

STATE OF HAWAII
DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES
REPORT ON HOUSE CONCURRENT RESOLUTION 59 (2025)

DECEMBER 2025

SUBMITTED TO
THE THIRTY-THIRD STATE LEGISLATURE

INTRODUCTION

The Hawai‘i State Legislature in its 2025 Session requested the Department of Accounting and General Services (DAGS) “study the feasibility of limiting the costs of project and construction management costs in each state construction project to ten percent of the total cost of the project and submit a report of its findings and recommendations, including any proposed legislation, to the Legislature no later than 20 days prior to the convening of the Regular Session 2026.” This request was made of DAGS via House Concurrent Resolution 59 from the 2025 Legislative Session. (Appendix A.) This report responds to that request.

The methodology DAGS employed was to survey 20 State departments and agencies in the Executive Branch. Attached agencies and the Judiciary were not solicited. The request for information was tendered via a memorandum issued under the signature of the Comptroller of DAGS, with an attached spreadsheet and a written questionnaire, both of which were to be filled out by the respondents. (The memo, spreadsheet and questionnaire are in Appendix B.) The recipients were advised that if they did not have any projects of their own to report and/or if DAGS carried out all of their projects on their behalf, to so indicate as their response.

To conduct this study, we requested data and information on the costs that departments or agencies contracted for Project Management (PM) and Construction Management (CM) services within the last five years; i.e., Fiscal Years 2021 – 2025, including completed and ongoing contracts.

As of this writing, 14 of the departments and agencies that were solicited responded. They are:

Department of Accounting and General Services (DAGS),
Department of Agriculture and Biodiversity (DAB),
Department of the Attorney General (AG),
Department of Budget and Finance (B&F),
Department of Corrections and Rehabilitation (OCR),
Department of Defense (DOD),
Department of Education (DOE),
Department of Health (DOH),
Department of Human Resources Development (DHRD),
Department of Labor and Industrial Relations (DLIR),
Department of Land and Natural Resources (DLNR),
Department of Taxation (DoTAX),
Hawai‘i State Public Library System (HSPLS),
and
University of Hawai‘i System (UH).

We remain open to receiving any information the other departments and agencies may provide subsequently, along with soliciting information from germane attached agencies, for a possible future survey effort.

Of the 14 responding entities, six provided substantive data. The others responded that they did not on their own engage in any capital improvement and physical facility projects, or they delegated any such projects to DAGS to carry out on their behalf. We anticipate most, if not all, of those who didn't provide a response as of this writing would say one of these two conditions applies to them.

The six entities that provided substantive information were:

- Department of Accounting and General Services (DAGS),
- Department of Agriculture and Biosecurity (DAB),
- Department of Defense (DOD),
- Department of Education (DOE),
- Department of Land and Natural Resources (DLNR),
- and
- University of Hawai'i System (UH).

These six entities are the ones in the State that regularly carry out projects directly on their own and therefore have relevant data to report. (There is one more entity, Department of Transportation, which we believe could possibly be added to that list, and we have sought information from them.)

The following is a brief, capsule summary of what the six entities provided.

DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES (DAGS)

As the primary organization within State government whose mission is to undertake and carry out capital improvement and other physical facility-related projects statewide, DAGS has a reasonably good sampling of those on which Project Management (PM)/Construction Management (CM) services were contracted. DAGS identified 15 projects/ contracts for this study.

Only one of DAGS' identified projects, the Hawai'i Emergency Management Agency - Disaster Warning & Communication Devices, Statewide project, required PM services to be contracted. The percentage of PM costs relative to the total design cost came in at a very high 84.1%. The unique nature of this project requires an extraordinary amount of coordination involving many disparate parties, including various state, county, and in a number of cases, federal agencies, landowners of the various sites and their tenants, members of the public, and others. This degree to which the extensive coordination tasks and requirements needed to be performed, while also meeting regulatory strictures and

environmental concerns, along with the sheer multiplicity of sites across the State which need to be selected and vetted, made planning and design for various sirens and related notification devices challenging and time-consuming, to say the least.

All of the other of DAGS' listed projects had no PM services, but did have CM services for certain projects. Overall, DAGS does not utilize CM services for most of its CIP projects. In the last decade, only a few large, complex, or remote projects employed CM services due to staff shortages. The percentages of construction cost for the CM services were somewhat varied, but on all except for one, the percentage of CM cost to overall project cost was below 10%, averaging 8.8%.

