### PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Abandoned Calls are **not** included in the % of Total Calls.
- All VoIP (Voice over Internet Protocol) types of 911 calls are combined in the Call Volume statistic.

### WIRELESS PSAP TESTING – AUGUST 2019

HAWAII COUNTY - AUGUST 2019						
Date	WSP	Sites Tested	Sectors Tested	Tested By:	Test Pass/Fail	Comments:
08/15/19	Sprint	2	2	Hawaii PSAP	Pass	

#### NOTES:

- There was one (1) scheduled Wireless 911 Tests for the month of August 2019.
- Verizon Wireless has completed migrating their Wireless network database from Intrado to ComTech.
- During the 4<sup>th</sup> quarter of 2018, there was an increasing amount of “MOBL” class of service type of 911 calls delivered to the State of Hawaii PSAPs. On January 15<sup>th</sup>, 2019, Intrado completed the position source mapping for ComTech which appears to have resolved this issue.

AVG PER MONTH	140	107	17	12	3	296	0	0	101

### Definitions

- (A) **Dispatchable Location** - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.
- (B) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (C) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 299 attached to them which indicates the need for validation.
- (D) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

## MSAG CURRENT MONTH NOTES:

A total of **92** MSAG transactions were processed in 9-1-1 Net during the current month. Eleven (**11**) requests were processed relating to the MSAG database. Changes include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS and Military response areas, and inserting new MSAG records.

There were **181** customer ANI/ALI (telephone number/address) records updated as a direct result.

## TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

Seven (**7**) Telephone Number Change Requests (TN CR) transactions were processed in 9-1-1 Net with valid MSAG addresses, as a result of the ESN 299 clean-up effort. ESN 299 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

One (**1**) ALI DRs were submitted as the result of a 9-1-1 call from a business in Hakalau. Three (**3**) VoIP Dr were submitted as a result of 9-1-1 calls, one (**1**) from a resident in Hawi and two (**2**) from businesses in Kelakekua and Keaau.

Akimeka submitted seventy (**70**) TN CRs related to the Dispatchable Location Project during the current month

## OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 213 Open TN CR Transactions.**
- **Refer to chart in the next section “TNCR Current Status”**

**213** Open TN CR transactions are a direct result of the dispatchable location project and are awaiting approval from Hawaiian Telcom, Inc. Once a telephone number is submitted to Intrado for correction, it is verified against HT records and/or by the customer. Intrado's internal process requires calling each telephone customer individually for verification to update an address in the 9-1-1 database.

- **There are currently no Open ALI-DRs as August 31, 2019**
- **There are currently no Open VoIP DRs as August 31, 2019**

## TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – AUGUST 2019

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

### NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)				
County	TOTAL TNCR RECORDS SUBMITTED BY AKIMEKA	OPENED TNCRS PENDING FURTHER ACTION BY INTRADO	OPENED TNCRS REFERRED TO TELCO BY INTRADO	TOTAL UNOPENED TNCR RECORDS
HAWAII	213	120	69	24

STATUS
<b><u>TOTAL TNCRs SUBMITTED</u></b> - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
<b><u>PENDING STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
<b><u>REFERRED STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
<b><u>TOTAL UNOPENED TNCR RECORDS STATUS</u></b> - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

DISPATCHABLE LOCATION – STATUS AS OF – AUGUST 2019

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

### NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of September 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the **Kings Shops at 690250 Waikoloa Beach Dr., Waikoloa**. The “Dispatchable Location” data is entered into the “Driving Directions” field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. There are a total of **5,075** Dispatchable Locations processed to date. There were **81** Dispatchable locations submitted and **70** were processed in August 2019.

SPECTRUM (CHARTER) 9-1-1 VOIP DATABASE VERIFICATION PROJECT - AUGUST 2019

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

Akimeka received the Automatic Location Identification (ALI) records from Spectrum (formally known as Charter Communications) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka is researching and verifying the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there are invalid MSAG addresses utilized by the VoIP Provider. These records are being identified, and will be sent back to Spectrum for corrective action.

