

JOSH GREEN, M.D.
GOVERNOR

DOUGLAS MURDOCK
CHIEF INFORMATION OFFICER

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES

P.O. BOX 119, HONOLULU, HI 96810-0119

December 16, 2022

The Honorable Ronald D. Kouchi,
President, and Members of the Senate
Thirty-Second State Legislature
State Capitol, Room 409
Honolulu, Hawai'i 96813

The Honorable Scott K. Saiki, Speaker
and Members of the House of
Representatives
Thirty-Second State Legislature
State Capitol, Room 431
Honolulu, Hawai'i 96813

Dear President Kouchi, Speaker Saiki, and Members of the Legislature:

For your information and consideration, I am transmitting a copy of the Preliminary Status Report on the Consolidation of Information Technology Services pursuant to Act 179, SB3284 SD2 HD2 CD1.

In accordance with Section 93-16, Hawaii Revised Statutes, this report will be posted on the Department of Accounting and General Services website at <http://ags.hawaii.gov/reports/legislative-reports/>.

Sincerely,

Douglas Murdock (Dec 20, 2022 10:35 HST)

DOUGLAS MURDOCK
Chief Information Officer

Attachment

Act 179 IT Consolidation

2022 Preliminary Status Report for the State of Hawai'i Legislature

Prepared by the Office of Enterprise Technology Services

Executive Summary

The Office of Enterprise Technology Services (ETS) is submitting its first interim report in compliance with Act 179. ETS has initiated the planning for how Executive Branch IT consolidation might occur, identifying key considerations and decisions points, gathering feedback from the rest of the Executive Branch, and forming initial recommendations to align with the strategic goals of Act 179 – more efficient, cost-effective, and secure use of technology in State government.

This initial report provides information on overall strategy, formation of the working group, areas where further planning is needed, and data collected to inform the process.

The state has already successfully consolidated many IT shared services and capabilities under ETS and its predecessors. For example, the Executive Branch mainframe system has been in use over 40 years, shared by many departments but run by ETS and its predecessors. The mainframe is still in use but recently has been modernized to work in a cloud-like as-a-service environment. Similarly, the Executive Branch shares a networking system called the Next Generation Network (NGN). Other great examples of shared services include the FAMIS financial management system, the payroll system, and the Microsoft 365 system.

ETS and the Consolidation Working Group believes the best way to implement consolidation is to continue to develop shared services that meet the needs of the Executive branch. These may include new IT procurement tools, IT recruiting and training for state staff, and shared program management. This is the best way to implement consolidation without negatively impact departments or the citizens and beneficiaries they serve.

The IT consolidation effort will be complimentary to ETS' objectives for the digital transformation of State government.

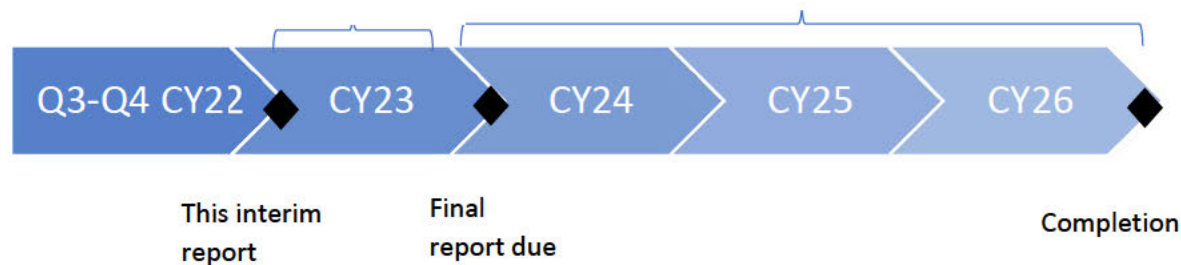

ETS will need to be stronger to lead the state through consolidation. Filling vacant positions, reclassifying legacy positions to more modern IT positions, and transforming ETS philosophy will be necessary for IT consolidation to be possible. ETS must be a great role model and a place that all state workers would like to work.

Background

Senate Bill 3284 SD2 HD2 CD1¹ establishes a technology services consolidation working group to develop a plan for the phased consolidation of all state executive branch information technology services and staff, under the ETS. The phased consolidation, where determined practicable by the working group, will exclude the Department of Education, Hawaii Health Systems Corporation, University of Hawaii, and Office of Hawaiian Affairs, and the phase-in period will be five (5) years. The plan must include the working group's recommendations to attract high-quality information technology professionals to the State. A report to the Legislature is required twice -- an interim and a final report -- before the 2023 and 2024 legislative sessions respectively. The bill dissolves the working group on 12/31/2023 (CD1). Act 179 was approved by Governor David Y. Ige on June 27, 2022.

Timeline

¹ https://www.capitol.hawaii.gov/session2022/bills/SB3284_CD1_.htm

Process

Act 179 provided that the working group would be comprised of each principal Executive Branch department or that person's designee, excluding the Department of Education, Hawaii Health Systems Corporation, University of Hawaii, and Office of Hawaiian Affairs. In Q3 of calendar year 2022, ETS formed the working group by asking each Executive Branch Department's Director/Chairperson to identify who would be participating in the working group. Each Executive Branch department's principal chose to designate one or more individuals. Most designees are representatives of their department or division's IT office.

5 Year Consolidation Plan

Planning year (CY23)

Committees of Consolidation Working Group members supported by ETS staff will have the responsibility to set formal deliverables as they see fit and agree to a finalized list of anticipated deliverables prior to the start of their planning work. ETS will make the following committee scope recommendations for the Planning Year.

Human Resources Plan

Determine the scope of positions within the IT consolidation effort, factoring in any constraints such as federally funded positions that cannot be moved. Identify each position within the scope of consolidation. Analysis of existing staff – staffing levels, job titles, benchmarks, key strengths, gaps, and challenges. Determine future state roles and functions, standardization of positions, and staffing levels. Recommend an approach to filling skills gaps.

Governance Structures

Assess HRS, HAR, Executive Orders, and other policies and procedures on IT governance, determine if additional changes are necessary to adopt additional centralized shared services, and make formal recommendations if so. Review ETS governance structures against any available in sister states, and as necessary, define new roles, responsibilities, and oversight groups to provide future state leadership.

Organizational Structures

Review existing organizational structures. Identify challenges and pain points in the current organizational structures where IT positions exist. Analyze organizational models of sister states and benchmark. Recommend optimal organizational structures to be utilized by ETS post-consolidation.

Sourcing and Procurement Strategy

Identify pain points in the current IT procurement process. Recommend a model to be able to leverage economies of scale for IT procurement by having ETS act as a broker for IT procurement transactions, including those that fall under the scope of shared services. Identify other opportunities to capture cost savings and efficiencies by assessing current spend across the executive branch, reviewing procurement policies, identifying any policy changes, and recommended consolidation of future contracts.

Financial Model

Analysis of current state funding approaches for IT expenditures. Are they effective and do they support a shared services model? Study possible funding models and determine the pros/cons of each option and make a recommendation for the best model/method available. Ensure sustainability of ETS' budget to deliver on shared services.

Project and Portfolio Management Strategy

Analysis of existing Executive Branch IT projects and portfolios of IT applications. Recommend a portfolio management strategy that will enable better investments in future projects and more successful business outcomes. Determine existing project organization structures, what project controls are in place, and recommend any necessary changes.

Change Management Plan

Identify all key stakeholder groups with respect to IT consolidation, including their level of influence and their level of influence and interest. Formalize a plan to ensure that all stakeholders are informed of changes and engaged, the timing of those changes, and the

level of readiness stakeholders should have to prepare for the IT consolidation effort. Identify any considerations for transition, with an emphasis on staff retention and satisfaction.

Communication Plan

Develop a formal plan for communications between ETS and other departments, including key stakeholders such as vendors, central state offices, legislators, unions, etc. Determine the key factors to communicate with respect to the consolidation, the means of communication, and the timing. Define the communication process, including who should sign off on communications.

Provider (or Vendor) Management Plan

Analysis of services currently provided either internally or externally (via vendor) to executive branch departments. Perform baseline user satisfaction surveys. Determine whether services currently provided are adequate and meet the needs of the “customer”. Identify any areas that require future vendor sourcing by completing a make/buy assessment and recommend a sourcing method. Finalize list of shared services to be included in the IT consolidation effort.

Facilities Strategy and Management Plan

Assess the State’s current footprint for people and physical assets, including data center utilization, and any future plans for cloud utilization and third-party Infrastructure-as-a-Service (IaaS). Recommend a strategic plan for the optimization of office space and data centers. Identify current pain points and cost inefficiencies and recommend steps to address those.

IT Network and Communications Plan

Assess the State’s current network utilization and network infrastructure assets (voice, video support, telecommunications, etc.) and identify any opportunities for third party management. Recommend a strategic plan for the optimization of network infrastructure. Identify current pain points and cost inefficiencies and recommend steps to address those.

Service Utilization Management Plan

Analyze current use of resources, planned use, forecast future use and develop models to best utilize available resources. Determine how to use existing assets more efficiently and effectively as well as to plan for more effective future uses of shared services. Identify any opportunities to leverage alternative models such as managed services, pooled storage, and virtualization.

Workforce Development and Recruiting

With an eye on attracting and retaining key skill sets in State government, develop a multi-faceted plan. Analyze current pay practices for exempt employees and compare to local market rates and rates of sister states and make recommendations for pay adjustments. Analyze available recruitment methods and make recommendations for new recruitment methods. Recommend development opportunities for existing staff with a focus on desired skill sets for a future workforce. Recommend new career pathways for advancement in IT.

Appendices A-D contain information on the membership of the working group, survey results, and meeting minutes.

The Departments of Agriculture and Human Services do not have volunteers to participate in the IT consolidation planning committees currently.

The work of the Communications Plan committee may be combined Change Management due to a low level of participation.

