# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

## PSAP OPERATION NOTES:

- **Abandoned Calls represent the number of incoming 9-1-1 calls for which the caller had hung up before a call-taker answered. Dropped Calls are hang ups after transfers.**
- **Abandoned Calls are included in the Wireline and Wireless total counts respectively.**
- **All VoIP (Voice over Internet Protocol) 911 calls are combined in the Call Volume statistic.**
- **A New Class of Service (COS): FIXD = Wireless 911 calls to the PSAP via fixed indoor antennas.**
- **0 (911) call with the COS of FIXD were added to the Wireless Phase I (WPH 1) percentage total.**
- **A New Class of Service (COS): WDL1/WDL2 = Wireless 911 calls to the PSAP via fixed indoor antennas with a general location i.e., pool area (WDL1) or a specific area i.e., room 101 (WDL2).**
- **0 (911) call with the COS of WDL1, or WDL2 were added to the Wireless Phase I or Phase II percentage total.**

Definitions
<p>(A) <b>Dispatchable Location</b> - is defined in the FCC 15-9 Docket as the verified or corroborated street address of the calling party plus additional information such as floor, suite, apartment or similar information that may be needed to adequately identify the location of the calling party. Please see Dispatchable Location Section for more information.</p> <p>(B) <b>Master Street Address Guide</b> - Represents corrections made to street records including, street names, address ranges, MSAG Communities and ESNs.</p> <p>(C) <b>Telephone Number Change Request</b> - Represents address corrections on a specific TN or group of TNs. These "invalid" TNs usually have an associated ESN 399 attached to them which indicates the need for validation.</p> <p>(D) <b>Automatic Location Information Discrepancy Record</b> - Represents an address discrepancy discovered during a live 9-1-1 call, from a landline OR a VoIP phone. These record corrections are treated with a higher priority and should be processed within 48 hours if wireline, and 72 hours if a VoIP phone, as a general guideline.</p>

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

---

## MSAG CURRENT MONTH NOTES:

A total of **253** MSAG transactions were processed in 9-1-1 Net during the current month. Nine (**9**) requests were processed relating to the MSAG database. Changes include: changes to high – low street ranges, combining street records, deletion of invalid records, splitting street records to align with Police, Fire, EMS, and inserting new MSAG records.

There were **28** customer ANI/ALI (telephone number/address) records updated as a direct result.

## TELEPHONE RECORD (ALI) TRANSACTIONS CURRENT MONTH NOTES:

VSE (formerly Akimeka) submitted two hundred and forty-four (**244**) TN CRs related to the Dispatchable Location Project during the current month.

## OPEN TELEPHONE RECORD (ALI) DISCREPANCY STATUS:

- **There are currently 1,181 Open TN CR Transactions.**
- **Refer to chart in the next section “TNCR Current Status”**

**1,181** Open TN CR transactions are a direct result of the Dispatchable Location Project and are awaiting approval from Hawaiian Telcom, Inc. VSE (formerly Akimeka) continues to monitor and track the progress of the Referred records. Once a telephone number is submitted to Intrado for correction, it must be verified against HT records and/or approved by the customer. Intrado's internal process requires calling each telephone customer individually for approval to update an address in the 9-1-1 database.

- **There is one open VoIP DR as of March 31, 2023**
- **There are no open ALI DRs as of March 31, 2023**

## Maui County E9-1-1 Status Report

**March 1, 2023 - March 31, 2023**

### TNCR (TELEPHONE NUMBER CHANGE REQUEST) CURRENT STATUS – MARCH 2023

**NOTE:**

- 9-1-1 NET is a secure web-based application that provides access to request changes to the MSAG, ALI, TN, and ESN/ELT data supported and maintained by Intrado for the Telephone Company (TelCo).
- TNCRs are not requests to change Telephone Numbers (TNs); however, it is a corrective process within 9-1-1 NET to modify location information associated with an Automatic Location Identification (ALI) record to a valid MSAG address for 9-1-1 purposes.

<b>PSAP 9-1-1 Telephone Number Location Change Request (Telephone Number Change Request (TNCR) Status)</b>				
<b>County</b>	<b>TOTAL TNCR RECORDS SUBMITTED BY VSE (formerly AKIMEKA)</b>	<b>OPENED TNCRS PENDING FURTHER ACTION BY INTRADO</b>	<b>OPENED TNCRS REFERRED TO TELCO BY INTRADO</b>	<b>TOTAL UNOPENED TNCR RECORDS</b>

<b>TOTAL</b>	<b>1,181</b>	<b>0</b>	<b>596</b>	<b>585</b>

<b>STATUS</b>
<b><u>TOTAL TNCRs SUBMITTED</u></b> - The total number of TNCR requests for modification that have been submitted in 9-1-1 NET.
<b><u>PENDING STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and are pending investigation whether the request is valid or invalid, and/or whether the request requires additional information to validate.
<b><u>REFERRED STATUS</u></b> - TNCRs assigned this status are requests which have been reviewed by the 9-1-1 Database Service Provider Data Analyst, and the request requires additional information to validate. The INTRADO Data Analysts assigns this status to a TNCR and the request is referred to the telephone service providers for further research.
<b><u>TOTAL UNOPENED TNCR RECORDS STATUS</u></b> - The request is submitted by VSE (formerly Akimeka) on behalf the PSAP; however, processing by the 9-1-1 Database Service Provider Data Analyst has not begun.

