

STATE OF HAWAII

**Communications, Technical
and Finance Meeting
(Combined Meeting)**

Tuesday, January 12, 2016
Kalanimoku Bldg., Room 132
1151 Punchbowl St., Honolulu
10:30 am to 1:00 pm

Agenda

- I. Call to Order, Public Notice, Quorum**
- II. Public testimony on all agenda items**
- III. Introductions**
- IV. Review and Approval of Last Month's Meeting Minutes**
- V. Committee Updates by Committee Chairs**
 - a. Communications Committee – Steven Schutte**
 - i. 2016 Legislative Investigative Committee update- Paul Ferreira
 - b. Technical Committee – Thalia Burns**
 - i. Investigative Regulatory Committee update – Marshall Kanehailua
 - ii. FCC update
 - iii. Text-to-911 update
 - iv. Request approval-
 1. 2016 HeXagon (Intergraph) Conference, Anaheim, June 13-17, 2016.
 - a. MPD (6) - \$18,874.56.
 - v. Others
 - c. Finance Committee – Kiman Wong**
 - i. Review of Monthly Cash Flow & Budget Financial Reports.
 - ii. Request Approval:
 1. Amend signatory requirements from two to one for checks under \$10,000.
For checks \$10,000 and over shall require two signatories as before.

- iii. Request Funding Approval:
 - 1. 2016 HeXagon (Intergraph) Conference, Anaheim, June 13-17, 2016.
 - a. MPD (6) - \$18,874.56.
- iv. Others.

VI. PSAP Status Updates

- a. Kauai – Mark Begley
- b. Oahu – Allan Nagata
- c. Molokai – Dean Rickard
- d. Maui – John Jakubczak
- e. Hawaii – Paul Ferreira

VII. Items for Discussion, Consideration and Action

- a. 911 Timeline update.
- b. Others.

VIII. Announcements

- a. Future Meeting dates (10:00 am – 12:00 noon):
 - i. Thursday, February 11, 2016 (Combined meeting)
 - ii. Thursday, March 10, 2016 (Combined meeting)
 - iii. Thursday, April 14, 2016 (Combined meeting)
 - iv. Thursday, May 12, 2016 (Combined meeting)
- b. Others

IX. Open Forum: Public comment on issues not on the agenda for consideration for Board agenda at the next meeting.

X. Adjournment

STATE OF HAWAII

Communications, Technical and Finance Meeting (Combined Meeting) Thursday, January 14, 2016 Kalanimoku Bldg., Room 132 1151 Punchbowl St., Honolulu 10:30 am to 1:00 pm

Communications Committee members present: Steven Schutte (Chair), Thalia Burns (HPD), Davlynn Racadio (MPD), and Paul Ferreira (HiPD) and Lavina Taovao (KPD).

Communications Committee members absent: None.

Technical Committee members present: Thalia Burns (Chair), Clement Chan (DIT), Rob Gausepohl (KPD), John Jakubczak (MPD), Ah Lan Leong (HPD), Steven Schutte (Verizon), Eleni Papakiristis (Hawaiian Telcom), Antonio Ramirez (Akimeka), Kenison Tejada (APCO/NENA Pacific Chapter), Jeff Riewer (AT&T Mobility), Kiman Wong (Oceanic Time Warner Cable) and David Miyasaki (KPD).

Technical Committee members absent: Gary Lum (HFD) and Marshall Kanehailua (HiPD).

Finance Committee members present: Kiman Wong (Chair), Lisa Hiraoka (Consumer Advocate designee), Mark Begley (Kauai County), and Paul Ferreira (HiPD)

Finance Committee members absent: Randy Macadangdang (HPD) and Roy Irei (T-Mobile).

Guests: Victoria Garcia (DoD), Bonnie Young (MPD), Ryan Freitas (Hawaiian Telcom), Arnold Kishi (CIO designee), Travis Ing (HiPD), Diana Chun (ESD), Ben Morgan (Hawaiian Telcom), Allan Nagata (HPD), Wayne Hirasa (SIC), and Dean Rickard (MPD).

I. Call to Order, Public Notice, Quorum

- a. The meeting was called to order at 10:03 am.
- b. Public notice was issued.
- c. Quorum was present for all committees.

II. Public testimony on all agenda items

- a. None

III. Introductions

- a. Introductions were made by everyone present at the request of Board Chair Paul Ferreira.

IV. Review and Approval of Last Month's Meeting Minutes

- a. Mr. Steven Schutte motioned to approve the December 2015 meeting minutes. The motion was seconded and approved by voice vote by all Committee members present.

V. Committee Updates by Committee Chairs

- a. Communications Committee – Steven Schutte
 - i. Communications Committee Chair Steven Schutte asked if the PSAPs are able to display the Text-to-911 posters at this time. Board Chair Ferreira stated he will defer this item to the technical committee.
 - ii. 2016 Legislative Investigative Committee update - Paul Ferreira
 1. Board Chair Ferreira announced that the 2016 Legislative session opens next week on Wednesday, January 20, 2016. The prepaid bill is still with Governor Ige's office as part of his administration package. Governor Ige is making the State of the State address on Monday, January 25, 2016, after which time we will be notified whether the bill will move forward. Once we receive notification that the bill will move forward as part of the Governor's legislative package, we will be asking everyone to provide supporting testimony to the committee.
- b. Technical Committee – Thalia Burns
 - i. Investigative Regulatory Committee update – Marshall Kanehailua
 1. Technical Committee Chair Ms. Thalia Burns announced there is no update at this time.
 - ii. FCC update
 1. Mr. Courtney Tagupa announced there is no update at this time.
 - iii. Text-to-911 update
 1. Ms. Thalia Burns announced both Kauai and Honolulu PSAPs have initiated a soft-launch of Text-to-911. Kauai launched on December 14, 2015 and Honolulu launched on December 21, 2015. She stated that they are in the final stages of fine tuning their processes. HPD Acting Major Allan Nagata provided a presentation on what they have encountered so far with text-to-911 and shared three live cases that were texted and responded to. These cases are use cases for the PSAPs and had successful outcomes. These texts came in during the last week of 2015 and on New Year's Day 2016. During that time of the year, it is very challenging due to many calls for service. They had some challenges and successes during this time that they would like to share.

Case 1: December 29, 2015 at 2021 hours

HPD received a 911 text stating that people were locked in the bathroom with perpetrators waiting to ambush them (they were not aware of the gender of the individual from the text) and they were hiding from the assailants. The address that was reported was familiar to Acting Major Nagata, as he used to work there. HPD officers that were dispatched to the scene were already aware of the location and that it was considered a problem house and were familiar of the people that lived there. HPD researched the phone number because in dispatch, they are not familiar with the individuals that the officers interacted with. The search revealed previous cases and phone numbers. The officers on the scene made contact with the texter and were able to safely remove them from the restroom. No charges were filed by the individual. This was our first text received at the 911 communications center and was successful.

