

HAWAII RURAL REHABILITATION CORPORATION

Records Relating to the Rural Rehabilitation Program in Hawaii in 1934--1936

The administrative records in this series represent the official papers of the rural rehabilitation program of the Federal Emergency Relief Administration in the Territory of Hawaii beginning from about May 1, 1934. The Hawaii Rural Rehabilitation Corporation, Limited, incorporated on November 16,* 1934 as an instrumentality of the FERA, began functioning in 1935 with an initial federal grant of \$35,000 to foster a program of relief and rural rehabilitation for the farmers, ranchers, and other agricultural groups.

On July 1, 1935 the Federal Emergency Relief Administration was superseded by the Resettlement Administration and, consequently, the Hawaii Rural Rehabilitation Corporation operated under this new agency. On February 29, 1936 the HRRC ceased its relief activities after operating for approximately 15 months. On May 1, 1939 the remaining funds of the corporation were transferred to the Governor's Special Contingent fund (HJR 31, SLH 1939).

This series, as seen in the attached inventory, consists of the records on the objectives and procedures of the rural rehabilitation program; and the charter, by-laws, policies, correspondence, and other administrative files of the Hawaii Rural Rehabilitation Corporation. They also contain representative samples of detailed field records of the client case reports on the several islands, agreements, contracts, notes, receipts, and other similar papers.

*JR 12, SLH 1935