The one project that exceeded 10% was the Hāna Public School Library Structural Repairs project, at 35.5%. This comparatively high figure can be attributed to the remoteness of the project site in Hāna, Maui; site observation and inspection visits by the contract construction management personnel involved a full day's travel for each site visit. It is also possible that, in certain cases, the work of the site observation and inspection visit required more than just a single day at a time, which would translate to lodging, meal and per diem costs.

It should also be pointed out that our Maui District Office (MDO) was severely short-staffed, including lacking an Engineering Program Manager who oversees all of the projects under construction within Maui County. This key position was filled recently as of November 2025. Out of necessity, an increasingly heavy reliance on contract construction managers developed to fill the void.

For DAGS, these examples underscore the need for PM and/or CM services, as driven by project complexity, geographic location and staff shortages, among other factors.

DAGS' opinion is that capping PM/CM costs at 10% is not feasible and not recommended because of the amount of these types of unique, complex projects which cannot be handled solely by in-house staff, compounded by staff shortages. If such a cap were imposed, making it infeasible to retain PM/CM specialists, DAGS would have to decline projects in which PM/CM contracted firms would be essential and necessary.

While there are no policies at present to specifically limit PM/CM costs, DAGS' policies and procedures governing all consultant agreements are applicable to PM/CM scoping and fee reviews and would apply to the hiring of PM/CM firms just as it does for all other design professional consultant services.

Lastly, on the matter of DAGS' longstanding staff shortages, it has been suggested increases in salaries and benefits would help attract engineers, architects, and inspectors. We hope more in-house resources will offset the need for certain PM/CM contract services and their costs.

DAGS' submittal materials are attached as Appendix C.

DEPARTMENT OF AGRICULTURE AND BIOSECURITY (DAB)

DAB reported that it contracted CM services were contracted for 12 of its projects. The CM expenditures for those projects as percentages of their respective total construction costs varied considerably, from a low of 3% to a high of 19%. While seven of the 12 projects had CM costs in excess of 10%, the overall CM average of all the projects taken together turned out to be 10%. DAB advised that none of its identified projects engaged PM services.

DAB cited project complexity and geographic location as factors that influence the decision to contract PM and/or CM services. DAB added it believes capping PM and CM costs at 10% would not be feasible, which its results bear out. If CM costs were to be capped, DAB would have to reduce the scope of CM services on projects by reducing inspections that the contracted CM entity would provide, in order to stay below the cap. DAB staff members involved with these projects are mindful of keeping CM costs low relative to the overall project costs.

DAB's submittal materials are attached as Appendix D.

DEPARTMENT OF DEFENSE (DOD)

DOD identified only one project deemed germane to this study, which consists of various upgrades and improvements to its Birkhimer Emergency Operations Center facility. The project did not involve any design PM services, but did engage CM services pegged at 16% of the current total construction cost. DOD advises the project is ongoing and design and construction costs may be in flux, so the resulting cost figures when the job is fully completed could be different; the final CM percentage figure could be significantly different from the present 16%.

DOD said the factors that most significantly influence the decision to contract PM / CM services are project complexity and if night / overtime work is necessary, due to operational considerations. In the past, it found CM (and potentially PM) costs for its projects have characteristically been at or above the 10% level. Consequently, it does not believe PM / CM costs should be capped at 10%.

DOD has suggested there should be a list of PM and CM firms that are vetted, and part of the State Procurement Office's Price and Vendor List Contracts system.

DOD's submittal materials are attached as Appendix E.

DEPARTMENT OF EDUCATION (DOE)

The DOE during the study period reported two outsourced Project Management Services Contracts with an average of 6.93% of the total architectural and engineering design costs. One of the projects is completed, while the other is still active.

It also reported a total of 32 outsourced Construction Management Services Contracts with seven of these contracts being a combination of PM and CM Services contracts with an average of 10.1% of the total construction contract costs. Two projects are completed, and 30 projects remain active.

Because there is limited data on contracts completed during the study period of five years, it is not possible to determine the final cost percentage of the PM and CM Services contracts.

However, as of the time the data was reported, nine of the 32 CM Services contracts exceed the 10% of the construction costs. The DOE that factors that may contribute to costs exceeding 10% are:

- Smaller or more complex projects – especially in remote areas or involving extensive coordination – often require proportionally higher oversight to ensure safety, quality, and timely delivery;
- Unforeseen conditions;
- Market constraints or project-specific risks.