Execution years 1-3 (CY24-26)

At the conclusion of the planning year, a full project plan including but not limited to costs, schedule, and scope will be compiled by ETS and given to the working group for review and comment, and then finalized for execution during calendar years 2024 through 2026.

Scope and Assumptions

ETS' Preliminary Proposal

ETS has formulated a preliminary proposal for discussion by the Consolidation Working Group as a model of what a successful IT consolidation might look like. The proposal is based on a “Shared Services” model which many other State governments have successfully adopted.

Shared services differ from centralized services. Whereas centralized services focus on consolidating work in a single location, shared services are provided by ETS to other departments as a part of a service offering to keep the department's overhead lower. Shared Services are a way to gradually gain additional economies of scale just as other State governments have done over time. One example of a Shared Service is the central procurement, provisioning, and management of Microsoft licenses for Executive Branch personnel.

A future expansion of the Shared Services model might include:

- Teams Calling
- Internet/network inside departments
- Common VPN/VDI
- Help Desks
- PC and device purchasing and support
- Cloud Contracts
- Baseline User Satisfaction for future projects
- Centralized design, development, and implementation (DD&I) processes
- Centralized project management for major existing systems

The benefits of expanding the Shared Services model are:

- Cost/process efficiency
- Consistent, dependable services

- Increased responsiveness
- Lessen disruption to business units

Appendix E contains ETS' preliminary recommended statutory changes that may be finalized after the planning year is complete. Appendix F contains various models for IT organizations in sister states.

Strategies

IT consolidation planning will seek to determine if any of the following are viable strategies:

- ETS becomes Broker for Vendor Services
- Vendor Management with Contracts for Projects
- Change Special Fund Use from Personnel Costs to Innovation
- Create Software Factory to Build Prototypes and Pilots
- Create Data Office to Help New Chief Data Officer
- IT Training, Career Tracks, funding for professional certifications
- Creation of a CIP project reinvestment fund
- Creation of a special fund for IT consolidation, workforce development, training, certification, workforce position description modernization
- Centralized funding of all IT hardware and software
- Centralized management of all IT positions

IT consolidation planning will leverage the following:

- Budget and occupied/empty position count/type analysis of departmental IT
- Authority and process for budget and position transfer
- Reorganized ETS structure

- Enhanced consolidated HR Position Descriptions & Recruitment Plan
- Departmental IT Services Manager Position Description
- Departmental IT Governance and strategic planning
- Memorandums of Agreement/Understanding
- Standards such as a Service Catalog, Work Breakdown Structure and RACI Charts
- IT Product & Service Catalog and Procedure
- Service Level Agreements & User Satisfaction Surveys
- Location decisions (central or decentralized)
- Procurement vehicles for brokering and vendor management

In that model, that which is *not* an ETS core competency will stay with the appropriate subject matter departments/agencies.

ETS may also expand professional shared services to departments through the IT consolidation effort. Certain existing or planned areas of ETS such as the Project Management Branch, Enterprise Architecture, IT Governance, or the services of the Chief Data Officer may become “expert hubs” providing a broad range of professional IT services.

People

Currently, there are 478 positions in the Executive Branch with the IT “broadband” job classification. At 103, Department of Accounting and General Services (“AGS”) has the highest number because Enterprise Technology Services is a division within AGS. See Attachment D for a listing of non-exempt broadband positions. Research will be required to identify positions whose job descriptions cannot be changed because of limitations imposed by the federal funding which funds the positions.

The following is a chart showing positions that are exempt and may be classified as IT positions. The list includes ETS positions under “AGS”. Non-ETS positions listed may not be IT positions and research will be required for each position, to determine if each position is an IT position or not. See Attachment E for a listing of 134 exempt positions.

ETS’ philosophy is that the State of Hawaii should not look to reduce IT personnel, but instead make changes to the re-skill the existing workforce to meet the demands of modernization where necessary and create incentives for its people to stay in State government which may take the form of skills training and workforce development, re-deployment to where needs are the greatest, and an identified career track for advancement.

Procurement

One area being evaluated by the IT Consolidation Working Group is further consolidation of IT Procurement. The State Procurement Office (SPO) procures and manages price list and vendor list contracts on behalf of Executive branch agencies, and any of the other twenty chief procurement officer (CPO) jurisdictions, including the Judiciary and the Legislative branches and the counties that commit to participate in the contracts issued by the SPO.²

Participating jurisdictions and agencies benefit by obtaining price discounts and other leveraged concessions through volume purchases. In addition, there are the efficiency savings – the administrative, procurement and contract management realized by each agency or jurisdiction, rather than having to solicit individual contracts, resulting in multiple contracts for the same commodity or service. Instead, these processes are managed by the SPO, and all participating jurisdictions and agencies are the beneficiaries of cooperative purchasing.

Attachment C contains a list of IT-related price and vendor lists managed by SPO, and ETS' involvement is noted within each. The State of Hawai'i is a member of the National Association of State Procurement Officials (NASPO), and the Chief Information Officer is a signatory to two NASPO contracts, 17-18 and 23-08.

The GSA (General Services Administration) MAS, formerly known as the GSA IT Schedule 70, may be used for IT SERVICES ONLY³. More information and procedures to use the GSA MAS is available in this document.

Departments are not permitted to purchase from a GSA contract if there is another active SPO statewide contract for that service. If a department believes it can negotiate better value using the GSA contract, it must include an analysis and justification in written notification to the attention of the CIO. The CIO may negotiate with existing statewide contractors to “meet or beat” the other contract terms, if possible. If CIO determines that “best value” for a department can only be obtained through the GSA contract, they may recommend approval, in writing, on a case-by-case basis.

³ <https://spo.hawaii.gov/wp-content/uploads/2016/12/2017-06-GSA-IT-Services.pdf>

Assumptions

The following table includes some of the current assumptions about the consolidation effort.

Table 1: Assumptions

1	With the change of administration, incoming Directors and Chairpersons will not want changes in how their departments are represented by the working group, and membership will remain relatively stable.
2	ETS will remain an organization that is staffed with a combination of personnel exempt from HRS §§ 76 and 89 and personnel who are not exempt from HRS §§ 76 and 89.
3	IT personnel in the Executive Branch are, for the most part, not exempt from HRS §§ 76 and 89, and union consult will be required regarding non-exempt personnel regarding all personnel matters subject to HRS § 89-9 ⁴ .
4	The Department of Human Resources Development's Labor Relations Branch will lead union consult activities on behalf of the Executive Branch as an employer.
5	Applicable labor unions will approve any changes that the employer presents for union consult.
6	IT position counts will remain the same and the Legislature will not agree to fund new positions.
7	The Legislature will provide funding for additional resources (e.g., contracts) and special project positions for ETS to manage the project.
8	Additional room at ETS' headquarters in the basement of Kalanimoku Building will not be sufficient to house additional ETS personnel.
9	Corresponding department budgets for personnel, systems, and projects that will be identified for consolidation will be moved to ETS.
10	ETS will manage the conversion of positions that are not exempt from HRS §§ 76 and 89 to exempt through natural attrition.
11	The Legislature will enact recommended statutory changes necessary to support the effort.

⁴ https://www.capitol.hawaii.gov/hrscurrent/Vol02_Ch0046-0115/HRS0089/HRS_0089-0009.htm

Workforce Enhancement

An important component of Act 179 was the requirement to make recommendations to attract high-quality information technology professionals to the State, including the use of internships, and assess the feasibility of exempting certain positions from the requirements of HRS §§ 76 and 89. ETS already utilizes an internship program with University of Hawaii West Oahu. Additionally, the following draft strategies will be fleshed out by the committees in 2023, as applicable:

- Aligning IT job titles, classifications, and descriptions more closely to the private sector
- Reskilling current employees to meet modern IT demands
- Streamlining the hiring process and reducing time to hire
- Expanding flexible work schedules
- Increasing remote work options
- Promoting non-salary benefits like greater stability and diversity of experience
- Call to public service
- Building talent pipelines (e.g., partnering with local colleges/universities/technical schools)
- Sponsoring community awareness events
- Opportunity to work in capital city
- Expanding flexible/remote work
- Hiring employees residing out of state
- Targeting non-traditional communities (veterans, non-degreed, etc.)
- Modifying job pre-requisites (e.g., education requirements)
- Public/private partnerships

Project Cost Estimates

The working group will be disbanded at the end of 2023 and recommendations will become final. To execute three years of IT consolidation work recommended by the working group, a team will also be required. Below are estimated figures for anticipated special project positions.

	FY24 (Q3-Q4)	FY25	FY26	FY27 (Q1-Q2)
HR Assistant	\$32,500	\$65,000	\$65,000	\$32,500
HR Assistant	\$32,500	\$65,000	\$65,000	\$32,500
HR Assistant	\$32,500	\$65,000	\$65,000	\$32,500
HR Assistant	\$32,500	\$65,000	\$65,000	\$32,500
HR Assistant	\$32,500	\$65,000	\$65,000	\$32,500
Technical Analyst	\$36,000	\$72,000	\$72,000	\$36,000
Technical Analyst	\$36,000	\$72,000	\$72,000	\$36,000
Technical Analyst	\$36,000	\$72,000	\$72,000	\$36,000
Technical Analyst	\$36,000	\$72,000	\$72,000	\$36,000
Procurement Specialist	\$42,500	\$85,000	\$85,000	\$42,500
Project Manager	\$57,500	\$115,000	\$115,000	\$57,500
Project Assistant	\$27,500	\$55,000	\$55,000	\$27,500
Organizational Change Coordinator	\$35,000	\$70,000	\$70,000	\$35,000
Communications Manager	\$32,500	\$65,000	\$65,000	\$32,500
YR Totals	\$501,500	\$1,003,000	\$1,003,000	\$501,500
			Grand Total	\$3,009,000

HR Assistants are needed to review and update position descriptions and organization charts for potentially hundreds of employees, and to administer any potential compensation changes. Technical Analysts are needed to review all systems and services identified

for consolidation and determine what changes are needed because of consolidation. A Procurement Specialist is needed to review and amend all affected State contracts. A Project Manager and Project Assistant are needed to coordinate all the consolidation activities across the State. An Organizational Change Coordinator is needed to assess stakeholder impacts and implement people-focused changes. A Communications Manager is needed to manage all project communications, both internal and external, to employees, department heads, vendors, unions, etc.

