PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are included in the Wireline and Wireless total counts respectively.
- All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.
- Outgoing 911 calls are included in the totals. These are ringback or callback 911 calls made from the Viper System.

WIRELESS PSAP TESTING – JULY 2019

MAUI COUNTY - JULY 2019						
Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail	Comments:

NOTES:

- There were no (0) scheduled Wireless 911 tests conducted in July 2019 for the Maui and Molokai PSAPs.
- Verizon Wireless has completed migrating their Wireless network database from West to ComTech.
- During the 4th quarter of 2018, there was an increasing amount of “MOBL” class of service type of 911 calls delivered to the State of Hawaii PSAPs. On January 15th, 2019, West completed the position source mapping for ComTech which appears to have resolved this issue.

Definitions

- (A) **Dispatchable Location** - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.
- (B) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (C) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 399 attached to them which indicates the need for validation.
- (D) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MSAG CURRENT MONTH NOTES:

A total of **184** MSAG transactions were processed in 9-1-1 Net during the current month. Seven (7) requests were processed relating to the MSAG database. Changes include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS, and inserting new MSAG records.

39 customer ANI/ALI (telephone number/address) records updated as a direct result.

TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

One (9) Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 399 clean-up effort. ESN 399 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

Two (2) ALI DRs were submitted as the result of 9-1-1 call from a resident in Kula.

Akimeka processed one hundred nineteen (**166**) TN CRs related to the Dispatchable Location Project during the current month.

OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 34 Open TN CRs.**

34 Open TN CR transactions are a result of the Dispatchable Location project. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to West for correction, it must be verified against HT records and/or approved by the customer. West's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no open VoIP DRs as of July 31, 2019**
- **There are no open ALI DRs as of July 31, 2019**

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – JULY, 2019

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by West Safety Services for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY WEST SAFETY SERVICES	OPENED TNCRS REFERRED TO TELCO BY WEST SAFETY SERVICES	TOTAL UNOPENED TNCR RECORDS
MAUI	34	5	29	0
MOLOKAI	0	0	0	0
TOTAL	34	5	29	0

STATUS
<u>TOTAL TNCRs SUBMITTED</u> - The total number of TNCR requests for modification that have been submitted in 9-1-1
<u>PENDING STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
<u>REFERRED STATUS</u> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The West Safety Services Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
<u>TOTAL UNOPENED TNCR RECORDS STATUS</u> - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

DISPATCHABLE LOCATION – STATUS AS OF – JULY 2019

NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The “Dispatchable Location” data is entered into the “Driving Directions” field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Screen shots of the “Before” ALI screen, and the “After” ALI screen with the updated “Dispatchable Location” information visible, were presented to the Dispatch Supervisors. Akimeka received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, Akimeka was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this “Dispatchable Location” information which will reduce the response times for Public Safety. There were 166 Dispatchable Locations submitted in July 2019 and 309 were processed by West.

Dispatchable Location			
2019	Common Name Place MSAG Address	TNCR*	Transactions
Quarter 3		Transactions Submitted	Processed**
Quarter 2 Carryover		3,435	3,119
July	Piilani Village, Piikea Ave, Kihei	0	24

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

SPECTRUM (CHARTER) 9-1-1 VOIP DATABASE VERIFICATION PROJECT – JULY 2019

Akimeka received the Automatic Location Identification (ALI) records from Spectrum (formally known as Charter Communications) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka is researching and verifying the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there are invalid MSAG addresses utilized by the VoIP Provider. These records are being identified, and will be sent back to Spectrum for corrective action.

*Spectrum (Charter) 9-1-1 VoIP Database Verification Project					
PSAP	TOTAL RECORDS SUBMITTED BY SPECTRUM (A)	TOTAL RECORDS MATCHING & VERIFIED WITH 911 DATABASES (B)	TOTAL RECORDS NOT MATCHING	NON MATCHING RECORDS CORRECTED BY AKIMEKA (C)	PERCENT COMPLETED
HAWAII County	22,044	21,638 (98%)	406	406	100.00%
KAUAI County	8,936	8,695 (97%)	241	241	100.00%
MAUI County	18,256	17,517 (96%)	739	739	100.00%
OAHU Civilian	87,414	85,329 (98%)	2,085	2,085	100.00%
OAHU Military	3,663	710 (19%)	2,953	2,953	100.00%
TOTAL	140,313	**133,889	6,424	6,424	100.00%

* Spectrum VoIP Database received on June 21st, 2017

** Akimeka provided VoIP Records with Latitude/Longitude coordinates

(A)	VoIP Database records submitted by Spectrum to Akimeka for research and MSAG address validation.
(B)	Akimeka has researched and verified the VoIP record against an MSAG valid address and GIS data. Akimeka is tracking corrections needed to be performed by Spectrum. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verification Process Completed.