DOE's submittal materials are attached as Appendix F.

DEPARTMENT OF LAND AND NATURAL RESOURCES (DLNR)

Like DOD, DLNR identified only one project it believes germane to this study: improvements to the Lahaina Small Boat Harbor Ferry Pier on Maui. There were no PM services involved, and the CM cost was less than 1% of the total construction cost. Despite that, DLNR is not in favor of capping PM and CM costs at 10%, with the explanation that, like DAB, the scope of work for contracted PM / CM firms would necessarily be greatly reduced, which may then be insufficient for the needs of the particular project. DLNR commented further that project complexity and staffing shortages are the factors that most influence the decision to contract PM / CM services.

DLNR's submittal materials are attached as Appendix G.

UNIVERSITY OF HAWAI'I SYSTEM (UH)

The UH system is undoubtedly one of the larger players within the State in the areas of capital improvements and physical facility development and management. This is not surprising, given its volume of ongoing projects and existing facilities across the State.

The numerical data that UH provided identifies a total of 121 applicable projects, with none having required design PM services, but for all of which it contracted services for CM. Of those, only on two projects did CM costs exceed ten percent (10%) of the total construction cost, one at 12.6% and the other at 13.74%. Other than those two, the contracted CM costs for the majority of UH's projects were well under 5% of the total construction cost. The overall average percentage for UH's CM costs as a portion of total construction costs came in at just 2.94%.

UH indicated the single most significant factor that strongly influences the decision to contract for CM services is geographic location; understandable, given the statewide orientation of its wide-ranging capital improvement and physical facility development and management needs. UH's opinion is that capping PM and CM costs at 10% of the total respective total costs would not be feasible, as the cap would not allow the flexibility needed due to reasons of scope, location, complexity, duration and budget for UH's projects across the state. UH said it has existing internal policies to evaluate PM and CM costs.

UH's submittal materials are attached as Appendix H.

SUMMARY CONCLUSIONS AND RECOMMENDATIONS

This conclusions and recommendations summary focuses on the substantive input and data that the foregoing six departments and agencies provided. The major theme is that the vast majority of PM and CM services already constitute less than 10% of the design and construction cost amounts, respectively. In the few cases where they are over 10%, there are unique and unavoidable conditions and aspects of the affected projects that necessitate an inordinately high level of those management services. The responding departments and agencies noted that key factors where PM/CM services would be concerned are project complexity, geographic location and shortages of their own project staff.

All respondents conveyed they are not in favor of the potential cap, as it would unduly constrain them if they ever needed an intensive level of the PM/CM services for certain especially complex projects. Some of the entities have policies and practices that monitor and possibly restrain PM/CM costs that they deem too high. Others do not have such policies and practices but are conscious about the judicious use of PM/CM contract services.

In sum, our recommendation is that the potential 10% cap is largely unnecessary, if the objective is to keep the costs of the specialized management services below that level; as the data has shown that the majority of projects do not rise to that level. For now and the foreseeable future, maintaining the status quo is most appropriate and advised.

APPENDIX A

House Concurrent Resolution No. 59 from the 2025 Legislative Session

HOUSE CONCURRENT RESOLUTION

REQUESTING THE DEPARTMENT OF ACCOUNTING AND GENERAL SERVICES TO
STUDY THE FEASIBILITY OF LIMITING THE COSTS OF PROJECT AND
CONSTRUCTION MANAGEMENT IN EACH STATE CONSTRUCTION PROJECT
TO TEN PERCENT OF THE TOTAL COST OF THE PROJECT.

1 WHEREAS, the State expends more than \$1 billion per year on
2 capital improvement projects, including construction or
3 renovation of roads, buildings, harbors, and airports; and
4

5 WHEREAS, Honolulu has some of the highest construction
6 costs in the world due, in part, to the high cost of
7 transporting goods to Hawaii, the cost of fuel, and high labor
8 costs; and
9

10 WHEREAS, the costs for project and construction management,
11 which traditionally should account for seven to eleven percent
12 of a project, have increased significantly over the last decade,
13 with some contractors charging as much as fifteen percent of a
14 project's cost for management expenses; and
15

16 WHEREAS, being able to control rising construction costs
17 would help to more efficiently use state funds; now, therefore,
18