Appendices

Appendix A: IT Consolidation Working Group Membership

	First Name	Last Name	Title	Department / Affiliation
1	Derek	Sodetani	System Analysis Manager	Accounting and General Services
2	Jason	Azus-Richardson	IT Specialist	Agriculture
3	Kevin	Richardson	Deputy Attorney General	Attorney General - Education Division
4	Susan	Yonemura	HCJDC DP Systems Manager	Attorney General - HCJDC
5	Lynne	Youmans	Deputy Attorney General	Attorney General - HHSD
6	Blair	Goto	Deputy Attorney General	Attorney General - HHSD
7	Tracy	Ban	Deputy Director/ASO	Budget and Finance
8	Wade	Kamikawa	DP Systems Analyst	Business, Economic Development and Tourism
9	Robert	Hiltner	ISCO IS Manager	Commerce and Consumer Affairs
10	Tony	Querubin	CIO	Defense
11	Linda	Inouye	ASO I&CS - IT Band B	Hawaiian Home Lands
12	Steve	Sakamoto	HISO Chief	Health
13	David	Keane	IT Manager	Human Resources Development
14	Ryan	Shimamura	CIO	Human Services
15	William	Kunstman	PIO	Labor and Industrial Relations
16	Lila	Loos	IT Administrator	Land and Natural Resources
17	Judy	Yamada	ITS IT Supervisor	Public Safety
18	Corey	Higa	IT Manager	Taxation
19	Darren	Cantrill	IT Manager	Transportation - Administration
20	Amy	Saito	IT Specialist	Transportation - Airports
21	Lena	Wang	IT Specialist	Transportation - Harbors
22	Bob	Sequeira	Engineer	Transportation – Highways

Appendix B: IT Consolidation Working Group Facilitation and Survey

The ETS Chief Information Officer presented draft plans that emphasize an expansion of a Shared Services model to the working group for their consideration. To encourage candor, ETS solicited anonymous feedback on the Chief Information Officer's draft plan. 11 people out of the 22-member working group contributed:

1. How well do you feel you understand the goals of Act 179? (5 = Really well; 1 = Not well at all)

Answers:

4
3
3
2
5
2
4
4
3
5
4

2. What challenges do you foresee for you or your organization?

Answers:

Our department has some programs and some attached agencies with very specialized and complicated IT needs. The attached agencies in particular have their own dedicated IT staff and also contract out IT support and maintenance services. These attached agencies would have concerns if their IT resources were no longer under their direct control. That would also apply to the program level IT staffing and resources. I also see a need to improve the ability to find qualified IT staff to fill out vacancies when those occur and to support staff development, training and opportunities for advancement as incentives.

- 1) Effects on federally funded positions as they are only required to work on a special project
- 2) Responsiveness by the centralized IT may be delayed in supporting the end-user

3) Lack of technical expertise to support complex mission critical applications as consolidation may transfer IT staff who will need to support other applications
We are a very small IT shop of 2 and could use the added assistance of expanding shared services
The department/agency IT staff are developers that specialize in the support of a proprietary system. This system is one of the larger state systems today and the developers all have years of knowledge in the systems' business rules. In a consolidation effort, we do not want to negatively affect the Business responsibilities of the department/agency in any way.
We will also need to understand how the program's funding may affect the effort. The department/agency personnel are all federally funded. All the hardware, software, and infrastructure are also federally funded.
Complicated business domain knowledge to support siloed organization; development and support for business units; complications of funding and assignment of resources.
Our operation is different in many ways including our users, understanding the business environment and nonstandard time of operation. I foresee limited support for our users since our users align with our business.
<ul style="list-style-type: none"> • Ensuring that shared services meet unique departmental requirements. For example, if one department has additional federal security requirements, can the shared service(s) be modified for the single department. • Time to implement or update services. New or updated services will have to be tested and approved by all departments before they can be implemented, likely leading to longer timelines. • IT resource reduction in departments. If IT resources are reduced as part of the consolidation, then it will impact departments' ability to have adequate staffing coverage when staff are absent or resources need to be shifted to meet increased demand. • Multiple service desks - Users may be confused on who to contact (Department or ETS) for services. Issue resolution may be slower since ETS may not understand department set up. • Funding - How will situations be handled when there is a lack of funding? In a decentralized model, department can choose which service to drop or move funds around within the department to covered required services. In a centralized model, how will decisions be made on which service to drop or find funds where actual costs are higher than budgeted costs. • Will ETS/Centralized IT have the expertise/resources to execute successfully. Failures or delays will have a widespread impact. There have been challenges with the FAMIS replacement project and Adobe licensing recently.
staff pushback; staff fears of having to move departments and/or change job duties
Not enough resources (people, experience, etc.), time, and money. Too much demand and unreasonable expectations for service delivery and reliability.
<ol style="list-style-type: none"> 1. The disruption of our current IT staff to continue effective work for our department IT. 2. Sudden vacancies of an effective IT staff due to threats of work reassignment.
We have several challenges to achieve the goals of the bill. One of the bigger hurdles is lack of standardization... not all of the department offices are on or integrated into the EAD. Many still operate stand-alone networks and independent domains. Some

systems don't currently conform to the ETS secure device standards. This is due to lack of staff to implement changes and the internal authority to do so. Due to lack of staff a few agencies have to rely on 3rd party assistance for IT matters. Additionally, personnel have concerns of the potential that local IT support being taken away thus causing the time for IT assistance request remediation increasing. There is also the fear of outside IT not understanding department culture, internal processes, as well as chain of command and directives/goals for each agency.

3. What key considerations would you include in planning the consolidation work?

Answers:

Careful review and consideration regarding what actually would be feasible and most beneficial overall given the unique situations that exists as it pertains to the different departments and agencies

- 1) Consolidate IT areas that make sense - data center, networking, cybersecurity, procurement, cloud computing
- 2) Consolidation is being done for 17 departments so one size does not fit all so be open to making exceptions
- 3) Communicate often and keep each department's leadership informed of the plans

Small shops like ours may be affected differently from the larger departments as we service our users Statewide and tend to be generalists (other than our departmental applications).

Some thoughts....

- 1) UNDERSTAND THE CURRENT ROLES, DUTIES, AND SCOPE OF IT WITHIN EACH DEPARTMENT/AGENCY. GATHER SIMILAR DATA AS WHAT IS LISTED IN THIS SECTION BELOW. VERY IMPORTANT TO UNDERSTAND HOW CONSOLIDATION CAN ACCOMMODATE.

Examples of what is performed today in our situation:

Design, develop, and support of "unique" major mission critical systems/applications. Know and understand the business rules and functional process of the systems/applications.

Plan, coordinate, and communicate any systems/applications changes with/to all external entities involved with interfaces and data exchanges. This works both ways, so all systems accommodate expected changes.

Design, develop, implement, and support of internal network and network security compliance.

Design, develop, implement, and support of ancillary systems. Ex - AWS GovCloud environment(s) – customer and agency ports, IVR, and analytics

Provide the needed segmentation and labeling of confidential data within systems, hardware, and network.

Perform monthly security assessments on all internal and external hardware, software, and data that fall within scope. Perform remediation to resolve any findings.

Develop and maintain the IT Security Policy and Procedure documents. Targeted to meet highest level audits. To include DR and Contingency planning documents.

Maintain and support all on premise computing devices – computers, printers, virtual infrastructures, scanning devices. Ensure these devices are security compliant by developing the needed automated policies.

Ensure all hardware and software lifecycles are compliant and supported by issuers, else research and procure to remain compliant.

Support all data security audits and provide remediation.

Develop 3-5 year IT plans that will accommodate the department's/agency's needs as described within its strategic plans.

Continue the training and knowledge transfer programs to enhance the “upward mobility” philosophy within the department/agency.

2) UNDERSTAND THE OVERALL FUNDING STRUCTURE OF EACH DEPARTMENT/AGENCY

Departments can have different funding structures. Identify differences and document how funding occurs...by function, program, activity, project, or overall?

Federal %

Special %

Grant %

General %

How is funding controlled?

3) IDEAS ON HOW CONSOLIDATION CAN HELP

IMPLEMENT SHARED/ENTERPRISE SERVICES, APPLICATIONS, AND INFRASTRUCTURE

SERVICES

Procurement:

LeanIX – IT purchasing/project roadmap and approval system.

Central IT purchasing

Volume software licenses

Expand SPO Price List scope for IT products and services. The “Agreements” within each price list per vendor is an important tool that helps protect the departments/agencies.

Project Management and other specialized services:

Provide seasoned PM’s to departments/agencies if/when justified.

Provide standardized PD's for IT positions

Help Desk:

For consolidated services (consolidated services to be determined)

State IT security posture:

IT Security Compliance

Security Documentation - State of Hawaii IT Security Policy and Procedures. Two or three “level” releases

Security Services

Cyber security

Infrastructure/Network Security

Data security

Federal Compliance

There were many other IT services gathered in the 4-day discussion on common services. Present the results to those involved.

APPLICATIONS

Document Management System

Databases:

Must meet highest level of compliance

Continue:

Office365

Adobe DC

SentinelOne (Endpoint security)

Tanium (Endpoint mgnt)

INFRASTRUCTURE

GPC/MFaaS/Cloud/etc:

Meet security compliance for all departments

Develop proper MOAs and SLAs

Provide steady cost structure

Network:

NGN (iNet?)

Continue – this is an excellent example of a successful consolidated service, thanks to all those who continue the effort throughout the years.

Provide robust/redundant connectivity to GPC/MFaaS/Cloud.

Continue to provide remote entry into state network.