Case 2: December 30th at 0317 hours

The second case was interesting because Regional Dispatch Center (RDC) received a text from a female at KPT housing reporting that she with her husband and he assaulted her and he was on drugs and threatened to kill her. HPD communications center received a call from this text because RDC picked up all of the information on the text and made the call to HPD and relayed the information. Acting Major Nagata stressed that there is still a need to coordinate a one text message transfer from RDC to HPD, but because we are new at this, RDC had the opportunity learn how to do it and HPD had the opportunity to assist them. In the end, the case had a successful outcome because RDC was able to relay all of the information to HPD. The officer arrived on scene in seven minutes. Charges were initiated against the suspect and the suspect was arrested. This is another successful use case for the PSAPs. This is part of the reason why HPD elected to launch the service in December. They wanted to offer the service to the public and this is one of the reasons why – in domestic violence cases - where it is unsafe to call 911. In this particular case, the female texter was with the suspect, and she couldn't make that voice call to 911. But with text messaging to 911, she could be twittering, facebooking, and the assailant wouldn't be aware of it. We all thought at communication centers it is better to have service not needed than needed and not have it. Acting Major Nagata and Ms. Ah Lan Leong went back to analyze the

case and listened to the calls. It took about two or three times between HPD and RDC. When he looked at MIS, the text detail went back and forth quite a bit because they had to ask the female texter “what is your location, any weapons, and any additional assault.” It took quite a few texts, but ultimately information transferred and HPD was successful. It was one of the first text to 911 use cases resulting in an arrest.

Case 3: January 1, 2016

A 911 text came in to the HPD communications center. A man identified himself as an adult corrections officer. The 911 text stated “possible gunshots in Palolo” and more importantly he put down that it occurred in “the housing.” All officers are familiar with “the housing” (Beat 779 in District 7, Palolo). HPD text him back asking him if he could make a voice call. Acting Major Nagata explained whenever there is a gun case, you want to get the information expeditiously. The man texted and asked the dispatcher to call him. The supervisor on duty made the decision to call him right back because he gave permission to call him. He was able to provide a more specific location within Palolo housing and officers were dispatched. Acting Major Nagata reported an officer arrived on scene seven minutes after the text was dispatched and indicated that was a very good response time. This was a good learning experience for HPD and were very happy with the successful outcome.

Case 4: Ms. Ah Lan Leong from HPD shared that HPD communications center have been receiving texts to 911 with the words “my location” with an address and it says “accurate to x number of yards” with the Google address with the latitude and long and noticed it coming from Sprint network. Hawaiian Telcom is working with HPD and Intrado to understand why they are receiving these texts. They have narrowed down that they are coming from Galaxy 4 phones and above and there is some kind of issue with the SOS application that is sending these text message inadvertently to 911. HT and Intrado are continuing to research the cause and develop a solution. She mentioned that HPD is very happy with service they have been receiving from Hawaiian Telcom through this process. They noticed in the beginning that those latitude long coordinates were almost exactly where the texter was at the time. They called the phone number back and texter replied they were in that location a few minutes ago, so the location information seems to be accurate. A lot of the information that is received from

the texts looks like gibberish, so now the call takers are getting used to seeing it and deciphering the information. Acting Major Nagata stated that they were not sure what this text was, if someone was stranded on a mountain or had an accident, so they elected to dispatch officers to each of these text locations. They wanted to service the texts in the event it was a true emergency. Ms. Leong stated they are very happy they elected to do the soft-launch in order to fine tune everything. If they would have elected to go live and had done the media blitz, this would have overwhelmed them because they did not know what this text was and they would have had to deal with texts coming in and the normal calls they get. HT has been on scene and extremely helpful in assisting HPD in getting their staff on board and on one page. They are continuing to train with HT. Ms. Leong extended her thanks to Mr. Ben Morgan of Hawaiian Telcom and his staff because they have had a wonderful partnership. HT has been very responsive and to all of their questions.

DCAB Presentation: January 7, 2016

HPD presented text-to-911 to DCAB. The State has many disabled individuals, especially hearing impaired. The attendees were very excited to hear of the service and thanked HPD for bringing this potential life-saving service to Honolulu. The attendees stated that they feel that 911 is now more accessible for those with handicaps and disabilities.

iv. Request approval-

1. 2016HeXagon (Intergraph) Conference, Anaheim, June 13-17, 2016.

a. MPD (6) - \$18,874.56.

A/C John Jakubczak clarified that Intergraph is MPD's CAD vendor. The reason this figure is so high at this point is due to a change in procedure in budgeting from their county accounting department. This particular request will be a one-time request for MPD. MPD has asked for two or three members to attend in previous years, but due to change in the budget process for this year, they have had to act quickly to submit this request for funding. The total number of personnel MPD is requesting to send this year is same amount from the prior year. The six personnel includes power users and technical support personnel. Mr. Tony Ramirez motioned to approve and forward to the Finance Committee for funding approval. The motion was seconded and approved by voice vote by all Technical Committee members present.

v. Others - There were no other items brought forward for discussion.

c. Finance Committee – Kiman Wong

i. Review of Monthly Cash Flow & Budget Financial Reports.

Finance Committee Chair Kiman Wong provided the following statistics for the month ending December 31, 2015:

Monthly Receipts - \$774,269, which is a normal month.

Disbursements - \$504,695, which is higher than normal, but still within a good range.

Net Receipts - \$269,574

Net Bank Balance - \$17,756,987, which is relatively high.

Unencumbered Bank Balance - \$12,867,130.

Finance Chair Wong stated that one of the major disbursements was the annual state administrative access and revenue assessment which amounts to approximately \$230,000. The full details of this expense are detailed in the full reports that were emailed by the Executive Director. Mr. Courtney Tagupa provided comments of note on one of the Statement of Cash Flow in the December report. Unfortunately, the particular company that went into Chapter 11 ceased operations. Mr. Tagupa was notified in early December that the company had exhausted all funds and personnel. Mr. Tagupa stated he will require the assistance of the Office of the Attorney General to determine the exact loss, but estimates the maximum loss to the Board would be approximately \$600.

ii. Request Approval:

1. Amend signatory requirements from two to one for checks under \$10,000. For checks \$10,000 and over shall require two signatories as before.

a. This is a new request to change the signatory protocol on checks under \$10,000. The Executive Director explained that the reason for this request is due to becoming state employees and with that, there are specific payroll and pCard expenditures that have payment deadlines by the State that we are required to adhere to. The current protocol on issuing checks requires two signatures from the list of three authorized signatories. In some cases, it is difficult for the Executive Director to obtain the required two signatures because only three total people are authorized signatories (two are located Downtown and one in Mililani). The Executive Director proposed that all checks under \$10,000 require only one signature

instead of two from the current approved signatories. The Executive Director explained that it was difficult during the month of December and January to obtain two signatures, as people were out of the office or on holiday. During December and January, we were late on pCard and payroll deadlines due to not having two required signatures. In one instance, there was a situation involving a check for \$4.00 for the pCard that needed to be signed in order to meet the pCard deadline. The Executive Director elected to write a personal check for the balance to meet the deadline. This is an extreme case, but situations like this will come up in which we need to meet the deadlines and if not, in some cases, the Board could be subject to penalties if timely payments are not made to the State. At one time, the previous Executive Director had the ability to sign checks under \$10,000 but we did not use this very often, so it was ultimately phased out. The Executive Director recommends to make an amendment to the signature procedures in requiring only one authorized signature in the event that situations like these arise. He has discussed this with First Hawaiian Bank they will process checks with one authorized signature, given Board approval. MPD Acting Chief John Jakubczak inquired if the check ceiling is determined by Board or by First Hawaiian Bank. The Executive Director replied that it would be determined by the Board. He stated that an average two-week payroll check amount to \$8,000 for a two-week period (payroll reimbursement checks payable to the State of Hawaii are due on the 15th of the month and the end of the month). Ms. Thalia Burns asked if this has an impact on the annual audit in any way. The Executive Director stated he has not discussed this with the auditor but he will have a discussion regarding this issue and report back. Ms. Lisa Hiraoka inquired as to the auditor's response if it would change the internal controls. The Executive Director said he had not yet spoken with the auditor, but would do so immediately and report back. It was suggested that the approval be taken for a vote, but the final decision would rest pending the auditor's response. Mr. Kerry Yoneshige of DAGS recommended to give the Executive Director approval to issue checks made payable to "State of Hawaii" for purposes of payroll and pCard payments and obtain only one board approved authorized

signature. The Executive Director clarified these amounts for pCard and payroll have already been factored into the budget. Mr. Yoneshige explained that the problem is due to the Board's funds residing outside of the State Treasury, a simple journal voucher cannot be used to transfer the Board's funds to the State's General Fund, which is normally what their office does. He stated this is why it is necessary for the Executive Director to prepare a check to pay the State for these items. Board Chair Ferreira motioned to approve in the checks issued payable to "State of Hawaii" for payroll and pCard purposes to require one authorized signature from any one of the three authorized signatories in lieu of two, pending the outcome of the discussion with the auditor in that this does not change our internal controls and subject to final approval by the Board. The motion was seconded and approved by voice vote of all Finance Committee members in attendance.