19 BE IT RESOLVED by the House of Representatives of the
20 Thirty-third Legislature of the State of Hawaii, Regular Session
21 of 2025, the Senate concurring, that the Department of
22 Accounting and General Services is requested to study the
23 feasibility of limiting the costs of project and construction
24 management costs in each state construction project to ten
25 percent of the total cost of the project; and
26

27 BE IT FURTHER RESOLVED that the Department of Accounting
28 and General Services is requested to submit a report of its
29 findings and recommendations, including any proposed

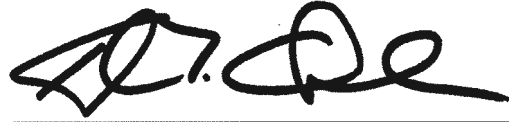

H.C.R. NO. 59

1 legislation, to the Legislature no later than twenty days prior
2 to the convening of the Regular Session of 2026; and

3
4
5
6
7
8

BE IT FURTHER RESOLVED that a certified copy of this
Concurrent Resolution be transmitted to the Comptroller.

OFFERED BY:

A handwritten signature in black ink, appearing to be "R. De" or similar, written over a horizontal line.

MEMORANDUM

TO: Heads of Departments and Agencies (Distribution List Attached)

FROM: Keith A. Regan 
Comptroller

SUBJECT: House Concurrent Resolution No. 59 from 2025 Legislative Session

The Department of Accounting & General Services (DAGS) has been tasked to study the feasibility of limiting the costs of project management (PM) and construction management (CM) in each state construction project to ten (10) percent of the total costs of the project, pursuant to House Concurrent Resolution No. 59 from the 2025 Legislative Session (copy attached for reference).

To conduct this study, we request data and information on the costs your department or agency has contracted for PM and CM services within the last five (5) years; i.e., Fiscal Years 2021-2025, including those that may be currently ongoing. Please complete the attached spreadsheet and questionnaire and return them to the below-named by or before October 10, 2025. Please let us know if there should be any questions as you and your staff prepare your responses and said materials. Additionally, DAGS may conduct interviews with your capital improvement project (CIP) staff person(s) for additional consultation.

For the purposes of this study, we are limiting the scope of "project costs" to just architectural / engineering (A/E) design and construction costs, since they are the common denominator typical to projects that the State undertakes, and on the basis that not all projects require planning, land acquisition, or equipment.

If your department or agency does not do any A/E design and/or construction projects independently, separate and apart from DAGS, please so advise as your response. On the other hand, if your department or agency utilizes DAGS exclusively to carry out your A/E design and/or construction projects, please advise accordingly.

If there are any questions, you or your staff may contact Dennis Chen, Branch Chief of the Staff Services Office in DAGS' Public Works Division, at phone no. (808) 586-0520 or via e-mail at <dennis.yk.chen@hawaii.gov>. Thank you in advance for your cooperation and assistance.

PM/CM Cost Questionnaire for State CIP Projects

GENERAL INFORMATION

Department or Agency Name: _____

Division / Program Handling
Design and/or Construction Projects: _____

Point of Contact (Name, Title, Phone, Email): _____

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:
 - a. Project management (PM): _____%
 - b. Construction management (CM): _____%
 - c. Combined PM/CM: _____%

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?
 - Project complexity
 - Geographic location
 - Department or Agency staffing shortages
 - Other _____

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?
 - Yes
 - No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