Acceptable compliance levels.

Robust perimeter security.

Cross-cutting services that can be provided with economies of scale or with centers of excellence; procurement and vendor/contract management where buying clout can make a material difference; expanded/enhanced price list; discounted licenses.

The Departments need an in-house IT section to help support their business operation, this should be a key consideration for planning the consolidation work.

- Each department needs dedicated staff from the centralized IT organization that understands the details of the department operations and the business needs of the department. Without the dedicated staff, the departments and centralized IT will not be able to understand the impact of changes due to a lack of knowledge of each other's operations.
- Need to define or understand how funding will be allocated. There seems to be a desire from the legislature to have ETS manage or approve all IT funds. The departments need flexibility in managing their budget to meet unexpected needs, such as equipment failure or implementation of new laws.
- Who will be responsible for managing department IT audits? Will there be positions created in the centralized IT to support audit responses and remediations.

<ul style="list-style-type: none"> • Every department and department IT groups operate very differently. How do we really understand what each department IT group is doing and are resources available within the department and ETS to properly document that as part of this working group. • There are currently gaps in services within department (i.e., cybersecurity, data governance, procurement management) so some of what is being "consolidated" is really adding additional services. Therefore, the total resources needed to support the "consolidation" will be greater. We need to make sure we don't cut necessary resources under the belief that there should be a reduction due to the consolidation. <p>Can ETS scale properly when there are a lot of projects going on at the same time? Or will departments just have to wait until ETS resources are available to support a project.</p>
assessing the responsibilities of the department/divisions, mandated policies of the department, current situations including personnel, state of equipment/systems, future plans or plans already in progress;
Include all IT professionals in the critical and ongoing discussions. Engage in ongoing dialog that encourages all to speak to what's on their minds.
<ol style="list-style-type: none"> 1. Prioritize assisting the departments that lack sufficient IT staff to provide effective IT services. 2. Recognize the importance of institutional knowledge and how departments are currently structured to support business applications and services.
<p>Keep in mind that for the State there is no one size fits all solution. Each department operates somewhat differently. It is easy to say consolidate everything in a few years but, each department has been running fairly independently since the early 90's with sporadic influence of ICSD (predecessor to ETS). That being said, no department does things exactly the same. This makes the one size option not really possible to implement rapidly. We are more in favor of the ETS setting policy and standards with each department retaining their IT to implement. We find this option to be the least disruptive. Existing IT knows the department's landscape to implement policy quicker. I understand this would be similar to how procurement consolidation is being handled. Central spo office to set policy/procedure with central department procurement offices for implementation. However, ETS needs to be a bit more forceful in implementing policies. Do keep the opt-out option and have a formal process for exemption. From our standpoint current ETS policies are more viewed as optional by department upper management.</p>

4. What impacts do you foresee as a result of the consolidation work?

Answers:

<p>Keeping an open mind. I hope to see improved efficiency, leveraging of resources, increased communication, improvements in the recruitment of qualified IT staff, training efforts and opportunities to keep up skills up to date in support of the organization and end users.</p>
<p>1) Business units within the department may lack the technical expertise required to support a complex application so business unit may have reduced confidence in IT</p>

2) Some centralized software tools may not be the best fit to support a department's needs
3) There may be little flexibility in deviating from the norm
The transition would be the hardest so we need a lot of buy in from the IT staff and how this change will help them and the State.
We need to avoid a "drop" in performance in any of the IT areas that could be consolidated. Be aware of the federal/Special/Grant funded positions and programs. These areas bring "new" money into the state of Hawaii economy.
I think it will be hard to get right and will cause significant disruption and extra expense in the short and medium term, with savings beginning to arrive in time for the pendulum to swing back toward distributed services. Not to be overly cynical, but this degree of change is obviously fraught with challenge and risk.
The effectiveness of the business would be very inefficient without direct support from IT staff that understand the functionality of the Department.
<p>I foresee some of the same issues that we have with centralized HR:</p> <ul style="list-style-type: none"> -Centralized body can't meet the demand of all the departments. -Centralized body can't adjust to department needs or are slow to change standards and policies. Departments are unable to keep current with standards or technology. -Additional step to get approval from both internal HR and centralized HR. -Focus has shifted to making the job of the centralized body easier and not on meeting the needs of the departments. -Slow response to correct issues. Centralized body doesn't understand when needs are urgent or is unwilling to expedite work.
possibility of having a designated ETS staff member(s) assigned to our department/division, makes for easier communication; possibility of building a state computing center at a new location with reliable power, ideal physical location, where multiple departments can utilize and house systems
Widespread confusion, fear and trepidation because of changes being made to an entrenched structure that struggles to provide reliable service, cost effective solutions, and standard enterprise-wide policies.
<ol style="list-style-type: none"> 1. Increased and better defined IT shared services. 2. Increased communication from ETS. 3. Hopefully not the helpdesk black hole for departments that already have a working ticket system.
Impacts to the department would vary depending upon what "solution" is selected. The central planning/decentral implementation would cause the least disruption. Centralizing everything would create the most havoc. Undoing almost 30 years of independence in such a short time span without major funding and staff would be extremely difficult. Even if going with the central/decentral option it will already take a long time to get to all of the ETS standards. There is currently no funding and staffing to implement such changes such as integration of independent networks into EAD. This is only speaking to the physical aspects of network and computing. It does not speak to issues like how things are acquired, projects are consulted on and approved within departments as well as other duties performed by local IT staff.

5. What opportunities do you foresee for you or your organization?

Answers:

Perhaps better leveraging of resources enterprise wide and enhanced abilities to move the needle on improvement projects that has suffered from limited resources and staff bandwidth.
<ul style="list-style-type: none"> 1) Resources such as project management may be available 2) Reduced costs (software, cloud hosting, etc.) 3) Implement newer technology quicker 4) Access to more shared services
I like the idea of ETS becoming the Broker for Vendor services and the creation of a software factory for pilots and prototypes. The expanded help desk would greatly assist our users with their general questions on hardware/software and give us more time to work on department specific questions.
Better support for general area, which should include: services, applications, and infrastructure.
There could be cost savings overall in certain areas where the state can use the volume concept for purchases.
Centers of excellence and a la cart offerings for cross-cutting services (rdbms, crm, travel, cms, erp, accounting management tools).
A broader view of how other State Departments work.
<ul style="list-style-type: none"> -Support from more experienced staff than departments are able to hire internally. -Easier to implement centralized services -Reduction in licensing costs -Better governance and IT controls
None at this point.
<ul style="list-style-type: none"> 1. The opportunity to contribute to the committees to strengthen shared services. 2. The opportunity to have the discretion to organize our department IT required by the department's mission. 3. The opportunity to voice my department's suggestions for reorganization.
Once full standardization is achieved I can see the potential for easier movement between departments. It should take less time for staff to "get used" to the new environment. I'm sure that there will be more opportunities to provide consolidated service options like office365 and Adobe. These are very helpful as it allows us to provide services that we would under normal circumstances couldn't afford due to economies of scale. On going training would be a plus as well.

6. How would you like to receive progress reports regarding the IT Consolidation effort?

ETS envisions forming multiple committees to formulate the final plan due at the end of 2023. The following is a list of the committees. Each committee will have specific objectives that they are expected to meet and turn in their final work for the overall IT consolidation plan. Working group members were asked to volunteer for one or more of these committees, which will be chaired by an ETS employee responsible for facilitating the group's decisions.

Proposed Committees

Committee Name	Number of Volunteers from Working Group
Human Resources Plan	10
Governance Structures	5
Organizational Structures	10
Sourcing and Procurement Strategy	6
Financial Model	8
Project and Portfolio Management Strategy	4
Change Management Plan	5
Communication Plan	0
Provider (or Vendor) Management Plan	6
Facilities Strategy and Management Plan	6
IT Network and Communications Plan	6
Service Utilization Management Plan	4
Workforce Development and Recruiting	5

The work of the Communications Plan will be combined a Change Management Plan with due to a lack of participation.

Of the 22 working group members, 19 members are willing to be on committees.

Committee Membership

No.	Member's Department	What committee(s) are you interested in participating in?
1	Dept of Transportation, Administration	IT Network and Communications Plan; Facilities Strategy and Management Plan; Service Utilization Management Plan
2	Dept of Budget and Finance	Human Resources Plan; Governance Structures; Sourcing and Procurement Strategy; Provider (or Vendor) Management Plan; Workforce Development and Recruiting; Financial Model
3	Dept of Transportation, Airports	Human Resources Plan; Organizational Structures; Financial Model; Facilities Strategy and Management Plan
4	Dept of Transportation, Highways	Human Resources Plan; Organizational Structures; Financial Model; Facilities Strategy and Management Plan
5	Dept of Health	IT Network and Communications Plan; Governance Structures; Project and Portfolio Management Strategy; Change Management Plan; Workforce Development and Recruiting
6	Dept of Business, Econ. Dev., and Tourism	Governance Structures; Organizational Structures; Project and Portfolio Management Strategy; Service Utilization Management Plan; Change Management Plan; Human Resources Plan; Sourcing and Procurement Strategy; Provider (or Vendor) Management Plan
7	Dept of Labor and Industrial Relations	Workforce Development and Recruiting; Governance Structures
8	Dept of Commerce and Consumer Affairs	Project and Portfolio Management Strategy; Financial Model; Change Management Plan
9	Dept of Public Safety	Provider (or Vendor) Management Plan; Change Management Plan
10	Dept of Taxation	Project and Portfolio Management Strategy; Organizational Structures

11	Dept of Hawaiian Home Lands	Organizational Structures
12	Dept of Attorney General	Organizational Structures; Sourcing and Procurement Strategy
13	Dept of Human Resources Dev	Workforce Development and Recruiting; Human Resources Plan; Facilities Strategy and Management Plan; Organizational Structures
14	Dept of Land and Nat Resources	Human Resources Plan; Provider (or Vendor) Management Plan
15	Dept Accounting and General Services	Organizational Structures; IT Network and Communications Plan; Human Resources Plan
17	Dept of Defense	Workforce Development and Recruiting; IT Network and Communications Plan; Sourcing and Procurement Strategy; Financial Model
18	Dept of Attorney General	Provider (or Vendor) Management Plan; Human Resources Plan; Sourcing and Procurement Strategy; Financial Model; IT Network and Communications Plan; Service Utilization Management Plan
19	Dept of Human Services	Human Resources Plan; Organizational Structures; Sourcing and Procurement Strategy; Financial Model; Change Management and Communications Plan; Service Utilization Management Plan; Facilities Strategy and Management Plan; IT Network and Communications Plan; Provider (or Vendor) Management Plan
19	Dept of Transportation, Harbors	Human Resources Plan; Organizational Structures; Financial Model; Facilities Strategy and Management Plan

Of the 16 departments, 15 have agreed to participate in committee work. Representation by Agriculture was not yet received as of the time of this report. Law Enforcement currently does not have representation, and contact will be established once the new department is operational.