# Maui County E9-1-1 Status Report

## March 1, 2023 - March 31, 2023

### DISPATCHABLE LOCATION – STATUS AS OF – MARCH 2023

#### NARRATIVE:

During the August 2015 State of Hawaii 911 Board meeting, VSE (formerly Akimeka) provided a “State of Hawaii PSAPs Proposed ALI Compliancy with FCC 15-9” presentation. Based on the 9-1-1 Board’s confirmation to add the “Dispatchable Location” information into the ALI database, VSE (formerly Akimeka) researched the format standards of each pertinent field and tested the delivery of the data to the PSAP. After a few configuration adjustments (eliminating the TelCo comments field from appearing on the ALI Screen), VSE (formerly Akimeka) standardized an additional information data format to proceed with this project. During the month of August 2015, VSE (formerly Akimeka) started a pilot project, entering additional location information to a verified MSAG address with multiple telephone numbers. Specifically, the Queen Kaahumanu Shopping Center at 275 Kaahumanu Ave. The “Dispatchable Location” data is entered into the “Driving Directions” field in the 9-1-1 Net system and will display on the Viper Power 911 ALI Screen in the “Exact” field should a 911 call be received from that telephone number. Screen shots of the “Before” ALI screen, and the “After” ALI screen with the updated “Dispatchable Location” information visible, were presented to the Dispatch Supervisors. VSE (formerly Akimeka) received positive feedback from the 911 Dispatch Personnel because the information that the 911 Call Takers will receive, will certainly cut down on the process of determining the exact location of the 911 caller. In addition to this, VSE (formerly Akimeka) was informed that the Mobile Dispatch Terminals (MDTs) in the Police Vehicles, also are able to view this “Dispatchable Location” information which will reduce the response times for Public Safety. There were **244** Dispatchable Locations submitted in March 2023 and **421** were processed by Intrado. (see next pages)

# Maui County E9-1-1 Status Report

**March 1, 2023 - March 31, 2023**

**SPECTRUM (CHARTER) 9-1-1 VOIP DATABASE VERIFICATION PROJECT – MARCH 2023**

VSE (formerly Akimeka) received the Automatic Location Identification (ALI) records from Spectrum (formally known as Charter Communications) which is the predominant Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As VSE (formerly Akimeka) has access to these ALI Records, VSE (formerly Akimeka) is researching and verifying the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there are invalid MSAG addresses utilized by the VoIP Provider. These records are being identified and will be sent back to Spectrum for corrective action.

<b>*Spectrum (Charter) 9-1-1 VoIP Database Verification Project</b>					
<b>PSAP</b>	<b>TOTAL RECORDS SUBMITTED BY SPECTRUM (A)</b>	<b>TOTAL RECORDS MATCHING &amp; VERIFIED WITH 911 DATABASES (B)</b>	<b>TOTAL RECORDS NOT MATCHING</b>	<b>NON MATCHING RECORDS CORRECTED BY VSE (formerly AKIMEKA) (C)</b>	<b>PERCENT COMPLETED</b>

\* Spectrum VoIP Database received on June 21st, 2017

\*\* VSE (formerly Akimeka) provided VoIP Records with Latitude/Longitude coordinates

(A)	VoIP Database records submitted by Spectrum to VSE (formerly Akimeka) for research and MSAG address validation.
(B)	VSE (formally Akimeka) has researched and verified the VoIP record against an MSAG valid address and GIS data. VSE (formerly Akimeka) is tracking corrections needed to be performed by Spectrum. Addressing data will be updated or added in the GIS if the VoIP record is determined to be valid.
(C)	Verification Process Completed.

**March 1, 2023 - March 31, 2023**

## BANDWIDTH 9-1-1 VOIP DATABASE VERIFICATION PROJECT – MARCH 2023

VSE (formerly Akimeka) received the Automatic Location Identification (ALI) records from Bandwidth which is a Voice over Internet Protocol (VoIP) provider in the State of Hawaii. As VSE (formerly Akimeka) has access to these ALI Records, VSE (formerly Akimeka) researched and verified the VoIP records against an MSAG valid address and the GIS data. This research is a validation of the ALI Record to ensure that the location as provided by the VoIP provider matches the GIS Information utilized by the Public Safety Agencies within their specific County 9-1-1 Service Area. This validation reduces the potential of address or location dispute during a 9-1-1 call.

The analysis of the database records indicates that there were invalid MSAG addresses utilized by the VoIP Provider. These records were identified and sent back to Bandwidth for corrective action.

VSE (formerly Akimeka) will update the chart below as we receive updated ALI records from Bandwidth.

