG VS. APRIL 1, 2016 MSAG CONTIUNED

❖ "MSAG Record with No GIS Record" remained the same (1 to 1) from April 2016 to July 2016. MSAG records with no matching record were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within City and County Honolulu. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the October 2016 re-analysis.

❖ "GIS MSAG Records with No Matching E9-1-1 MSAG Record" decreased (4 to 3) from April 2016 to July 2016. Records with no matching record was due primarily to the verification of the MSAG records against the single source 9-1-1 GIS databases created by Akimeka from the multiple public safety agencies' databases to determine if the roads exist within City & County of Honolulu and Military bases GIS records. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the October 2016 re-analysis.

❖ "GIS –Minor Corrections" decreased (8 to 5) from April 2016 to July 2016. Low and high address ranges, street suffixes, and MSAG Community were adjusted in the GIS database to correspond with the MSAG record. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the July 2016 re-analysis.

❖ A constant effort to keep the databases synchronized and maintained are required to improve the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is "last modified".

❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

At the request of the Kauai County and Hawai'i County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided all State of Hawai'i PSAPs and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the Oahu Civilian data provided are as follows:

OAHU CIVILIAN	Invalid MSAG Records					
	9-1-1 MSAG Dated 01-01-16		9-1-1 MSAG Dated 04-01-16		9-1-1 MSAG Dated 07-01-15	
	Number of Records	% of Total Invalid MSAG Records	Number of Records	% of Total Invalid MSAG Records	# of Records	% of Total MSAG Records (Valid and Invalid)
ESN 199	122	1.5%	114	1.4%	72	0.9%

These invalid MSAG records represent **0.9%** of the Total MSAG records for the City & County of Honolulu as of the July 1, 2016 MSAG. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 199 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Oahu Civilian E9-1-1 Status Report

July 1, 2016 - July 31, 2016

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for the City & County of Honolulu (Oahu Civilian). As of July 1, 2016, there are **542** ALI records with an assigned ESN of 199, representing **.1%** of the City & County of Honolulu (Oahu Civilian) total ALI records.

With Akimeka's continuing MSAG Community and Street Segment Sweep effort, the percentage of ESN 199 records may increase as low and high address ranges and new communities are verified.
The number of Ali records with an ESN 199 records decreased by **28%** (752 to 542) from April 2016 to July 2016 respectively. The decrease was due primarily to Akimeka's effort to identify the invalid MSAG records and verify their correct locations against current County GIS data.

Although the ESN 199 is a "valid" MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a "No Record Found" condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller's location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 199 MSAG records to a valid City & County of Honolulu ESN 100 to ensure that all ALI records assigned to the City & County of Honolulu (Oahu Civilian) have an "MSAG valid address".