Appendix C: Studies and Analysis

Analysis on consolidation efforts and various shared services models utilized by sister states will be included in the in the scope of planning year and the work of the committees. ETS has data on what Minnesota, North Carolina, Maryland, and Louisiana have done that can be studied and possibly leveraged. The CIO's affiliation with the National Association of State CIO's (NASCIO) will be helpful in conducting further research and informing the work of committees.

Appendix D: Working Group Meeting Minutes

Act 179 Working Group Meeting 10/7/22

Attended: Doug Murdock (*initials DM*), Jennifer Halaszyn (*initials JH*), Darren Cantrill, Ryan Shimamura, David Keane, Wade Kamikawa, Linda Inouye, Joan Delos Santos, Linda Inouye, Jason Azus-Richardson, Judy Yamada, Lynn Youmans, Corey Higa, Lila Loos, Susan Yonemura, Blair Goto, Tracy Ban, Dexter Lee, Todd Omura, Antonio Querubin, Jussi Sipola, Kevin Richardson, Bob Hiltner, Amy Saito, Steve Sakamoto, Robert Sequeira, Derek Sodetani, Susan Yonemura.

DM provided a slide deck presentation How to attract high quality info technology professionals to the State. (See also Attachment A, "CIO's Preliminary Proposal.")

- Slide: Background
- Slide: Consolidation models-expand shared services model
- Slide: Working group plan
- Slide: Year 0: ETS' current activities
- Slides Yr. 1, 2, 3: Combine resources in the same building. DAGS, DLIR, ETS
- Slide: Open Questions
- Slide: Plan Contents draft
- Slide: Enablers
- Slide: Work breakdown schedule. Provide real practical advice for tools and training to depts so they can run their own projects and process improvement events.
- Slide: Workforce Recruiting & Development. Working group can discuss list of possible opportunities.
 - How to attract high quality info technology professionals to the State.
 - How do we create better position descriptions?
 - How do we enhance mobility?
 - There may be careers that don't require a college degree.
 - Should we have a career depts. Starts in ETS go out. Or start in Depts and come into ETS.
- Slide: Guiding principles. Only one CIO but there can be other IT directors/IT managers.
- Slide: Statutory changes to HRS 27-43? Possibly change dept name.

- Comment from attendee: Like capturing savings. It is important to getting anything done.
- DM: Provide real practical advice for tools and training to depts so they can run their own projects and process improvement events.
- DM: Replied that he recently met with Sen. Moriwaki who wants to reduce people to save money. My response was that IT is already under-staffed and under-funded. Sen. Moriwaki brought up example of an attached agency having issues. That agency only has 1 or 2 people, who already can't support the dept and all agencies under it.
- DM: Need to not just shave costs continually, need to be able to reinvest. This will be a high priority. Don't want to lose people and lose money. Don't want to do anything that will make things worse. Anything we do should make things better.
- DM: I want to emphasize that the Leg expects ETS to do something. The Working Group cannot choose to do nothing. Unless we come up with significant activities to make things better, that will lead to Leg consolidating IT to one dept if you don't participate. Want to avoid having something done to us that is something that we don't want to have happen.

DM exits to allow Working Group to have a feedback session. JH facilitates the rest of the meeting.

Feedback/Discussion

- JH: Now that CIO provided the background and vision for IT consolidation, we want to launch this group and include all the necessary stakeholders. Will do several things.
 - Share DM's PowerPoint slides
 - Collect anonymous stakeholder feedback
 - Collect committee sign ups
- JH: Stakeholder feedback form is to help the working group form a plan and will become an appendix to the legislative report. Want to encourage candor. Collect thoughts outside of the meeting. Any discussion will be anonymous and consolidated.
- Comment from attendee: Are we using the feedback process to come up with a plan? Do we have a plan already? i.e., One area is shared services. What is the strategy?
- JH: The feedback form is not necessarily designed to come up with a strategy. It's to collect key considerations for committees to use to come up with a strategy. Recommendation is to use the shared services model. Committees to validate the strategy or does it need to be tweaked.

- Comment from attendee: Do we know where the pain points are now?
 - JH: Baseline user surveys is what CIO was referencing. Data needs to be collected.
-
- Comment from attendee: Confirming we don't have an inkling of a plan yet?
 - JH: Want to start from studying the information.
-
- Comment from attendee: Feedback form requires logon to Office 365. Will the form collect your name?
 - JH: It is truly anonymous.
-
- Comment from attendee: Due date for report, very little time to get the report done. Any idea what elements on what will be in interim report on how shared services be implemented?
 - JH: CIO has provided some information and direction. He will elaborate it, has ideas on what the strategy will look like. A plan on how to study it will necessary and then we can determine if it is in or out of scope.
-
- Comment from attendee: When are the surveys due?
 - JH: End of October
-
- JH showed the survey and went over 7 questions. Baseline survey on how we want to formulate some of the issues and concerns and how we want to drive them to the working group.
-
- Comment from attendee: Many are federally funded in IT depts. What consideration will be made to integrate or not integrate these positions into consolidation?
 - JH: DM brought this to the Leg's attention. Might be restrictions on federally funded projects, and that might not be in scope. We have flagged it as an issue and barrier. The committees need to look at and make a recommendation on what is out of scope.
-
- Comment from attendee: Wants slide deck.
-
- Comment from attendee: There are 13 committees. What's the time commitment?

- JH: The planning year is all of 2023 and committees will be responsible to meet to come up with a plan for their specific topic. I'd suggest a cadence of 1 meeting month per month. Committees can determine. May consolidate the committees depending on level of engagement. Fixed period to get first draft. ETS will prepare the first draft and then distribute for comment.
- Comment from attendee: Draft doesn't exist yet?
- JH: No. It's sketched out at a high level in CIO's slides. It requires being put in a report format with more elaboration.
- Comment from attendee: when can we see first draft.
- JH: Mid-November. Then working group have several weeks to review and revise. So final first report needs to be done by about December 20th.

Follow-up

- Distribute DM's slides.

Appendix E: Recommended Statutory Changes

ETS as an Executive Branch Department

Per HRS § 27-43, ETS is currently established within the Department of Accounting and General Services, and the Chief Information Officer is also a cabinet-level appointed position. Department of Accounting and General Services has approximately 700 positions, which includes 194 ETS positions. ETS currently does not have autonomy for human resources, budget management, or office space which are controlled by Department of Accounting and General Services. If a consolidation of IT staff across the Executive Branch were to include all IT positions, ETS would grow from 150 positions to between 700 and 800 positions approximately, making it larger than the Department of Accounting and General Services' 500 position count if ETS' positions were excluded from that count. Autonomy for the Executive Branch's central IT organization would facilitate faster administrative decisions, hiring, and the ability to scale services more easily.

Recommendation 1: Amend HRS § 27-43 and § 26 to establish ETS as its own Executive Branch Department, independent of the Department of Accounting and General Services.

Recognize autonomy of UH, DOE, OHA and HHSC

The University of Hawaii, Department of Education, Office of Hawaiian Affairs, and Hawaii Health Systems Corp. currently have their own IT offices and substantial autonomy for governance of IT systems and personnel without ETS oversight. HRS § 27-43 does include a carve out provision for what is not within the scope of the Chief Information Officer.

Recommendation 2: Amend HRS § 27-43 to specify that the Chief Information Officer is not responsible for University of Hawaii, Department of Education, Office of Hawaiian Affairs, and Hawaii Health Systems Corp.

New Name to Reflect Growing Needs of State Government

Trends in both the private and public sectors are to re-brand the traditional role of “Chief Information Officer” as the “Chief Innovation Officer” and to re-focus technology teams away from simple services to development operations (DevOps) centers of innovation. This reflects the increasing perceived value of IT work not as merely services to manage your data (i.e., information) but rather value-creation services. To bring ETS in-line with market standards and to increase attractiveness as an employer, the CIO should be renamed and ETS should be internally referred to differently.

Recommendation 3: Amend HRS § 27-43 to identify the “Chief Innovation Officer” instead of “Chief Information Officer”.

Information Technology Steering Committee

Per HRS § 27-43, the CIO is assisted by an Information Technology Steering Committee (ITSC) that is comprised of thirteen (13) members who are appointed by the Senate, House, and Chief Justice, Governor, Superintendent, and UH President. As the ITSC’s current composition is highly concentrated within government, to encourage public investment in government infrastructure, and to align with private sector trends, the composition of the ITSC should be changed to a board/commission governed under HRS § 26. This will empower this governance body to have formal decision-making authority that is balanced with the Governor’s agenda for State IT and give ETS additional continuity.

Recommendation 4: Amend HRS § 27-43(b) – (e) to refer to an Information Technology Steering “Board” governed by HRS § 26, instead of “Committee”.

Executive Order(s)

Future plans may include recommendations for certain Executive Orders to operationalize changes such as funding streams and new policies governing for IT systems and personnel.