\*\* Akimeka provided VoIP Records with Latitude/Longitude coordinates

(A)	VoIP Database records submitted by Spectrum to Akimeka for research and MSAG address validation.
(B)	Akimeka has researched and verified the VoIP record against an MSAG valid address and GIS data. Akimeka is tracking corrections needed to be performed by Spectrum. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verification Process Completed.

BANDWIDTH 9-1-1 VOIP DATABASE VERIFICATION PROJECT – AUGUST 2019

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

Akimeka received the Automatic Location Identification (ALI) records from Bandwidth which is a Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka researched and verified the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there were invalid MSAG addresses utilized by the VoIP Provider. These records were identified, and sent back to Bandwidth for corrective action.

Akimeka will update the chart below as we receive updated ALI records from Bandwidth.

<b>*Bandwidth</b> <b>9-1-1 VoIP Database Verification Project **(Updated)</b>

\*Bandwidth VoIP Database received on April 5th, 2018

\*\*Updated Bandwidth VoIP Database received on September 6th, 2018

(A)	VoIP Database records submitted by Bandwidth to Akimeka for research and MSAG address validation.
(B)	Akimeka has researched and verified the VoIP record against an MSAG valid address and GIS data. Akimeka is tracking corrections needed to be performed by Bandwidth. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verification Process Completed.

### 3. GEOGRAPHIC INFORMATION SYSTEM (GIS) – AUGUST 2019

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

## MAPPING LAYERS UPDATED (PART I)

*9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and NG9-1-1 systems.*

HAWAII COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Address Points	8/27/19 To 8/31/19	Next Delivery 9/10/2019
		Added alias for one (1) record in Papaaloa
		Corrected spatial for one (1) record in Kealakekua
		Corrected spatial for five (5) records in Honokaa
		Corrected spatial for three (3) records in Kailua Kona
		Corrected spatial for twenty-eight (28) records in Pahala
		Corrected spatial for seven (7) records in Mountain View
		Corrected spatial and corrected TMK for one (1) record in Papaaloa
		Updated location name for one (1) record in Kapaau
		Corrected spatial for two (2) records in Hilo
		Corrected spatial for twelve (12) records in Papaaloa
		8/13/19 To 8/26/19
	Added address for one (1) record in Honokaa	
	Added address for two (2) records in Naalehu	
	Added address for thirty (30) records in Pahoa	
	Added address for two (2) records in Pepeekeo	
	Added address for one (1) record in Honomu	
	Added address for one (1) record in Kapaau	
	Added address for three (3) records in Captain Cook	
	Added POI for one (1) record in Ookala	
	Updated address for two (2) records in Pepeekeo	
	Added address for one (1) record in Keauhou	
	Corrected spatial for eleven (11) records in Waikoloa	
	Added address for twelve (12) records in Volcano	
	Added address for two (2) records in Holualoa	
	Corrected spatial for eight (8) records in Kailua Kona	
	Added POI for one (1) record in Laupahoehoe	
	Added POI for one (1) record in Volcano	
	Corrected TMK for one (1) record in Kamuela	
	Added address for twenty (20) records in Ocean View	
	Added address for thirteen (13) records in Hilo	
	Added address for two (2) records in Kealakekua	