<b>*Bandwidth</b>					
<b>9-1-1 VoIP Database Verification Project *** (Updated)</b>

## MAPPING LAYERS UPDATED (PART IX)

*The 9-1-1 GIS layers provided by VSE (formerly Akimeka) to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.*

MAUI COUNTY		
Type of Layer	VSE (formerly Akimeka) GIS Server	Other/Remarks
	Date Created/ Edits Performed	
<b>CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH &amp; RESPONSE (Listed Alphabetically)</b>		
Street Centerlines	<b>3/8/2023 To 3/21/2023</b>	<b>Delivered 3/22/2023</b>
		Modified range, corrected parity for one (1) record in Lahaina
		Corrected parity for one (1) record in Lahaina
		Corrected street type for one (1) record in Waiehu
		Spatially corrected, updated range for two (2) records in Haiku
		Split centerline one (1) record in Kula
		Partial spatial correction for three (3) records in Kahului
		Split segment, modified range for two (2) records in Wailuku
		Spatially corrected, updated range for one (1) record in Kula
		Updated range for one (1) record in Kula
		Corrected parity for one (1) record in Kula
		Updated elevation for three (3) records in Kahului
		Updated ESN for one (1) record in Kahului
		Corrected parity for one (1) record in Kahului
		Spatially corrected eight (8) records in Haiku
		Updated ESN for one (1) record in Wailuku
		Partial spatial correction for one (1) record in Kula
	Correceted parity, updated range for one (1) record in Paia	
<b>3/1/2023 To 3/7/2023</b>	<b>Delivered 3/8/2023</b>	
	Updated ESN for one (1) record in Pukalani	
Subdivisions		
Tow Jurisdictions		
Tsunami Evacuation Zones		
Tsunami Heights		
Waste Water Plants		

# Maui County E9-1-1 Status Report

**March 1, 2023 - March 31, 2023**

**MAPPING LAYERS UPDATED (PART X)**

*The 9-1-1 GIS layers provided by VSE (formerly Akimeka) to the PSAP are designed for use on E9-1-1 and NG9-1-1 systems.*

MAUI COUNTY		
Type of Layer	VSE (formerly Akimeka) GIS Server Date Created/ Edits Performed	Other/Remarks
<b>CRITICAL 9-1-1 PUBLIC SAFETY LAYERS FOR DISPATCH &amp; RESPONSE (Listed Alphabetically)</b>		
WSP Cell Sectors	3/22/2023 To 3/31/2023	<b>Next Delivery 4/5/2023</b>
		Added four (4) sectors per AT&T CRS
		Added twelve (12) sectors per Verizon Wireless CRS
	3/8/2023 To 3/21/2023	<b>Delivered 3/22/2023</b>
		Updated twelve (12) sectors per Verizon Wireless CRS
WSP Cell Towers	3/22/2023 To 3/31/2023	<b>Next Delivery 4/5/2023</b>
		Added one (1) tower per AT&T CRS
		Added one (1) tower per Verizon Wireless CRS
	3/8/2023 To 3/21/2023	<b>Delivered 3/22/2023</b>
		Updated one (1) tower per Verizon Wireless CRS

**NOTE:**

The Parcels layer is provided by Maui County. VSE (formerly Akimeka) performs edits on the spatial information of the layer for 9-1-1 purposes. Changes to the attribute table are made when needed. The Parcels layer uploaded to the PSAP GIS server is intended for 9-1-1 purposes only and should not be disseminated to other county agencies.

# Maui County E9-1-1 Status Report

**March 1, 2023 - March 31, 2023**

## GEOGRAPHIC INFORMATION SYSTEM (GIS) NARRATIVES

### GIS KEY ACTIVITIES/UPDATES

- **GIS Key activities include the events such as GIS deliverables, meetings, agreements, etc.**

Date	Key Activities/Updates
3/30/2023	Delivered 32 requested layers to EagleView for the development of the Pictometry Connect accounts for Public Safety officials.
3/22/2023	Delivered updated data for MapFlex which included Address Points, ESN, Points of Interest, Street Centerlines, WSP Cell Sectors, and WSP Cell Towers.
3/22/2023	Delivered .map, .rte, and .str files for Intergraph CAD 9.4 with updated data which included Address Points, Cell Towers, Common Places Lookup table, Points Of Interest, Street Centerlines, and RMS files.
3/9/2023	Delivered Address Points, Coastal Names, Fire Beats, Fire RA, Medic Beats, Medic RA, Impound Boundaries, Points of Interest, Police Districts, Police RA, Rescue Tubes, Street Centerlines, Subdivisions, and Tow Boundaries for P1 of Motorola CAD implementation.
3/8/2023	Delivered updated data for MapFlex which included Address Points, Lodging, Points of Interest, Street Centerlines, WSP Cell Sectors, and WSP Cell Towers.
3/8/2023	Delivered .map, .rte, and .str files for Intergraph CAD 9.4 with updated data which included Address Points, Cell Towers, Common Places Lookup table, Lodging, Points Of Interest, Street Centerlines, and RMS files.

### GIS FOR 911

As part of ensuring GIS data compatibility with 911 CAD systems, VSE (formerly Akimeka) removed certain spatial characteristics of street centerlines known as “true curves”. True, or geometric, curves are sometimes used in the street centerline layer to depict a road that curves in a circular (or semi-circular) fashion, like a round-about or a cul-de-sac. These features can cause processing issues in CAD and GIS software, and therefore were replaced with a series of points that depict the same geometry without the use of a geometric, or true curve.

March 1, 2023 - March 31, 2023

---

## INTERGRAPH CAD UPGRADE

From April through June 2014, the Maui Police Department worked to upgrade their Intergraph CAD system to the more recent 2014 version. Through this upgrade process, new improvements were identified and the overall functionality of the system from the Map Build process to the Production workstation made significant enhancements in order to streamline the deliverables and continue providing accurate data to the PSAP.