Appendix F: Explanation of IT Organization models

Here are some of the IT consolidation models seen in various sister states:

- Centralized Planning (Governance) – Decentralized Execution
- Reserved Rights
- Decentralized Planning – Decentralized Execution
- Centralized Planning – Centralized Execution
- Shared Services

Hawaii proposes using the Shared Services model.

Attachments

Attachment A: CIO's Preliminary Proposal

Consolidation: Senate Bill 3284 SD2 HD2 CD1

- Establishes a technology services consolidation working group
- To develop a plan for the **phased consolidation** of all state executive branch information technology services and staff,
- Under the Office of Enterprise Technology Services.
- **Where determined practicable** by the working group,
- Excluding those of the Department of Education, Hawaii Health Systems Corporation, University of Hawaii, and Office of Hawaiian Affairs,
- Requires the working group to recommend ways to **attract high-quality information technology professionals** to the State
- And **report to the Legislature 2 times**, interim and final, before 2023 and 2024 sessions.
- Dissolves the working group on 12/31/2023. (CD1)
- Five years phase-in period
- https://www.capitol.hawaii.gov/session2022/bills/SB3284_CD1_.htm

10/24/2022

Phasing over 5+ years

Meeting Soon

WORKING DRAFT

5

Consolidation: YEAR 0 (23/24) EXPANDED SHARED SERVICES

- Establish IT Governance Process in Each Department
- Cybersecurity Inside Departments
- MyHawaii ID Program
- Chief Data Officer
- Workforce Consolidation Development & Training Plan
- IT Purchase Agreements
- Standards
- Baseline User Satisfaction For Next Year Projects
- Data Center & Cloud

10/24/2022

These projects are underway

6

Consolidation: WORKFORCE RECRUITING & DEVELOPMENT

- New Position Descriptions
 - Enhanced for modern terminology and duties
 - Consolidated state-wide
- Formalized Internship Program
- Exempt Positions (See HRS 27-43 and SB 3284 Sec 2a2)
- Qualifications other than College Degree
- Training Program
- Career Path thru Departments and ETS

Digital Transformation of SOH Government

analyze data to
make it more
decision ready

TRANSFORMATION IS A CONTINUOUS PROCESS

10/24/2022

WORKING DRAFT

8

Consolidation: ETS TRANSFORMATION

- ETS becomes Broker for Vendor Services
 - Vendor Management with Contracts for Projects
- Change Special Fund Use from Personnel Costs to Innovation
- Create Software Factory to Build Prototypes and Pilots
- Create Data Office to Help New Chief Data Officer
- IT Training, Career Tracks, funding for Certs (Need High Level HR Staff)

Consolidation: PLAN CONTENTS

- Executive Summary
- Background
- Scope and Assumptions
- Process
- Workforce Enhancement
- 5 Year Consolidation Plan
- Attachments
 - Studies & Analysis
 - Workgroup Meeting Minutes
 - Recommended Statutory Changes
 - Organization Charts
 - Executive Order
 - IT Personnel Counts by Department
 - IT Contracts funded by Department

Consolidation: ENABLERS

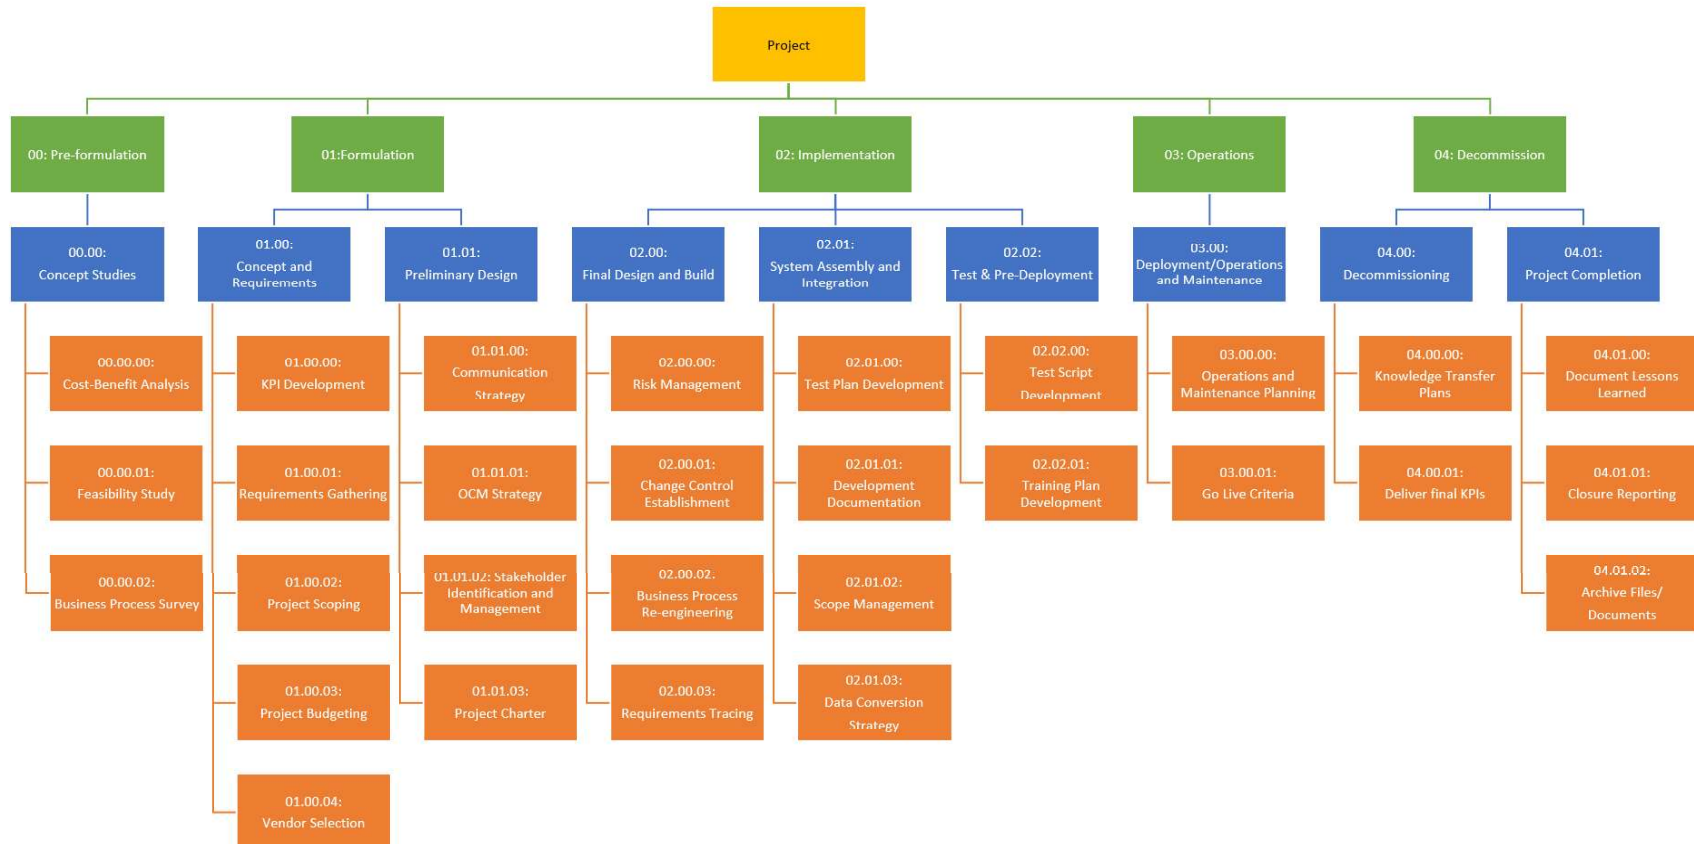

- Budget and occupied/empty position count/type analysis of departmental IT
- Authority and process for budget and position transfer
- Reorganized ETS structure
- Enhanced consolidated HR Position Descriptions & Recruitment Plan
- Departmental IT Services Manager Position Description
- Departmental IT Governance and strategic planning
- Memorandums of Agreement/Understanding
- Service Catalog, Work Breakdown Structure and RACI Charts
- IT Product & Service Catalog and Procedure
- Service Level Agreements & User Satisfaction Surveys
- Location decisions (central or decentralized)
- Procurement vehicles for brokering and vendor management

WORKING DRAFT

11

Statewide Project Management Office Work Breakdown Structure

10/24/2022

12

Consolidation: WORKFORCE RECRUITING & DEVELOPMENT

- Aligning IT job titles, classifications and descriptions more closely to the private sector
- Reskilling current employees to meet modern IT demands
- Streamlining the hiring process and reducing time to hire
- Expanding flexible work schedules
- Increasing remote work options
- Promoting non-salary benefits like greater stability and diversity of experience
- Call to public service
- Building talent pipelines (e.g., partnering with local colleges/universities/technical schools)
- Sponsoring community awareness events
- Opportunity to work in capital city
- Expanding flexible/remote work
- Hiring employees residing out of state
- Targeting non-traditional communities (veterans, non-degreed, etc.)
- Modifying job pre-requisites ([e.g.](#) education requirements)
- Public/private partnerships

Consolidation: YEAR 0 (22/23) LEGISLATIVE AGENDA

- Status Briefings
- Disaster recovery and Business continuity analysis
- ETS Statutory Change Recommendations
- Digital Service Recommendations
- Any Changes to Consolidation Statute
- Expedited Procurement Tools
 - Piggy-backing
 - ETS Authority
 - CIO as HOPA

10/24/2022

WORKING DRAFT

14

Consolidation: YEAR 1 (23/24) EXPANDED SHARED SERVICES

- Teams Calling
- Internet/network inside departments
- Common VPN/VDI
- Help Desks
- PC and device purchasing and support
- Small Department option
- Cloud Contracts
- Baseline User Satisfaction For Next Year Projects

Consolidation: YEAR 2 (24/25) EXPANDED SHARED SERVICES

- PM of Systems in design, development and implementation (DD&I) process
- Baseline User Satisfaction For Next Year Projects

Consolidation: YEAR 3 (25/26) EXPANDED SHARED SERVICES

- Transition PM of Existing Major Systems

Consolidation: Guiding Principles

- One CIO
- Baseline User Satisfaction
- No Chargeback unless driven by funding source
- Efficiency savings invested in IT
- Technical debt tracked and prioritized
- Advisory and Assistance Services

Consolidation: STATUTORY CHANGES TO HRS 27-43?