15-10-0987	Not Applicable	Maui District Office - Construction Management Services for DAGS Projects, 2021 (Master ID/IQ Contract)												SSFM International, Inc.	\$4,000,000	not applicable							MasterID/IQ Contract - No encumbrances. Work Order Contracts issued from this contract for individual construction projects funded by the User Agency of the project. External CM Services justified due to MDO workload and staffing shortage.
15-14-7509	15-14-7509	Maui Veterans Cemetery - Expansion and Improvements (Work Order Contract)								\$4,697,753	\$1,840,887	\$6,538,640	\$6,538,640	SSFM International, Inc.	\$88,000		1.35%	0.00%	06/09/21		ended		External CM Services justified due to MDO workload and staffing shortage.
15-27-5701		Maui Community Correctional Center - New Medium Security (Work Order Contract)		\$2,167,950						\$9,954,000	\$4,282,974	\$14,236,974	\$5,385,848	SSFM International, Inc.	\$1,140,069	\$914,519	8.01%	6.42%	06/08/21	on-going	03/15/27	External CM Services justified due to MDO workload and staffing shortage. As of 10/19/2025: CM Services: \$879,007 expended Constr. Work completed: 39.82% Full-time or almost full-time CM Services contracted for this project. The 8.01% of construction cost is on the high side because the total construction cost is relatively small for full-time CM Services, but necessary due to the complexity of the project involving detention and security systems. In addition, the project has had delays and it is expected that the CM Services cost will exceed 10% before construction is complete due to the delays due to unforeseen conditions and other changes to the construction contract. Constr. Contract Time Lapsed: 84.60%	
65-36-6591		Hana Public and School Library - Structural Repairs (Work Order Contract)		\$90,221						\$110,000	\$0	\$110,000	\$110,000	SSFM International, Inc.	\$48,000	\$39,090	43.64%	35.51%	06/09/21	04/28/22		Percentage is probably high to lengthy travel time to Hana. Construction contract time was 120 cal. days which amounts to 16 weeks. Say CM went out twice a week, each time taking a full day (8 hours) due to travel time. Therefore 16 hours per week x 16 weeks = 256 hours at \$150/hour = \$38,400.	
25-14-7710		Maui Veterans Cemetery - Additional Columbarium Niches (Work Order Contract)		Fee in C.O. to 15-14-7509						\$787,000	\$9,743	\$796,743		SSFM International, Inc.	\$36,000	\$35,962	4.52%	4.51%	06/09/21	10/10/22		External CM Services justified due to MDO workload and staffing shortage.	
15-27-5738		Maui Community Correctional Center - Dorms 1, 2, & 3 - Reef System Renovation & Other Improvements (Work Order Contract)		\$59,835						\$346,850		\$346,850	Missing Postgres	SSFM International, Inc.	\$40,000	\$12,861	3.71%		10/01/22			Missing Postgres data. It might be due to project not moving forward. External CM Services justified due to MDO workload and staffing shortage.	
15-27-5750		Maui Community Correctional Center - Renov., Security Upgrades & Other Improvements (Work Order Contract)		\$3,257,000 entered into Postgres is incorrect.						\$3,257,000	\$36,295	\$3,293,295	\$2,805,033	SSFM International, Inc.	\$319,800	\$271,559	9.71%	8.25%	11/02/22	on-going		External CM Services justified due to MDO workload and staffing shortage.	
15-21-7725		Hoapili Hale - Parking Structure Phase 1, Fire Sprinkler System Improvements (Work Order Contract)								\$1,498,000	\$0	\$1,498,000	\$120,339	SSFM International, Inc.	\$150,000	\$10,834	10.01%	0.72%	06/30/22			External CM Services justified due to MDO workload and staffing shortage.	

PM/CM Cost Questionnaire for State CIP Projects

GENERAL INFORMATION

Department or Agency Name: Department of Accounting & General Services

Division / Program Handling

Design and/or Construction Projects: Public Works Division

Point of Contact (Name, Title, Phone, Email):

Dennis Chen, Staff Services Office, dennis.yk.chen@hawaii.gov, 808-586-0520

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:

a. Project management (PM): 98.47%

b. Construction management (CM): 8.88 %

c. Combined PM/CM: n.a. %

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?

Project complexity

Geographic location

Department or Agency staffing shortages

Other _____

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?

Yes

No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

A cap would prevent us from doing certain projects, or we may not be able to complete certain projects if there is a cap imposed.

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

There are no policies at present to limit PM/CM costs, although DAGS' policies and procedures governing all consultant agreements are applicable to PM/CM scoping and fee reviews. We do have guidelines in our Budget Table A8a that specify external CM for projects of \$10 million or more at a budget rate of \$100,000 per month for O'ahu projects and \$120,000 per month for neighbor island projects. Depending on the progress of construction on any given project, renegotiations of PM/CM fees may be appropriate.

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

- We need salary increases, and benefit increases to attract engineers, architects, and inspectors from the private sector to come to work in State government.
- We need a lot more staff positions in order to more adequately meet the current needs and demands of the many complex and often large capital improvement-type projects that we undertake. The hope is that if we have more in-house resources available, it may help to at least partially offset the need for certain PM/CM contract services and their attendant costs.

ADDITIONAL COMMENTS OR SUGGESTIONS:

Some background regarding the legislative intent of HCR No. 59 would be helpful.

