

Medical ID Setup for iOS

HOW TO SETUP YOUR MEDICAL ID

Step 1: Open the Health app and tap the Summary tab.

Step 2: Tap your profile picture in the upper corner.

Step 3: Under your profile picture, tap Medical ID.

Step 4: Tap Edit or Add next to the field you want to update. You can add details such as Medications, Allergies, and any Conditions you have.

Step 5: To make your Medical ID available from the Lock screen on your iPhone, turn on Show When Locked. In an emergency, this gives information to people who want to help. To share your Medical ID with emergency responders, turn on Share During Emergency Call. When you make a call or send a text to emergency services on your iPhone or Apple Watch, your Medical ID will automatically be shared with emergency services.

BEST PRACTICES FOR MEDICAL ID

- **Be concise (avoid overly detailed, non essential information).**
- **Check spelling (double check medication names).**
- **Regularly update information (update information after doctor visits or other major life events).**
- **Add multiple emergency contacts.**
- **Inform your friends and family that you have a Medical ID.**
