PSAP OPERATION NOTES:

- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Abandoned Calls are not included in the % of Total Calls.**
- **All VoIP (Voice over Internet Protocol) types of 911 calls are combined in the Call Volume statistic.**

WIRELESS PSAP TESTING – JUNE 2019

HAWAII COUNTY - JUNE 2019						
Date	**WSP**	**Sites Tested**	**Sectors Tested**	**Tested By:**	**Test Pass/Fail**	**Comments:**

NOTES:

- There were no (0) scheduled Wireless 911 Tests for the month of June 2019.
- Verizon Wireless has completed migrating their Wireless network database from West to ComTech.
- During the 4th quarter of 2018, there was an increasing amount of "MOBL" class of service type of 911 calls delivered to the State of Hawaii PSAPs. On January 15th, 2019, West completed the position source mapping for ComTech which appears to have resolved this issue.

Definitions

(A) **D**ispatchable **L**ocation - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.
(B) **M**aster **S**treet **A**ddress **G**uide - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
(C) **T**elephone **N**umber **C**hange **R**equest - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
(D) **A**utomatic **L**ocation **I**nformation **D**iscrepancy **R**ecord - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

MSAG CURRENT MONTH NOTES:

A total of **129** MSAG transactions were processed in 9-1-1 Net during the current month. Thirteen (**13**) requests were processed relating to the MSAG database. Changes include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **87** customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

Two **(2)** Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 299 clean-up effort. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

One (**1**) ALI DRs were submitted as the result of 9-1-1 call from a resident in Kealakekua.

Akimeka submitted one hundred thirteen (**113**) TN CRs related to the Dispatchable Location Project during the current month.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 318 Open TN CR Transactions.**
- **Refer to chart in the next section "TNCR Current Status"**

318 Open TN CR transactions are a direct result of the dispatchable location project and are awaiting approval from Hawaiian Telcom, Inc. Once a telephone number is submitted to West for correction, it is verified against HT records and/or by the customer. West's internal process requires calling each telephone customer individually for verification to update an address in the 9-1-1 database.

- **There are currently no Open ALI-DRs as June 30, 2019**
- **There are currently no Open VoIP DRs as June 30, 2019**

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JUNE 2019

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)

County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES	OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES	TOTAL UNOPENED TNCR RECORDS
HAWAII	318	120	61	137

STATUS
TOTAL TNCRs SUBMITTED - The total number of TNCR requests for modification that have been submitted in 9-1-1
PENDING STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
REFERRED STATUS - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
TOTAL UNOPENED TNCR RECORDS STATUS - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

DISPATCHABLE LOCATION – STATUS AS OF – JUNE 2019

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a "State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9" presentation. Based on the 9-1-1 Board's confirmation to add the "Dispatchable Location" information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The "Dispatchable Location" data is entered into the "Driving Directions" field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the "Exact" field should a 911 call be received from that telephone number. There are a total of 4,893 Dispatchable Locations processed to date. There were 113 Dispatchable locations submitted and 268 were processed in June 2019.

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

SPECTRUM (CHARTER) 9-1-1 VOIP DATABASE VERIFICATION PROJECT - JUNE 2019

Akimeka received the Automatic Location Identification (ALI) records from Spectrum (formally known as Charter Communications) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka is researching and verifying the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there are invalid MSAG addresses utilized by the VoIP Provider. These records are being identified, and will be sent back to Spectrum for corrective action.

*Spectrum (Charter) 9-1-1 VoIP Database Verification Project					
PSAP	**TOTAL RECORDS SUBMITTED BY SPECTRUM (A)**	**TOTAL RECORDS MATCHING & VERIFIED WITH 911 DATABASES (B)**	**TOTAL RECORDS NOT MATCHING**	**NON MATCHING RECORDS CORRECTED BY AKIMEKA (C)**	**PERCENT COMPLETED**

**** Akimeka provided VoIP Records with Latitude/Longitude coordinates**

(A)	VoIP Database records submitted by Spectrum to Akimeka for research and MSAG address validation.
(B)	Akimeka has researched and verified the VoIP record against an MSAG valid address and GIS data. Akimeka is tracking corrections needed to be performed by Spectrum. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verifcation Process Completed.

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

BANDWIDTH 9-1-1 VOIP DATABASE VERIFICATION PROJECT – JUNE 2019

Akimeka received the Automatic Location Identification (ALI) records from Bandwidth which is a Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka researched and verified the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there were invalid MSAG addresses utilized by the VoIP Provider. These records were identified, and sent back to Bandwidth for corrective action.

Akimeka will update the chart below as we receive updated ALI records from Bandwidth.