1. March 8<sup>th</sup>, 2023 – VSE (formerly Akimeka) delivered an updated Intergraph CAD map which included:
  - i. .map, .rte, and .str
  - ii. Address Points, Common Name Lookup Table, Lodging, Points Of Interest, Street Centerlines, and WSP Cell Towers.
  - iii. RMS files
  
2. VSE (formerly Akimeka) delivered an updated Intergraph CAD map March 22<sup>nd</sup>, 2023, which included:
  - i. .map, .rte, and .str
  - ii. Address Points, Common Name Lookup Table, Points Of Interest, Street Centerlines, and WSP Cell Towers
  - iii. RMS files

During April 2023, the Intergraph CAD map will continue to be delivered every other week, which has been coordinated with all mapping system updates and synchronizations with other 911 databases.

## MOTOROLA PREMIER ONE PROJECT

On Wednesday, February 15, 2023, and Thursday, February 16<sup>th</sup>, 2023, VSE (formerly Akimeka) participated in the GIS workshop with Motorola GIS staff. VSE will provide the first Motorola CAD GIS deliverable in mid-March, and work with Motorola to make any necessary updates to the schema and data, to ensure a successful implementation.

## MAPFLEX SYSTEM

VSE (formerly Akimeka) delivered GIS data to the MapFlex system on the following dates in March 2023.

**Hawaii County** – March 7, 2023, and March 21, 2023

**Maui County** – March 8, 2023, and March 22, 2023

**Kauai County** – March 9, 2023, and March 23, 2023

**Honolulu** – March 10, 2023, and March 24, 2023

## MAPFLEX ISSUES

The MapFlex issues are archived in the 2021 Monthly Status Report. Should the existing issues be addressed, this report will be reopened and tracked.

March 1, 2023 - March 31, 2023

## 5. E9-1-1 DATABASE SYNCHRONIZATION

**(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)**

The database synchronization process is an essential ongoing and continuous process to ensure the E9-1-1 databases used in the Selective Router (SR), and the MPD 9-1-1 GIS layers used for location determination are exactly matched. This process ensures that the 9-1-1 databases and the GIS data remain current, exactly matched, and are synchronized and useful for 9-1-1. This process also prepares the GIS data for use in Next Generation 9-1-1 (NG911) systems, operations, and applications.

In 9-1-1, Public Safety Agencies (PSAs) are allocated Emergency Service Zones (ESZs) by the Telephone Company for their Selective Router (SR) programming use. The entire County Jurisdiction Zone is referred to as an Administrative ESZ. Each PSA is required by Tariff to assign their Response Areas (RAs) based on their operational requirements and assignments within the ESZ. Smaller and more accurate ESZs are created for the geographic areas that have the same PSAs and assigned an Emergency Service Number (ESNs) which are known as a Routing ESNs, or ESNs.

The street names and associated addresses within the ESNs must be translated into a data format that is useful to the SR, the public safety agencies, and their 9-1-1 systems. Translated addresses for 9-1-1 must include the house numbers, street names, street name suffixes, MSAG Communities and are assigned to each of the PSA response areas. These translated addresses are referred to as “valid MSAG addresses” and are applied to both the MSAG and GIS databases. The data must be formatted to traverse throughout 9-1-1 networks & systems. This must also be done for the Public Safety Agencies to ensure there is no loss of data characters or data truncation for their internal and external 9-1-1 systems.

These MSAG street names and MSAG Communities might not be recognized in the County’s authoritative addressing Agency and are intended for Public Safety Agency use only. Since neither database is static in nature, the synchronization process will never remain at a 100 percent match rate. It can be expected that the match rate percentage will fluctuate by a small degree each month. As such, NENA’s recommended match rate between these critical databases is minimum 98%.

As part of VSE (Formerly Akimeka LLC’s) value added services, VSE conducts four quarterly, in-depth 9-1-1 Database Synchronization audits per year for the Maui Police Department. They are conducted in March, June, September, and December of each Calendar Year while under contract with VSE (Formerly Akimeka LLC).

The results of the **March 31, 2023**, database synchronization audits are presented below.

## TWO-WAY (2-WAY) COMPARISON – MARCH 2023

VSE’s (Formerly Akimeka LLC) two-way database comparison service provides for comparing the Local Exchange Carriers (LECs) MSAG Database to the Maui Police Department’s 9-1-1 GIS Street Centerline layer. This ensures the Telephone or VoIP Telephone Company device information is accurate and correct. This information is utilized to route the 9-1-1 call to the PSAP, and the associated location information delivered ALI Datastream is used to dispatch appropriate emergency responders. This also ensures the necessary data elements for 9-1-1 caller location based on street name, MSAG Community, and Emergency Service Numbers (ESNs) are delivered to the PSAP, in the exact format that matches the MPD 9-1-1 GIS layers.