Action Item: Discuss this signatory amendment with the auditor to ensure the internal controls and annual CPA report are not adversely impacted.

iii. Request Funding Approval:

1. 2016 HeXagon (Intergraph) Conference, Anaheim, June 13-17, 2016.
 - a. MPD(6) - \$18,874.56.

The Board Chair asked the Executive Director for clarification on the number of personnel that may be allowed to attend conferences from each agency. Mr. Courtney Tagupa stated it was previously agreed upon that two people from each agency may attend conferences. The Board Chair stated that he has no problem funding the entire amount since he knows it was fully funded last year. Ms. Thalia Burns asked the Executive Director if there are funds available in the budget to cover the difference. Mr. Courtney Tagupa stated that there are sufficient funds to cover the difference in the expense. The Board Chair motioned to approve funding subject to final approval by the full board. The motion was seconded and approved by voice vote by all Finance Committee members present.

iv. Others.

1. There were no other updates.

VI. PSAP Status Updates

a. Kauai – Mark Begley

- i. KPD A/Chief Rob Gausepohl announced that KPD has also soft-launched Text-to-911 on Kauai. They have not yet received any returns, but they have had samples and are fine tuning their processes. They have not encountered any problems such as those presented by HPD. Acting Chief Gausepohl stated KPD should have the contract with Hawaiian Telcom finalized in the near future. They are keen to negotiate in good faith because Hawaiian Telcom is already providing the Text-to-911 service with KPD. Acting Chief Gausepohl also shared a success story. KPD's current ADA coordinator is an attorney who fell and injured herself in her house. She had no device close to her to contact 911 other than an iPad. She was able to email KPD Dispatch One and a dispatcher under Ms. Lavina Taovao's supervision immediately noticed email and sent help immediately. The ADA coordinator was diagnosed as having a fractured hip and would not have been able to move without pain and possible further injury, so Ms. Lavina Taovao and her team are to be commended for their quick response that contributed to a successful outcome.

b. Oahu – Allan Nagata

- i. HPD Acting Major Allan Nagata provided an update on Smart911. 2015 with a total of 2,165 Smart911 accounts created from inception-to-date. He wanted to compare and contrast the enrollment numbers with a PSAP of similar size as Honolulu. There is one of a similar size on the mainland that has over 10,000 accounts, but that number reflects over two and a half years of service. It has only been four months since our launch here. Acting Major Nagata and Ms. Thalia Burns initially had Smart911 media announcements coordinated with I Heart Media, Perry & Price and Island 98.5 to capture both the young and the "young at heart" populations but they were rescheduled until February. Acting Major Nagata expressed that he hopes the Committee and Board members sign up for this potentially life-saving service. He also wanted to introduce the Board and Committee members to HPD's new police radio dispatcher trainees that started on August 19, 2015. They initially started with three, but a former air traffic controller decided a career with air traffic was enough and elected to enjoy retirement, so they are down to two who are completing their call taking training and finishing up at end of January. Starting next week, they will be doing independent call taking on second watch. They will officially complete their training on August 16, 2016. Another class of ten new hires started on January 4, 2016.

Acting Major Nagata expressed how extremely proud he is of them. The new hires had family orientation yesterday where they brought their family and friends and toured and were introduced to the communications center. HPD Police Chief Louis Kealoha was also in attendance. He hopes to see all of the new hires on board next year when they graduate on January 3, 2017. Last year, a total of nine police radio dispatchers graduated on August 28, 2015. Four dispatchers graduated and then another five graduated from the 43rd police radio dispatcher class. HPD's communication center are very happy with the addition of the nine graduates.

c. Molokai – Dean Rickard

- i. Maui Police Department Deputy Chief Dean Rickard announced that they are waiting to deploy the soft-launch of Text-to-911, as all paperwork and the contract has been forwarded to corporate counsel.

d. Maui – John Jakubczak

- i. Maui Police Department A/C John Jakubczak announced that the box of Text-to-911 posters that was being flown back to Maui on Hawaiian Airlines broke open upon arrival in Maui and sent posters flying all over the tarmac, so there is information about Text-to-911 on the island in an “unofficial soft launch.” Work is also continuing on the Kihei station dispatch center. Ms. Davlynn Racadio stated that the Kihei alternate center where they are presently working has put in a request for furniture and equipment. MPD is also waiting for the service contract to be approved by corporate counsel. It looks like it will happen this year if all goes as planned.

e. Hawaii – Paul Ferreira

- i. Hawaii Police Department Acting Lieutenant Travis Ing announced their soft launch for Text-to-911 is forthcoming. The contract is presently with their county finance department. HiPD has also hired four new police radio dispatchers who will start on February 1, 2016. These four filled positions account for a little more than half of their present vacancies. Deputy Chief Paul Ferreira also stated that their county finance department indicated they would like a sole source memorandum from Hawaiian Telcom. MPD A/C John Jakubczak stated that Maui county finance department is also asking for the same memorandum.

VII. Items for Discussion, Consideration and Action

- a. 911 Timeline update.

- i. The Board Chair requested that the PSAPs report any timeline updates to be posted on the 911 website to the Executive Director.
- b. Others.
 - i. Ms. Davlynn Racadio of MPD provided an update on the upcoming 911 Goes to Washington conference. She sent out an email to all conference attendees that detail their activities. Four appointments have been set up to meet with our State Legislators. One day has been set aside to meet with both Senators and the following day the group will meet with both Representatives. She stated that there is approximately a 20 minute walk between the offices of Representatives Takai and Gabbard, but yet there is a potential for snow. The group also has an appointment set up to tour the Pentagon on February 22, 2016. If anyone is interested in that tour, they would have to leave the conference early to attend. This is the only time that was available for the entire group. Ms. Davlynn Racadio is still waiting for confirmation for the White House and Capitol tours for the group. Representative Takai will not be available to meet with the group and we are meeting with Sean Callahan of his staff who they have met with previously. She stressed that the group will require a list of at least four or five talking point for their appointments. NENA is recommending the group discuss MLTS and to continue to push for NG911. She is looking for a leader to represent the group and to facilitate the conversations. Ms. Thalia Burns stated that the highest ranking Board member has been designated as the leader in prior appointments. Senators Hirono and Schatz are on the 911 Caucus and seem supportive. We should focus our efforts in an attempt to gain support from Representatives Gabbard and Takai. Ms. Davlynn Racadio has reached out throughout the year on behalf of the Board to build a relationship prior to the group's visit and to ensure they are aware of the issues that we are facing. She inquired about prepaid legislation talking points, as Deputy Chief Paul Ferreira indicated if the bill does move forward, it will be moving through the legislature when the group attends the conference.
Action Item: Draft four to five talking points for the group and distribute to the conference attendees.