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

BANDWIDTH 9-1-1 VOIP DATABASE VERIFICATION PROJECT – JULY 2019

Akimeka received the Automatic Location Identification (ALI) records from Bandwidth which is a Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka researched and verified the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there were invalid MSAG addresses utilized by the VoIP Provider. These records were identified, and sent back to Bandwidth for corrective action.

Akimeka will update the chart below as we receive updated ALI records from Bandwidth.

*Bandwidth 9-1-1 VoIP Database Verification Project **(Updated)					
PSAP	TOTAL RECORDS SUBMITTED BY BANDWIDTH (A)	TOTAL NEW RECORDS VERIFIED WITH 911 DATABASES (B)	TOTAL RECORDS NOT MATCHING	NON MATCHING RECORDS CORRECTED BY AKIMEKA (C)	PERCENT COMPLETED
HAWAII County	545	85	0	0	100.00%
KAUAI County	306	41	0	0	100.00%
MAUI County	914	222	1	1	100.00%
OAHU Civilian	4,065	888	1	1	100.00%
OAHU Military	56	7	0	0	100.00%
TOTAL	5,886	1,243	2	2	100.00%

*Bandwidth VoIP Database received on April 5th, 2018

**Updated Bandwidth VoIP Database received on September 6th, 2018

(A)	VoIP Database records submitted by Bandwidth to Akimeka for research and MSAG address validation.
(B)	Akimeka has researched and verified the VoIP record against an MSAG valid address and GIS data. Akimeka is tracking corrections needed to be performed by Bandwidth. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verification Process Completed.

3. GEOGRAPHIC INFORMATION SYSTEM (GIS) – JULY 2019

MAPPING LAYERS UPDATED (PART I)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

MAUI COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Address Points	7/17/19 To 7/31/19	Delivered 7/31/2019
		Added address for seven (7) records in Lahaina
		Updated location name for one (1) record in Paia
		Added location name for one (1) record in Paia
		Verified address for four (4) records in Haiku
		Added address for one (1) record in Kahului
		Added location name for one (1) record in Kihei
		Updated location name for one (1) record in Kihei
		Updated location name for one (1) record in Kihei
		Removed location name for six (6) records in Kahului
		Spatially corrected one (1) record in Kihei
		Spatially corrected, updated location name for one (1) record in Lahaina
		Spatially corrected one (1) record in Lahaina
		Verified address for three (3) records in Kaunakakai
		Updated location name for one (1) record in Kula
		Added address for one (1) record in Haiku
		Updated location name for one (1) record in Makawao
		Updated location name for one (1) record in Wailuku
		Added location name for two (2) records in Kaunakakai
		Added TMK for one (1) record in Hana
		Spatially corrected one (1) record in Kaanapali
		Added location name for one (1) record in Waihee
		Added location name for two (2) records in Pukalani
		Spatially corrected, added location name for one (1) record in Makawao
		Added address for three (3) records in Haiku
		Added address for one (1) record in Haliimaile
		Removed location name for six (6) records in Kahului
		Added location name for one (1) record in Kualapuu
		Updated location name for one (1) record in Lanai
		Spatially corrected, updated location name for one (1) record in Waiehu
		Added location name for one (1) record in Wailuku
		Added POI address for one (1) record in Maunaloa

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MAPPING LAYERS UPDATED (PART II)

Updated address for one (1) record in Kapalua		

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MAPPING LAYERS UPDATED (PART XI)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

MAUI COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Points of Interest	7/17/19 To 7/31/19	Spatially corrected, updated address for one (1) record in Wailea
		Verified address for two (2) records in Wailea
		Updated POI name for one (1) record in Maunaloa
		Spatially corrected, updated POI name for one (1) record in Kahului
		Updated POI name for one (1) record in Kahului
		Added street name for one (1) record in Kula
		Updated POI name for two (2) records in Kihei
		Added POI for one (1) record in Waiehu
		Added hn for one (1) record in Paia
		Added POI for two (2) records in Kapalua
		Updated name for two (2) records in Kahului
		Added new POI for two (2) records in Hana
		Added POI for eight (8) records in Lahaina
		Added new subdivision, still vacant for one (1) record in Wailea
		Spatially corrected two (2) records in Haiku
		Changed alias two (2) records in Paia
		Updated name for one (1) record in Kihei
		Spatially corrected, updated POI name for two (2) records in Wailuku
		Added address, spatially corrected one (1) record in Kaunakakai
		Updated POI name for one (1) record in Lanai
		Spatially corrected, added ph # for one (1) record in Kahului
		Updated POI name for four (4) records in Lahaina
		Corrected POI name for one (1) record in Kahului
		Spatially corrected eleven (11) records in Lahaina
		Spatially corrected two (2) records in Wailuku
		Verified address for two (2) records in Kaanapali
		Added address for one (1) record in Kapalua
		Spatially corrected two (2) records in Kaunakakai
		Verified address for four (4) records in Lanai
		Added POI for two (2) records in Waihee
		Added POI for one (1) record in Hoolehua
		Verified address for two (2) records in Paia
Added POI for twelve (12) records in Wailea		