***Bandwidth**
9-1-1 VoIP Database Verification Project **(Updated)

PSAP	TOTAL RECORDS SUBMITTED BY BANDWIDTH (A)	TOTAL NEW RECORDS VERIFIED WITH 911 DATABASES (B)	TOTAL RECORDS NOT MATCHING	NON MATCHING RECORDS CORRECTED BY AKIMEKA (C)	PERCENT COMPLETED

		Corrected spatial for seven (7) records in Hawi
		Corrected spatial for thirteen (13) records in Volcano
		Corrected spatial for one (1) record in Pahoa
		Corrected spatial for twenty-two (22) records in Paauilo
		Corrected spatial for two (2) records in Holualoa
		Updated address for one (1) record in Ocean View
		Corrected TMK for three (3) records in Pahoa
		Added alias for one (1) record in Hilo
		Corrected TMK and updated routingID for one (1) record in Kailua Kona
		Corrected spatial for eight (8) records in Kailua Kona
		Corrected TMK for one (1) record in Paauilo
		Corrected spatial and corrected TMK for one (1) record in Papaikou
		Corrected spatial for ten (10) records in Kapaau
		Updated routingID for six (6) records in Kailua Kona
		Verified address for one (1) record in Kailua Kona
		Corrected spatial and corrected TMK for three (3) records in Paauilo
		Corrected spatial for one (1) record in Captain Cook
		Verified address for one (1) record in Honokaa
		Corrected spatial for ten (10) records in Mountain View
		Verified address for one (1) record in Papaikou
		Corrected spatial for three (3) records in Papaikou
		Corrected spatial for thirteen (13) records in Keauhou
		Added address for one (1) record in Keaau
		Corrected spatial for three (3) records in Naalehu
		Updated routignID for one (1) record in Kailua Kona
		Corrected TMK, added alias for two (2) records in Hilo
		Corrected spatial for twenty-six (26) records in Hilo
		Added address for one (1) record in Captain Cook
	6/4/2019 To 6/17/2019	**Delivered 6/18/2019**
		Corrected spatial for nineteen (19) records in Hawi
		Added address for one (1) record in Honokaa

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

MAPPING LAYERS UPDATED (PART II)

9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and NG9-1-1 systems.

HAWAII COUNTY		
Type of Layer	**Akimeka GIS Server Date Created/ Edits Performed**	**GIS Delivery Dates/Remarks**
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Address Points	**6/4/2019 To 6/17/2019**	Added address for thirteen (13) records in Naalehu
		Added address for thirteen (13) records in Pahoa
		Added address for two (2) records in Kapaau
		Corrected spatial for six (6) records in Holualoa
		Updated routingID and TMK for one (1) record in Holualoa
		Corrected spatial for four (4) records in Waikoloa
		Updated street name for nine (9) records in Pahoa
		Updated address for five (5) records in Captain Cook
		Added address for nine (9) records in Volcano
		Added address for one (1) record in Holualoa
		Corrected spatial for fifteen (15) records in Kailua Kona
		Corrected TMK for one (1) record in Hawi
		Updated routingID for one (1) record in Hilo
		Corrected spatial for eight (8) records in Kapaau
		Updated routingID for nine (9) records in Kailua Kona
		Added address for fourteen (14) records in Ocean View
		Added address for five (5) records in Hilo
		Added address for one (1) record in Kealakekua
		Added address for two (2) records in Hawi
		Added address for six (6) records in Kailua Kona
		Corrected spatial for one (1) record in Mountain View
		Added address for four (4) records in Captain Cook
		Corrected spatial for nine (9) records in Kamuela
		Added address for two (2) records in Hakalau
		Corrected spatial for two (2) records in Keauhou
		Added address for twenty-one (21) records in Keaau
		Added address for twelve (12) records in Mountain View
		Added address for one (1) record in Waikoloa
		Added address for three (3) records in Kamuela
		Added address for two (2) records in Paauilo
		Corrected spatial for five (5) records in Hilo
		Added address for twenty-one (21) records in Kurtistown

		Added twenty-seven (27) towers per Sprint audit
		Added three (3) towers per AT&T audit
		Updated ninety-three (93) towers per AT&T audit

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
6/4/2019	Delivered Address Points, Cell Sectors, Cell Towers, Points of Interest, Street Centerlines, ESN, and Common Places for Hawaii County Mapflex.
6/4/2019	Delivered Address Points, City, Common Names Alt Table, Display Streets, Fire EMS Zone, First In, Points of Interest, POI Alt Names, Police Zones, Street Centerlines, Street Alt Names, Street Routes for Hawaii County Spillman.
6/18/2019	Delivered Address Points, Cell Sectors, Cell Towers, Points of Interest, Street Centerlines, ESN, and Common Places for Hawaii County Mapflex
6/18/2019	Delivered Address Points, City, Common Names Alt Table, Display Streets, Fire EMS Zone, First In, Points of Interest, POI Alt Names, Police Zones, Street Centerlines, Street Alt Names, Street Routes for Hawaii County Spillman.

LAVA FLOW AND ALTERNATE ROUTES

Historical events are archived in the 2018 Monthly Status Reports.

Akimeka will resume to deliver updates should the event start up again.