VIII. Announcements

- a. Future Meeting dates (10:00 am – 12:00 noon):
 - i. Thursday, February 11, 2016 (Combined meeting)
 - ii. Thursday, March 10, 2016 (Combined meeting)
 - iii. **Tuesday**, April 12, 2016 (Combined meeting) (**Meeting Location/Time TBD**)
 - iv. Thursday, May 12, 2016 (Combined meeting)

- b. Others
 - i. There were no other items for discussion.

IX. Open Forum: Public comment on issues not on the agenda for consideration for Board agenda at the next meeting.

- i. The Board Chair asked if there was anyone who wishes to comment on issues not on the agenda for consideration for the agenda at the next Board meeting to please come forward. No one responded.

X. Adjournment

- i. The meeting was adjourned at 11:24 am.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

PSAP OPERATION NOTES:

- **Total call volumes does not include Administrative Calls. Administrative calls = Calls originating on Administrative lines that required 911 service.**
- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.**
- **Abandoned Calls are not included in the Wireline and Wireless total counts respectively.**
- **All VoIP (Voice over Internet Protocol) types of 911 calls are combined in the Call Volume statistic.**

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TEXT TO 911 – CURRENT MONTH – JANUARY 2016

NOTE:

- The Oahu Civilian PSAPs have deployed a soft launch for Text to 911 on December 21, 2015.
- During this soft launch period, PSAP personnel will utilize this period to sharpen their Texting skills and procedures.
- Although there is a “Text to 911” plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.

Definitions

- (A) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (B) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 199 attached to them which indicates the need for validation.
- (C) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
- (D) **Voice over Internet Protocol Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

MSAG CURRENT MONTH NOTES:

A total of twenty-four (24) MSAG transactions were processed in 9-1-1 Net during the month of January 2015. Twenty-three (23) requests were processed relating to the MSAG database, and one (1) requests relating to the ALI database (see ALI Transaction chart on next page). There were 515 customer ANI/ALI (telephone/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

There was one (1) ALI Discrepancy Request (ALI DR) processed in 9-1-1 Net, as the result of a 911 call from a residence in Nanakuli. Akimeka verified the address provided by the caller and verified the correct location. The address has been updated in the GIS and in 9-1-1 Net and is now MSAG valid.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 468 Open TN CR Transactions as of January 31, 2016**
- **Refer to chart in the next section "TNCR Current Status"**

The Open TN CR transactions are a direct result of the ESN 199 clean-up and are awaiting approval from Hawaiian Telcom, Inc. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no Open ALI-DRs as of January 31, 2016**
- **There are no Open VoIP DRs as of January 31, 2016**

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JANUARY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
OAHU CIVILIAN	468	11	177	280

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

MSAG COMMUNITIES PROJECT

MSAG COMMUNITY AND STREET SEGMENT SWEEP – PHASE VII

MSAG Community and Street Segment Sweep – Phase VII

Subsequent to the completion of the MSAG Community and Street Segment Sweep - Phase V work on **June 27, 2014**, and the Database Synchronization Phase VI in **July 2014**, a project plan for Phase VII, with regards to the spatial accuracy of Street Centerlines, was approved by the Honolulu Police Department on **July 31, 2014**. The MSAG Community and Street Segment Sweep – Phase VII project is aimed to identify and correct the spatial accuracy of Street Centerlines throughout the island of Oahu, through a methodical counter-clockwise approach, following the same community correction path in the previous phases, to ultimately increase the accuracy of the data and to be in compliance with NENA standards. Street Centerlines that are corrected through this process will then achieve the NENA recommended standard of being accurate to within 10 feet or less.

Below is the latest Phase VII work effort as of **January 31, 2016**:

1/4/2016	Cell Towers and Cell Sectors for GeoComm at HPD, HFD and EMS

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

POLICE BEATS CORRECTIONS

Background

The Police Beats layer was previously identified as a layer requiring corrective action in preparation for the ESZ/ESN project and ensuring spatial accuracy.

Subsequent to the Police Beat corrections that took place during the month of August 2013, upon loading the GIS data for Street Centerlines in the current Motorola Premier CAD, HPD PMT confirmed that there were no issues with regards to the CAD system recommendations. HPD PMT also reviewed the Police Beats corrections worksheet and confirmed that there were no issues with the document. As such, Akimeka proceeded to make corrections to the Police Beats layer utilizing HPD's written Policies and Procedures document for boundary descriptions.

Status to Date

Based on HPD PMT's confirmation, Akimeka continued to make corrections to the Police Beats during the month of January 2016 and has corrected three (3) more Police Beats (567, 568, and 569), performed routing maintenance on five (5) Police Beats (150, 151, 154, 384, and 555), and is in the process of correcting three (3) additional Police Beat boundaries (570, 571, and 572) according to the HPD written Policies and Procedures.

Upload Process

It was agreed that the Police Beats layer will be uploaded to the current Motorola CAD system given some delays with the new Motorola PremierOne CAD system. During the month of April 2015, Akimeka had worked with HPD PMT to design a new upload procedure that would provide the updated Police Beats into the system, along with other corrected layers now previously loaded to the Motorola CAD system. For more information regarding the latest CAD upload procedure, refer to the May 2015 Monthly Status Report, section on Motorola CAD Upload. Updated Police Beats are continuously delivered with this new process on a bi-monthly update with the other GIS deliverables.

MAPFLEX SYSTEM

During the month of January 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of January 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in January 2016
 - a. **Hawaii County** – January 12th and January 19th
 - b. **Maui County** – January 6th and January 20th
 - c. **Kauai County** – January 7th and January 20th
 - d. **Honolulu** – January 8th and January 22nd

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

STREET UTILITY CHECK

This is an ongoing project to correct the errors identified. A comparison of the raw CAD generated report from the Street Check Utility was performed between the Street Centerline GIS data on December 24, 2015 and January 13, 2016.

Street Utility Check				
	First Report 06/01/13	12/24/2016	1/13/2016	Improvements/Corrections
Total Number of GIS Records	26,602	29,139	29,308	Increased by 169 records
Errors Identified				
Zero Errors	5,112	373	374	Increased by 1 error
Low > High Errors	3	0	0	No Change
Mixed Parity Errors	1	0	0	No Change
Changed Parity Errors	105	0	0	No Change
Address Gap Errors	2,629	1	0	Decreased by 1 error
Address Overlap Errors	423	1	0	Decreased by 1 error
Flipped Link Errors	1,030	630	635	Increased by 5 errors
Total Errors	9,303	1,005	1,009	Increased by 0.39% (4 errors)

In addition to Akimeka’s internal validation tools, Akimeka will continue to utilize the various CAD reports to further identify and correct the multitude of discrepancies in the GIS data. This is an ongoing and routine process which Akimeka has been using to improve the accuracy of the GIS data for Public Safety.

Akimeka plans to continue its work effort to complete corrections of the discrepancies identified and/or identify any valid exceptions which Akimeka will tag with the proper information so the CAD system will accept the record(s) and not jeopardize the full functionality of the CAD system from the upload to RMS. Akimeka plans to complete all Street Utility Check errors prior to the implementation of the Motorola PremierOne CAD “go live” date.