- Researching options, could be all new or modification
- ETS as Department, Attached Agency, or status quo in DAGS
- ITSC as advisory committee or change to board or commission
- Departments with autonomy (UH, DOE, HHSC, OHA)
- New Name
- Funding
 - Resource Study
 - Investment Fund
 - Special Fund
 - Fee for Service

Attachment B: Existing Expedited Procurement Methods

The following is a list of IT-related price and vendor lists managed by SPO, and ETS' involvement is noted within each. The State of Hawai'i is a member of the National Association of State Procurement Officials (NASPO), and the Chief Information Officer is a signatory to two NASPO contracts, 17-18 and 23-08.

08-13 Internet Portal Manager and Service Provider	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	January 3, 2025
Effective	May 1, 2022
<u>Summary:</u> Internet Portal Services is a self- supporting and cost-effective Internet Portal that provides enhanced access to public information and services. The key components of the Portal system are a "home page" that is designed from a customer or citizen point of view, applications that support on-line processing of licenses, filings, permits, applications, renewals, and database searches, and presentation of information to citizens and businesses. Primary funding for the portal comes from transaction costs or additional portal fees for enhanced or value-added services. Under the self-supporting model, multiple revenue sources are identified and established by the Access Hawaii Committee (AHC) to fund the enterprise portal initiative. This contract is for front-end Web applications to deliver information and services, including: <ul style="list-style-type: none">· Web site and application development;· Web site and application maintenance;· Web site and application hosting;· Marketing;· Customer service;· Payment portal and account management;· Portal development and maintenance; and	

- Mobile web applications

To facilitate the integration of application development with State and County systems, the Contractor will provide the following at no additional expense:

- Data conversion to port data from the existing back-end systems or other data sources to the Portal at the Contractor's expense; and
- Development, maintenance, and troubleshooting interfaces to transfer information bi-directionally between the Portal Partner's system and the Portal. Unless separately negotiated between the Portal Manager and a Portal Partner, any computer and/or communications hardware, software, or service required to implement these interfaces shall be at Contractor's expense, inclusive of all onetime and recurring costs.

12-12 Network and Telecommunications Services, Furnish, Deliver, Install, and Manage

- Provision of information on how to access a Software Publisher's "Help Desk" (either telecom or web-based) for basic use questions.

SOW ITEM 5: Customer Service and Representation

- Dedicated Representation and Timely Response. Reseller shall provide a dedicated representative for each Participating State. Such representative will become familiar

with the State and its cooperative partners, provide a single point as needed for quote assistance, offer software recommendations, track and report on renewal deadlines, and serve as a contact point for the LSCA. Reseller must commit to returning phone calls or responding to emails within two (2) business days.

17-02 Office Supplies and Printer Cartridges	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	May 04, 2024
Effective	August 04, 2022
<p><u>Summary:</u></p> <p>Agencies can purchase items on the published vendor price list (pgs 13-20) without obtaining additional quotes.</p> <p>GROUP 1: General Office Supplies --- Not awarded, go to “Vendor List Instructions” on page 21 of the vendor price list.</p> <p>GROUP 2: Recycled Office Paper --- Page 13 of the vendor price list.</p> <p>GROUP 3: OEM Printer Cartridges --- Page 15 of the vendor price list.</p> <p>GROUP 4: Dated Products --- Page 20 of the vendor price list.</p>	

17-16 CENTREX Telephone and Telephone Cabling Services	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	May 31, 2023
Effective	October 13, 2022
<p><u>Summary:</u></p>	

The general scope of this price list contract covers two (2) categories, Centrex Telephone (Section Three) and Telephone Cabling (Section Four) services statewide.

The first category (Section Three) is Centrex Telephone which covers Centrex single line and multi-line telephone service statewide. Abbreviated five digits and toll-free 8-1-808 dialing should be provided between State users on all islands. Access must be provided to all local, wireless, long distance, and international telephone systems. Associated telephone services like voicemail, Automatic Call Distribution, ISN BRI (for multi-line service in 5ESS central offices), and telephone instruments must be provided. Also, simple installation and complete repair service for structured cabling (telephone and data), as well as the materials needed to provide the services shall be included. This service was awarded to Hawaiian Telcom, Inc.

The second category (Section 4) is for cabling only and not for installation, repair, or provisioning of Centrex service which is covered by Section 3. Participating jurisdictions will have the option of utilizing either Section Three or Section Four for installing cabling; however, it is expected that Section 4 will principally be used for large cabling project (10 lines and over). This service is awarded to Communication Consulting Services, Inc. for the island of Oahu to Hawaiian Telcom, Inc. for the island of Hawaii, Maui, Kauai, and Molokai/Lanai.

17-18 NASPO ValuePoint Cloud Solutions	
ETS Involvement: CIO approves IT Purchases >\$100,000 and CIO signs NASPO addendum	
Expires	September 15, 2026
Effective	October 3, 2022
<u>Summary:</u> **NOTE** Summary only. Please be sure to reference latest published price list for configuration dollar limits, restrictions and other details. The purpose of this contract is to provide Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service (IaaS). During the term of the contract, awarded	

vendors may request for inclusion of new and improved technology products pending approval from the Lead State Contract Administrator.

Infrastructure as a Service (IaaS) - is defined the capability provided to the end user to provision processing, storage, networks, and other fundamental computing resources where the consumer is able to deploy and run arbitrary software, which can include operating systems and applications. The end user does not manage or control the underlying cloud infrastructure but has control over operating systems, storage, deployed applications; and possibly limited control of select networking components (e.g. host firewalls).

Platform as a Service (PaaS) - is defined as the capability provided to the consumer to deploy onto the cloud infrastructure end user created or-acquired applications created using programming languages and tools supported by the provider. This capability does not necessarily preclude the use of compatible programming languages and tools supported by the provider. This capability does not necessarily preclude the use of compatible programming languages, libraries, services, and tools from other sources. The end user does not manage or control the underlying cloud infrastructure including, network, servers, operating systems, or storage, but has control over the deployed applications hosting environment configurations. Cloud Solutions 6 SPO Vendor List Contract No. 17-18 07/07/2017 to 09/15/2026

Service Level Agreement (SLA) - means the SLA obligations the service provider publishes in its service terms or a written agreement between both the Purchasing Entity and the Contractor that is subject to the terms and conditions and relevant Participating Addendum unless otherwise expressly agreed in writing between the Purchasing Entity and the Contractor. SLA's should include: (1) the technical service level performance promises, (i.e. metrics for performance and intervals for measure), (2) description of service quality, (3) identification of roles and responsibilities, (4) remedies, such as credits, and (5) an explanation of how remedies or credits are calculated and issued.

Software as a Service (SaaS) - is defined as the capability provided to the consumer to use the service providers, Contractor's or third party applications available in the service provider's marketplace running on a Contractor's infrastructure (commonly referred to as "cloud infrastructure). The applications are accessible from various client devices through a thin client interface such as a Web browser (e.g., Webbased email), or a program interface. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user-specific application configuration settings.

Fulfillment Partner - means a third-party contractor qualified and authorized by Contractor, and approved by the Participating State under a Participating Addendum, who may, to the extent authorized by Contractor, fulfill any of the requirements of this Master Agreement including but not limited to providing Solutions under this Master Agreement and billing Customers directly for such Solutions.

18-03 Mailroom Equipment, Supplies, and Maintenance - STATEWIDE

 Category 9: Inspection & Monitoring

- Fire Extinguishing Systems
- Fire Sprinkler Systems
- Alarm Monitoring
- Fire Alarm/protective Signaling Systems

18-11 Long Distance Telephone Services	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	March 17, 2023
Effective	May 27, 2022
<u>Summary:</u> Hawaiian Telcom, Inc. is the authorized contractor to provide Long Distance Telephone Services to the State of Hawaii. Inter-island and inter-state long distant telephone rates, regulatory fees, and international long-distance telephone rates, and miscellaneous services are listed.	

19-19 NASPO ValuePoint Procurement of Acquisition Support Services (PASS)	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	June 5, 2023
Effective	June 6, 2022

Summary:

The following 13 categories are included in this contract for acquisition support services.

(1) Specifications/Scope of Work Review - This category of services is for the review and/or assistance in development of a scope of work (SOW) or specification(s). Services within this category are as follows:

- Review Services
- Requirement Analysis
- Specification Writing (Technical)

(2) Procurement Strategy/Acquisition Strategy Plan - Contractor shall provide advice and recommendation for all elements in acquisition plans, including approaches, options, strategies, risks, contracting methods, competition, sources, cost, milestone schedule, etc. Contractor shall research existing Government-wide contracts for available products and services, evaluate different approaches to and sources for acquisition support, and research available suppliers and compare services and costs of obtaining support from the different providers

(3) Independent Government Cost Estimate - An Independent Government Cost Estimate (IGCE) is a tool developed by government personnel to estimate the costs incurred by a Contractor in the performance of a contract. The IGCE is an unbiased realistic cost estimate that reflects a clear understanding of all the requirements. Services within this category include:

- Data Collection
- Sufficiency Review
- Data Analysis
- Results Reporting

(4) Market Research - Market research refers to the examination of available sources to find the available sources of supply which may identify critical business requirement.

(5) Cost & Pricing Analysis - A Cost & Pricing Analysis conducted before a Request for Proposal (RFP) is released will assist a State in determining how to capture all costs related to a project, determine which method is best for evaluating cost, and if the budget for said project is realistic.