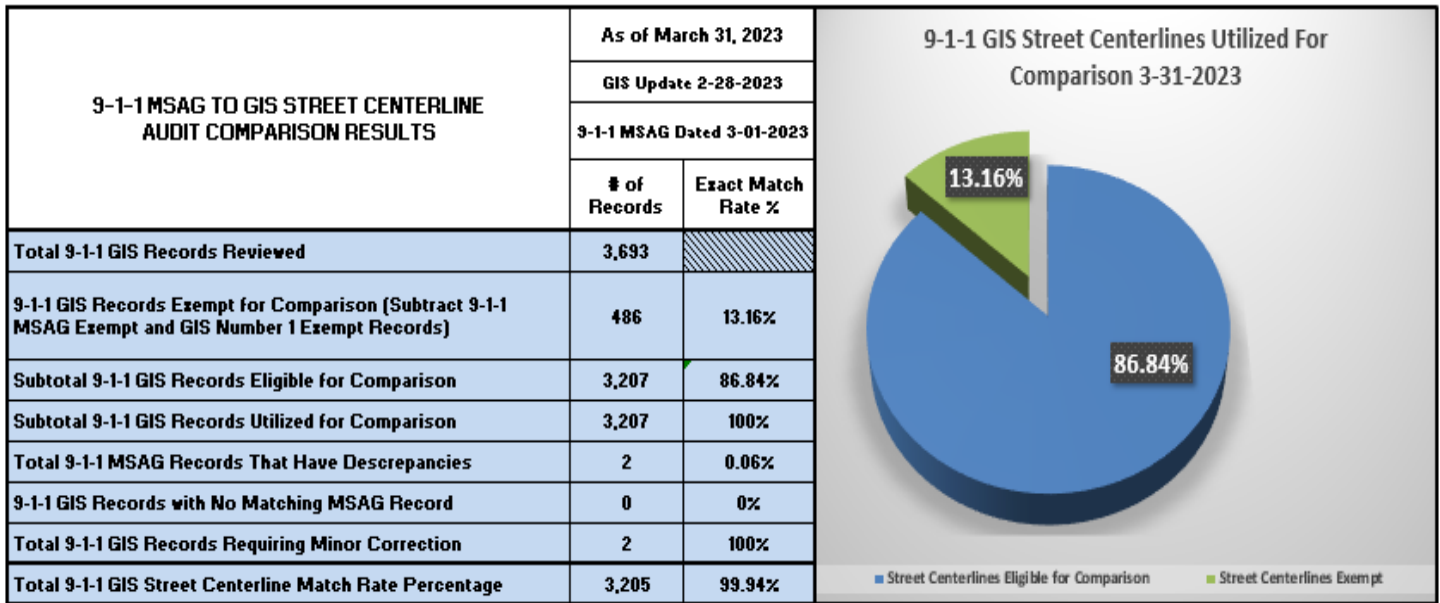

# Maui County E9-1-1 Status Report

**March 1, 2023 - March 31, 2023**

**9-1-1 GIS Street Centerlines Utilized For Comparison**

A total number of **3,693** GIS Street Centerline Records are maintained for the Maui Police Department’s 9-1-1 GIS database by VSE (Formerly Akimeka LLC). For this comparison, **486** GIS street records were excluded as database exemptions. VSE (Formerly Akimeka LLC) excludes GIS Street Centerlines records from the comparison that do not have the possibility of generating a telephone company 9-1-1 wireline call. Those would include roadways that do not have an MSAG address such as, Freeways, Ramps, and alleys. The remaining **3,207** GIS street records called “Valid 9-1-1 GIS Street Centerline records” and are compared against the Valid MSAG Records. The results of the GIS to MSAG Records comparison analysis are provided below:

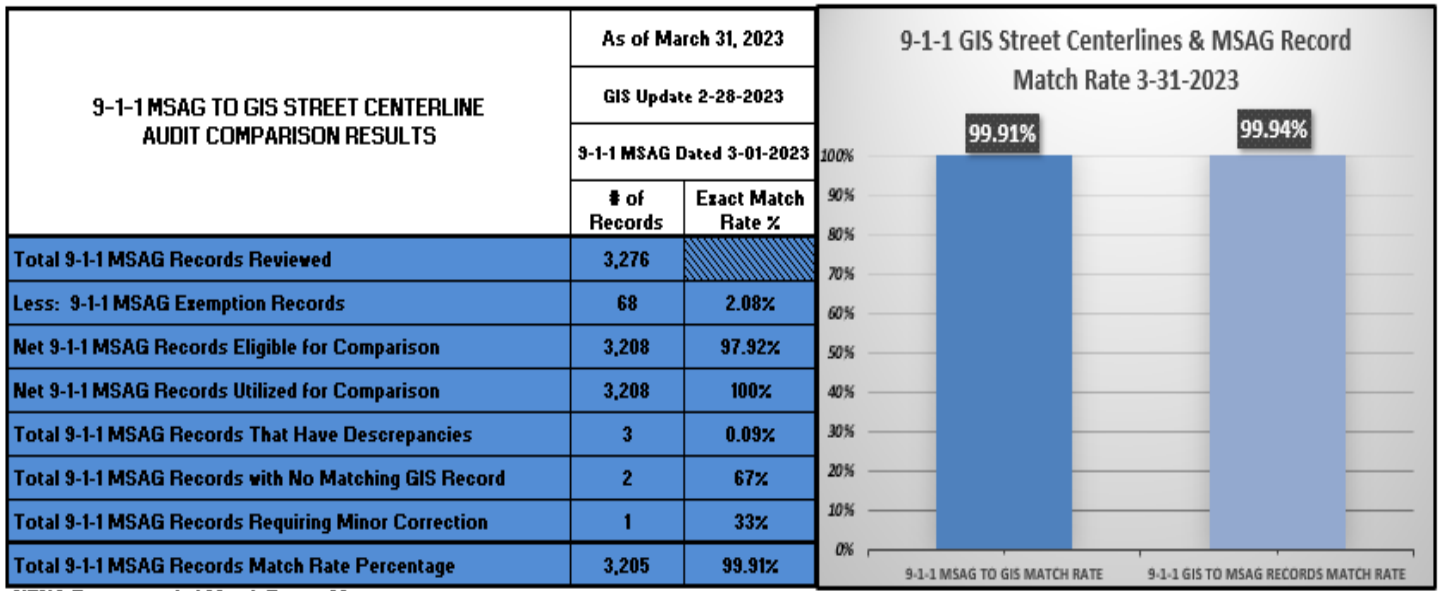

**9-1-1 GIS Street Centerline to MSAG Record Comparison**

A total of **3,276 9-1-1 MSAG Records** are maintained for the Maui Police Department’s 9-1-1 GIS database by VSE (Formerly Akimeka LLC). VSE (Formerly Akimeka LLC) removed **68** MSAG street records from this comparison as exemptions. These exemptions are the MSAG Records utilized for wireless 9-1-1 Call routing, 9-1-1 VoIP Call Routing, and 9-1-1 GIS Street Centerline record that are known and approved exemptions such as Freeways or Roadways with no chance of generating a 9-1-1 call. These MSAG Records are known as “Valid MSAG records”. Valid MSAG Records are Street Names that have undergone a 9-1-1 Street translation process to ensure they can be utilized in the 9-1-1 system. These translated street names, MSAG Communities, and their assigned Emergency Service Numbers (ESNs) are provided to the telephone company and 9-1-1 Service Provider for Public Safety Agencies 9-1-1 use. The total number of MSAG records utilized for this comparison audit was **3,208 MSAG Records**.

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

The street name and MSAG Community translation process ensures that the full data characters within the delivered ALI datastream can transverse between the different systems in the 9-1-1 network without loss of data characters. The results of the MSAG comparison analysis are provided below.

NENA Recommended Match Rate = 98%

## THREE-WAY (3-WAY) COMPARISON – MARCH 2023

**(Reference: NENA 71-501, Version 1.1 – NENA Information Document for Synchronizing Geographic Information System databases with MSAG & ALI)**

The three-way database comparison services compare the Local Exchange Carriers (LECs) Automatic Location Identification (ALI) Database to the MPD’s 9-1-1 GIS Site Structure Points layer and the 9-1-1 Road Network or Street Centerline layers.

This process ensures PSAP’s internal 9-1-1 equipment (i.e... the Computer Aided Dispatch systems (CADs), Records Management Systems (RMS), Automatic Vehicle Location (AVL) systems, and the Voice Recording Systems) will be able to display an accurate location on their GIS enabled systems. The internal PSAP 9-1-1 equipment will also log-in the delivered location data information as either a civic address or in a Geodetic (Lat/Long) format for 9-1-1 Dispatch and Response. It can be expected that the match rate percentage will fluctuate by a small degree. As such, NENA's recommended minimum match rate is 98%.