Due to the MSAG Community and Street Sweep – Phase VII project, Akimeka expects there to be fluctuation in the results of the Street Check Utility moving forward, especially with regards to Zero Errors, Flipped Link Errors, Address Gap Errors, and Address Overlap Errors. These errors are as a direct result of the spatial corrections made on the Street Centerline network, where many new ingress segments are added. The preference is that the system can generate these non-impacting and non-critical errors instead of overriding them beforehand. The errors that are identified through this process are subsequently corrected based on the results of the Street Check.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

4. E9-1-1 DATABASE SYNCHRONIZATION

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for the Oahu Civilian PSAP in January 1, 2016.

The database synchronization effort included comparing Oahu Civilian's 9-1-1 MSAG received from the 911 Database provider, Intrado on January 1, 2016, against the PSAP's 911 GIS Street Centerline data. A total number of **7,752** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on January 1, 2016 for the Oahu Civilian PSAP are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUDIT SUMMARY RESULTS – 2016

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of April 1, 2015		As of July 1, 2015		As of October 1, 2015		As of January 1, 2016	
		9-1-1 MSAG Dated 4-01-15		9-1-1 MSAG Dated 7-01-15		9-1-1 MSAG Dated 10-01-15		9-1-1 MSAG Dated 1-01-16	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		7,541		7,597		7,749		7,752	
Less: 9-1-1 MSAG Exception Records	(1)	42	0.6%	40	0.5%	35	0.5%	30	0.4%
Net 9-1-1 MSAG Records Eligible for Comparison		7,499		7,557		7,714		7,722	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG – GIS Match – No Corrections Required)		7,475	99.7%	7,547	99.9%	7,694	99.7%	7,710	99.8%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	21	0.3%	6	0.1%	16	0.2%	11	0.1%
9-1-1 MSAG Record With No Matching GIS Record	(3)	3	0.0%	4	0.1%	4	0.1%	1	0.0%
Total 9-1-1 MSAG Records No Match		24	0.3%	10	0.1%	20	0.3%	12	0.2%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the City & County of Honolulu (Civilian PSAPs) was completed as scheduled. The match rate remained consistent from October 2015 with a 99.7% Match Rate to a 99.8% Match Rate as of January 2016

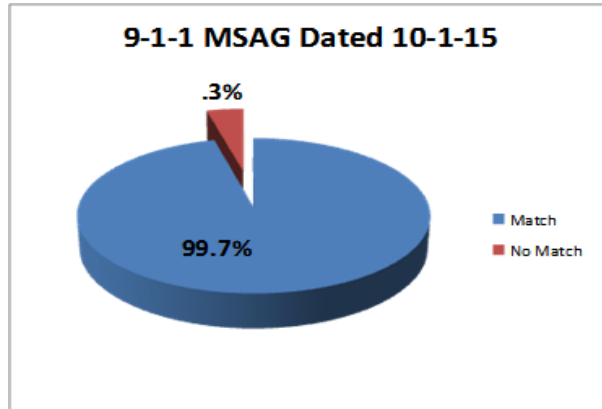

NOTES:

- An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUDIT SUMMARY RESULTS – JANUARY 1, 2016 MSAG VS. OCTOBER 1, 2015 MSAG

Oahu Civilian’s level of accuracy or 9-1-1 Match percentage remained consistent with a 99.8% as of January 1, 2016 compared to 99.7% as of October 1, 2015.

The majority of the remaining MSAG and GIS discrepancies are in the Honolulu MSAG Community.

- ❖ As agreed between HPD PMT and Akimeka, Akimeka would initially focus on the existing MSAG and GIS records to produce a match which will benefit the PSAP in the interim.
- ❖ This effort would not include the MSAG Communities project to implement the new MSAG Communities and associated GIS Street Centerlines. This would be handled as a separate project as identified and agreed to.
- ❖ As a result of the MSAG Community and Street Segment Sweep project, the majority of the remaining discrepancies resides in the Honolulu MSAG Community and will be addressed during the Phase V effort.
- ❖ The previously completed MSAG Communities as a result of the MSAG Community and Street Segment Sweep project are now considered part of ongoing maintenance.
- ❖ “MSAG - GIS Minor Corrections” decreased (16 to 11) from October 2015 to January 2016. Low and high address ranges, odd/even combines, and street suffixes were adjusted in the MSAG to correspond with the GIS record. Although identified as a minor correction, customer telephone numbers (TNs) must be validated in 9-1-1Net prior to correcting the MSAG record to ensure the correction will not result in an orphan ALI Record or TN Fall-out.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUDIT SUMMARY RESULTS – JANUARY 1, 2016 MSAG VS. OCTOBER 1, 2015 MSAG CONTIUNED

- ❖ “MSAG Record with No GIS Record” decreased (4 to 1) from October 2015 to January 2016 respectively. MSAG records with no matching record were due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within City and County Honolulu. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the April 2016 re-analysis.
- ❖ “GIS MSAG Records with No Matching E9-1-1 MSAG Record” decreased (3 to 1) from October 2015 to January 2016. Records with no matching record was due primarily to the verification of the MSAG records against the single source 9-1-1 GIS databases created by Akimeka from the multiple public safety agencies’ databases to determine if the roads exist within City & County of Honolulu and Military bases GIS records. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the April 2016 re-analysis.
- ❖ “GIS –Minor Corrections” decreased (23 to 14) from October 2015 to January 2016. Low and high address ranges, street suffixes, and MSAG Community were adjusted in the GIS database to correspond with the MSAG record. Akimeka will research the discrepancy and ensure they are processed in 9-1-1Net prior to the April 2016 re-analysis.
- ❖ A constant effort to keep the databases synchronized and maintained are required to improve the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is “last modified”.
- ❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.

All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

At the request of the Kauai County and Hawai'i County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided all State of Hawai'i PSAPs and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the Oahu Civilian data provided are as follows:

OAHU CIVILIAN	Invalid MSAG Records	
	9-1-1 MSAG Dated 01-01-16	
	Number of Records	% of Total Invalid MSAG Records
ESN 199	122	1.5%

These invalid MSAG records represent **1.5%** of the Total MSAG records for the City & County of Honolulu as of the January 1, 2016 MSAG. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 199 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Oahu Civilian E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

As part of Akimeka’s ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for the City & County of Honolulu (Oahu Civilian). As of January 1, 2016, there are **794** ALI records with an assigned ESN of 199, representing **.2%** of the City & County of Honolulu (Oahu Civilian) total ALI records.

With Akimeka’s continuing MSAG Community and Street Segment Sweep effort, the percentage of ESN 199 records may increase as low and high address ranges and new communities are verified.

The number of Ali records with an ESN 199 records decreased by **8.9%** (872 to 794) from October 2015 to January 2016 respectively. The increase was due primarily to Akimeka’s effort to identify the invalid MSAG records and verify their correct locations against current County GIS data.

Although the ESN 199 is a “valid” MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a “No Record Found” condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller’s location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 199 MSAG records to a valid City & County of Honolulu ESN 100 to ensure that all ALI records assigned to the City & County of Honolulu (Oahu Civilian) have an “MSAG valid address”.

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the total of Wireline and Wireless counts respectively.
- All VOIP (Voice over internet protocol) types of 911 calls are combined in the Call Volume statistic.

Hawaii County E9-1-1 Status Report

TEXT TO 911 – CURRENT MONTH – JANUARY 2016

NOTE:

- Hawaii County is scheduled to deploy a soft launch of Text to 911 on February 1, 2016.
- Although there is a “Text to 911” plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- In the coming months when Text to 911 is operational in Hawaii County, the chart will indicate the amount of Text to 911 messages that are received at the respective PSAPs.
- The January Text to 911 counts reflects only internal testing of Text to 911.