## MAPPING LAYERS UPDATED (PART II)

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

*9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and NG9-1-1 systems.*

HAWAII COUNTY		
Type of Layer	Akimeka GIS Server	GIS Delivery Dates/Remarks
	Date Created/ Edits Performed	
CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH & RESPONSE (Listed Alphabetically)		
Address Points	8/13/19 To 8/26/19	Added address for one (1) record in Hawi
		Added POI for four (4) records in Hilo
		Added address for five (5) records in Kailua Kona
		Corrected spatial and corrected TMK for one (1) record in Waikoloa
		Corrected spatial for thirty-one (31) records in Mountain View
		Updated location name for two (2) records in Keaau
		Added alias for one (1) record in Pahoa
		Added POI for one (1) record in Paauilo
		Corrected spatial for one (1) record in Kamuela
		Added POI for one (1) record in Pahala
		Added address for one (1) record in Hakalau
		Added address for thirty-eight (38) records in Keaau
		Added address for twenty-eight (28) records in Mountain View
		Added address for nine (9) records in Kamuela
		Added address for two (2) records in Paauilo
		Corrected spatial for one (1) record in Hilo
		Added address for twenty-two (22) records in Kurtistown
		Added POI for nine (9) records in Kamuela
		Added POI for one (1) record in Kailua Kona
	8/1/19 To 8/12/19	Delivered 8/13/2019
		Corrected spatial for three (3) records in Hawi
		Added address point for one (1) record in Keaau
		Corrected spatial and corrected TMK for two (2) records in Kamuela
		Corrected spatial and corrected TMK for one (1) record in Hawi
		Corrected spatial for four (4) records in Pahoa
		Updated location name and corrected TMK for one (1) record in Hilo
		Corrected spatial for three (3) records in Holualoa
		Updated routingID and TMK, added to AP, corrected address, corrected spatial for one (1) record in Captain Cook
		Corrected spatial for five (5) records in Waikoloa
		Verified address for one (1) record in Kamuela
		Corrected TMK for one (1) record in Captain Cook

MAPPING LAYERS UPDATED (PART III)

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

*9-1-1 GIS layers provided by Akimeka to the PSAP are designed for use on E9-1-1 systems and NG9-1-1 systems.*

## GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

### GIS KEY ACTIVITIES/UPDATES

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

---

GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.

Date	Key Activities/Updates
8/27/2019	Delivered Address Points, Cell Sectors, Cell Towers, Points of Interest, Street Centerlines, ESN, and Common Places for Mapflex in Hawaii County
8/27/2019	Delivered Address Points, City, Common Names Alt Table, Display Streets, Fire EMS Zone, First In, Points of Interest, POI Alt Names, Police Zones, Street Centerlines, Street Alt Names, Street Routes for Spillman for Hawaii County.
8/13/2019	Delivered Address Points, Cell Sectors, Cell Towers, Points of Interest, Street Centerlines, ESN, and Common Places for Mapflex in Hawaii County
8/13/2019	Delivered Address Points, City, Common Names Alt Table, Display Streets, Fire EMS Zone, First In, Points of Interest, POI Alt Names, Police Zones, Street Centerlines, Street Alt Names, Street Routes for Spillman for Hawaii County.

---

### LAVA FLOW AND ALTERNATE ROUTES

Historical events are archived in the 2018 Monthly Status Reports.

Akimeka will resume to deliver updates should the event start up again.

---

### FIRE DEPARTMENT IMT (INCIDENT MANAGEMENT TEAM) MAP

Historical events are archived in the 2018 Monthly Status Reports.

Akimeka will update these GIS layers upon request by the Hilo Fire Department.

---

### ADDRESS POINTS AND STREET CENTERLINES UPDATE COMPARISON

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

On a routine basis, upon receipt of Hawai'i County Planning Department's Address Points and Street Centerlines layer updates, Akimeka compares and incorporates any of the County's additions, changes, and deletions into the Akimeka Address Points and Street Centerlines layers that appear necessary for the dispatch and response of 911 personnel.

The new Address Points and Street Centerlines geodatabase comparative analysis was received from the Hawai'i County Planning Department on **August 22, 2019**. A new compare process was developed by Akimeka to perform this analysis.

