#### PSAP OPERATION NOTES:

- Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.
- Abandoned Calls are included in the Wireline and Wireless total counts respectively.
- All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.
- Outgoing 911 calls are included in the totals. These are ringback or callback 911calls made from the Viper System.

### NOTES:

- There were three (3) scheduled Wireless 911 tests conducted in December 2019 for the Maui and Molokai PSAPs.
- Verizon Wireless has completed migrating their Wireless network database from Intrado to ComTech.
- During the 4<sup>th</sup> quarter of 2018, there was an increasing amount of “MOBL” class of service type of 911 calls delivered to the State of Hawaii PSAPs. On January 15<sup>th</sup>, 2019, Intrado completed the position source mapping for ComTech which appears to have resolved this issue.

### Definitions

- (A) **Dispatchable Location** - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.
- (B) **Master Street Address Guide** - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.
- (C) **Telephone Number Change Request** - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 399 attached to them which indicates the need for validation.
- (D) **Automatic Location Information Discrepancy Record** - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

---

### MSAG CURRENT MONTH NOTES:

A total of **288** MSAG transactions were processed in 9-1-1 Net during the current month. Five (**5**) requests were processed relating to the MSAG database. Changes include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS, and inserting new MSAG records.

**8** customer ANI/ALI (telephone number/address) records updated as a direct result.

### TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

Three (**3**) Telephone Number Change Request (TN CR) transaction was processed in 9-1-1 Net with valid MSAG address, as a result of the ESN 399 clean-up effort. ESN 399 TN CRs must be validated against HT records and approved by the end user Hawaiian Telcom customer before updating the ALI record.

Three (**3**) ALI DR's were submitted as the result of 9-1-1 calls from one residence in Lahaina, and two residences in Kaunakakai on Molokai. One (**1**) VoIP Dr was submitted as a result of 9-1-1 call from a resident in Kahului.

Akimeka submitted two hundred and seventy six (**276**) TN CRs related to the Dispatchable Location Project during the current month.

### OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 148 Open TN CRs.**

**148** Open TN CR transactions are a result of the Dispatchable Location project. Akimeka continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There are no open VoIP DRs as of December 31, 2019**
- **There are no open ALI DRs as of November 31, 2019**

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – DECEMBER, 2019

NOTE:

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

|---|
| <b><u>TOTAL TNCRs SUBMITTED</u></b> - The total number of TNCR requests for modification that have been submitted in 9-1-1  |
| <b><u>PENDING STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.   |
| <b><u>REFERRED STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The Intrado Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research. |
| <b><u>TOTAL UNOPENED TNCR RECORDS STATUS</u></b> - The request is submitted by Akimeka on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.   |

# Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

## DISPATCHABLE LOCATION – STATUS AS OF – DECEMBER 2019

### NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, Akimeka provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, Akimeka researched the format standards of each pertinent field, and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), Akimeka standardized an additional information data format to proceed with this project.

During the month of August 2015, Akimeka started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The “Dispatchable Location” data is entered into the “Driving Directions” field in the 9-1-1 Net system, and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Screen shots of the “Before” ALI screen, and the “After” ALI screen with the updated “Dispatchable Location” information visible, were presented to the Dispatch Supervisors. Akimeka received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, Akimeka was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this “Dispatchable Location” information which will reduce the response times for Public Safety. There were 276 Dispatchable Locations submitted in December 2019 and 223 were processed by Intrado.

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

### SPECTRUM (CHARTER) 9-1-1 VOIP DATABASE VERIFICATION PROJECT – DECEMBER 2019

Akimeka received the Automatic Location Identification (ALI) records from Spectrum (formally known as Charter Communications) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka is researching and verifying the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there are invalid MSAG addresses utilized by the VoIP Provider. These records are being identified, and will be sent back to Spectrum for corrective action.

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

### BANDWIDTH 9-1-1 VOIP DATABASE VERIFICATION PROJECT – DECEMBER 2019

Akimeka received the Automatic Location Identification (ALI) records from Bandwidth which is a Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As Akimeka has access to these ALI Records, Akimeka researched and verified the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there were invalid MSAG addresses utilized by the VoIP Provider. These records were identified, and sent back to Bandwidth for corrective action.

Akimeka will update the chart below as we receive updated ALI records from Bandwidth.

# Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

## NOTE:

The Parcels layer is provided by Maui County. Akimeka performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

## GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

### GIS KEY ACTIVITIES/UPDATES

- **GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.**

| Date       | Key Activities/Updates   |
|------------|--|
| 12/31/2019 | Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers for Intergraph. |
| 12/31/2019 | Delivered updated data for MapFlex which included Address Points, Points Of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.  |
| 12/18/2019 | Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers for Intergraph. |
| 12/18/2019 | Delivered updated data for MapFlex which included Address Points, Points Of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.  |
| 12/4/2019  | Delivered .map, .str, .rte, Maui Cell Coverage.csv, and database files, which included updated Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers for Intergraph. |
| 12/4/2019  | Delivered updated data for MapFlex which included Address Points, Points Of Interest, Street Centerlines, WSP Cell Sectors and WSP Cell Towers.  |

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

### INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. Akimeka delivered an updated Intergraph CAD map December 4<sup>th</sup>, 2019 which included:
  - a. Address Points, Common Name Lookup Table, Points of Interest, Street Centerlines, and WSP Cell Towers.
  - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
2. On December 18<sup>th</sup>, 2019 Akimeka delivered an updated Intergraph CAD map which included:
  - a. Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers
  - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv
3. On December 31<sup>st</sup>, 2019 Akimeka delivered an updated Intergraph CAD map which included:
  - a. Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers
  - b. .map, .str, .rte, CAD Map Build database and Cell Coverage.csv

During January 2020, the Intergraph CAD map will continue to be delivered every other week, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

### MAPFLEX SYSTEM

Akimeka delivered GIS data to the MapFlex system on the following dates in December 2019

**Hawaii County** – December 3<sup>rd</sup>, 2019, December 17<sup>th</sup>, 2019, and December 31<sup>st</sup>, 2019

**Maui County** – December 4<sup>th</sup>, December 18<sup>th</sup>, 2019, and December 31<sup>st</sup>, 2019

**Kauai County** – December 5<sup>th</sup>, 2019, and December 29<sup>th</sup>, 2019

**Honolulu** – December 6<sup>th</sup>, 2019, and December 20<sup>th</sup>, 2019

### MAPFLEX ISSUES

Below is a detailed list of issues regarding the MapFlex systems throughout the State of Hawaii.

| DATE   | ISSUE              | DESCRIPTION   | STATUS   |
|--------|--------------------|---|--|
| 8/2016 | Wireless Addresses | MapFlex system began displaying wireless information incorrectly. MapFlex system is doing a reverse query for additional information in the GIS and this is overriding the ALI information with the closest address in the GIS. | Partially Resolved (Nov 2016)<br>The overriding ALI with updated Lat/Longs from the GIS is still occurring |

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

|           |                                       |   |   |
|-----------|---------------------------------------|---|---|
| 11/2016   | Phase I Display                       | Wireless Phase I calls plotting at centroid of coverage area and landing in the ocean. After installation of new MapFlex version to correct other issues, the configurations for Wireless Phase I were not set up properly by Intrado, in which the mapping did not point to the correct information in MapFlex.  | Partially Resolved (Dec 2016)<br>According to PSAPs, it's not fully resolved. The icon of the tower still doesn't plot for Phase I. |
| 11/2016   | Wireless Confidence                   | Sprint calls coming across with unusually high confidence. Coordination is taking place with Sprint and Intrado. Intrado provides the PDE services for Sprint.  | Pending   |
| 3/22/2017 | ArcGIS Address Locator                | The locators in MapFlex have a configurations which does not include ESNs. A reported issue has occurred with the Sheraton in Waikiki. The address locator does not differentiate between the Sheraton hotel and the surf break and plots on the surf break. The bigger issue is that this same issue will occur with complexes that have same primary address.   | Pending<br>A new SP 5.4 update by Intrado is aimed to correct this issue.   |
| 5/17/2017 | VoIP Calls Plotting Incorrectly       | Recognized in late April and early May 2017, the PSAPs have been receiving several VoIP calls which are plotting in the incorrect locations. After further research it was determined that it is because MapFlex is configured to plot the received Lat/Long. The problem is that these are not always maintained properly and that ideally the system should first choose to match with the GIS data based on the provided address.<br>During the September 20, 2017 PSAP conference call, HT relayed there was confirmation that the Time Warner records were in fact passing through the Intrado FMCC. | Partially Resolved – the Lat/Longs are no longer being plotted in MapFlex due to a software release.                                |
| 5/17/2017 | Landline Calls Producing X/Y on calls | It was determined that for normal landline calls, the X/Y coordinates are being sent. The PSAPs have asked where these are being generated and why would they be sent for landline calls.   | Intrado is looking into this (May - June 2017)  |
| 5/23/2018 | Phase I & Phase II coverage area      | Phase I calls received at the Kihei Maui PSAP are displaying a circular circumference area rather than a cone shaped directional coverage. Phase II calls are not plotting the COF meters correctly.  | Pending   |
| 5/24/2018 | Incorrect Addresses                   | MapFlex system began displaying incorrect addresses in the bubble display when an Address Point is right mouse clicked to see information by the PSAPs. However, the address in the data is still correct as shown on the left hand side.   | Pending   |
| 6/27/2018 | Moving Labels                         | It was brought up during the PSAP teleconference with Hawaiian Tel and Intrado that the Hawaii Fire Department submitted a trouble ticket regarding the parcel labels. When the base map is checked on for viewing the owner's names on the parcel layer, the names of some of the parcels will follow and leave their parcel as the map is panned following streets. This problem was also recreated at the Hawaii Police Department.  | Pending   |