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:

a. Project management (PM): 0 %

b. Construction management (CM): 10 %

c. Combined PM/CM: 10 %

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?

Project complexity

Geographic location

Department or Agency staffing shortages

Other _____

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?

Yes

No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

The CM may have to reduce inspections throughout the project to meet the cap.

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire. +

No, however Project Managers are mindful to keep CM costs low relative to the +

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

Unknown. Increased CM budgets would enable more thorough review and overs +

ADDITIONAL COMMENTS OR SUGGESTIONS:

Chief Engineering Officer, 808-369-3488, shaoyu.l.lee@hawaii.gov

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:

- a. Project management (PM): N/A %
- b. Construction management (CM): 16 %
- c. Combined PM/CM: 16 %

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?

- Project complexity
- Geographic location
- Department or Agency staffing shortages
- Other If night work or overtime services will be required.

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?

- Yes
- No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

See Attachment 1 - Continuation State PMCM Questionnaire

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

See Attachment 1 - Continuation State PMCM Questionnaire

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

See Attachment 1 - Continuation State PMCM Questionnaire

ADDITIONAL COMMENTS OR SUGGESTIONS:

See Attachment 1 - Continuation State PMCM Questionnaire

ATTACHMENT 1 – CONTINUATION OF PMCM QUESTIONNAIRE

FEASIBILITY AND IMPACT ASSESSMENT

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

We normally provide PM services in-house or use DAGS. For larger projects where we have not used DAGS, we have contracted out CM services. Fees for these are based on complexity and can typically be over 10% of the construction cost of a project. Limiting costs to 10% would make it difficult to contract this work. In the case for the Birkhimer Upgrades and Improvements project shown above, CM services were ~16% of total project costs.

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on a separate attachment to this questionnaire.

For the Birkhimer Upgrades and Improvements project, we went through the RFP solicitation process and evaluated potential CM firms based on Experience and Professional Qualifications, Past Performance, and Capacity to Accomplish Work.

Once we selected a CM firm based on selection criteria, we negotiated a fee that was fair and reasonable based on labor rates and quantity of hours expected to be required to manage the construction of the project.

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency control or reduce PM/CM costs without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

If possible, having a list of PMs/CMs that have been vetted and are on the State Procurement Office's Price & Vendor List Contracts page could be helpful.

ADDITIONAL COMMENTS OR SUGGESTIONS

From 2020 to 2025, we contracted CM Services for the Birkhimer Upgrades and Improvements Project. Total construction costs were awarded at \$6,876,763. Cost for CM Services were awarded at \$1,100,000 for a percentage of 16%. Please note that the cost of construction will increase / decrease due to additions and deletions to the scope of work which will in turn cause the % of the cost of CM Services to Construction to increase / decrease accordingly.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

See attached

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

See attached

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

See attached

ADDITIONAL COMMENTS OR SUGGESTIONS:

Responses to PM/CM Cost questionnaire for State CIP Projects

4. *What challenges would your department or agency face in implementing such a cap? Please describe below, or on a separate attachment to this questionnaire.*

The Department of Education's Facilities Development Branch (FDB) currently maintains project and construction management (PM/CM) average cost below 10% of total project value on average. While we support the intent to control administrative costs, implementing a fixed cap of 10% across all projects presents operational challenges. Smaller or more complex projects—especially those in remote areas or involving extensive coordination—often require proportionally higher oversight to ensure safety, quality, and timely delivery.

A rigid cap could limit our ability to respond to unforeseen conditions, market constraints, or project-specific risks. Instead, FDB is committed to maintaining cost discipline through internal controls, milestone-based consultant payments, and performance tracking. We will continue to keep PM/CM costs as low as practicable, while preserving the flexibility needed to manage diverse capital projects effectively.

5. *Are there existing internal policies or practices to limit or evaluate PM/CM Costs? If yes, please describe below, or on separate attachment to this questionnaire.*

While we do not currently have formal written policies specifically outlining the evaluation or limitation of Project Management (PM) and Construction Management (CM) costs, we do follow established internal practices to ensure these costs are reasonable and aligned with project scope and complexity. Our evaluation process typically includes:

Benchmarking Against Industry Standards: We compare proposed PM/CM costs against historical data from similar projects to ensure competitiveness and fairness.

Scope-Based Assessment: PM/CM costs are reviewed in relation to the overall project scope, duration, and complexity. Larger or more complex projects may justify higher PM/CM percentages due to increased coordination and oversight requirements.