Definitions

- (A) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (B) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
- (C) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
- (D) **Voice over Internet Protocol Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

MSAG CURRENT MONTH NOTES:

A total of **293** MSAG transactions were processed in 9-1-1 Net during the month of January 2016. Twenty-two (**22**) requests were processed relating to the MSAG database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **282** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

262 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 299 clean-up effort. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Eight (**8**) ALI DRs were submitted as the result of 9-1-1 calls, including residences in Ocean View and a business in Kamuela. One (**1**) VoIP DR was submitted for a 911 caller in Captain Cook. Hawaii County Fire submitted these requests to Akimeka to update the customer information.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 1,924 Open TN CR Transactions as of January 29, 2016.**
- **Refer to chart in the next section “TNCR Current Status”**

1,849 Open TN CR transactions are a direct result of the ESN 299 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **75** Open TN CR transactions are a result of the Dispatchable Location project submitted in September. (Refer to the “Dispatchable Location” chart below) Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There is one (1) Open ALI-DR as of January 29, 2016**
- **There is one (1) Open VoIP DR as of January 29, 2016**

The VoIP DR was the result of 9-1-1 call from a residence in Captain Cook. Hawaii County Fire submitted the requests to Akimeka to update the customer information and provided an MSAG valid address. Akimeka submitted the VoIP DRs to the proper telco's via email and are awaiting confirmation that the addresses have been updated.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JANUARY 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
HAWAII	1,924	171	57	1696

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JANUARY 2016 – “PENDING”

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Seventy-five (75) Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted. No further developments as of January 2016.

Dispatchable Location					
Common Name Place	MSAG Address	2016	Number of TNCR* Transactions Submitted	Number of Transactions Processed**	
KINGS SHOPS	CARRY OVER	2015	75	0	
		Jan	0	0	
		Feb			
		Mar			
		Apr			
		Total		75	0

*project currently on hold by Intrado/Hawaiian Telcom.

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
1/19/2016	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places, Street Centerlines, MSAG Communities, ESN, Fire Districts, Medical Response Areas and Police Districts.
1/12/2016	MapFlex deliverable which included the following updated layers: Address Points, Cell Sectors, Cell Towers, Common Places, Street Centerlines and MSAG Communities.

ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The Address Points and Street Centerlines layer comparative analysis was completed on the updates received from the Hawai'i County Planning Department on **January 19, 2016**. Results are as follows:

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	88	
Addresses Removed	0	
Address Street Name Changes	0	
Address Street Number Changes	0	
New Street Segments Added		0
Street Segments Removed		0
Street Segment Range Changes		0
Street Segment Name Changes		0

NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

POLICE BEAT REVIEW

Beginning in late 2015 and continuing in January 2016, Akimeka has been conducting a Police Beats review process as part of an annual update and in addition, preparation for Hawaii County's CAD system deployment. During this time, the Police Beats are also reviewed with the written descriptions of the Hawaii Police Beat Boundaries, whereby corrections are made to the Police Beat GIS layer where applicable in an effort to synchronize the GIS layer with the written descriptions and provide the 911 centers in Hawaii with a more accurately defined boundary layer which align with operational jurisdictions.

1. To better service the public safety needs of Hawaii County, Akimeka compared the written descriptions of the Hawaii Police Beats as recorded in Document Number GO 204 with an effective date of June 27, 2011, and made corrections to the Police Beats GIS layer where needed. In addition, Akimeka has been documenting any recommendations for document description updates.
 - a. Akimeka reviewed the written descriptions for the Hawaii Police Beats and cross referenced it to the Police Beats GIS layer. The boundaries to all seventy-six police beats as well as the area falling within the jurisdiction of the Hawaii Volcanoes National Park were edited for greater accuracy.
 - b. Akimeka has documented all potential discrepancies between the written descriptions and GIS layer for a thorough review upon completion. Akimeka has also produced several maps to better illustrate some of the larger discrepancies.
 - c. Upon completion of the GIS editing procedures, Akimeka will participate in a Police Beat review process with the Hawaii Police Department to further refine the boundaries to the Police Beats GIS layer and the written descriptions for those boundaries. This process will finalize the synchronization between the GIS layer and the written descriptions; provide additional precision and accuracy to both the GIS layer and written descriptions; and eliminate all discrepancies so that confusion and/or misinterpretation of those boundaries do not hinder public safety needs.

CAD SYSTEM DEPLOYMENT

During the 2015 year, the Hawaii County Police Department has conducted thorough research and has decided to implement a new CAD (Computer Aided Dispatch) system. Through their selection process, they have chosen the Spillman Technologies CAD system to best fit their operational needs. Throughout the coming months there will be much coordination between the Hawaii Police Department, Hawaii IT Department, Akimeka, and Spillman Technologies to deploy the Spillman Technologies CAD system with absolute success.

1. The Hawaii Police Department, Akimeka, and Spillman Technologies have begun introductory coordination and information sharing to ensure a successful deployment of the new CAD system, which will improve dispatch efficiency.
 - a. On January 15, 2016, Spillman Technologies held a webinar and discussion on their Geobase process which HPD, Spillman Technologies, and Akimeka were in attendance. The discussion was high-level and pertaining to the GIS database and how it is integrated within the Spillman Technologies CAD architecture.
 - b. In February 2016, Spillman Technologies will be on-site at the Hawaii Police Department and hosting an official kick-off meeting and technical discussion which Akimeka will be in attendance as well. The meeting is expected to cover additional details of the CAD system, including documentation, requirements, timelines, deliverables, next steps, etc.

Hawaii County E9-1-1 Status Report

January 1, 2016 – January 31, 2016

MAPFLEX DEPLOYMENT:

During the month of January 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of January 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in January 2016
 - a. **Hawaii County** – January 12th and January 19th
 - b. **Maui County** – January 6th and January 20th
 - c. **Kauai County** – January 7th and January 20th
 - d. **Honolulu** – January 8th and January 22nd

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the Wireline and Wireless total counts respectively.
- All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.
- Outgoing 911 calls are included in the totals. These are ringback or callback 911calls made from the Viper System.

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TEXT TO 911 – CURRENT MONTH – JANUARY 2016

NOTE:

- Maui County has not yet deployed the soft launch of Text to 911 pending contract review and approval.
- Although there is a “Text to 911” plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.
- In the coming months when Text to 911 is operational in Maui County, a chart will be provided for the amount of Text to 911 messages that are received at the PSAPs.
- Text to 911 Chart reflects only internal testing of Text to 911.

Definitions

- (A) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (B) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 399/359 attached to them which indicates the need for validation.
- (C) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.
- (D) **Voice over Internet Protocol Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

MSAG CURRENT MONTH NOTES:

A total of **176** MSAG transactions were processed in 9-1-1 Net during the month of January 2016. Eight (**8**) requests were processed relating to the MSAG database changes which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS, and Military response areas, and inserting new MSAG records.