HAWAII COUNTY	Address Points Layer	Street Centerlines Layer
New Addresses Added	195	
Addresses Removed	0	
Address Street Name Changes	1	
Address Street Number Changes	2	
New Street Segments Added		4
Street Segments Removed		0
Street Segment Range Changes		6
Street Segment Name Changes		0

## NOTE:

Some Address Points have multiple updates that are required, including Street Name and Street Number. These updates are counted as separate actions since the changes are required in order to make the GIS layers "9-1-1 capable" for CAD system recommendations affecting public safety dispatch and response operations.

## CAD SYSTEM DEPLOYMENT

On September 18<sup>th</sup>, 2018, the Hawaii Police and Fire Department went live on the new Spillman CAD and mapping systems. There have been no major GIS data configuration changes requested. Historical events are archived in the 2018 Monthly Status Reports.

## MAPFLEX SYSTEM

Akimeka delivered GIS data to the MapFlex system on the following dates in August 2019

**Hawaii County** – August 13<sup>th</sup>, 2019 and August 27<sup>th</sup>, 2019

**Maui County** – August 14<sup>th</sup>, 2019, and August 28<sup>th</sup>, 2019

**Kauai County** – August 1<sup>st</sup>, 2019, August 15<sup>th</sup>, 2019, and August 29<sup>th</sup>, 2019

**Honolulu** – August 2<sup>nd</sup>, 2019, August 16<sup>th</sup>, 2019 and August 30<sup>th</sup>, 2019

## MAPFLEX ISSUES

Below is a detailed list of issues regarding the MapFlex systems throughout the State of Hawaii.

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

DATE	ISSUE	DESCRIPTION	STATUS
8/2016	Wireless Addresses	MapFlex system began displaying wireless information incorrectly. MapFlex system is doing a reverse query for additional information in the GIS and this is overriding the ALI information with the closest address in the GIS.	Partially Resolved (Nov 2016) The overriding ALI with updated Lat/Longs from the GIS is still occurring
11/2016	Phase I Display	Wireless Phase I calls plotting at centroid of coverage area and landing in the ocean. After installation of new MapFlex version to correct other issues, the configurations for Wireless Phase I were not set up properly by Intrado, in which the mapping did not point to the correct information in MapFlex.	Partially Resolved (Dec 2016) According to PSAPs, it's not fully resolved. The icon of the tower still doesn't plot for Phase I.
11/2016	Wireless Confidence	Sprint calls coming across with unusually high confidence. Coordination is taking place with Sprint and Intrado. Intrado provides the PDE services for Sprint.	Pending
3/22/2017	ArcGIS Address Locator	The locators in MapFlex have a configurations which does not include ESNs. A reported issue has occurred with the Sheraton in Waikiki. The address locator does not differentiate between the Sheraton hotel and the surf break and plots on the surf break. The bigger issue is that this same issue will occur with complexes that have same primary address.	Pending A new SP 5.4 update by Intrado is aimed to correct this issue.
5/17/2017	VoIP Calls Plotting Incorrectly	Recognized in late April and early May 2017, the PSAPs have been receiving several VoIP calls which are plotting in the incorrect locations. After further research it was determined that it is because MapFlex is configured to plot the received Lat/Long. The problem is that these are not always maintained properly and that ideally the system should first choose to match with the GIS data based on the provided address. During the September 20, 2017 PSAP conference call, HT relayed there was confirmation that the Time Warner records were in fact passing through the Intrado FMCC.	Partially Resolved – the Lat/Longs are no longer being plotted in MapFlex due to a software release.
5/17/2017	Landline Calls Producing X/Y on calls	It was determined that for normal landline calls, the X/Y coordinates are being sent. The PSAPs have asked where these are being generated and why would they be sent for landline calls.	Intrado is looking into this (May - June 2017)
5/23/2018	Phase I & Phase II coverage area	Phase I calls received at the Kihei Maui PSAP are displaying a circular circumference area rather than a cone shaped directional coverage. Phase II calls are not plotting the COF meters correctly.	Pending
5/24/2018	Incorrect Addresses	MapFlex system began displaying incorrect addresses in the bubble display when an Address Point is right mouse clicked to see information by the PSAPs. However, the address in the data is still correct as shown on the left hand side.	Pending
6/27/2018	Moving Labels	It was brought up during the PSAP teleconference with Hawaiian Tel and Intrado that the Hawaii Fire Department submitted a trouble ticket regarding the parcel labels. When the base map is checked on for viewing the owner's names	Pending