Review of Level of Effort and Staffing Plans: We assess the proposed staffing levels, roles, and responsibilities to ensure they are appropriate and necessary for the successful execution of the project.

Cost Reasonableness Review: Our internal teams conduct a detailed review of the cost breakdowns to validate that the proposed PM/CM costs are proportionate and justifiable.

Negotiation and Adjustments: If proposed PM/CM costs exceed expected thresholds, we engage in discussions with the contractor or consultant to adjust the costs accordingly.

These practices help maintain fiscal responsibility and ensure that PM/CM costs are aligned with project needs and budget constraints.

6. What specific actions or policy changes could help your department or agency control or reduce PM/CM costs without compromising project quality, timeliness, or safety? Please describe below, or on a separate attachment to this questionnaire.

The Department of Education's Facilities Development Branch (FDB) recognizes the importance of controlling project and construction management (PM/CM) costs and is actively exploring strategies to strengthen cost discipline. While we have not yet formalized a comprehensive policy framework, we are evaluating measures such as standardized scopes of work, milestone-based consultant payments, and performance tracking tools to improve oversight and accountability.

Our goal is to identify scalable, resource-conscious practices that align with existing staffing and funding levels, while preserving the flexibility needed to manage diverse and complex capital projects. These efforts will help ensure that PM/CM costs remain as efficient and justifiable as possible, without compromising project quality, safety, or delivery timelines.

PM/CM Cost Questionnaire for State CIP Projects

GENERAL INFORMATION

Department or Agency Name: Land and Natural Resources/Engineering Division

Division / Program Handling

Design and/or Construction Projects: _____

Point of Contact (Name, Title, Phone, Email): Denise Manuel, Engineer

808-587-0246, denise.m.manuel@hawaii.gov

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:

a. Project management (PM): 0 %

b. Construction management (CM): 0 %

c. Combined PM/CM: 0 %

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?

Project complexity

Geographic location

Department or Agency staffing shortages

Other _____

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?

Yes

No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.
with a cap on the amount, the capped amount may not be sufficient to carry out the PM or CM needs of the project

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

No

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.

PM/CM Cost Questionnaire for State CIP Projects

GENERAL INFORMATION

Department or Agency Name: UH - Capital Projects Business Office

Division / Program Handling
Design and/or Construction Projects: Jeffrey Tagami Digitally signed by Jeffrey Tagami
Date: 2025.10.10 15:47:53 -10'00'

Point of Contact (Name, Title, Phone, Email): Jeffrey Tagami

Fiscal Specialist, (808) 956-6803, jstagami@hawaii.edu

PROJECT AND CONSTRUCTION MANAGEMENT COSTS

1. For projects completed or are ongoing between FY21 and FY25, what was the **average percentage** of total cost spent on:

- a. Project management (PM): N/A %
- b. Construction management (CM): 2.94 %
- c. Combined PM/CM: 2.94 %

2. In your experience, what factors most significantly influence your decision to contract PM/CM services?

- Project complexity
- Geographic location
- Department or Agency staffing shortages
- Other _____

FEASIBILITY AND IMPACT ASSESSMENT

3. Would capping PM/CM costs at 10% of total project costs be feasible for your department's or agency's projects?

- Yes
- No

If yes, please provide brief explanation why as an attachment to this questionnaire.

4. What challenges would your department or agency face in implementing such a cap? Please describe below, or on separate attachment to this questionnaire.

It may provide challenges to our department since it provides us the flexibility to ensure we have the appropriate expertise to manage a construction project depending on a number of factors (e.g., scope, location, complexity, duration, budget, etc.).

5. Are there existing internal policies or practices to limit or evaluate PM/CM costs? If yes, please describe below, or on separate attachment to this questionnaire.

Yes, there are existing internal policies to evaluate PM/CM costs. In-house estimates of the project management cost are performed and compared to the proposed cost. A selection process (3-member team) via the professional services method of procurement, is used to select a company for each project unless an already established IDIQ contract is used for construction management services. Finally, a percentage comparison of the proposed management cost versus the total project cost is taken. A range between 5% - 15% is normal.

STRATEGIES TO CONTROL MANAGEMENT COSTS

6. What specific actions or policy changes could help your department or agency **control or reduce PM/CM costs** without compromising project quality, timeliness, or safety? Please describe below, or on separate attachment to this questionnaire.