There were **173** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

167 Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 399 clean-up effort. ESN 399 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. One (**1**) VoIP DR was submitted for a 911 call that came in from Ace Hardware in Wailuku. There were no ALI DRs submitted.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 1,893 Open TN CR Transactions as of January 29, 2016.**
- **Refer to chart in the next section “TNCR Current Status”**

1,824 Open TN CR transactions are a direct result of the ESN 399 clean-up and are awaiting approval from Hawaiian Telcom, Inc. **69** Open TN CR transactions are a result of the Dispatchable Location project submitted in September. (Refer to the “Dispatchable Location” chart below) Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no ALI DRs Open as of January 29, 2016**
- **There are no VoIP DRs Open as of January 29, 2016**

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JANUARY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
MAUI	1,468	93	75	1300
MOLOKAI	425	22	19	384
TOTAL	1,893	115	94	1684

STATUS
<u>TOTAL TNCRS SUBMITTED</u> - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET. This includes the 399 and 359 clean up effort, and the "Dispatchable Location" project.
<u>PENDING STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
<u>REFERRED STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
<u>TOTAL UNOPENED TNCR RECORDS STATUS</u> - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JANUARY 2016 - PENDING

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Screen shots of the “Before” ALI screen, and the “After” ALI screen with the updated “Dispatchable Location” information visible, were presented to the Dispatch Supervisors. Akimeka received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, Akimeka was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this “Dispatchable Location” information which will reduce the response times for Public Safety. In September, the Dispatchable Location transactions have been temporarily stopped. Transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted. No further developments as of January 2016.

Dispatchable Location				
Common Name Place	MSAG Address	2016	Number of TNCR* Transactions Submitted	Number of Transactions Processed**
Queen Kaahumanu Center	Carryover from 2015	2015	368	299
		Jan	0	0
		Feb		
		Mar		
		Apr		
		Total	368	299

*project currently on hold by Intrado/Hawaiian Telcom.

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

NOTE:

- The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

- GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
1/20/2016	Prepared and delivered the following data for MapFlex: Address Points, Coastal Names, Gate Codes, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers
1/20/2016	Prepared and delivered the following data for the Intergraph CAD map: Maui Cell Coverage .csv, .str, .rte and .map which included updated Address Points, Gate Codes, Coastal Names, Street Centerlines and WSP Cell Towers
1/19/2016	Added street centerline labels in the Intergraph CAD map
1/6/2016	Delivered the following for a MapFlex update: Address Points, Points of Interest, Emergency Shelters, Schools, Subdivisions, Food and Beverage, WSP Cell Sectors and WSP Cell Towers
1/6/2016	Delivered the following data for the Intergraph CAD map: Maui Cell Coverage .csv, .str, .rte and .map which included updated Address Points, Gate Codes, Subdivisions and WSP Cell Towers

Maui County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. On January 6, 2016, the following data was prepared and delivered for an Intergraph CAD Map update:
 - a. Address Points, Gate Codes, Subdivisions and WSP Cell Towers.
 - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
2. Akimeka delivered an updated Intergraph CAD map on January 20, 2016 which included:
 - a. Address Points, Coastal Names, Gate Codes, Street Centerlines and WSP Cell Towers.
 - b. The .map, .str, .rte, CAD Map Build database and Cell Coverage.csv were also delivered.
3. Throughout January, duplicate and overlapping Street Centerline and Stream labels were removed. Street Centerline labels of new streets were added. This is an ongoing effort.

During February 2016, the Intergraph CAD map will continue to be delivered on a bi-monthly basis, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

MAPFLEX DEPLOYMENT

During the month of January 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of January 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in January 2016
 - a. **Hawaii County** – January 12th and January 19th
 - b. **Maui County** – January 6th and January 20th
 - c. **Kauai County** – January 7th and January 20th
 - d. **Honolulu** – January 8th and January 22nd

PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are not included in the total Wireline and Wireless counts respectively.
- All VoIP (Voice over Internet Protocol) type of 911 calls is combined in the Call Volume statistic.
- *911 Calls with no Ali 0.23% - Statewide average = 0.18% Year 2015

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TEXT TO 911 – CURRENT MONTH – JANUARY 2016

NOTE:

- Kauai County has deployed a soft launch for Text to 911 on December 21, 2015.
- During this soft launch period, internal testing and training will be conducted.
- Although there is a “Text to 911” plot on the MapFlex, the location of the plot is not reliable. Text to 911 Dispatchers should use their skills to ascertain the exact location of the emergency response.

Definitions

(A) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.

(B) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 499 attached to them which indicates the need for validation.

(C) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline. These record corrections are treated with a higher priority and should be processed within 48 hours as a general guideline.

(D) **Voice over Internet Protocol Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a VoIP phone. These record corrections are treated with a higher priority and should be processed within 72 hours as a general guideline per Time Warner Operations Center. MSR tracking effective April 2014.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

MSAG CURRENT MONTH NOTES:

A total of Fourteen (14) MSAG transactions were processed in 9-1-1 Net during the month of January 2016. The fourteen (14) requests were processed relating to the MSAG database, which include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were 70 customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

All Kauai Telephone Number Change Requests (TN CR) transactions have been processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 499 clean-up effort. ESN 499 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record. Akimeka is awaiting feedback from Intrado on the TN CRs that have been submitted for correction. In January 2016, there were 37 TN CRs completed and as a result, five (5) ESN 499 street records were deleted from the MSAG database.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are 198 Open TN CR Transactions as of January 29, 2016.**
- **Refer to chart in the next section “TNCR Current Status”**

136 Open TN CR transactions are a direct result of the ESN 499 clean-up and are awaiting approval from Hawaiian Telcom, Inc. 62 Open TN CR transactions are a result of the Dispatchable Location project submitted in September (refer to the “Dispatchable Location” chart below). Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no Open ALI-DRs as of January 29, 2016**
- **There are no Open VoIP DRs as of January 29, 2016**

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JANUARY, 2016

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
PSAP	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
KAUAI	198	33	53	112

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

DISPATCHABLE LOCATION – STATUS AS OF – JANUARY 2016 - PENDING

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kukui Grove Center at 302600 Kaumualii Hwy, Lihue**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the Intrado 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Sixty two (62) Telephone Number Change Requests (TN CR) transactions were processed as a result of the Dispatchable Location Project. These transactions have not been updated in 9-1-1 Net pending research by Hawaiian Tel and Intrado for providing an additional 60 character field in the ALI data stream to accommodate Dispatchable Location information as an alternative to using the “Driving Directions” field. Until this field is created, no further Dispatchable Location transactions will be submitted. During the months of November, December, and January as Akimeka awaits for the notice to proceed, Akimeka has continued to research and prepare “Driving Instructions” for other shopping malls that will assist the Kauai Dispatchers with their 911 calls for service. A total of 493 telephone records are complete and ready for submittal, however there were no further developments as of January 2016 to proceed.

Dispatchable Location					
Common Name Place	MSAG Address	2016	Number of TNCR* Transactions Prepared	Number of TNCR* Transactions Submitted	Number of Transactions Processed**
	2015 Carryover	2015	286	62	0
Ching Young Shopping Center	505190 Kuhio Hwy, Hanalei	Jan	84		
Eleele Shopping Center	4469 Waialo Rd, Port Allen		77		
Hanalei Center	505161 Kuhio Hwy, Hanalei		46		
		Feb			
		Mar			
		Apr			
		Total	493	0	0

*project currently on hold by Intrado/Hawaiian Telcom.

Definition
Dispatchable Location is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party.
TNCR* Telephone Number Change Request - Transactions submitted to Intrado to update/edit Dispatchable Location in the Exact field on the ALI Screen.
Processed** may include inactive telephone numbers that were removed from the ALI Database.