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

---

		on the parcel layer, the names of some of the parcels will follow and leave their parcel as the map is panned following streets. This problem was also recreated at the Hawaii Police Department.	
--	--	---	--

#### 4. SERVICE REQUESTS TRANSACTIONS

##### OPEN SERVICE REQUESTS – AUGUST 2019

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

#	Date	Ticket #	Description	PSAP	Urgency	Comments
1	01/23/19	1007	Incorrect Address	Hawaii Fire	Normal	Confirmation pending from Inteliquent.com 8/31/2019 JBC
2	08/12/19	1008	Incorrect Address	Hawaii Fire	Normal	Confirmation pending from Inteliquent.com 8/31/2019 JBC
3	8/12/19	1009	Incorrect Address	Hawaii Fire	Normal	Confirmation pending from Inteliquent.com 8/31/2019 JBC

Note\* There is one (3) opened service request pending for August 2019.

### SERVICE REQUEST YEAR-TO-DATE (YTD) SUMMARY – 2019

HAWAII COUNTY				MSAG SERVICE REQUEST CATEGORIES					
2019	TOTAL		Open	WIRELINE		WIRELESS		VoIP

**Note:**

\* The 2018 Carryover row indicated the number of Service Requests that were opened in 2018 and brought forward into 2019 in an effort to track the service request until completion. Detailed information on service tickets are available upon request.

Definitions:	Category	Description
	Wireline	Telephone Number (ALI) Discrepancies from land line phones that have been submitted to Intrado via 9-1-1 Net for correction.
	Wireless	Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database.
	VoIP	Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCBL) or other VoIP providers for correction

### 5. E9-1-1 DATABASE SYNCHRONIZATION

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

---

**(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)**

As part of Akimeka's value added services, Akimeka conducted a quarterly database synchronization audit for Hawaii County in **August 2019**.

The database synchronization effort included comparing Hawaii County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **4,595** 9-1-1 MSAG records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on August 1, 2019 for Hawaii County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never remain at a 100 percent match rate. It can be expected that the percentage will fluctuate by a small degree. As such, NENA's recommended minimum match rate is 98%.

The database synchronization process is essential to monitor and ensure the level of accuracy of the E9-1-1 databases and prepare for Next Generation 9-1-1 (NG9-1-1). As such, Akimeka will perform database synchronization audits on a quarterly basis as part of its ongoing maintenance process. Results of the database synchronization audit will be included and reported in the Monthly Status Report (MSR) accordingly.

### AUDIT SUMMARY RESULTS – AUGUST 2019

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

9-1-1 MSAG TO GIS STREET CENTERLINE AUDIT COMPARISON RESULTS	Notes	As of November 1, 2018		As of February 1, 2019		As of May 1, 2019		As of August 1, 2019	
		9-1-1 MSAG Dated 11-01-18		9-1-1 MSAG Dated 2-01-19		9-1-1 MSAG Dated 5-01-19		9-1-1 MSAG Dated 8-01-19	
		# of Records	%	# of Records	%	# of Records	%	# of Records	%
Total 9-1-1 MSAG Records Reviewed		4,580		4,578		4,592		4,595	
Less: 9-1-1 MSAG Exception Records	(1)	51	1.1%	45	1.0%	44	1.0%	44	1.0%
Net 9-1-1 MSAG Records Eligible for Comparison		4,529		4,533		4,548		4,551	
Total 9-1-1 MSAG Records Match (9-1-1 MSAG -- GIS Match -- No Corrections Required)		4,520	99.8%	4,515	99.6%	4,547	100.0%	4,551	100.0%
9-1-1 MSAG -- GIS No Match Minor Correction Required	(2)	5	0.1%	11	0.2%	1	0.0%	0	0.0%
9-1-1 MSAG Record With No GIS Record	(3)	4	0.1%	7	0.2%	0	0.0%	0	0.0%
Total 9-1-1 MSAG Records No Match		9	0.2%	18	0.4%	1	0.0%	0	0.0%