FIRE DEPARTMENT IMT (INCIDENT MANAGEMENT TEAM) MAP

Historical events are archived in the 2018 Monthly Status Reports.

Akimeka will update these GIS layers upon request by the Hilo Fire Department.

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The new Address Points and Street Centerlines geodatabase comparative analysis was received from the Hawai'i County Planning Department on **June 19, 2019**. A new compare process was developed by Akimeka to perform this analysis.

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	137	
Addresses Removed	0	
Address Street Name Changes	8	
Address Street Number Changes	1	
New Street Segments Added		4
Street Segments Removed		0
Street Segment Range Changes		4
Street Segment Name Changes		1

NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

CAD SYSTEM DEPLOYMENT

On September 18th, 2018, the Hawaii Police and Fire Department went live on the new Spillman CAD and mapping systems. There have been no major GIS data configuration changes requested. Historical events are archived in the 2018 Monthly Status Reports.

MAPFLEX SYSTEM

Akimeka delivered GIS data to the MapFlex system on the following dates in June 2019

Hawaii County – June 4th, 2019 and June 18th, 2019
Maui County – June 5th, 2019 and June 19th, 2019
Kauai County – June 6th, 2019, and June 20th, 2019
Honolulu – June 7th, 2019, and June 21st, 2019

Hawaii County E9-1-1 Status Report

June 1, 2019 – June 30, 2019

MAPFLEX ISSUES

Below is a detailed list of issues regarding the MapFlex systems throughout the State of Hawaii.

DATE	ISSUE	DESCRIPTION	STATUS
8/2016	Wireless Addresses	MapFlex system began displaying wireless information incorrectly. MapFlex system is doing a reverse query for additional information in the GIS and this is overriding the ALI information with the closest address in the GIS.	Partially Resolved (Nov 2016) The overriding ALI with updated Lat/Longs from the GIS is still occurring
11/2016	Phase I Display	Wireless Phase I calls plotting at centroid of coverage area and landing in the ocean. After installation of new MapFlex version to correct other issues, the configurations for Wireless Phase I were not set up properly by West, in which the mapping did not point to the correct information in MapFlex.	Partially Resolved (Dec 2016) According to PSAPs, it's not fully resolved. The icon of the tower still doesn't plot for Phase I.
11/2016	Wireless Confidence	Sprint calls coming across with unusually high confidence. Coordination is taking place with Sprint and West. West provides the PDE services for Sprint.	Pending
3/22/2017	ArcGIS Address Locator	The locators in MapFlex have a configurations which does not include ESNs. A reported issue has occurred with the Sheraton in Waikiki. The address locator does not differentiate between the Sheraton hotel and the surf break and plots on the surf break. The bigger issue is that this same issue will occur with complexes that have same primary address.	Pending A new SP 5.4 update by West is aimed to correct this issue.
5/17/2017	VoIP Calls Plotting Incorrectly	Recognized in late April and early May 2017, the PSAPs have been receiving several VoIP calls which are plotting in the incorrect locations. After further research it was determined that it is because MapFlex is configured to plot the received Lat/Long. The problem is that these are not always maintained properly and that ideally the system should first choose to match with the GIS data based on the provided address. During the September 20, 2017 PSAP conference call, HT relayed there was confirmation that the Time Warner records were in fact passing through the West FMCC.	Partially Resolved – the Lat/Longs are no longer being plotted in MapFlex due to a software release.
5/17/2017	Landline Calls Producing X/Y on calls	It was determined that for normal landline calls, the X/Y coordinates are being sent. The PSAPs have asked where these are being generated and why would they be sent for landline calls.	West is looking into this (May - June 2017)
5/23/2018	Phase I & Phase II coverage area	Phase I calls received at the Kihei Maui PSAP are displaying a circular circumference area rather than a cone shaped directional coverage. Phase II calls are not plotting the COF meters correctly.	Pending
5/24/2018	Incorrect Addresses	MapFlex system began displaying incorrect addresses in the bubble display when an Address Point is right mouse clicked to see information by the PSAPs. However, the address in the data is still correct as shown on the left hand side.	Pending

6/27/2018	Moving Labels	It was brought up during the PSAP teleconference with Hawaiian Tel and West that the Hawaii Fire Department submitted a trouble ticket regarding the parcel labels. When the base map is checked on for viewing the owner's names on the parcel layer, the names of some of the parcels will follow and leave their parcel as the map is panned following streets. This problem was also recreated at the Hawaii Police Department.	Pending

Note:	* The 2018 Carryover row indicated the number of Service Requests that were opened in 2018 and brought forward into 2019 in an effort to track the service request until completion. Detailed information on service tickets are available upon request.

	Category	Description
Definitions:	**Wireline**	Telephone Number (ALI) Discrepancies from land line phones that have been submitted to West Safety Services via 9-1-1 Net for correction.
	Wireless	Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database.
	VoIP	Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCBL) or other VoIP providers for correction

5. E9-1-1 DATABASE SYNCHRONIZATION