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

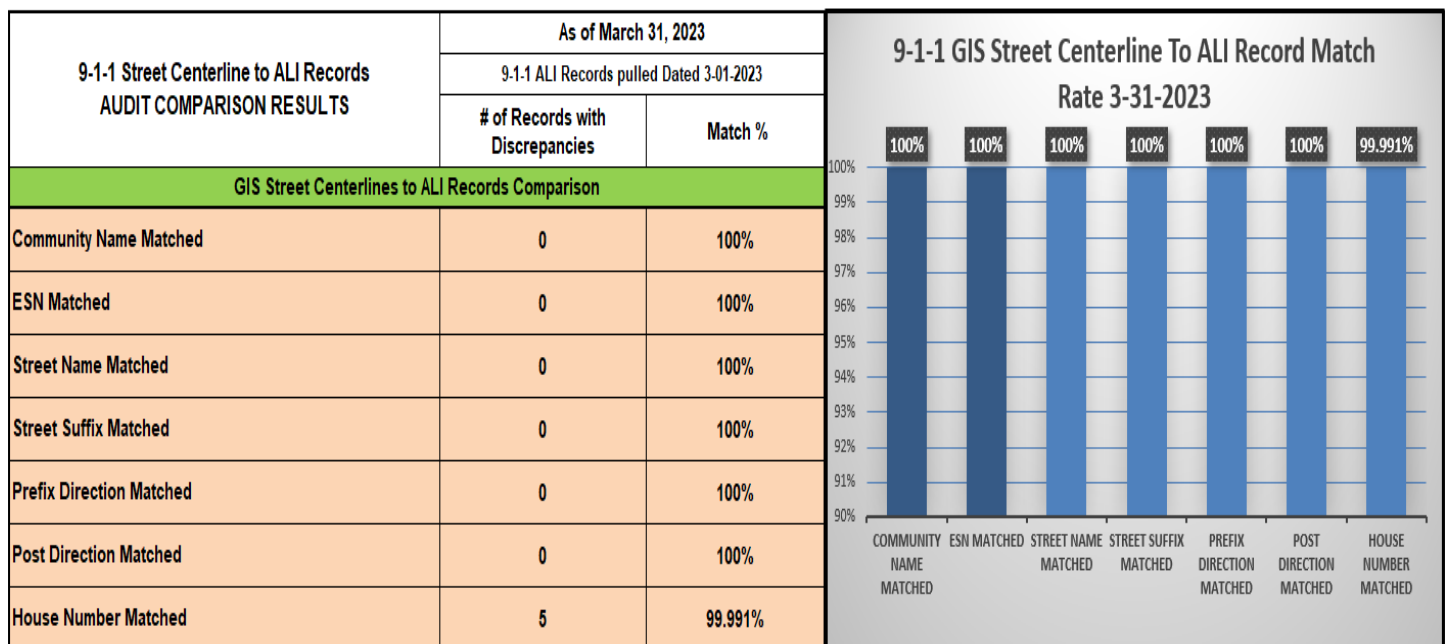

## 9-1-1 GIS Street Centerline To ALI Record Attribute Match Rate

The 9-1-1 GIS Street Centerline to ALI records attribute comparison is used to identify the “course location”, or main MSAG valid address that will geocode to the street centerline data. Geocoding is the process of assigning a geographic coordinate for a location and converting it to a valid address utilizing the tabular address information to geographic reference information. This is a proactive way to identify any inconsistencies and enhance the accuracy of all associated 9-1-1 databases, and to ensure the proper operation of the PSAP 9-1-1 systems such as Automatic Vehicle Location (AVL). There are seven (7) GIS and ALI Record attributes that are compared for an exact match.

Items from the Databases that will be compared and audited will include these attributes:

- MSAG Community Name
- ESNs
- Street Names
- Street Name Suffix
- Prefix Direction
- Post Direction
- House Number

See chart below:

NENA Recommended Match Rate = 98%

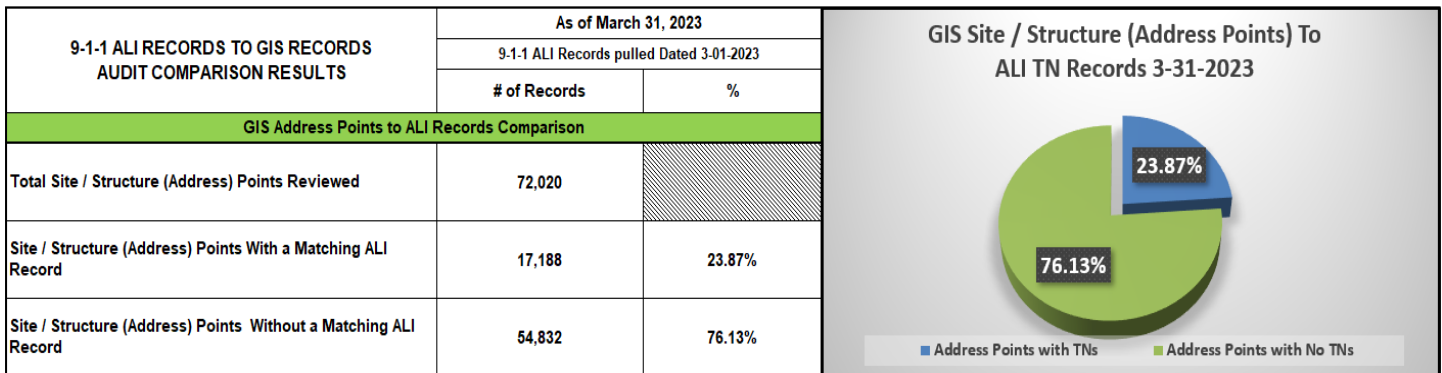

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

## Total GIS Site/Structure (Address) Points and those with Matching ALI Records

The **9-1-1 Site/Structure Points (Address Points) GIS records with Matching ALI Records** comparison identifies the total number of Site/Structure Points (Address Points) that reside within the jurisdiction against how many of those Site/Structure Points (Address Points) have been matched against a matching ALI record. The Maui Jurisdiction has approximately **72,020 total Site Structure Points** with approximately **17,188 Site Structure Points** that have a matching ALI telephone record. These locations with a matching ALI record indicate a potential location from which a wireline 9-1-1 call may originate as provided by the Communication Service Provider (CSP).

See chart below:

## 9-1-1 Site/Structure (Address) Points with Exact Matching ALI Records

The **9-1-1 Site/Structure (Address Points) GIS records with ALI Records** comparison represents the total number of Site/Structure (Address Points) GIS records that have exact matching ALI records at that location. The matching 9-1-1 GIS Site Structure (Address) Points with Exact Matching ALI Database comparison is used to identify the “Dispatchable Location” that can be utilized to send 9-1-1 responders to locate a 9-1-1 caller’s exact location, or at least to the front of the property until a Dispatchable Location can be determined. The objective is to ensure that attributes between the ALI Records and the 9-1-1 Site /Structure Points are exactly matched and accurate.

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

There are **54,821 total Automatic Location Identification (ALI) Records** with the Wireline Provider. There are **54,373 Valid ALI records** that have an exact match with a GIS Site Structure Point. There are a total of **448 Valid ALI Records** that require reviewed and/or correction to achieve an exact match. This does not mean the Valid ALI Records and Site Structure Point do not possess sufficient information that will impact a 9-1-1 call or its location information. It indicates that these records require additional research and update to exactly match the two different database records. There are zero **0 ESN 359 & ESN 399 Invalid ALI Records** remaining that are in the process of determining a verified valid address. ESN 359 & ESN 399 ALI records are records that the 9-1-1 Database Maintenance Service Provider (DBMSP) could not determine an actual address for the Telephone Company.