## Notes:

- (1) An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- (2) An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- (3) An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

AUDIT SUMMARY RESULTS COMPARISON – AUGUST 1, 2019 VS MAY 1, 2019

# Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

**9-1-1 MSAG Dated 8-01-19**

**9-1-1 MSAG Dated 5-01-19**

## NOTE:

**Hawaii County's level of accuracy or 9-1-1 Match percentage remained consistent from 100% as of August 1, 2019 to 100% as of May 1, 2019**  
**NENA Recommended Match Rate = 98%**

## AUDIT SUMMARY RESULTS

### COMPARISON NOTES:

- ❖ There continues to be a tremendous work effort to synchronize the MSAG and GIS data. Akimeka continues to work closely with County Planning to address problem areas. Hawai'i County has worked very hard to assign addresses and name and range street centerlines which have helped facilitate Akimeka's synchronization efforts.
- ❖ "MSAG - MSAG with Missing GIS Records" remained consistent from zero (0) to zero (0) records from May 2019 to August 2019. MSAG records with missing record were zero due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Hawaii County.
- ❖ "MSAG - GIS Minor Corrections" decreased from one (1) to zero (0) records from May 2019 to August 2019. The non-match condition of the eleven records are a result in which MSAG records submitted in 9-1-1 Net were not completed prior to the end of month.
- ❖ "GIS Record with No Matching MSAG Record" decreased from one (1) to zero (0) records from May 2019 to August 2019. This includes GIS records that have no MSAG records, and/or GIS records that do not match the MSAG record exactly.
- ❖ "GIS Record with No MSAG Record" decreased from one (1) to zero (0) records from May 2019 to August 2019. This was primarily the result of edits made to the GIS Street Centerlines layer in order to meet new NG9-1-1 requirements.
- ❖ Ongoing maintenance is critical to ensure the database synchronized level of address accuracy is maintained each time an MSAG or GIS record is "touched".

## INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

At the request of the County of Hawai'i Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Hawai'i County and Akimeka, as the PSAP's agent, with access and visibility to the ESN x99 MSAG records which are "known" invalid streets and address ranges. Results of the data provided are as follows:

HAWAII	Invalid MSAG Records					
	9-1-1 MSAG Dated 02-01-19		9-1-1 MSAG Dated 05-01-19		9-1-1 MSAG Dated 08-01-19	
	Number of Records	% of Total Invalid MSAG Records	Number of Records	% of Total Invalid MSAG Records	Number of Records	% of Total Invalid MSAG Records
ESN 299	199	4.2%	188	4.0%	177	3.7%

These invalid MSAG records represent **3.7%** of the Total MSAG records for Hawai'i County. The individual ALI records associated with these records are provided below.

TN CRs are submitted by Akimeka when valid MSAG addresses are identified and validated against the GIS data. Akimeka will continue to investigate and report on these ESN 299 MSAG records as a separate project and add-on to the Database Synchronization quarterly report.

### AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

## Hawaii County E9-1-1 Status Report

August 1, 2019 – August 31, 2019

---

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancy reports by community for Hawai'i County. As of **August 28, 2019**, **569** ESN 299 records, representing **.8%** of Hawai'i County's total ALI records, require research and corrective action, if needed. These ALI discrepancy reports may result in a No Record Found (NRF) condition during a 9-1-1 call.
