

SAM TESTIMONY

FW: [EXTERNAL] Manufactured homes testimony

Aloha Mr. Wiig

My name is Samuel Kekoa Hasted and I am a life long resident of Hawaii Island. I currently teach Building Construction and Design Technology at a high school in Hilo. I am in full support of adopting manufactured home and tiny home code rules for the State of Hawaii. Over the years I have watched many friends and families leave their home for cheaper options abroad due to the astronomical costs of housing in Hawaii. I have seen classmates go homeless or adopt substandard living condition to stay in the Hawaii, the home they love.

Manufactured options allow for a stream line building process with an extremely efficient use of various material and building components. All of those costs can be passed To our families and keiki. Manufactured home will provide a viable and affordable option for our families and is something we need to do for Hawaii.