Attributes from the two Databases that were compared during this audit include:

- House Number
- House Number Suffix
- Prefix Direction
- Street Name
- Street Name Suffix
- Post Direction
- MSAG Community Name
- Postal Community Name
- ESNs
- Zip Codes

See chart below:

NENA Recommended Match Rate = 98%

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

## INVALID MSAG STREETS AND ADDRESS RANGES – ESN 359 & ESN 399 MSAG & ALI RECORDS PROJECT COMPLETED

At the request of the Maui Chief of Police, Hawaiian Telcom, Inc. (HTI) provided Akimeka LLC, with access to the Maui County ESN 359 and ESN 399 MSAG and ALI records. The ESN 359 and ESN 399 MSAG Street Records represented the and identified all the “known” invalid streets in the MSAG Database.

The ESN 359 and ESN 399 ALI Records represented the and identified all the “known” invalid streets telephone device/home or office addresses in the ALI Database that were associated with the known invalid MSAG Street Records. These ALI records were required to be corrected to ensure no 9-1-1 emergencies were dispatched to erroneous address/locations.

Akimeka LLC has completed the necessary investigation and required correction of the **378** MSAG Street Records identified at the start of the project. This service was provided without interruption of 9-1-1 service to the owners of the telephone devices while simultaneously producing temporary locations until the records were investigated and corrected accurately.

### Valid MSAG Records to Invalid ESN 359 & ESN 399 MSAG Records

The ESN 359 and ESN 399 MSAG Street Records represented the number of invalid MSAG Streets Records in Maui County that were on file with Hawaiian Telcom and their Database Maintenance Service Provider. The ESN 359 (on Molokai), and ESN 399 MSAG Records represented invalid MSAG Street Records that still had a valid telephone number that needs to be reassigned to a valid address.

VSE (Formerly Akimeka LLC) conducted the research and corrected the MSAG Street Records to a valid location. This may have included moving any or all associated Automatic Location Identification (ALI) Records to an MSAG valid location. There are 0 ESN 359 and ESN 399 MSAG Street Records that require attention in Maui County. Please see the chart below:

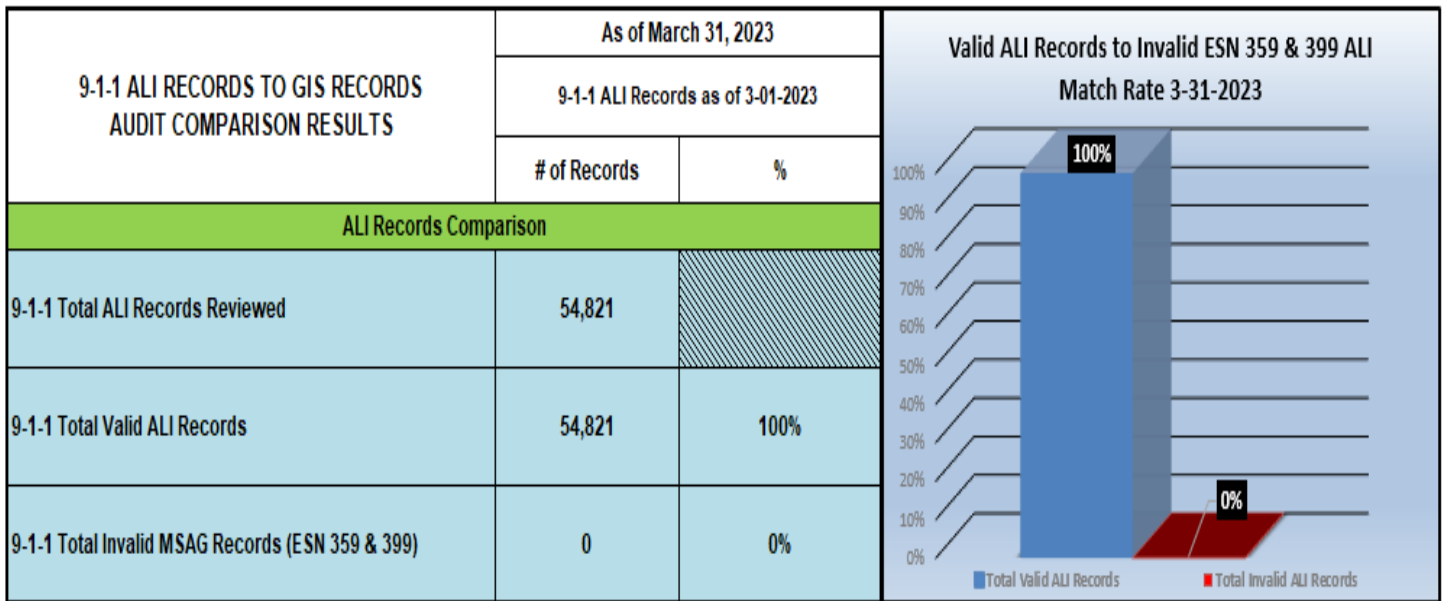

# Maui County E9-1-1 Status Report

March 1, 2023 - March 31, 2023

**Valid ALI Records to Invalid ESN 359 & ESN 399 ALI Records**

The ESN 359 and ESN 399 invalid ALI records have been investigated and corrected. There are 0 ESN 359 and 0 ESN 399 ALI records. VSE (Formerly Akimeka LLC) has completed the research and has corrected all invalid ALI records within Maui County.

NENA Recommended Match Rate = 98%