(6) Solicitation Review or Preparation - The solicitation document is the official document inviting the vendor community to respond to the needs of the government entity. Services within this category would be review services and RFP development.

(7) Source Selection - Source selection planning entails: preparing to receive bids or proposals, preparing to apply evaluation criteria, and determining standards to select a Contractor. The Source Selection Plan (SSP) should include: evaluation criteria, evaluation standards, weighting system, screening system, and source selection process.

(8) Cost Realism Analysis - Cost Realism Analysis may be requested by States to determine if all components of cost have been contemplated from all vendors. Determining if cost proposals are acceptable and fair will assist States in a successful evaluation and award of a contract which is in the best interest of the State. Cost realism is about the system of logic, the assumptions about the future, and the reasonableness of the historical basis of the estimate. It's about the estimating information (cost data) that makes up the foundation of the estimate.

(9) Contract Development/Contract Formation - Contractor shall provide assistance to the government entity in the formulation of the contract between the awarded vendor and government entity.

(10) Contract Management - Contract management refers to post-award type activities, such as contract implementation, contract administration, measurement of work completion and payment computation. Moreover, it involves the monitoring of a contract, making important changes and modifications to the contract and dealing with related problems. Activities in contract management facilitate a positive working relationship between the government

customer, procurement staff, and the contractor for the successful implementation of the contract award. Acquisition consultants can assist the government procurement staff and program managers in various capacities of administration and facilitation with the contractor, not including any inherent governmental duties. Service categories include:

- Contract Administration
- Vendor Performance Plan Development/Review
- Contract Modifications

(11) Vendor Performance Evaluation Program - Contract closeout involves several activities. Unlike a purchase order where receipt of the items ordered and subsequent payment constitute closure, a contract requires documentation to the contract file that includes a written report with the description and analysis of the Contractor's performance. A quality vendor performance review (aka performance evaluation) assesses how the vendor is performing against Key Performance Indicators (KPI)'s and Service Level Agreements (SLA)'s established in the vendor's contract. However, it can also show noncontractual performance issues, such as incidents that aren't measured by a service level. This does not include vendor performance evaluation for construction contracts.

(12) Procurement Policy - Procurement planning is part of the annual budgeting process. Each departmental head is responsible for planning his/her project's estimated procurement needs on an annual basis through the use of the annual procurement plan (APP), which indicates the items to be bought in the various quarters of the year.

(13) Category Management - Category management is a strategic approach to purchasing that allocates a government's procurement resources into specific categories of spending to be analyzed by category managers and aligned with the marketplace through in-depth spend and market analyses. Services within this category are as follows:

- Data Analysis
- Supplier Analysis
- Action Plan Development
- Organizational Restructure

- Product and Service Catalogs

20-07 NASPO ValuePoint Copiers & Managed Print Services	
ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires:	September 30, 2026
Effective:	December 16, 2021

The Contractor must perform vulnerability assessments, privacy impact and policy assessments, and evaluation and analysis of internal controls critical to the detection and elimination of vulnerabilities to the protection of Data, as defined by a Purchasing Entity.

Category 2 – Incident Response Services

The Contractor must provide a general call center that may be reached via toll free number twenty-four hours per day, seven days per week (24x7), every day of the year. If the incident requires an on-site Contractor presence, the Contractor must be on-site within one (1) business day of request, or as mutually agreed on the Order.

Because of the sensitive and confidential nature of information and communication surrounding an Incident, the Contractor must ensure all communication is through secure channels and disclosure of Incident information is limited to identified Purchasing Entity personnel and limited to a need to know basis (as defined by the Purchasing Entity) for all others.

Category 2 services include: containment services, eradication services, recovery services, forensic and analysis.

Category 3 – Breach Coach Services

The Contractor must ensure all Breach Response Specialists that provide services are trained experts in the field relevant to the services ordered, who possess the experience and qualifications identified in the Contractor's response to Category 3 Breach Response Specialist – Experience and Qualifications.

The Contractor must possess well-rounded knowledge of the Breach life cycle from start to finish including, but not limited to the investigation process, regulatory requirements, and consumer and business notification rules and expectations.

22-15 Document Shredding and Related Services

ETS Involvement: CIO approves IT Purchases >\$100,000	
Expires	May 31, 2024
Effective	August 30, 2022
<p><u>Summary:</u></p> <p>Purpose of this contract is for the contractor to provide services to shred, incinerate, disintegrate, or otherwise destroy any type of paper items (white and/or NCR/color paper), microfilm, microfiche, x-rays, computer tape, CDs, VHA tapes, audio cassettes, computer hard drives and other storage media. The contractor can provide these services on-site and/or off-site for State agencies.</p> <p>Contractors will allow either scheduled pick-up, on-call service, or on an as-needed basis. Agencies shall specify whether they prefer scheduled or on-call service. Those agencies that only need service on an as-needed basis shall notify the Contractor when service is needed. Agencies using the scheduled pick-up option shall note what type of service plan they require. Agencies have the option to change their service plan within five (5) business days before their scheduled pick-up.</p> <p>If requested by the agency, the Contractor shall allow an agency representative to witness the shredding process. The Contractor shall perform all services to the sole satisfaction of the agency as specified herein. The Contractor shall understand that an agency representative may, at any time throughout the contract, accompany the Contractor during the collection, hauling and shredding being conducted by the Contractor. The Contractor shall not restrict in any way or limit the agency's right or ability to oversee shredding of the agency's confidential documents provided by the Contractor.</p> <p>The Contractor shall perform services during normal State working hours from 7:45 am to 4:30 pm, Monday through Friday, excluding official state holidays.</p>	

23-07 NASPO ValuePoint Citizen Engagement Platform
ETS Involvement: CIO approves IT Purchases >\$100,000

Expires	September 14, 2026
Effective	October 13, 2022
<p><u>Summary:</u></p> <p>This portfolio covers a broad range of citizen engagement solutions in the following categories:</p> <ol style="list-style-type: none"> 1. Platform Management Software solutions offering a variety of applications to help public entities manage systems across platforms. This category includes solutions that answer questions and remember, remind, and respond to users. 2. Master Data Management Software solutions that provide the means to associate various records pertaining to an individual. This category includes technology to ensure uniformity and accuracy of master data assets and coordination of data across all platforms. These solutions also allow a public entity to create and manage a central, persistent system of record or index of record for master data and support ongoing master data stewardship and governance requirements through workflow-based monitoring and corrective-action techniques. 3. Chatbots and Customer Service: Software solutions that provide Robotic Process Automation (RPA) to assist government agencies by responding to frequently asked questions quickly to complete a transaction or find information. 4. Customer Engagement: Software solutions that provide a centralized platform to manage multiple interactions with customers. These solutions offer a platform for studying customer behavior through all channels and touchpoints of interaction such as by phone, in person, or online. 5. Social Listening: Software solutions that allow entities to view the “voice of the customer” across all input channels, such as through email, web forms, social media, and inbound calls. These solutions utilize a dashboard to effectively identify issues, 	

satisfaction, and needs.

6. In addition to the above, contractors in this portfolio may also offer additional value-add items and services, such as identity management, referral engines, user behavior analytics, digital wallets, web hosting, website and web app development, eCommerce services, and payment processing.
7. **Value Add Items/Services:** value added solutions may include, but are not limited to, solutions as - Citizen Engagement Platform 8 SPO Price List Contract No. 23-07 10/06/2022 to 09/14/2026 identity management, referrals engine, user behavior analytics, digital wallets, web hosting, Website & web app development, eCommerce services and payment processing, etc.

23-08 NASPO ValuePoint Software Value-Added Reseller (VAR)	
ETS Involvement: CIO approves IT Purchases >\$100,000 and CIO signs NASPO addendum	
Expires	April 24, 2027
Effective	November 9, 2022
<u>Summary:</u> Software Value-Added Reseller refers to a company that resells software and offers value beyond order fulfillment. Non-SaaS cloud computing products such as Infrastructure as a Service (“IaaS”), Platform as a Service (“PaaS”), and Software provided by a Managed Services Provider are generally out of scope of this Contract. Software Publisher Categories: <ul style="list-style-type: none">• Category I – General Software: Includes all software titles except Microsoft and Oracle<ul style="list-style-type: none">○ Tier 1 – Key Itemized Publishers: Adobe, CA Technologies, Cisco, Commvault, IBM, Red Hat, Splunk, Tableau, VEEAM, VMware○ Tier 2 – Other Itemized Publishers: Autodesk, Barracuda Networks, BMC Software, Check Point Software, Cherwell, Citrix, CPI, CrowdStrike, Dell,	

Delphix, Docusign, Dynatrace, Forcepoint, Fortinet, Google, Informatica, Ivanti, Knowbe4, McAfee, Micro Focus, Mulesoft, Netmotion, Okta, Opentext, Progress Software, Proofpoint, Quest Software, Rapid7, RSA Security, Salesforce, SAP, Solarwinds, Sophos, Spillman, Symantec, Tenable, Trend Micro, Varonis, Veritas, Zoho

- **Tier 3 – Non-Itemized Publishers:** All other publishers
- **Category II – Microsoft Reseller:** Restricted to only Microsoft software products
- **Category III – Oracle Reseller:** Restricted to only Oracle software products and VAR shall be a large account reseller, authorized by Oracle as a Licensing Solution Partner (LSP)

The GSA (General Services Administration) MAS, formerly known as the GSA IT Schedule 70, may be used for IT SERVICES ONLY⁵. More information and procedures to use the GSA MAS is available in this document.

Departments are not permitted to purchase from a GSA contract if there is another active SPO statewide contract for that service. If a department believes it can negotiate better value using the GSA contract, it must include an analysis and justification in written notification to the attention of the CIO. The CIO may negotiate with existing statewide contractors to “meet or beat” the other contract terms, if possible. If CIO determines that “best value” for a department can only be obtained through the GSA contract, it may recommend approval, in writing, on a case-by-case basis.