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MAPPING LAYERS UPDATED (PART XII)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

MAUI COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Points of Interest	7/17/19 To 7/31/19	Added address info for one (1) record in Lahaina
		Added one (1) record in Maalaea
		Added POI for three (3) records in Maalaea
		Added address for one (1) record in Wailuku
		Verified address for one (1) record in Waihee
		Updated location name for one (1) record in Wailuku
		Spatially corrected thirteen (13) records in Kaanapali
		Spatially corrected one (1) record in Paia
		Updated POI name for one (1) record in Kaanapali
		Spatially corrected, updated address for two (2) records in Kaanapali
		Corrected business spelling for one (1) record in Kahului
		Added address for two (2) records in Kihei
		Added POI for one (1) record in Kualapuu
		Added POI for three (3) records in Napili
		Corrected address for one (1) record in Kaanapali
		Updated name, updated address for one (1) record in Kapalua
		Updated full address for one (1) record in Kapalua
		Spatially corrected, updated address for one (1) record in Lahaina
		Verified address for three (3) records in Hoolehua
		Verified address for three (3) records in Kaunakakai
		Added one (1) record in Hana
		Added POI for twelve (12) records in Kihei
		Verified address for two (2) records in Haiku
		Spatially corrected, updated name for one (1) record in Wailea
		Updated POI name for two (2) records in Haiku
		Verified address for one (1) record in Kula
		Spatially corrected ten (10) records in Wailea
		Updated name for one (1) record in Wailea
		Updated address for one (1) record in Pukalani
		Updated address for one (1) record in Kapalua
		Corrected full address for two (2) records in Kihei
		Spatially corrected one (1) record in Kaanapali
		Spatially corrected thirteen (13) records in Kahului

Maui County E9-1-1 Status Report

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MAPPING LAYERS UPDATED (PART XIV)

The 9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.

MAUI COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
WSP Cell Sectors	7/17/19	Delivered 7/31/2019
	To	Updated fourteen (14) sectors per AT&T CRS
	7/30/19	Added seven (7) sectors per AT&T CRS
	7/3/19	Delivered 7/17/2019
	To	Updated six (6) sectors per Sprint CRS
	7/16/19	Added twenty-one (21) sectors per Sprint CRS
	7/1/19 To	Delivered 7/3/2019
	7/2/19	Updated two (2) sectors per Sprint CRS
WSP Cell Towers	7/17/19 To	Delivered 7/31/2019
	7/30/19	Updated two (2) towers per AT&T CRS
	7/3/19	Delivered 7/17/2019
	To	Added three (3) towers per Sprint CRS
	7/16/19	Updated one (1) tower per Sprint CRS
	7/1/19 To	Delivered 7/3/2019
	7/2/19	Updated one (1) tower per Sprint CRS

NOTE:

The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

GIS KEY ACTIVITIES/UPDATES

- **GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.**

Date	Key Activities/Updates
7/3/2019	Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Parks, Points Of Interest, and WSP Cell Towers for Intergraph.
7/3/2019	Delivered updated data for MapFlex which included Address Points, Parks, Points of Interest, WSP Cell Sectors and WSP Cell Towers.
7/17/2019	Delivered shapefiles for Address Points, Common Places, and Street Centerlines for Intergraph RMS training/implementation.
7/17/2019	Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Parks Polygon, Points Of Interest, Street Centerlines, and WSP Cell Towers for Intergraph.
7/17/2019	Delivered updated data for MapFlex which included Address Points, Parks, Parks Polygon, Points of Interest, WSP Cell Sectors and WSP Cell Towers.
7/31/2019	Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Common Name Lookup Table, Gate Codes, Lodging, Parks, Points Of Interest, Street Centerlines, and WSP Cell Towers for
7/31/2019	Delivered updated data for MapFlex which included Address Points, Churches, Emergency Shelters, Food & Beverage, Gas Stations, Government Buildings, Lodging, Parks, Parks Polygon, Points of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. Akimeka delivered an updated Intergraph CAD map July 3rd, 2019 which included:
 - a. Address Points, Common Places Lookup Table, Parks Polygon, Points of Interest, Street Centerlines, and WSP Cell Towers.
 - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
2. Akimeka attended a Hexagon CAD Mapping Workshop at the Maui Police Station from July 8-10.
3. On July 17th, 2019– Akimeka delivered an updated Intergraph CAD map which included:
 - a. Address Points, Parks Polygon, Points of Interest, Street Centerlines, and WSP Cell Towers.
 - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
4. On July 31st, 2019– Akimeka delivered an updated Intergraph CAD map which included:
 - a. Address Points, Common Name Lookup Table, Gate Codes, Lodging, Parks, Points of Interest, Street Centerlines, and WSP Cell Towers.
 - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv

During August 2019, the Intergraph CAD map will continue to be delivered every other week, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

MAPFLEX SYSTEM

Akimeka delivered GIS data to the MapFlex system on the following dates in July 2019

Hawaii County – July 2nd, 2019, July 16th, and July 30th, 2019
Maui County – July 3rd, 2019, July 17th, 2019, and July 31st, 2019
Kauai County – July 3rd, 2019, and July 18th, 2019
Honolulu – July 3rd, 2019, and July 19th, 2019

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

MAPFLEX ISSUES

Below is a detailed list of issues regarding the MapFlex systems throughout the State of Hawaii.

DATE	ISSUE	DESCRIPTION	STATUS
8/2016	Wireless Addresses	MapFlex system began displaying wireless information incorrectly. MapFlex system is doing a reverse query for additional information in the GIS and this is overriding the ALI information with the closest address in the GIS.	Partially Resolved (Nov 2016) The overriding ALI with updated Lat/Longs from the GIS is still occurring
11/2016	Phase I Display	Wireless Phase I calls plotting at centroid of coverage area and landing in the ocean. After installation of new MapFlex version to correct other issues, the configurations for Wireless Phase I were not set up properly by West, in which the mapping did not point to the correct information in MapFlex.	Partially Resolved (Dec 2016) According to PSAPs, it's not fully resolved. The icon of the tower still doesn't plot for Phase I.
11/2016	Wireless Confidence	Sprint calls coming across with unusually high confidence. Coordination is taking place with Sprint and West. West provides the PDE services for Sprint.	Pending
3/22/2017	ArcGIS Address Locator	The locators in MapFlex have a configurations which does not include ESNs. A reported issue has occurred with the Sheraton in Waikiki. The address locator does not differentiate between the Sheraton hotel and the surf break and plots on the surf break. The bigger issue is that this same issue will occur with complexes that have same primary address.	Pending A new SP 5.4 update by West is aimed to correct this issue.
5/17/2017	VoIP Calls Plotting Incorrectly	Recognized in late April and early May 2017, the PSAPs have been receiving several VoIP calls which are plotting in the incorrect locations. After further research it was determined that it is because MapFlex is configured to plot the received Lat/Long. The problem is that these are not always maintained properly and that ideally the system should first choose to match with the GIS data based on the provided address. During the September 20, 2017 PSAP conference call, HT relayed there was confirmation that the Time Warner records were in fact passing through the West FMCC.	Partially Resolved – the Lat/Longs are no longer being plotted in MapFlex due to a software release.
5/17/2017	Landline Calls Producing X/Y on calls	It was determined that for normal landline calls, the X/Y coordinates are being sent. The PSAPs have asked where these are being generated and why would they be sent for landline calls.	West is looking into this (May - June 2017)
5/23/2018	Phase I & Phase II coverage area	Phase I calls received at the Kihei Maui PSAP are displaying a circular circumference area rather than a cone shaped directional coverage. Phase II calls are not plotting the COF meters correctly.	Pending
5/24/2018	Incorrect Addresses	MapFlex system began displaying incorrect addresses in the bubble display when an Address Point is right mouse clicked to see information by the PSAPs. However, the address in the data is still correct as shown on the left hand side.	Pending

Maui County E9-1-1 Status Report

July 1, 2019 - July 31, 2019

6/27/2018	Moving Labels	It was brought up during the PSAP teleconference with Hawaiian Tel and West that the Hawaii Fire Department submitted a trouble ticket regarding the parcel labels. When the base map is checked on for viewing the owner's names on the parcel layer, the names of some of the parcels will follow and leave their parcel as the map is panned following streets. This problem was also recreated at the Hawaii Police Department.	Pending