NOTE:

- **The Parcels layer is provided by Kauai County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.**

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
1/20/2016	Prepared Address Points, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for a MapFlex delivery
1/20/2016	Prepared Address Points, Street Centerlines, WSP Cell Sectors and WSP Cell Towers for a GeoComm delivery
1/7/2016	Prepared and delivered the following for a GeoComm update: Street Centerlines, Points of Interest, WSP Cell Sectors, WSP Cell Towers, GEO.xml and Landmark.xml
1/7/2016	Prepared and delivered the following for a MapFlex update: Address Points, Street Centerlines, Points of Interest, WSP Cell Sectors and WSP Cell Towers

GPS DATA COLLECTION AND SITE VERIFICATION

During the month of January 2016, there were no scheduled GPS data collection and site verifications required. Data capture will continue to be coordinated on an as needed basis.

MAPFLEX DEPLOYMENT:

During the month of January 2016, the MapFlex system performed without any issues and deliverables continued on schedule.

Considering that the MapFlex initiative being provided by Hawaiian Telecom and sub-contractor, Intrado, was implemented across the State of Hawaii, in the below narrative there is some information pertaining to all of the Hawaiian Islands. For a record of historical information regarding the MapFlex system, please see MSRs during the 2015 year.

During the month of January 2016, there were continued GIS deliverables into the MapFlex system for Hawaii County, Maui County, Kauai County, and Honolulu Civilian PSAPs. The MapFlex deployment has been concluded and is now considered a running system capable of receiving updates regularly.

1. Akimeka delivered GIS data to the MapFlex system on the following dates in January 2016
 - a. **Hawaii County** – January 12th and January 19th
 - b. **Maui County** – January 6th and January 20th
 - c. **Kauai County** – January 7th and January 20th
 - d. **Honolulu** – January 8th and January 22nd

Note:	* The 2015 Carryover row indicated the number of Service Requests that were opened in 2015 and brought forward into 2016 in an effort to track the service request until completion. Detailed information on service tickets are available upon request.
--------------	--

Definitions:	Category	Description
	Wireline	Telephone Number (ALI) Discrepancies from land line phones that have been submitted to Intrado via 9-1-1 Net for correction.
	Wireless	Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database.
	VoIP	Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCBL) for correction

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

5. E9-1-1 DATABASE SYNCHRONIZATION

(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)

As part of Akimeka's value added services, Akimeka conducted a database synchronization audit for Kauai County in January 2016.

The database synchronization effort included comparing Kauai County's 9-1-1 MSAG received from the 911 Database provider, Intrado on January 1, 2016, against its 9-1-1 GIS Street Centerline data. A total number of **1,300** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on January 1, 2016 for Kauai County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never yield a 100 percent match rate. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUDIT SUMMARY RESULTS – 2016

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of April 1 , 2015		As of July 1 , 2015		As of October 1 , 2015		As of January 1 , 2016	
		9-1-1 MSAG Dated 4-01-15		9-1-1 MSAG Dated 7-01-15		9-1-1 MSAG Dated 10-01-15		9-1-1 MSAG Dated 1-01-15	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		1,280		1,290		1,297		1,300	
Less: 9-1-1 MSAG Exception Records	(1)	64	5.0%	67	5.2%	66	5.1%	72	5.5%
Net 9-1-1 MSAG Records Eligible for Comparison		1,216		1,223		1,231		1,228	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		1,214	99.8%	1,223	100.0%	1,231	100.0%	1,223	99.6%
9-1-1 MSAG -- GIS No Match - Minor Correction Required	(2)	2	0.2%	0	0.0%	0	0.0%	5	0.4%
9-1-1 MSAG Record With No GIS Record	(3)	0	0.0%	0	0.0%	0	0.0%	0	0.0%
Total 9-1-1 MSAG Records No Match		2	0.2%	0	0.0%	0	0.0%	5	0.4%

Objective: NENA Recommended Match Rate = 98%

The two-way (MSAG – GIS) database synchronization audit for the Kauai County was completed as scheduled. The match rate remained consistent from October 2015 with a 100% Match Rate to a 99.6% Match Rate as of January 2016.

NOTES:

- An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUDIT SUMMARY RESULTS – JANUARY 1, 2016 MSAG VS. OCTOBER 1, 2015 MSAG

Kauai County level of accuracy or 9-1-1 Match percentage remained consistent with a 99.8% as of January 1, 2016 compared to 100% as of October 1, 2015

The NENA recommended minimum match rate of 98% has been met consistently in 2013 and continues in 2016.

- ❖ Akimeka continues to work with Kauai County GIS and Planning departments to validate streets and communities.
- ❖ In achieving and exceeding the NENA minimum match rate of 98% for data accuracy, Kauai County is ready for Next Generation 9-1-1 (NG9-1-1) from a database perspective.
- ❖ A constant effort to keep the databases synchronized and maintained are required to ensure the level of accuracy of the E9-1-1 databases each time an MSAG or GIS record is “last modified”.
- ❖ “MSAG record that doesn’t match the GIS” remained consistent at **100%** (0 to 0) records that don’t match the GIS. This is a result in which MSAG records submitted in 9-1-1 Net were not completed prior to the end of the month.
- ❖ “MSAG record with missing GIS record” reminded consistent with zero (0) records falling under section.
- ❖ “MSAG Records Corrections Required” There is five (5) minor MSAG corrections identified. MSAG records have been combined, split, and high/low ranges have been changed, to match the Street Centerlines, and will be reflected in the April 2016 re-analysis.
- ❖ Accurate location and GIS information will ensure proper dispatching and response in a timely manner for all Public Safety agencies.
- ❖ All the hard work to maintain and synchronize the E9-1-1 databases is validated when a life and/or property is saved.
- ❖ Coordinating the clean-up of the ALI discrepancy records associated with an assigned ESN of 499 with the respective Service Providers is needed to ensure all records are MSAG valid.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

At the request of the Kauai County Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Kauai County and Akimeka, as the PSAP’s agent, with access and visibility to the ESN x99 MSAG records which are “known” invalid streets and address ranges. Akimeka will be investigating and reporting on these ESN x99 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

Results of the data provided are as follows:

KAUAI	Invalid MSAG Records	
	9-1-1 MSAG Dated 1-01-16	
	Number of Records	% of Total Invalid MSAG Records
ESN 499	43	3.2%

These invalid MSAG records represent **3.2%** of the Total MSAG records for Kauai County as of the January 1, 2016 MSAG as compared to **3.4%** as of the October 1, 2015 MSAG. The individual ALI records associated with these records are provided below.

The decrease in the number of invalid MSAG records is a result of Akimeka’s research and validation of telephone numbers (TNs) assigned an invalid MSAG address. In order for a TN to be corrected, Akimeka submits the update to the Service Provider via Intrado for approval.

Kauai County E9-1-1 Status Report

January 1, 2016 - January 31, 2016

AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

As part of Akimeka’s ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancies by community in 9-1-1Net for Kauai County. As of January 28, 2016, there are **141** ESN 499 ALI records, representing **0.6%** of Kauai County’s Total ALI records. The number of ESN 499 ALI records was further reduced by **22%** (181 to 141) from October 28, 2015 to January 28, 2016 respectively.

Although the ESN 499 is a “valid” MSAG utilized for overflow addressing, the voice portion of the 9-1-1 call will still be routed to the PSAP. However, the address information will present an invalid address/location to the dispatcher or a “No Record Found” condition which may affect the processing of the 9-1-1 response and/or cause confusion or delay during the dispatch of 9-1-1 resources to the caller’s location.

The goal, which requires the cooperation among all service providers, is to clean-up all ESN 499 MSAG records to a valid Kauai County ESN 400 – 448 to ensure that all ALI records assigned to the County of Kauai have an “MSAG valid address”.