#### Note:

\*The 2018 Carry Over row indicates the number of Service Requests that were opened in 2018; however, were brought forward into 2019 in an effort to track the service request until completion.

| Definitions: | Category | Description   |
|--------------|----------|---|
|              | Wireline | Telephone Number (ALI) Discrepancies from land line phones that have been submitted to Intrado via 9-1-1 Net for correction.  |
|              | Wireless | Telephone Number (ALI) Discrepancies from phones that were land lines at one time, and were ported out to a wireless carrier. However, the phone number was never removed from the MSAG database. |
|              | VoIP     | Telephone Number (ALI) Discrepancies from VoIP phones that have been submitted to Time Warner Cable (TWCB) or other VoIP providers for correction   |

# Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

---

## 5. E9-1-1 DATABASE SYNCHRONIZATION

**(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)**

As part of Akimeka's value added services, Akimeka conducted the next quarterly database synchronization audit for Maui County in December 2019.

The database synchronization effort included comparing Maui County's 9-1-1 MSAG against its GIS Street Centerline data. A total number of **2,741** 9-1-1 MSAG (ESN 300 – 357) records were reviewed in the audit and analyzed. Results of the database synchronization audit completed on December 1, 2019 for Maui County are reported below.

Database synchronization should be part of an ongoing and continuous process to ensure that the databases remain current and synchronized. Since neither database is static in nature, the synchronization process will never remain at a 100 percent match rate. It can be expected that the percentage will fluctuate by a small degree. As such, NENA's recommended minimum match rate is 98%.

### AUDIT SUMMARY NOTES:

- (1)An MSAG Record that will not have a corresponding GIS Street Centerline Record but is required for the routing of E9-1-1 calls (i.e., Emergency Call Box, Foreign Exchange Records, Wireless Shell Records, etc.). No further action is required.
- (2)An MSAG Record that requires minor MSAG attention in 9-1-1Net to correct MSAG Records (i.e., Reassignment of an MSAG Community, modification of the Site Address Range, assignment of an ESN, performing a combine or insert of an existing MSAG Record, etc.).
- (3)An MSAG Record that does not have a corresponding GIS Record and will require additional research and validation. The GIS Section will assist with this effort.

# Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

## MSAG AUDIT SUMMARY RESULTS – DECEMBER 1, 2019 VS SEPTEMBER 1, 2019

Maui County's level of accuracy or 9-1-1 Match percentage remained constant at 100% as of December 1, 2019 to 100% on September 1, 2019

NENA Recommended Match Rate = 98%

### MSAG AUDIT SUMMARY RESULTS NOTES:

- “MSAG - GIS Minor Corrections” remained the same (2 to 2) from September 2019 to December 2019. Minor corrections were primarily the result of edits made to the GIS Street Centerlines layer in order to meet new NG9-1-1 requirements. Low and high address ranges were then adjusted in the MSAG to correspond with the GIS record. Although this is a minor correction, customer telephone numbers (TNs) need to be validated by the service providers prior to adjusting an address range.
- “MSAG Record with No GIS Record” increased (0 to 2) from September 2019 to December 2019. MSAG Record with No GIS Record were zero due primarily to the verification of the MSAG records against multiple GIS databases to determine if the roads are existing within Maui County records.
- Ongoing maintenance is critical to ensure the database synchronized level of address accuracy is maintained each time an MSAG or GIS record is “last modified”.

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

### INVALID MSAG STREETS AND ADDRESS RANGES – ESN X99 RECORDS

Hawaiian Telcom, Inc. (HTI) provides Maui County and Akimeka, as the PSAP's agent, with access and visibility to the ESN 359/399 MSAG records which are "known" invalid streets and address ranges. Results of the data provided are as follows:

| PSAP              | ESN | Invalid MSAG Records      |   |                           |   |                           |   |                           |   |

## Maui County E9-1-1 Status Report

December 1, 2019 - December 31, 2019

### AUTOMATIC LOCATION IDENTIFICATION (ALI) DISCREPANCY REPORT

As part of Akimeka's ongoing database synchronization efforts, Akimeka reviewed and summarized the ALI discrepancy reports by community for Maui County. As of **December 27, 2019**, 2 ESN 399 (Maui/Lanai) and ESN 359 (Molokai) records, representing **.01%** of Maui County's total ALI records, require research and corrective action, if needed.
